IMPORTANT SAFETY INSTRUCTIONS 1

ASSEMBLING YOUR AIR CONDITIONER 10

USING YOUR AIR CONDITIONER 19

CLEANING AND MAINTENANCE 24

TROUBLESHOOTING 25

* The design and specifications are subject to change without prior notice for product improvement. Consult with the sales agency or manufacturer for details.
* The shape and position of buttons and indicators may vary according to the model, but their function are the same.

IMPORTANT SAFETY INSTRUCTIONS

Read All Instructions and Cautionary Markings Before Operation and Installation to prevent death or injury to the user or other people and property damage, the following instructions must be followed. Incorrect operation due to ignoring of instructions may cause death, harm or damage.

This symbol indicates the possibility of personnel injury or loss of life.

This symbol indicates the possibility of property damage or serious consequences.

⚠WARNING

1. Installation must be performed according to the installation instructions. Improper installation can cause water leakage, electrical shock, or fire.
2. Use only the included accessories and parts, and specified tools for the installation. Using nonstandard parts can cause water leakage, electrical shock, fire, and injury or property damage.
3. Make sure that the outlet you are using is grounded and has the appropriate voltage. The power cord is equipped with a three-prong grounding plug to protect against shock. Voltage information can be found on the nameplate of the appliance.
4. Your appliance must be used in a properly grounded wall receptacle. If the wall receptacle you intend to use is not adequately grounded or protected by a time delay fuse or circuit breaker (the fuse or circuit breaker needed is determined by the maximum current of the appliance. The maximum current is indicated on the nameplate located on the appliance), have a qualified electrician install the proper receptacle.
4. Install the appliance on a flat, sturdy surface. Failure to do so could result in damage or excessive noise and vibration.
6. The appliance must be kept free from obstruction to ensure proper function and to mitigate safety hazards.
7. Do not modify the length of the power cord or use an extension cord to power the appliance.
8. Do not share a single outlet with other electrical appliances. Improper power supply can cause fire or electrical shock.
9. Do not install your air conditioner in a wet room such as a bathroom or laundry room. Too much exposure to water can cause electrical components to short circuit.
10. Do not install the appliance in a location that may be exposed to combustible gas, as this could cause fire.
11. he appliance has wheels to facilitate moving. Make sure not to use the wheels on thick carpet or to roll over objects, as these could cause tipping.
12. Do not operate the appliance if it has been dropped or damaged.
13. The appliance with electric heater shall have at least 3 feet / 1 meter space away from the combustible materials.
14. Do not touch the appliance with wet or damp hands or when barefoot.
15. If the air conditioner is knocked over during use, turn off the appliance and unplug it from the main power supply immediately. Visually inspect the appliance to ensure there is no damage. If you suspect the appliance has been damaged, contact a technician or customer service for assistance.

IMPORTANT SAFETY INSTRUCTIONS

16. In a thunderstorm, the power must be cut off to avoid damage to the machine due to lightning. Your air conditioner should be used in such a way that it is protected from moisture. e.g. condensation, splashed water, etc. Do not place or store your air conditioner where it can fall or be pulled into water or any other liquid. Unplug immediately if it occurs.
17. All wiring must be performed strictly in accordance with the wiring diagram located inside of the appliance.
18. The appliance's circuit board(PCB) is designed with a fuse to provide overcurrent protection. The specifications of the fuse are printed on the circuit board, such as: T 3.15A / 250V, etc.
19. After proper installation, condensate will not overflow during normal use. If the fan hits the built-up water and the sound annoys you, please remove the cap located at the back of the air conditioner to drain the water away.

⚠CAUTION

1. This appliance can be used by children aged from 8 years and above and person with reduced physical, sensory or mental capabilities or lack of experience and knowledge if they have been given supervision or instruction concerning use of the appliance in a safe way and understand the hazards involved. Children shall not play with the appliance. Cleaning and user maintenance shall not be made by children without supervision. (be applicable for the European Countries)
2. This appliance is not intended for use by persons (including children) with reduced physical, sensory or mental capabilities or lack of experience and knowledge, unless they have been given supervision or instruction concerning use of the appliance by a person responsible for their safety. Children should be supervised to ensure that they do not play with the appliance. Children must be supervised around the appliance at all times. (Be applicable for other countries except the European Countries.)
3. If the supply cord is damaged, it must be replaced by the manufacturer, its service agent or similarly qualified persons in order to avoid a hazard.
4. Prior to cleaning or other maintenance, the appliance must be disconnected from the supply mains.
5. Never use this appliance if it is not working properly, or if it has been dropped or damaged.
6. Do not run cord under carpeting. Do not cover cord with throw rugs, runners, or similar coverings. Do not route cord under furniture or appliances. Arrange cord away from traffic area and where it will not be tripped over.
7. Do not operate with a damaged cord, plug, power fuse or circuit breaker. Discard the appliance or return to an authorized service facility for examination and/or repair.
8. To reduce the risk of fire or electric shock, do not use this fan with any solid-state speed control device.
9. The appliance shall be installed in accordance with national wiring regulations.
10. Contact the authorized service technician for repair or maintenance of this appliance.
11. Contact the authorized installer for installation of this appliance.
12. Do not cover or obstruct the inlet or outlet grilles.

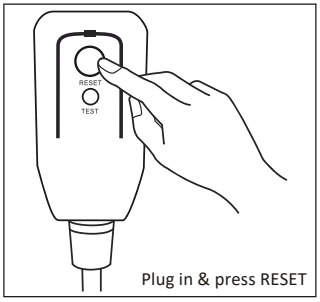

IMPORTANT SAFETY INSTRUCTIONS

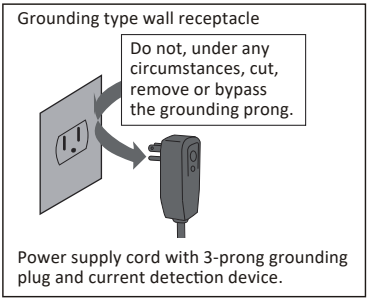

13. Do not use this product for functions other than those described in this instruction manual.
14. Before cleaning, turn off the power and unplug the appliance.
15. Disconnect the power if strange sounds, smell, or smoke comes from it.
16. Do not press the buttons on the control panel with anything other than your fingers.
17. Do not operate or stop the appliance by inserting or pulling out the power cord plug.
18. Do not use hazardous chemicals to clean or come into contact with the appliance.
    Do not use the appliance in the presence of inflammable substances or vapour such as alcohol, insecticides, petrol, etc.
19. Always contact a qualified person to carry out repairs. If the damaged power supply cord must be replaced with a new power supply cord obtained from the product manufacturer and not repaired.
20. Hold the plug by the head of the power plug when taking it out.
21. Turn off the product when not in use.

Operation of Current Device

The power supply cord contains a current measuring device that detects damage to the power cord. Test your power supply cord as follows:

1. Plug in the air conditioner.
2. The power supply cord will have TWO buttons on the plug head. Press the TEST button. You will notice a click as the RESET button pops out.
3. Press the RESET Button. You will notice a click as the button engages.
4. The power supply cord is now supplying electricity to the unit.
   (On some products this is also indicated by a light on the plug head.)

NOTE:

1. The power supply cord with this air conditioner contains a current detection device designed to reduce the risk of fire.
2. In the event that the power supply cord is damaged, it can not be repaired. It must be replaced with a cord from the manufacturer.
3. Do not use this device to turn the unit on or off.
4. Always make sure the RESET button is pushed in for correct operation.
5. The power supply cord must be replaced if it fails to reset when either the TEST button is pushed, or it can not be reset. Please contact Customer Service.

IMPORTANT SAFETY INSTRUCTIONS

WARNING FOR USING R32 REFRIGERANT

For R32 refrigerant models:

1. Appliance shall be installed, operated and stored in a room with a floor area larger than 4 m^2.
2. Appliance shall not be installed in an unvertilated space, if that space is smaller than 4 m^2.
3. Compliance with national gas regulations shall be observed.
4. Keep ventilation openings clear of obstruction.
5. The appliance shall be stored so as to prevent mechanical damage from occurring.
6. A warning that the appliance shall be stored in a well-ventilated area where the room size corresponds to the room area as specified for operation.
7. Any person who is involved with working on or breaking into a refrigerant circuit should hold a current valid certificate from an industry-accredited assessment authority, which authorises their competence to handle refrigerants safely in accordance with an industry recognised assessment specification.
8. Servicing shall only be performed as recommended by the equipment manufacturer. Maintenance and repair requiring the assistance of other skilled personnel shall be carried out under the supervision of the person competent in the use of flammable refrigerants.
9. Please follow the instruction carefully to handle, install, clear, service the air conditioner to avoid any damage or hazard. Flammable Refrigerant R32 is used within air conditioner. When maintaining or disposing the air conditioner, the refrigerant (R32) shall be recovered properly, shall not discharge to air directly.
10. No any open fire or device like switch which may generate spark/arcing shall be around air conditioner to avoid causing ignition of the flammable refrigerant used.
11. Please follow the instruction carefully to store or maintain the air conditioner to prevent mechanical damage from occurring.
12. Flammable refrigerant -R32 is used in air conditioner. Please follow the instruction carefully to avoid any hazard.
13. For specific information on the type of gas and the amount, please to the relevant label on the unit itself.

Caution: Risk of fire/flammable materials
(Required for R32 units only)

Warning: low burning velocity material
(For R32 models apply to IEC60335-2-40:2018)

Note about Fluorinated Gases

1. Fluorinated greenhouse gases are contained in hermetically sealed equipment. For specific information on the type, the amount and the Co2 equivalent in tonnes of the fluorinated greenhouse gas(on some models), please refer to the relevant label on the unit itself.
2. Installation, service, maintenance and repair of this unit must be performed by a certified technician.
3. Product uninstallation and recycling must be performed by a certified technician.

IMPORTANT SAFETY INSTRUCTIONS

Explanation of symbols displayed on the unit:

	WARNING	This symbol shows that this appliance used a flammable refrigerant. If the refrigerant is leaked and exposed to an external ignition source, there is a risk of fire.
	CAUTION	This symbol shows that the operation manual should be read carefully.
	CAUTION	This symbol shows that a service personnel should be handling this equipment with reference to the installation manual.
	CAUTION	This symbol shows that information is available such as the operating manual or installation manual.

FOR HOUSEHOLD USE ONLY READ AND SAVE THESE INSTRUCTIONS

1. Transport of equipment containing flammable refrigerants
See transport regulations.

2. Marking of equipment using signs
See local regulations.

3. Disposal of equipment using flammable refrigerants
See national regulations.

4. Storage of equipment/appliances
The storage of equipment should be in accordance with the manufacturer's instructions.

5. Storage of packed (unsold) equipment
Storage package protection should be constructed such that mechanical damage to the equipment inside the package will not cause a leak of the refrigerant charge. The maximum number of pieces of equipment permitted to be stored together will be determined by local regulations.

6. Information on servicing

1) Checks to the area
Prior to beginning work on systems containing flammable refrigerants, safety checks are necessary to ensure that the risk of ignition is minimised. For repair to the refrigerating system, the following precautions shall be complied with prior to conducting work on the system.

2) Work procedure
Work shall be undertaken under a controlled procedure so as to minimise the risk of a flammable gas or vapour being present while the work is being performed.

3) General work area
All maintenance staff and others working in the local area shall be instructed on the nature of work being carried out. Work in confined spaces shall be avoided. The area around the workspace shall be sectioned off. Ensure that the conditions within the area have been made safe by control of flammable material.

4) Checking for presence of refrigerant
The area shall be checked with an appropriate refrigerant detector prior to and during work, to ensure the technician is aware of potentially flammable atmospheres. Ensure that the leak detection equipment being used is suitable for use with flammable refrigerants, i.e. non-sparking, adequately sealed or intrinsically safe.

5) Presence of fire extinguisher
If any hot work is to be conducted on the refrigeration equipment or any associated parts, appropriate fire extinguishing equipment shall be available to hand. Have a dry powder or CO2 fire extinguisher adjacent to the charging area.

