Wireless CarPlay adapter

User Manual

Device name: smartBox-xxxx

Product Introduction

This product converts original wired CarPlay to wireless CarPlay/Android Auto and supports rear dashcam recording

Important Instructions

Please read the manual carefully before use and we recommend keeping this manual for future reference.

Notice:

1. This product is suitable for iPhone and overseas versions of Android Auto Wireless Carplay Adapter Display Name: smartBox-xxxx.(xxxx represents a separate code for each product.)
2. Before use, ensure your car has wired CarPlay function.
3. Ensure your iPhone is iPhone 8 or later models, operating system is iOS 10 or higher. (Mobile phone with Carplay function).
4. If car has customized features (such as front-facing camera monitoring, car 360 surround monitoring, etc.), After a successful connection, black screen may appear. This is not a product issue.
5. When connecting, make sure your iPhone connects to the Wireless CarPlay Adapter rather than the vehicle's built-in system.

Pay More Attention

- Notice:** iPhone Bluetooth is only used for pairing. All subsequent functions run over iPhone Wi-Fi (auto-configured). Keep Bluetooth enabled for automatic reconnection next time you use it.
1. When using Wireless CarPlay, ensure your iPhone is not connected to other Wi-Fi networks, as this will cause connection conflicts.
 2. The automatic connection function requires iPhone Wi-Fi and Bluetooth on. In addition, please set the Wireless Carplay Adapter's Wi-Fi signal network to "Auto Join".

3. After pairing, the Wireless CarPlay Adapter will disconnect the Bluetooth connection, ensure iPhone's Bluetooth not make any other connections, otherwise it may cause conflicts.

1. Start the car and open iPhone's Bluetooth and Wi-Fi.

Bluetooth

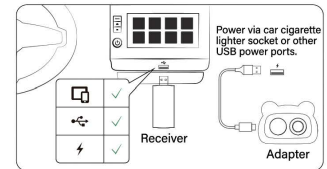

Wi-Fi

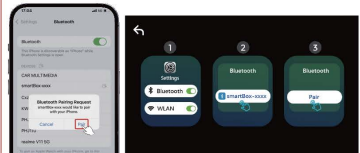

Install equipment

2. Connect the Wireless CarPlay Adapter to your vehicle's USB or USB C port(Information transmission port).

背面

3. On your phone's Bluetooth menu, search for the device name shown on your car's infotainment screen: smartBox-xxxx, then tap "Pair" to complete Bluetooth pairing.

4. Once connected, a CarPlay prompt will appear on your iPhone. Tap "Use CarPlay" to enter the CarPlay interface.

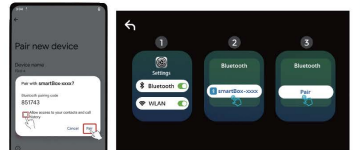

5. After initial pairing, the adapter will auto-reconnect to your iPhone (Wi-Fi and Bluetooth required). On some vehicles, tap the CarPlay icon to start the connection.

Wireless Android Auto connectionsteps

1. Search the Bluetooth name displayed on the car computer on the mobile phone's Bluetooth interface: smartBox-xxxx and click pairing

2. After the connection is successful, you can directly enter the interface for use.

FAQs & Troubleshooting

Can't find the smartBox-xxxxx signal?

- Possible Causes:
1. The WiFi and Bluetooth modules of the mobile phone are defective.
 2. The Wireless CarPlay Adapter has defects.

Solution:

- 1) Test it with another iPhone. If only a specific iPhone cannot find the Bluetooth or Wi-Fi of the Wireless CarPlay Adapter, please try to reset the network and Bluetooth.
- 2) settings of this iPhone and then restart the phone once; if the same problem happens on other iPhones, the unit may be defective. In this case, please seek help from our store customer service

Audio input or output issues: Audio abnormality

Possible Causes: The Bluetooth connection has multiple connections, the audio output selection is wrong.

Solution:

- 1) Check iPhone's Bluetooth' connection, turn it off. A. Settings> Bluetooth> Choose the Bluetooth that comes with the car like "smartBox-xxxx" >Click the exclamation mark: select "Forget This Device";
- 2) Clear the programs running in the background of your phone when using the Wireless CarPlay Adapter.
- 3) When on a call, check that your "Audio" output option is Carplay.

Persistent disconnection?

Possible Causes: The Wi-Fi connection is disrupted

Solution:

- 1) Check if your iPhone's Wi-Fi is connected to other devices.
- 2) Reset your mobile WLAN network. Also, check Wireless Carplay Adapter is ok.
Go to Settings> General >Transfer or Reset iPhone> Reset> Reset Network Settings.

Unable to automatically reconnect?

Possible Causes: Phone Settings conflict

Solution:

- 1) In some cars, you need to select "automatic connection" in the CarPlay settings.
- 2) Check phone settings:
A.Settings> WLAN> Ask to Join Networks: select "Notify";
B.Settings>WLAN>Click the "i" symbol on the far right of "smartBox-xxxx">Turn on "Auto-Join".
- 3) Other cases:
A. Ensure that Bluetooth and WiFi are turned on normally and unoccupied.
B. Clear the pairing history, restart the phone, and pair the phone again.
C. Update the firmware.

What is the Wi-Fi password for the Wireless CarPlay Adapter?

Solution:

we need to connect the Bluetooth,not Wi-Fi. After Bluetooth matching is successful,Wi-Fi will automatically connect.So no need Wi-Fi password . Make sure your Wi-Fi is turned on and unoccupied when pairing

Did it disconnect after using it for a while?

Solution:

The box has a built-in protection mechanism. If the machine is in a silent state due to current load, simply unplug and reconnect it.

FCC ID: 28HJP-55C

FCC Caution

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm between the radiator & your body.