6) No ignition sources
No person carrying out work in relation to a refrigeration system which involves exposing any pipe work that contains or has contained flammable refrigerant shall use any sources of ignition in such a manner that it may lead to the risk of fire or explosion. All possible ignition sources, including cigarette smoking, should be kept sufficiently far away from the site of installation, repairing, removing and disposal, during which flammable refrigerant can possibly be released to the surrounding space. Prior to work taking place, the area around the equipment is to be surveyed to make sure that there are no flammable hazards or ignition risks. No Smoking signs shall be displayed.

7) Ventilated area
Ensure that the area is in the open or that it is adequately ventilated before breaking into the system or conducting any hot work. A degree of ventilation shall continue during the period that the work is carried out. The ventilation should safely disperse any released refrigerant and preferably expel it externally into the atmosphere.

8) Checks to the refrigeration equipment
Where electrical components are being changed, they shall be fit for the purpose and to the correct specification. At all times the manufacturer's maintenance and service guidelines shall be followed. If in doubt consult the manufacturer's technical department for assistance. The following checks shall be applied to installations using flammable refrigerants:

a. The charge size is in accordance with the room size within which the refrigerant containing parts are installed;
b. The ventilation machinery and outlets are operating adequately and are not obstructed;
c. If an indirect refrigerating circuit is being used, the secondary circuit shall be checked for the presence of refrigerant; Marking to the equipment continues to be visible and legible. Markings and signs that are illegible shall be corrected;
d. Refrigeration pipe or components are installed in a position where they are unlikely to be exposed to any substance which may corrode refrigerant containing components, unless the components are constructed of materials which are inherently resistant to being corroded or are suitably protected against being so corroded.

9) Checks to electrical devices
Repair and maintenance to electrical components shall include initial safety checks and component inspection procedures. If a fault exists that could compromise safety, then no electrical supply shall be connected to the circuit until it is satisfactorily dealt with. If the fault cannot be corrected immediately but it is necessary to continue operation, an adequate temporary solution shall be used. This shall be reported to the owner of the equipment so all parties are advised. Initial safety checks shall include:

a. That capacitors are discharged: this shall be done in a safe manner to avoid possibility of sparking;
b. That there no live electrical components and wiring are exposed while charging, recovering or purging the system;
c. That there is continuity of earth bonding.

7. Repair to intrinsically safe components

Do not apply any permanent inductive or capacitance loads to the circuit without ensuring that this will not exceed the permissible voltage and current permitted for the equipment in use. Intrinsically safe components are the only types that can be worked on while live in the presence of a flammable atmosphere. The test apparatus shall be at the correct rating. Replace components only with parts specified by the manufacturer. Other parts may result in the ignition of refrigerant in the atmosphere from a leak.

8. Cabling

Check that cabling will not be subject to wear, corrosion, excessive pressure, vibration, sharp edges or any other adverse environmental effects. The check shall also take into account the effects of aging or continual vibration from sources such as compressors or fans.

9. Detection of flammable refrigerants

Under no circumstances shall potential sources of ignition be used in the searching for or detection of refrigerant leaks. A halide torch (or any other detector using a naked flame) shall not be used.

10. Leak detection methods

The following leak detection methods are deemed acceptable for systems containing flammable refrigerants. Electronic leak detectors shall be used to detect flammable refrigerants, but the sensitivity may not be adequate, or may need re-calibration. (Detection equipment shall be calibrated in a refrigerant-free area.) Ensure that the detector is not a potential source of ignition and is suitable for the refrigerant used. Leak detection equipment shall be set at a percentage of the LFL of the refrigerant and shall be calibrated to the refrigerant employed and the appropriate percentage of gas (25 % maximum) is confirmed. Leak detection fluids are suitable for use with most refrigerants but the use of detergents containing chlorine shall be avoided as the chlorine may react with the refrigerant and corrode the copper pipe-work. If a leak is suspected, all naked flames shall be removed/extinguished. If a leakage of refrigerant is found which requires brazing, all of the refrigerant shall be recovered from the system, or isolated (by means of shut off valves) in a part of the system remote from the leak. Oxygen free nitrogen (OFN) shall then be purged through the system both before and during the brazing process.

11. Removal and evacuation

When breaking into the refrigerant circuit to make repairs or for any other purpose conventional procedures shall be used. However, it is important that best practice is followed since flammability is a consideration. The following procedure shall be adhered to: Remove refrigerant; Purge the circuit with inert gas; Evacuate; Purge again with inert gas; Open the circuit by cutting or brazing. The refrigerant charge shall be recovered into the correct recovery cylinders. The system shall be flushed with OFN to render the unit safe. This process may need to be repeated several times. Compressed air or oxygen shall not be used for this task. Flushing shall be achieved by breaking the vacuum in the system with OFN and continuing to fill until the working pressure is achieved, then venting to atmosphere, and finally pulling down to a vacuum. This process shall be repeated until no refrigerant is within the system. When the final OFN charge is used, the system shall be vented down to atmospheric pressure to enable work to take place. This operation is absolutely vital if brazing operations on the pipe-work are to take place. Ensure that the outlet for the vacuum pump is not close to any ignition sources and there is ventilation available.

IMPORTANT SAFETY INSTRUCTIONS

12.Charging procedures

In addition to conventional charging procedures, the following requirements shall be followed. Ensure that contamination of different refrigerants does not occur when using charging equipment. Hoses or lines shall be as short as possible to minimise the amount of refrigerant contained in them. Cylinders shall be kept upright. Ensure that the refrigeration system is earthed prior to charging the system with refrigerant. Label the system when charging is complete (if not already). Extreme care shall be taken not to overfill the refrigeration system. Prior to recharging the system it shall be pressure tested with OFN. The system shall be leak tested on completion of charging but prior to commissioning. A follow up leak test shall be carried out prior to leaving the site.

13.Decommissioning

Before carrying out this procedure, it is essential that the technician is completely familiar with the equipment and all its detail. It is recommended good practice that all refrigerants are recovered safely. Prior to the task being carried out, an oil and refrigerant sample shall be taken in case analysis is required prior to re-use of reclaimed refrigerant. It is essential that electrical power is available before the task is commenced.

a. Become familiar with the equipment and its operation.

b. Isolate system electrically.

c. Before attempting the procedure ensure that: Mechanical handling equipment is available, if required, for handling refrigerant cylinders; All personal protective equipment is available and being used correctly; The recovery process is supervised at all times by a competent person; Recovery equipment and cylinders conform to the appropriate standards.

d. Pump down refrigerant system, if possible.

e. If a vacuum is not possible, make a manifold so that refrigerant can be removed from various parts of the system.

f. Make sure that cylinder is situated on the scales before recovery takes place.

g. Start the recovery machine and operate in accordance with manufacturer's instructions.

h. Do not overfill cylinders. (No more than 80 % volume liquid charge).

i. Do not exceed the maximum working pressure of the cylinder, even temporarily.

j. When the cylinders have been filled correctly and the process completed, make sure that the cylinders and the equipment are removed from site promptly and all isolation valves on the equipment are closed off.

K. Recovered refrigerant shall not be charged into another refrigeration system unless it has been cleaned and checked.

14.Labelling

Equipment shall be labelled stating that it has been de-commissioned and emptied of refrigerant. The label shall be dated and signed. Ensure that there are labels on the equipment stating the equipment contains flammable refrigerant.

15.Recovery

When removing refrigerant from a system, either for servicing or decommissioning, it is recommended good practice that all refrigerants are removed safely. When transferring refrigerant into cylinders, ensure that only appropriate refrigerant recovery cylinders are employed. Ensure that the correct number of cylinders for holding the total system charge is available. All cylinders to be used are designated for the recovered refrigerant and labelled for that refrigerant (i.e. special cylinders for the recovery of refrigerant).

Cylinders shall be complete with pressure relief valve and associated shut-off valves in good working order. Empty recovery cylinders are evacuated and, if possible, cooled before recovery occurs. The recovery equipment shall be in good working order with a set of instructions concerning the equipment that is at hand and shall be suitable for the recovery of flammable refrigerants. In addition, a set of calibrated weighing scales shall be available and in good working order. Hoses shall be complete with leak-free disconnect couplings and in good condition. Before using the recovery machine, check that it is in satisfactory working order, has been properly maintained and that any associated electrical components are sealed to prevent ignition in the event of a refrigerant release. Consult manufacturer if in doubt. The recovered refrigerant shall be returned to the refrigerant supplier in the correct recovery cylinder, and the relevant Waste Transfer Note arranged. Do not mix refrigerants in recovery units and especially not in cylinders. If compressors or compressor oils are to be removed, ensure that they have been evacuated to an acceptable level to make certain that flammable refrigerant does not remain within the lubricant. The evacuation process shall be carried out prior to returning the compressor to the suppliers. Only electric heating to the compressor body shall be employed to accelerate this process. When oil is drained from a system, it shall be carried out safely.

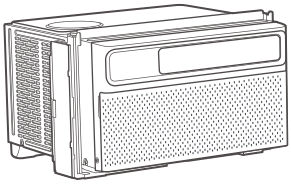

Gentle Reminder

Check the appliance regularly and refer to TROUBLESHOOTING or contact our customer support if it shows any of the following signs:

- Power cord or plug is damaged.
- Loud noise, unusual smell or excessive heat.

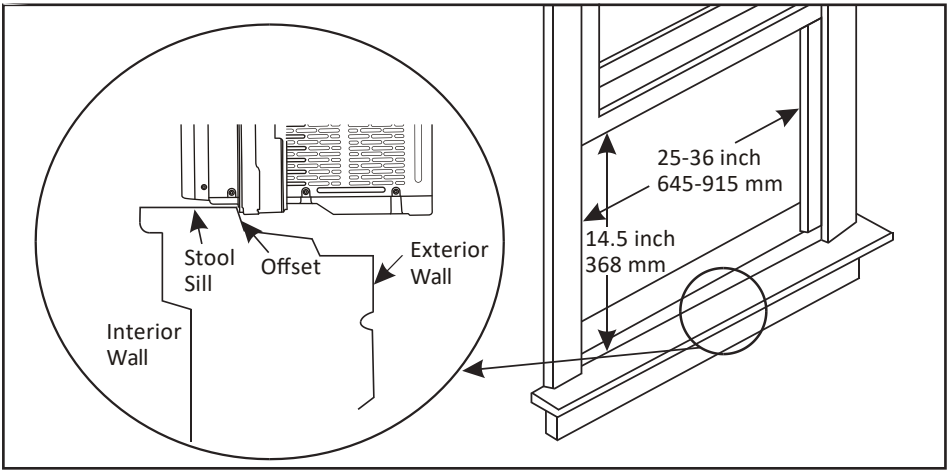

ASSEMBLING YOUR AIR CONDITIONER

Package Contents

	Part Name	Quantity
	Window Air Conditioner	1
	Remote Control	1
	Long Foam Seal (Non-Adhesive)	1
	Long Foam Seal (Adhesive)	1
	Security Bracket	1
	3/4" Screw	4
	1/2" Screw	3
	Remote Control Battery	2
	Plasticene	1
	Short Lock Frame (back-up use)	2
	Long Lock Frame (back-up use)	2

ASSEMBLING YOUR AIR CONDITIONER

Window Requirements

1. This air conditioner is designed to be installed in a standard single-hung or double-hung window with a window width between 25" and 36"(645mm - 915mm).
2. The air conditioner can be installed without the side panels to fit in a narrow window opening. See the window dimensions. If the air conditioner is installed on a window with a width of 645-720mm, the air conditioner must be installed to the right and the right bracket must be abut on the air conditioner, otherwise the air conditioner will not operate normally.
3. The lower sash (the lower part of the window that moves up and down) must allow for 14.5" of vertical clearance when open.
4. All supporting parts must be secured to firm wood, masonry or metal.
5. The electrical outlet must be within reach of the power cord.

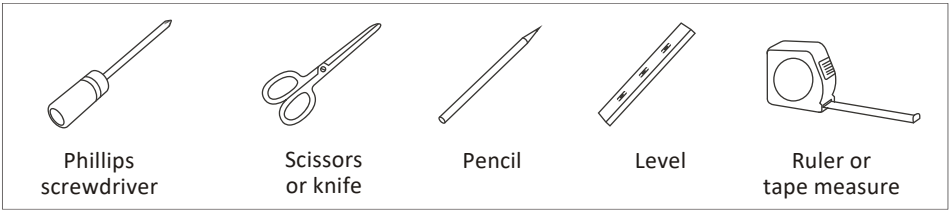

NOTE:

1. Save the product packaging and installation instructions for future reference.
2. Store the air conditioner in the product box during winter or when not in use.

ASSEMBLING YOUR AIR CONDITIONER

Getting Started

SUGGESTED TOOLS FOR INSTALLATION (Not included)

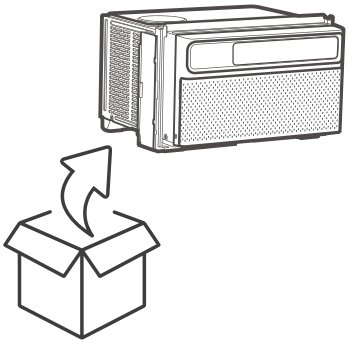

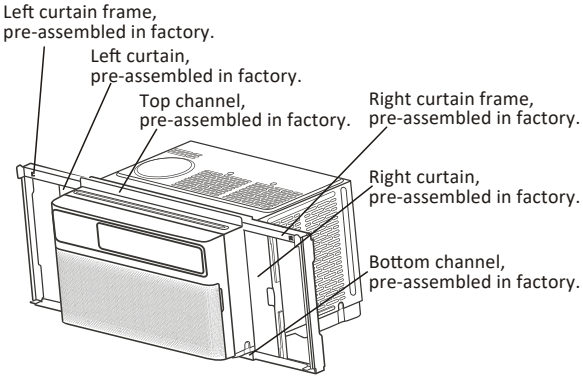

CAUTION:

Heavy object. Team handling is required during the installation process.

1. Removing All the Packaging

Carefully remove all the packaging straps and wraps from the air conditioner and accessories.

CAUTION:

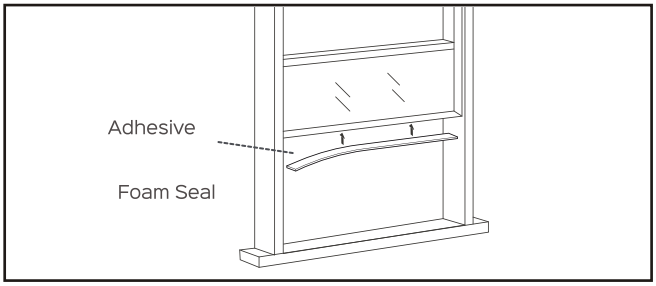

When handling the unit, be careful to avoid cuts from the sharp metal edges and aluminum fins on the front and rear coils.

NOTE:

To be easy installation, both the left and right curtains, curtain frames, top channel, and bottom channel, are pre-assembled in factory.

2.Applying the Adhesive Foam Seal

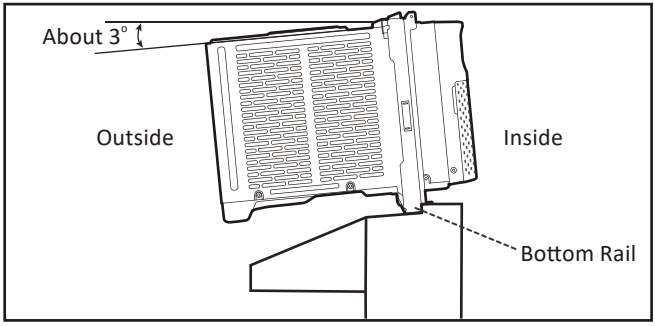

Measure the length of the upper window frame, trim the adhesive foam seal to the appropriate length and apply as shown.

ASSEMBLING YOUR AIR CONDITIONER

3.Placing Inside an Open Window

Carefully lift the air conditioner with a helper to the windowsill and pull down the sash, making sure the air conditioner is centered and its bottom rail is flush against the windowsill.

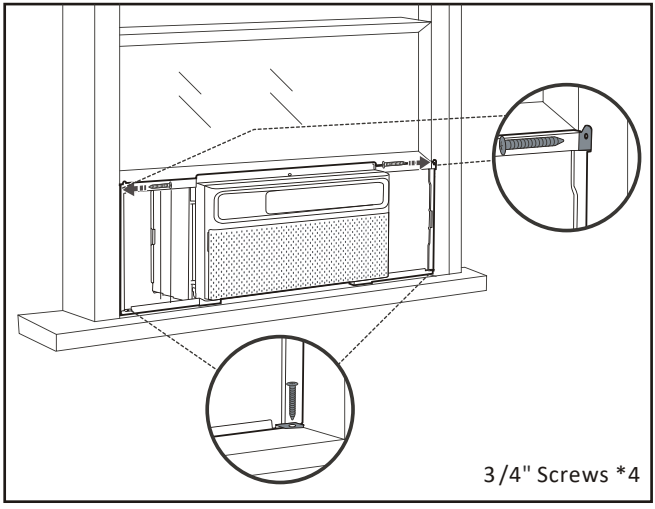

NOTE:

The air conditioner should be tilted about 3° for better drainage of condensate and rainwater. Use a level: about 1/3 bubble willshow correct slant.

4.Securing the Side Brackets

Extend the side brackets from both sides of the air conditioner onto the left and right window frames and secure by installing four 3/4" screws as shown.

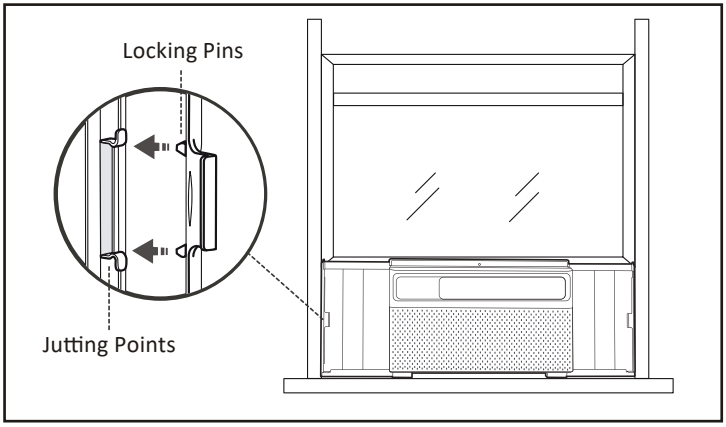

NOTE:

Fix the upper screws first, then the lower screws.

ASSEMBLING YOUR AIR CONDITIONER

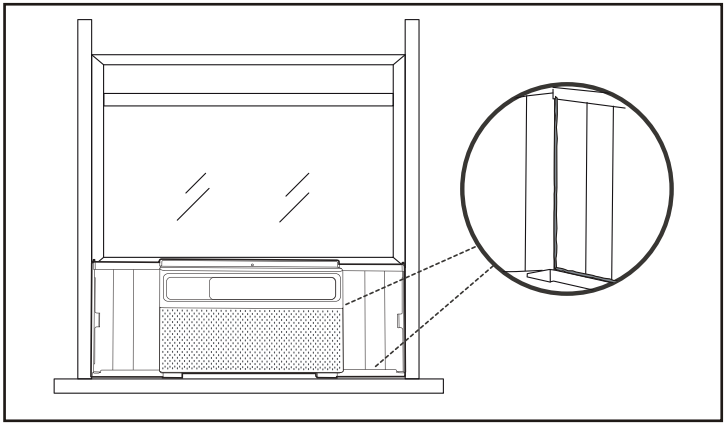

5.Securing the Side Panels

Pull the side panels inwards to align with the brackets, then secure onto the sides by snapping the jutting points onto the locking pins.

6.Sealing the Crevices with Plasticene (Optional)

Fill the crevices between the side brackets and panels with the included plasticene.

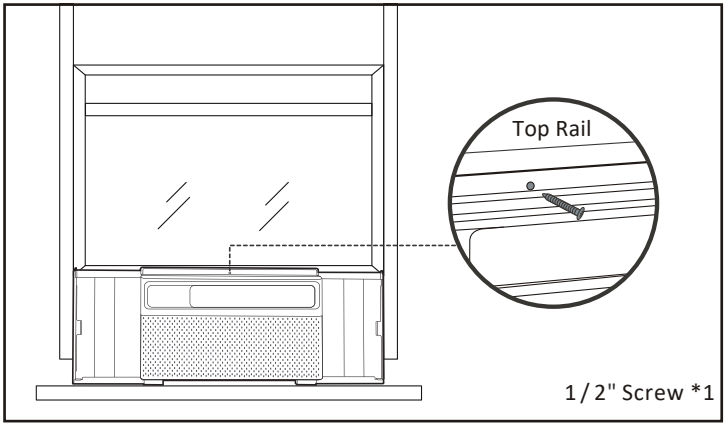

ASSEMBLING YOUR AIR CONDITIONER

7.Installing the Screw Into the Top Rail

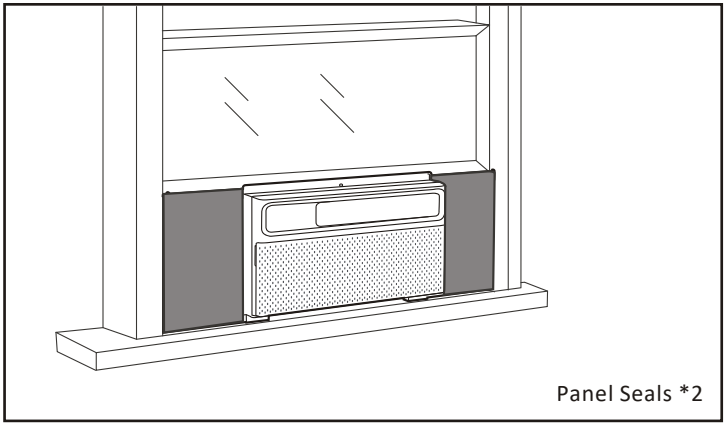

Install the 1/2" screw into the top rail of the air conditioner.

Note: It is recommended to install this screw and remove it only when you need to open the window

8.Applying the Panel Seals(optional)

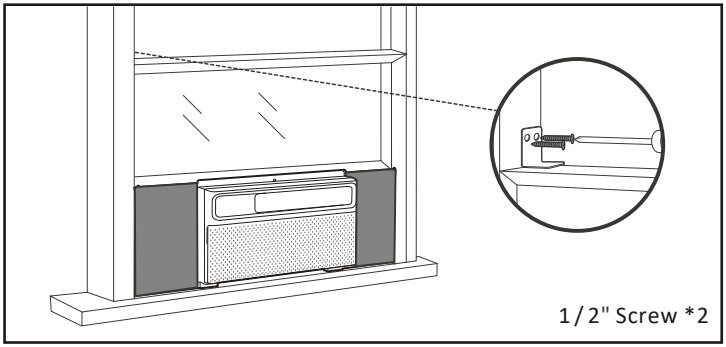

Measure the length extended by the side panels, trim the panel seals to the appropriate length, peel off the backings and apply on the panels on both sides.

ASSEMBLING YOUR AIR CONDITIONER

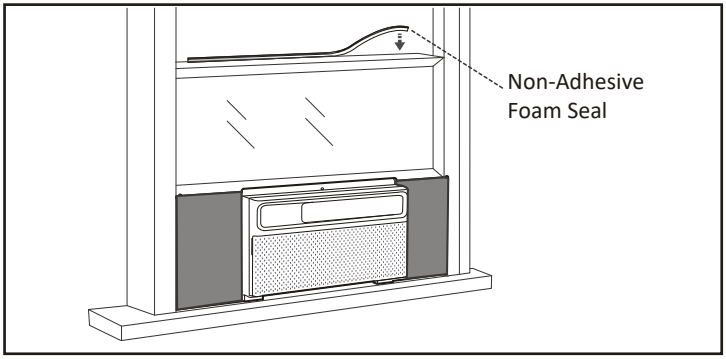

9.Installing the Security Bracket

Attach the security bracket on top of the window sash and secure with two 1/2" screws.

10.Filling the Gap Between Sashes

Trim the non-adhesive foam seal to the appropriate length and insert between the window sashes.

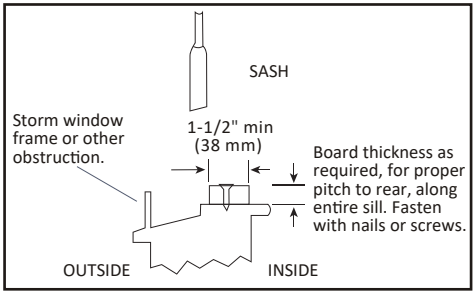

CAUTION:

When open the window, besure that the fixed screws are avaliable from the curtain to the window frame.

If AC Is Blocked By Storm Window

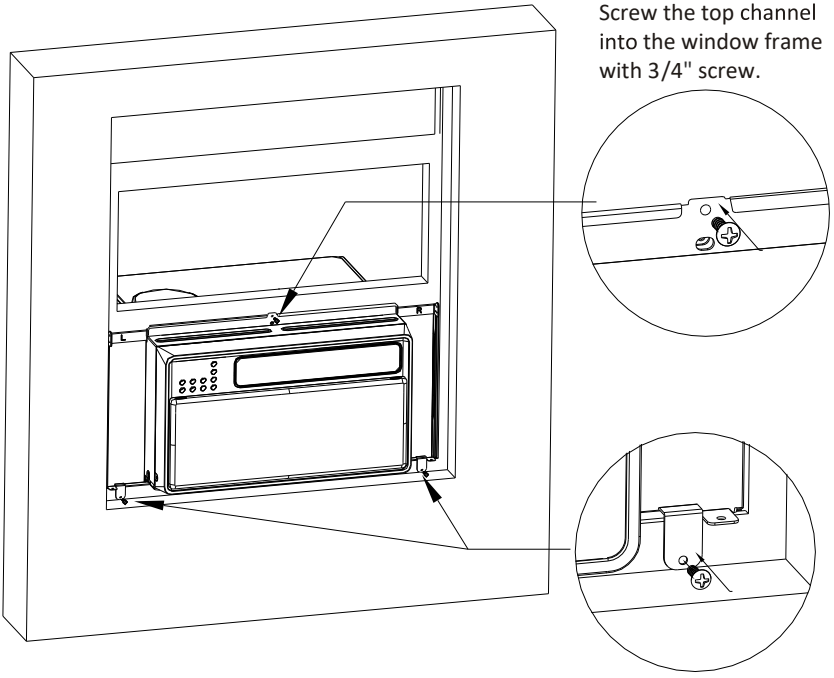

1. Add wood as shown, or remove storm window before air conditioner is installed.
2. If Storm Window Frame must remain, be sure the drain holes or slots are not caulked or painted shut. Accumulated Rain Water or Condensate must be allowed to drain out.

ASSEMBLING YOUR AIR CONDITIONER

For some special window frame, as too thin or too thick, you may need to use the back-up lock frame to do the additional fixed.
If the AC unit can not be screw-fixed well by the steel frame holes, you must use the back-up lock frame to do the additional fixed, as the aluminum alloy window.

1. Install the screw into the top channel of the AC unit, and screw into the window frame.
2. Select two suitable back-up using lock frames, fix them at the bottom of steel frame near the sides with screws.
3. If needed, you can use the other two back-up using lock frames to do the additional fix at the top area.

ASSEMBLING YOUR AIR CONDITIONER

Installation & Assembly Instructions

Important Considerations

1. Before installing the appliance, you must read the manual carefully to get the safety information and notes.
2. Unit refrigerant charge amount: refer to unit name plate marking.
3. A leak test must be done after the installation is completed.
4. It is a must to do the safety inspection before maintaining or repairing an air conditioner using combustible refrigerant in order to ensure that the fire risk is reduced to minimum.
5. It is necessary to operate the machine under a controlled procedure in order to ensure that any risk arising from the combustible gas or vapor during the operation is reduced to minimum.

Introduction to Refrigerants R32

1.Site Safety

Open Flames Prohibited

Ventilation Necessary

2.Operation Safety

Mind Static Electricity

Must Wear Protective Clothing and Anti-Static Gloves

Don't Use Mobile Phone

3.Installation Safety

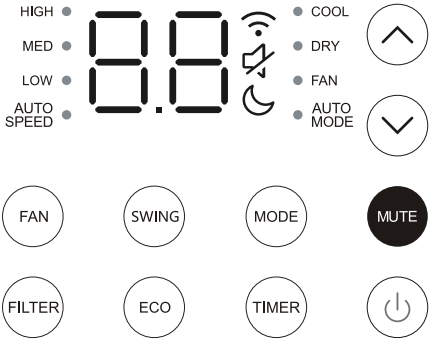

- Refrigerant Leak Detector
- Appropriate Installation Location
- The left picture is the schematic diagram of arefrigerant leak detector.

Please note that:

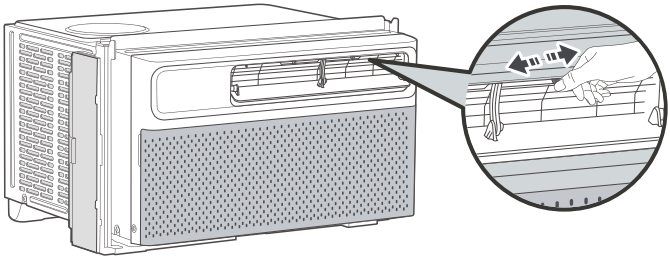

1. The installation site should be in a well-ventilated condition.
2. The sites for installing and maintaining an air conditioner using Refrigerant R32 should be free from open fire or welding, smoking, drying oven or any other heat source higher than 548℃ which easily produces open fire.
3. When installing an air conditioner, it is necessary to take appropriate anti-static measures such as wear anti-static clothing and/or gloves.
4. It is necessary to choose the site convenient for installation or maintenance wherein the air inlets and outlets of the indoor and outdoor units should be not surrounded by obstacles or close to any heat source or combustible and/or explosive environment.
5. If the indoor unit suffers refrigerant leak during the installation, all the personnel should go out till the refrigerant leaks completely for 15 minutes. If the product is damaged, it is a must to carry such damaged product back to the maintenance station and it is prohibited to weld the refrigerant pipe or conduct other operations on the user's site.
6. It is necessary to choose the place where the inlet and outlet air of the indoor unit is even.
7. It is necessary to avoid the places where there are other electrical products, power switch plugs and sockets, kitchen cabinet, bed, sofa and other valuables right under the lines on two sides of the indoor unit, and also prevent mechanical damage from occurring.

USING YOUR AIR CONDITIONER

	Turn on the air conditioner or switch to standby.
FAN	Adjust fan speed (Low, Med, High, Auto) NOTE: Fan speed setting is available in Auto,Cool, and Fan modes only.
SWING	Select to adjust the airflow direction by swinging the louver vertically.
	Decrease the air conditioning temperature.
	Increase the air conditioning temperature.
MODE	Switch between Cool/Dry/Fan/Auto mode.
FILTER	Remind to clean the dust filter.
ECO	Turn on/off the ECO mode, under Cool/Dry mode.
TIMER	Timer on or Timer off the unit.
MUTE	Turn on/off the MUTE mode.
COOL DRY FAN AUTO MODE	Indicates Cool, Dry, Fan, and Auto mode, respectively.
	Indicates the unit is in Sleep mode.
	Indicates the unit is in MUTE mode.
	Indicates that there is a WiFi connection
HIGH MED LOW AUTO SPEED	Indicates Low, Medium, High, and Automatic fan speeds, respectively.

General Operations

Power Button	Press to turn on the air conditioner or switch it to standby mode.
Increase Button	Press to increase the air conditioning temperature by 1°F/°C.
Decrease Button	Press to decrease the air conditioning temperature by 1°F/°C.
Swing/ Oscillation Button	1.Press to make the louver move up and down. 2.Press again to stop the louver at the desired angle. **NOTE:** To adjust the airflow direction horizontally, manually move the levers located on top of the air outlet from side to side. **NOTE:** Do not adjust the big vertial louver by hand, otherwise will cause damage. 
Fan Speed Button	**Adjust Fan Speed** Press repeatedly to adjust fan speed: Low, Med, High, and Auto.
Filter Button	**Reset Filter Reminder** To clean the filter, see page below.

NOTE:

- In Auto speed, fan speed will adapt to the room temperature.
- In Dry Mode, fan speed cannot be adjusted.

USING YOUR AIR CONDITIONER

Mode Button	**Press repeatedly to cycle through Cool, Dry, Fan and Auto modes.** **Cool Mode** - In Cool mode, the air conditioner cools the room to the desired temperature. - Temperature and fan speed are adjustable. **Dry Mode** - In Dry mode, the air conditioner works as a dehumidifier to remove humidity in the room. The fan is constantly running at a low speed. - Temperature and fan speed cannot be adjusted. **Fan Mode** - In Fan mode, the air conditioner circulates air like a normal fan. Remember to open the vent during this function, but keep it closed during cooling for maximum cooling efficiency. - Fan speed can be set to Low, Med, or High. - Temperature cannot be adjusted. **Auto Mode** - In Auto mode, the air conditioner adjusts its working mode (Cool or Fan) automatically based on the room temperature. - Temperature and fan speed cannot be adjusted.
Timer Button	- When the air conditioner is on standby/running, press the Timer button and its icon will flash on the remote display. During the flashing process, press + or - to select a timer from 0.5 to 24 hours, then press the Timer button again to confirm the setting. After the timer ends, the air conditioner will start/stop running automatically. - Turning the air conditioner ON or OFF at any time or adjusting the timer setting to 0.0 hour will cancel the timer program.
Eco Mode Button	In Eco mode, when the desired temperature is reached, the compressor will turn off and the fan will continue to run for 3 minutes. Then the fan cycles on for 1 minutes at 5 minute intervals until the room temperature is above the set temperature, at which time the compressor turns back on and cooling restarts.
Mute Mode Button	Turn on/off Mute mode

Sleep Mode Button (On Remote Control)	In Sleep mode, the air conditioning temperature will adjust gradually every 30 minutes to keep you comfortable while preventing overcooling. After 10 hours, Sleep mode will exit automatically and the temperature will return to the initial temperature. **NOTE:** In Sleep mode, all the button sounds will be muted, and all the indicators on the display will turn off after 15 seconds, except for the Sleep mode indicator.
LED or Display Button (On Remote Control)	Turn on or off the display on the air conditioner.

Other Features

Filter Reminder

When the running time of the fan reaches 500 hours, the filter reminder will light up to remind you to clean the filter. To clean the filter, see page below.

Display Auto Off

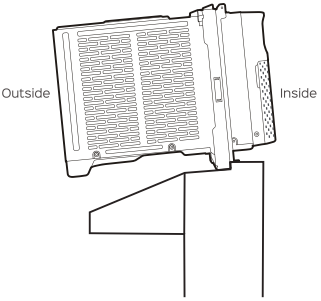

- Display will dim after 30 seconds (off after 15 seconds in sleep mode).
- Wake up the display with any button.

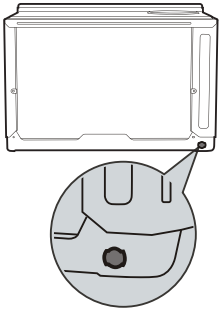

Memory

If the air conditioner is turned OFF and stays connected to the power, it will operate under the previous settings (except the timer setting) when it is turned ON again.

Drain Water

After proper installation, condensate will not overflow during normal use.
If the fan hits the built-up water and the sound annoys you, please remove the cap located at the back of the air conditioner to drain the water away.
NOTE: Removing the cap may affect the heat transfer efficiency.

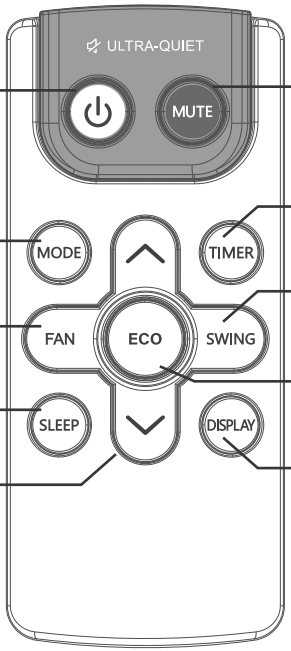

Remove the cap located at the back

How to Control Your AC

Remote Control

POWER
Turn the device on/off

MODE
Cycle through Cool, Dry, Fan, and Auto modes.

FAN SPEED
Adjust the fan speed (Low, Medium, High, Auto) Press and hold f or 5s to switch between°F/°C.

SLEEP MODE
Designed to save energy while your sleep.

UP/DOWN
Increased or decrease the temperature/Timer.

MUTE
Select Mute to lower the operating volume to its quietest setting.

TIMER
Set a Timer to turn the air conditioner on/off.

SWING
Start and pause vent oscillation.

ECO MODE
Designed to save energy while keeping your room at the set temperature.

DISPLAY
Turn on/off the device's display.

For more information on how to use the remote and other functions of your air conditioning unit, or to understand how each mode works, please refer to the next few pages.

Battery Replacement

The air conditioner comes with two batteries for the included remote control. Please be sure to insert them correctly for proper use of the remote.

Note:
- Do not mix old and new batteries, or batteries of different types
- Do not leave batteries in the remote if you do not plan on using the device for more than 2 months
- Follow your local city ordinances for information on proper disposal of old and used batteries. Do not dispose of batteries in unsorted municipal waste.

Tips for Using the Remote

1. The remote must be used within 26ft of the unit
2. The unit will make a sound when it receives the remote's signal
3. Curtains, other materials, and even direct sunlight can interfere with the infrared signal receiver.
4. Press "MODE" and " ^" and hold for 3s to reset the wifi setting.

CLEANING AND MAINTENANCE

Care and Cleaning

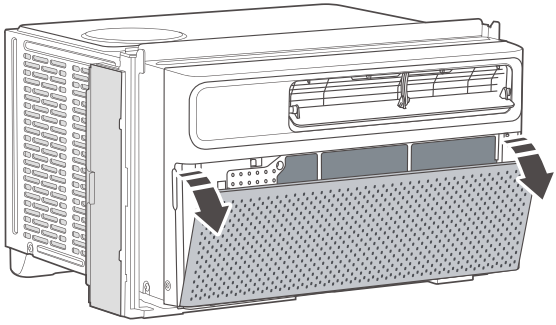

Clean your air conditioner occasionally to keep it looking new. Be sure to unplug the unit before cleaning to prevent shock or fire hazards.

Air Filter Cleaning

The air filter should be checked at least once every month to see if it needs cleaning. Never use hot water over 104°F (40°C) to clean the air filter. Never attempt to operate the unit without the air filter.

Trapped particles and dust can build up in the filter and may decrease airflow as well as cause the cooling coils to accumulate frost. To clean the air filter:

1. Pull the grille out from the indents on both sides at the front and remove the filter inside.
2. Wash the filter using liquid dish soap and warm water. Rinse the filter thoroughly. Gently shake the filter to remove excess water.
3. Let the filter dry completely before placing it into the air conditioner.
4. If you do not wish to wash the filter, you may vacuum the filter to remove the dust and other particles.

Cabinet Cleaning

To clean the air conditioner cabinet:

- Unplug the air conditioner to prevent shock or a fire hazard. The cabinet and front panel of the air conditioner may be dusted with an oil free cloth or washed with a cloth dampened in a solution of warm water and mild liquid soap. Rinse thoroughly with a damp cloth and wipe dry.
- Never use harsh cleaners, wax or polish on the cabinet front.
- Be sure to wring excess water from the cloth before wiping around the controls. Excess water in or around the controls may cause damage to the air conditioner.

Winter Storage

To store the air conditioner when it is not in use for an extended period of time, remove it carefully from the window according to the installation instructions and cover it with plastic or place it in the original box.

TROUBLESHOOTING

Problem	Possible Cause	Solution
The air conditioner will not start	The air conditioner is unplugged	Make sure the air conditioner plug is pushed completely into the outlet.
	The fuse is blown/circuit breaker is tripped	Check the house fuse/circuit breaker box and replace the fuse or reset the breaker.
	Power failure	- The unit will automatically restart when power is restored. - There is a protective time delay (approx. 3 minutes) to prevent tripping of the compressor overload. For this reason, the unit may not start normal cooling for 3 minutes after it is turned back on.
	The current interrupter device is tripped	- Press the RESET button located on the power cord plug. - If the RESET button will not stay engaged, discontinue use of the air conditioner and contact a qualified service technician.
The air conditioner does not cool as it should	Air flow is restricted	Make sure there are no curtains, blinds or furniture blocking the front of the air conditioner.
	The temperature control may not be set correctly.	Lower the set thermostat temperature.
	The air filter is dirty	Clean the filter. Refer to CLEANING & MAINTENANCE.
	The room may be too warm	Please allow time for the room to cool down after turning on the air conditioner.
	Cold air is escaping	Check for open furnace registers and cold air returns.
	The cooling coils are frozen	Switch to high fan speed and set the thermostat to a higher temperature.
	Temperature sensor is not well situated.	Temperature sensor behind the air filter is touching the coil. Try to move it so it does not contact the cold coil.
The air conditioner is freezing up	Ice blocks the air flow and stops the air conditioner from cooling the room	Switch to high fan speed and set the thermostat to a higher temperature.

TROUBLESHOOTING

Problem	Possible Cause	Solution
The remote control is not working	The batteries are inserted incorrectly	Check the position of the batteries.
	The batteries may be dead	Replace the batteries.
Water is dripping outside	Hot and humid weather	This is normal.
Water is dripping OUTSIDE when the unit is cooling	The air conditioner is not correctly tilted outside	Improper installation. Tilt air conditioner slightly to the outside to allow water drainage. Refer to installation instructions.
Water is dripping INSIDE when the unit is cooling	Moisture removed from the air is draining into the base pan	This is normal for a short period in areas with low humidity and normal for a longer period in areas with high humidity.
Noise when the unit starts	A "da-da" sound may occur for 30 seconds when the unit is turned on due to the compressor starting.	This is normal.

ONE-YEAR LIMITED APPLIANCE WARRANTY (US)

Impecca™ warrants this product against defects in material and workmanship to the original purchaser as specified below.

PARTS AND LABOR– if the product is determined to have a manufacturing defect, within a period of one year from the date of the original purchase, Impecca™, at its own discretion, will repair or replace the product parts at no charge to you in the U.S.A.

To obtain warranty service by an authorized Impecca™ service center, please email us at: service@impecca.com to obtain a Repair and Maintenance Authorization (RMA) number and received instructions on how the repair and/or replacement procedure will take place.

Any glass materials included with the appliance will be covered for a period of 60 days from purchase.

Impecca™ specifically excludes from this warranty any non-electric/mechanical attachments, accessories and disposable parts including but not limited to outside case, connecting cables, batteries and AC adapters. Impecca™ reserves the right to repair or replace defective products with the same, equivalent or newer models.

We reserve the right to either repair or replace product at our discretion. Replacement may be either new or refurbished and while every endeavor will be made to ensure it is the same model, if not possible it will be equal or higher specification.

Normal "Wear and Tear" is not covered by this warranty. Further, Impecca™ hereby reserves the right to determine "Wear and Tear" on any and all products. Tampering or opening the product casting or shell will void this warranty in its entirety.

Exclusions: This warranty does not cover the following:

1. Any product that has a defaced or covered serial number.
2. Products that have been transferred to a second owner.
3. Rust on the interior or exterior of the unit.
4. Products listed as "As-Is" or "Refurbished."
5. Food loss due to any product failure.
6. Window air conditioners installed in a wall.
7. The product if used in a commercial setting.
8. Service calls that do not involve product malfunction.
9. Service calls for a product ruined by not following the provided instructions.
10. Service calls to correct improper installation.
11. Costs associated with making the product accessible for servicing (including but not limited to removal of trim/molding/cabinetry, etc.)
12. Service calls to replace any consumables such as light bulbs, filters, etc.
13. Surcharges that may apply to service calls on weekends, nights, holidays. Damages to the finish of appliance or household furnishings due to installation of appliance.
14. Damages caused by any of the following: Acts of God; fires; misuse; accidents; incorrect power supply; service performed by unauthorized persons; use of non-genuine Impecca parts, etc.

ALL IMPLIED WARRANTIES, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE ARE LIMITED IN DURATION TO 1 YEAR FROM THE DATE OF THE ORIGINAL RETAIL PURCHASE OF THIS PRODUCT.

THESE WARRANTIES AND REMEDIES ARE THE SOLE AND EXCLUSIVE WARRANTIES AND REMEDIES IN CONNECTION WITH THE SALE AND USE OF THE PRODUCT. NO OTHER WARRANTIES, ORAL OR WRITTEN, EXPRESSED OR IMPLIED, ARE GIVEN.

IMPECCA™ IS NOT RESPONSIBLE OR LIABLE FOR ANY DAMAGE, WHETHER SPECIAL, INCIDENTAL, CONSEQUENTIAL, DIRECT OR OTHERWISE, OR WHETHER KNOWN OR SHOULD HAVE BEEN KNOWN TO IMPECCA™, INCLUDING LOST PROFITS, GOODWILL, AND PROPERTY AND PERSONAL INJURY RESULTING FROM ANY BREACH OF WARRANTY, THE INABILITY TO USE THE PRODUCT OR UNDER ANY LEGAL THEORY IN CONTRACT OR TORT. IMPECCA LIABILITY IS LIMITED TO THE ACTUAL PURCHASE PRICE PAID TO THE RETAIL SELLER OF THE DEFECTIVE PRODUCT.

No Impecca™ dealer, agent or employee is authorized to make any modification, extension, change or amendment to this warranty without the written consent and authorization from Impecca™.

Some states do not allow the exclusion or limitation of implied warranties or liability for incidental or consequential damages, or do not allow a limitation on how long an implied warranty lasts, so the above limitations or exclusions may not apply to you. This warranty gives you specific legal rights, and you have other rights, which vary from state to state.

Note: Our Warranty center services only to Continental U.S.A.

v. 0.7

Let's get start!

Operation guideline. Please take below simple guideline instruction as reference.

Operation Steps	Operation Items	New Account	Re-install APP (registered before)
Step 1	Download and Install APP	YES	YES
Step 2	Activate APP	YES	YES
Step 3	Registration Account	YES	NO
Step 4	Login	YES	YES
Step 5	Add Device to control	YES	Registered Device will remain.

Note：*If you registered the account and added device before, when you re-install the APP again and login, the added device will remain .*

FCC Caution (FCC ID: 2AJCLTWAC-TYWFS/2ANDL-WBR3)

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-Reorient or relocate the receiving antenna.
-Increase the separation between the equipment and receiver.
-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-Consult the dealer or an experienced radio/TV technician for help.
The distance between user and device should be no less than 20cm.

Wi-Fi Module specification and basic information

1. Minimum specifications on a Smart phone:

Android 5.0 version or higher
IOS 9.0 version or higher

2. Basic parameters for Wi-Fi module

Parameters	Details
Network frequency	2.400 - 2.500GHz
Standards of WLAN	IEEE 802.11 b/g/n(channels 1-14)
Protocol stack support	IPv4/IPv6/TCP/UDP/HTTPS/TLS/MulticastDNS
Security support	WEP/WPA/WPA2/AES128
Network type support	STA/AP/STA+AP

Download and Install the App

SmartLife-SmartHome

For Android smart phone

Method1: Please scan the QR code with a browser scanner, download and install the APP.

Method2: Open the Google "Play Store" on your smart phone and search "SmartLife-SmartHome" , download and install the APP.

For IOS smart phone

Method1: Please scan the QR code and follow the tips to get into "AppStore", download and install the APP.

Method2: Open the Apple "AppStore" on your smart phone and search "SmartLife-SmartHome" , download and install the APP.

⚠ ***Note:***

Please enable the permissions of Storage/Location/Camera for this APP when installing. Otherwise it will have some problems when operating.

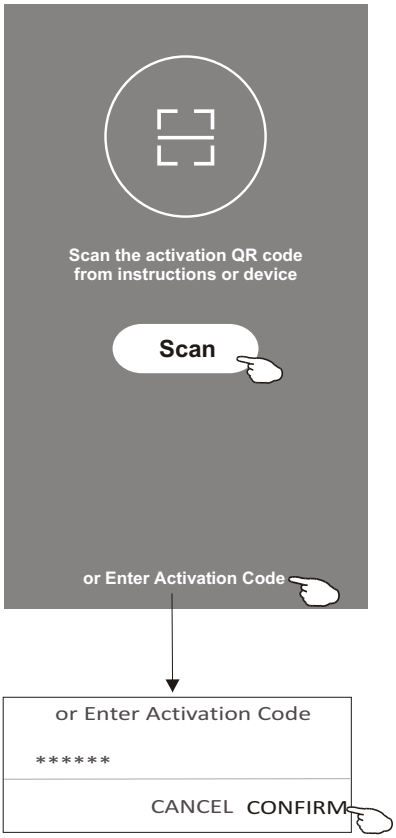

Activate APP

The first time the app is used, it will need activating.

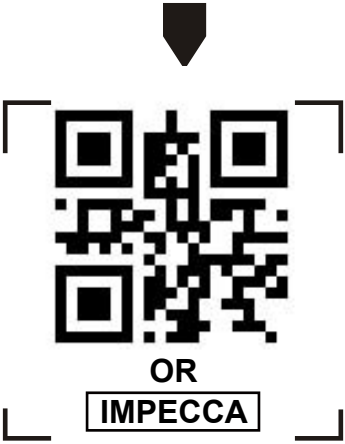

1. Launch the APP "SmartLife-SmartHome" on your smart phone.

SmartLife-SmartHome

2. Method1:Tap button "Scan" and scan the right Activate QR code
   Method2: Tap "or Enter Activation Code" in bottom of the screen,
   then enter the activate code 'IMPECCA' and tap "CONFIRM".

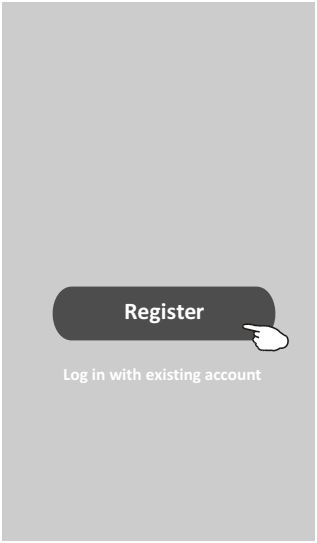

Activate QR code and activation code

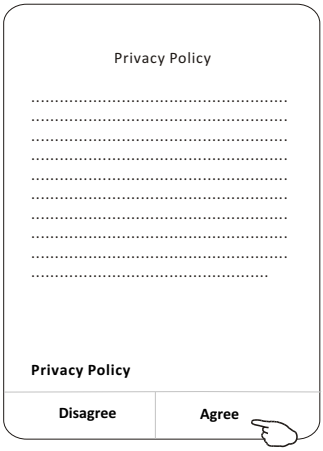

Note: Without the QR code or activation code, you can't active the APP and using it, please keep them safe.

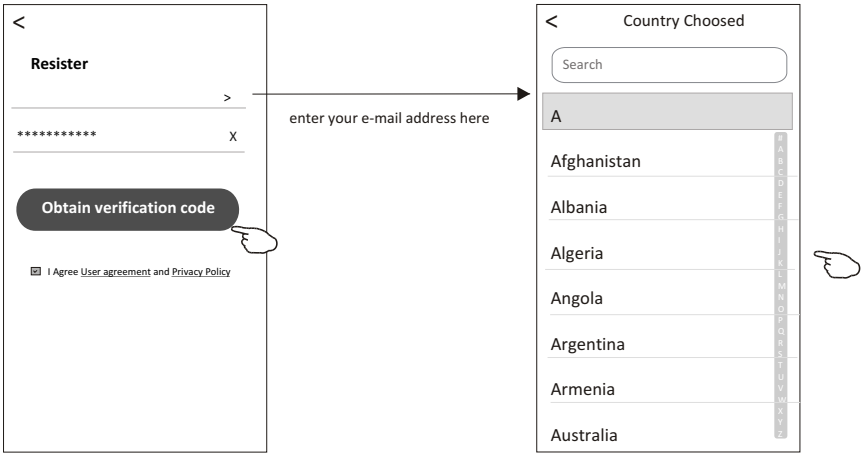

Registration

1.If you don't have any account please tap button "Register".
2.Read the Privacy Policy and tap "Agree".

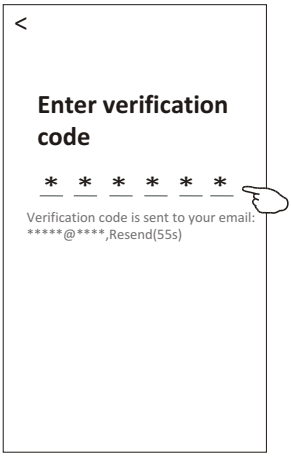

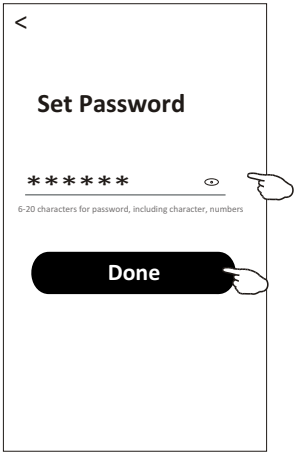

3.Tap">" and choose the country.
4.Enter your e-mail address.
5.Tap the button "Obtain verification code".

Registration

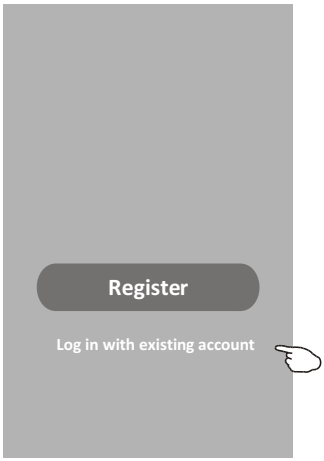

6.Enter the verification code you received from e-mail.
7.Set the Password with 6-20 characters including characters and numbers.
8.Tap "Done".

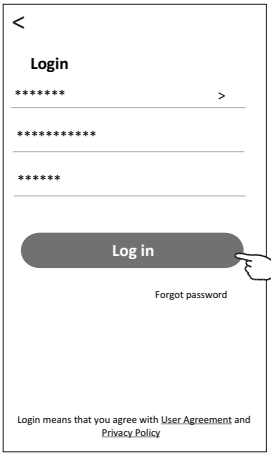

Login

1.Tap "Log in with existing account".
2.Enter your registered account and password.
3.Tap "Log in" button.

enter your account(e-mail) here

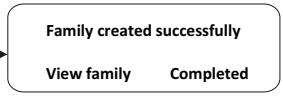

enter the password

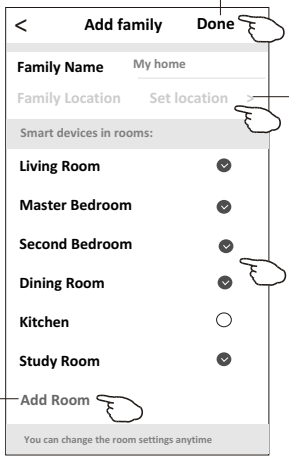

Login

The first time the APP is used, Create family is needed:

4.Tap "Create family".
5.Make name for the family.
6.Set the location.
7.Choose default rooms or add new rooms.
8.Tap "Done" and "Completed".

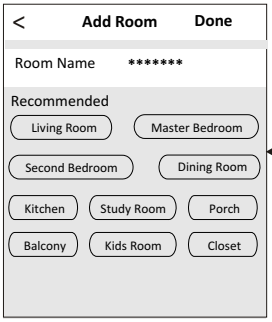

choose the recommended room or make a new room, then tap Done.

Note:
The app can open the map on your phone and you can set the location where you are.

Login

Forgot the password

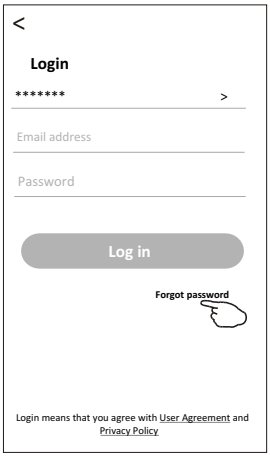

If you forgot the password or you want to reset the password, operate as below:

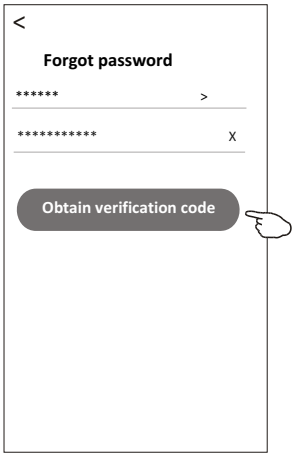

1.Tap "Forgot password".

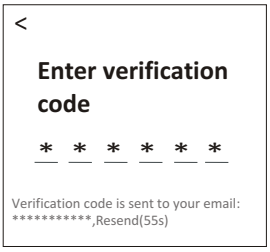

2.Enter your account(e-mail address) and tap button "Obtain verification code".

3.Enter the verification code received by your e-mail.

4.Set the new password and tap button "Done".

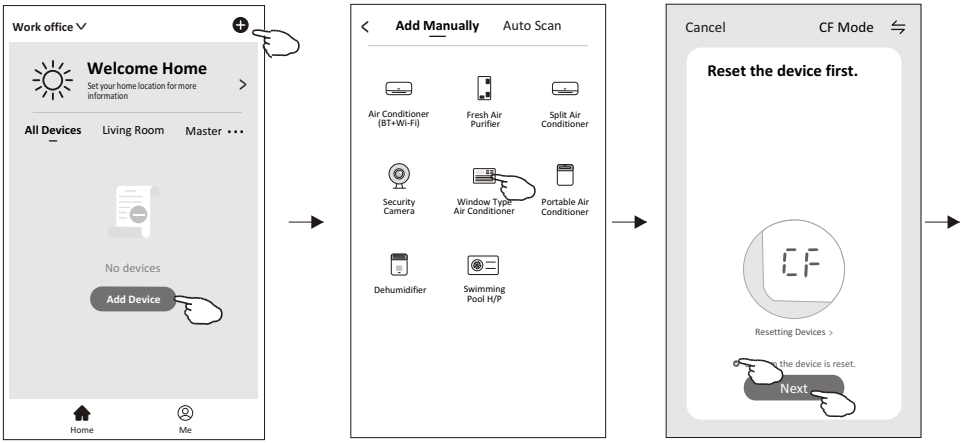

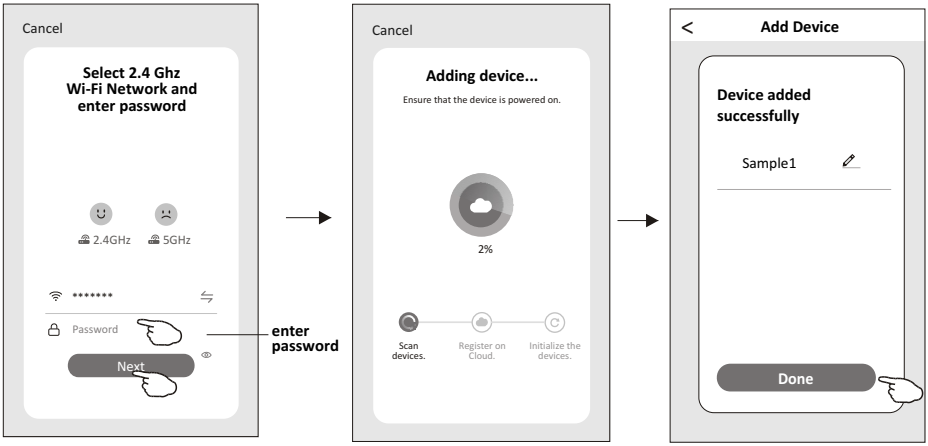

Add device

There are 2 modes CF(Quick connection) and AP(Access Point) for adding device.

CF mode

1.Power on the indoor unit, no need to launch the air conditioner.
2.Click "+" in the upper right corner of the "Home" screen or tap "Add device" on the room which has no device.
3.Tap the "Window Type Air conditioner" logo.
4.Input the password of the Wi-Fi which the same as your smart phone connected, then tap "Next".
5.Choose "CF Mode" on the right corner, then follow the instruction on page before or screen to reset the Wi-Fi module, then tap "Next".
6.You can see the percent rate of connecting process, at the same time
PP","SA","AP" shining in turn on the indoor display.
"PP" means "Searching the router"
"SA" means "connected to the router"
"AP" means "connected to the server"

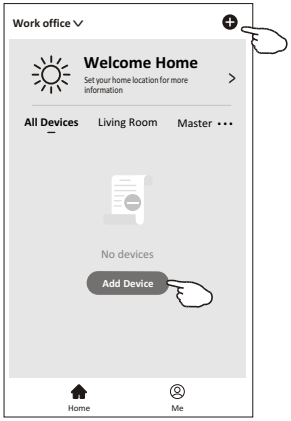

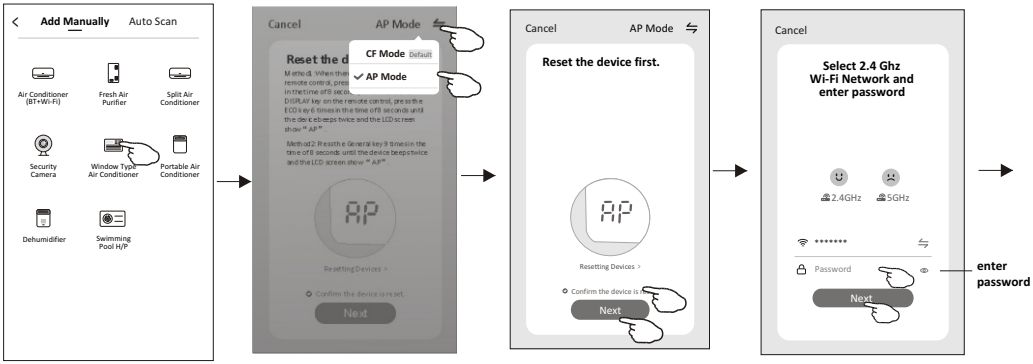

Add device

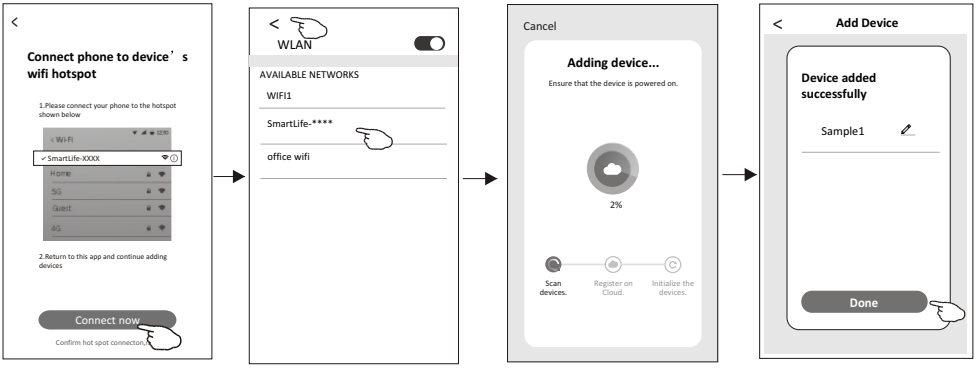

There are 2 methods to add the device.

2-AP mode

1.Power on the indoor unit, no need to launch the air conditioner.
2.Click "+" in the upper right corner of the "Home" screen
or tap "Add device" on the room which has no device.
3.Tap the "Window Type Air Conditioner" logo.
4.Input the password of the Wi-Fi which the same as your smart phone connected, then tap "Next".
5.Choose "AP Mode" on the right corner, then follow the instruction on page before or screen to reset the Wi-Fi module, then tap "Next".
6.Read the instruction carefully and tap "Connect now".
7.In the network setting screen, select "SmartLife-****", and tap"< ".
8.You can see the percent rate of connecting process, at the same time "PP","SA","AP" shining in turn on the indoor display.
"PP" means "Searching the router"
"SA" means "connected to the router"
"AP" means "connected to the server"

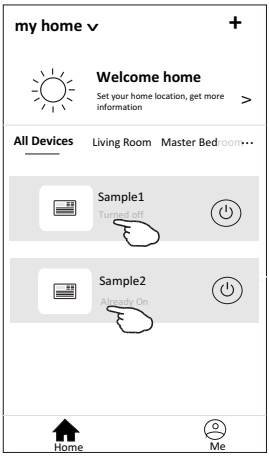

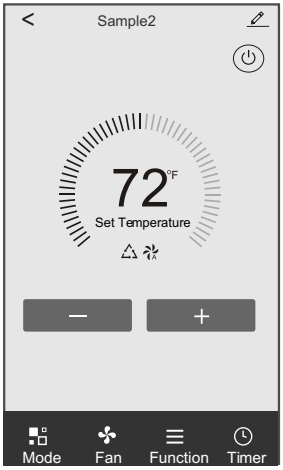

Air conditioner control

The device control screen will pop up automatically after adding the device.
The device control screen will pop up manually by tapping the device name on the home screen.

Note:
There are two different control forms base on different software or Wi-Fi module firmware.
Please read the manual carefully base on the real control interface.

Control form1

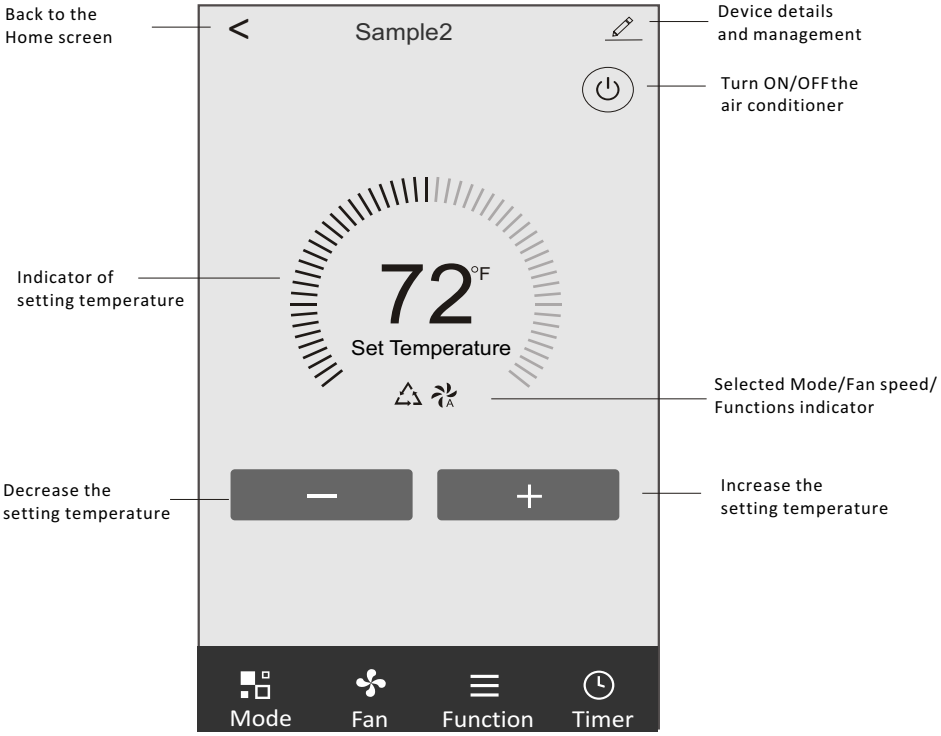

Control form2

Control form1

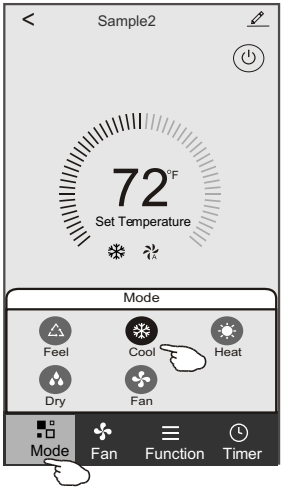

The main control interface

Air conditioner control

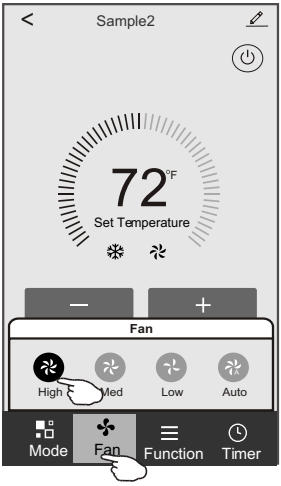

Control form1-Mode setting

1.Tap Mode to pop up the Mode screen.
2.Select one of the mode Feel/Cool/Heat/Dry/Fan.
3.Tap anywhere around the setting temperature to cancel the Mode setting.

Control form1-Select fan speed

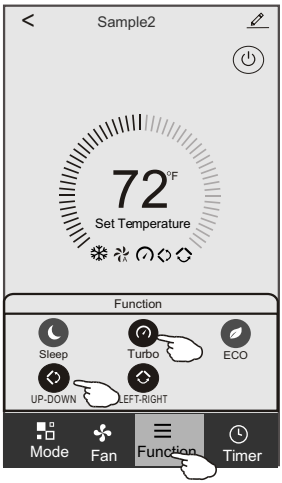

1.Tap Fan to pop up the Fan screen.
2.Select one of the fan speed High/med/Low/Auto.
3.Tap anywhere around the setting temperature to cancel the selection.

Air conditioner control

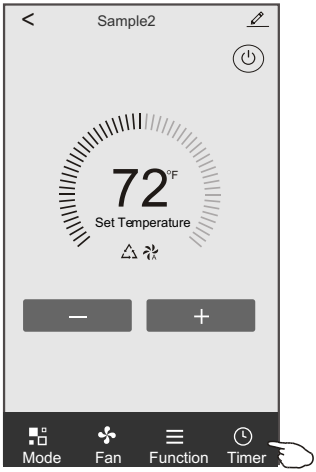

Control form1-Function setting

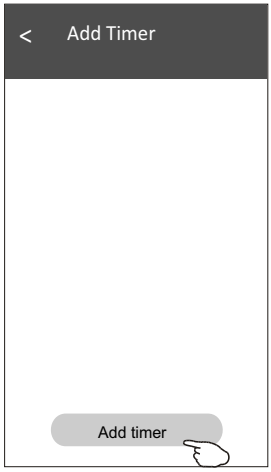

1.Tap Function to pop up the Function screen.
2.Select one of the functions Sleep/Turbo/ECO.
3.Select UP-DOWN/LEFT-RIGHT for auto swing with direction of UP-DOWN/LEFT-RIGHT.
4.Tap anywhere around the setting temperature to cancel the Function setting.

Control form1-Timer adding

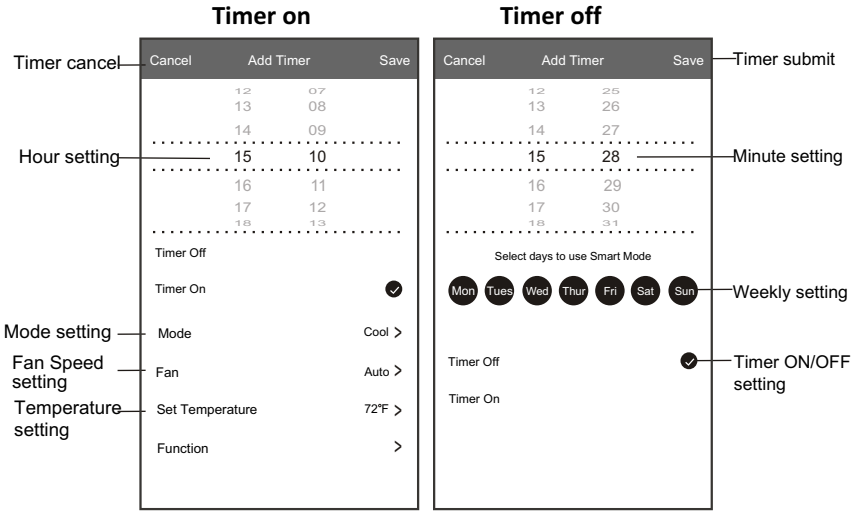

1.Tap Timer to pop up the Add Timer screen.
2.Tap Add Timer.

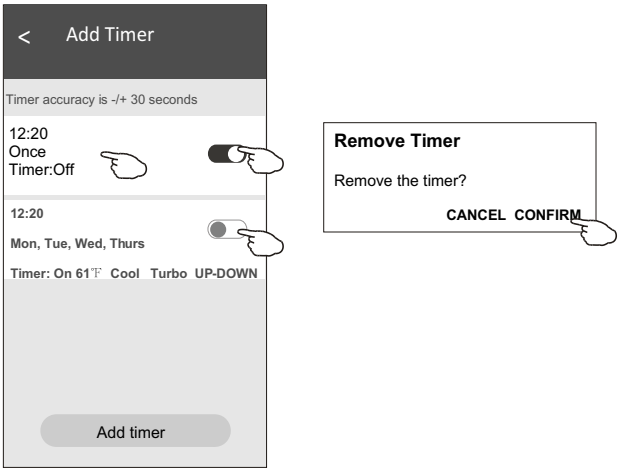

Control form1-Timer adding

3.Select the time, select the repeat days and Timer on/off.
4.Select the Mode/Fan speed/Function and select the setting temperature for Timer on.
5.Tap Save to add the timer.

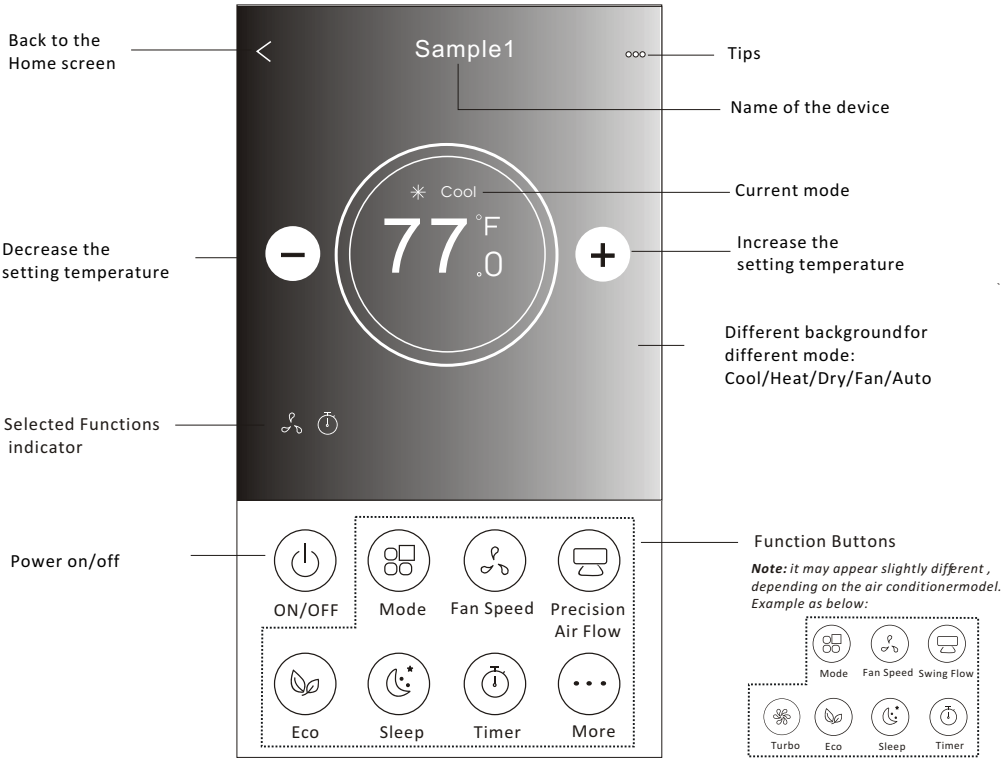

Control form1-Timer Management

1.Tap the bar of timer to edit the Timer like the Timer adding process.
2.Click the switch to enable or disable the Timer.
3.Holdind the bar of Timer about 3seconds and pop up the Remove Timer screen, tap CONFIRM and remove the Timer.

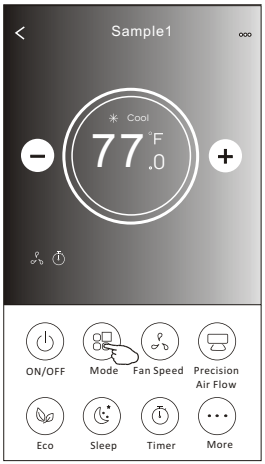

Control form2

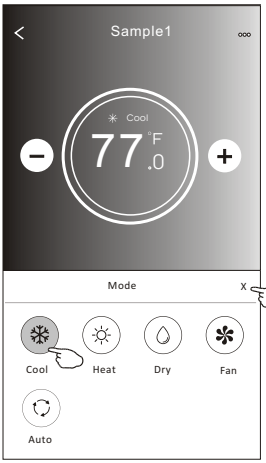

The main control interface

Control form2-Mode setting

1.Tap the Mode button.
2. There are 5 modes on the Mode screen, tap one button to set the Air conditioner working mode.
3.Tap the X button to back the main control screen.
4.The mode and background will change on the screen.

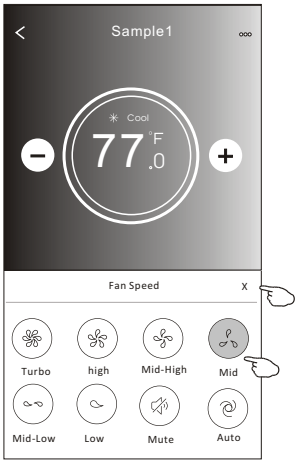

Note: *please read the details of each mode in the user manual to control more comfortable.*

Control form2-Fan speed selection

1.Tap the Fan speed button.
2.Choose your desired fan speed and tap it.
3.Tap the X button to back the main control screen.
4.The selected fan speed indicator will appear on the screen.

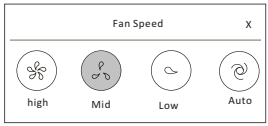

Mode	Fan Speed
Cool	All speeds
Fan	All speeds
Dry	
Heat	All speeds
Auto	All speeds

Note:
Fan Speed can't be adjusted on Dry mode .

Note: *Fan Speed screen mayappear slightly different , depending on the air conditionermodel.*
Example as below:

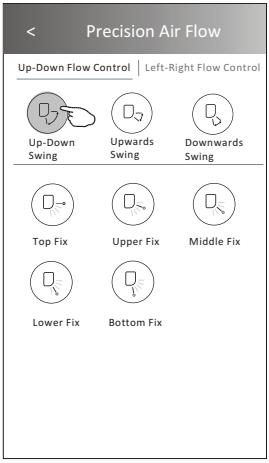

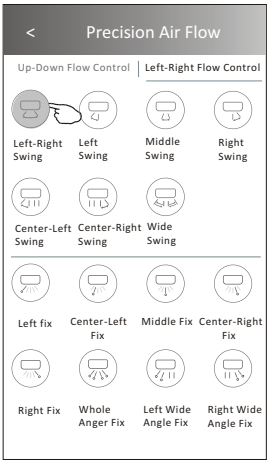

Control form2-Air Flow control

1.Tap the Precision Air Flow button or Swing Flow button.
2.Choose your desired air flow and tap it.
3.Tap the X button to back to the main control screen.
4.The selected air flow indicator will appear on the screen.

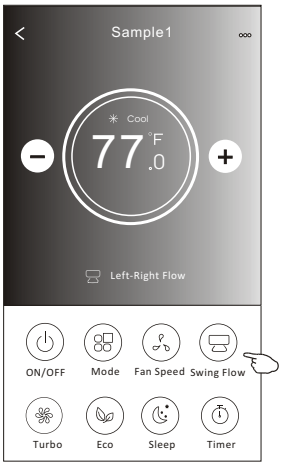

Note: *For some models without auto Left-Right wind, If you active it, you will hear a beep,but no any actions.*

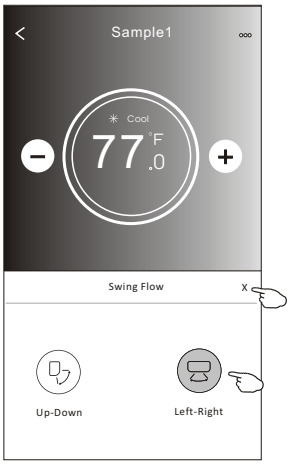

Note: *The Main controlscreen and Air Flowscreen may appear slightlydifferent , depending on the airconditioner model.Example asbelow:*

Control form2-ECO function

1.For Eco function, just tap the button to activate the function, the button will be lighting and the indicator will appear on the screen.
2.Tap again to disable the function.
3.Temperature controlled for some air conditioner model:
In Cooling mode, the new setting temperature will ⩾ 78°F.
In heating mode, the new setting temperature will ⩽ 77°F.

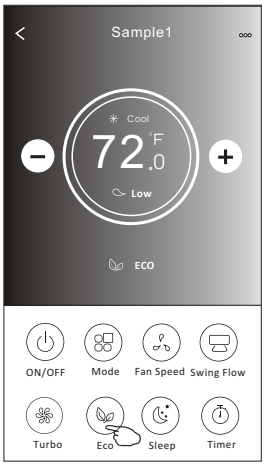

Mode	ECO enabled
Cool	Yes
Fan	
Dry	
Heat	Yes
Auto	

ECO is disabled on Fan/ Dry/Auto mode .

Note: *The Main controlscreen and ECOcontrol method mayappear slightly different, depending on the airconditioner model.Example asbelow:*

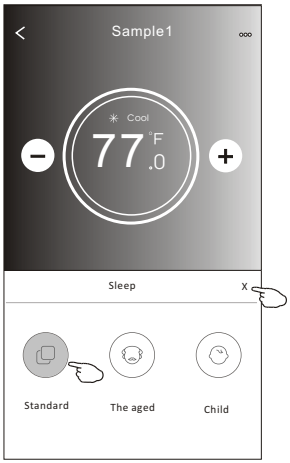

Note:
ECO is disabled on Turbo/Sleep mode too for some air conditioner model.

Control form2-Sleep function

1.Tap the Sleep button.
2.Choose your desired sleep mode and tap it.
3.Tap the X button to back to the main control screen.
4.The selected sleep mode indicator will appear on the screen.

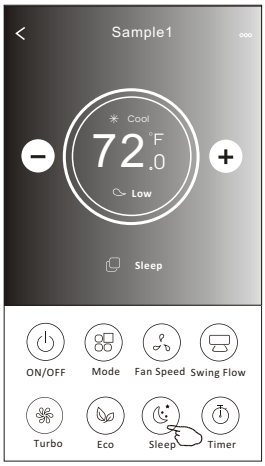

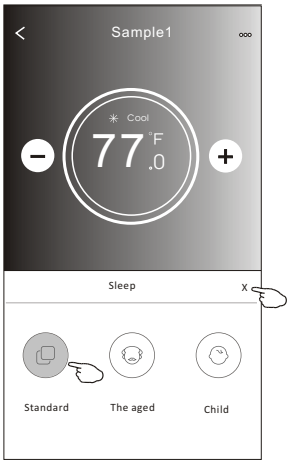

Mode	Sleep enabled
Cool	Yes
Fan	
Dry	
Heat	Yes
Auto	

Sleep is disabled on Fan/ Dry/Auto mode .

Note:
The Main control screen may appear slightly different , depending on the air conditioner model.
Example as below:

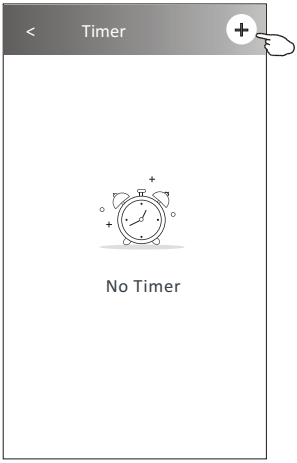

Note:
Sleep is disabled on Turbo/Sleep mode too for some air conditioner model..

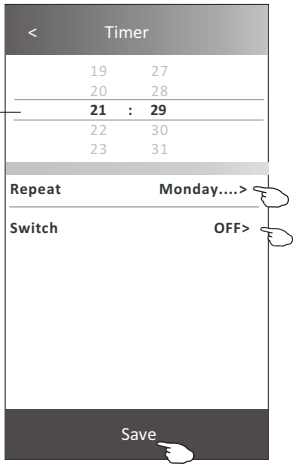

Control form2-Timer(on) setting

1.Tap the Timer button.
2.Tap + in the upper right corner of the Timer main screen.
3.Choose the Time/Repeat/Switch OFF then tap Save.
4.The timer(off) will appear on the Timer main screen.

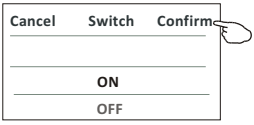

Slide up or down to select time

Tap repeat> then tap your desired repeat days orOnce, then tap Confirm your selection.

Tap Switch> then slide the screen to chooseON and Confirm.

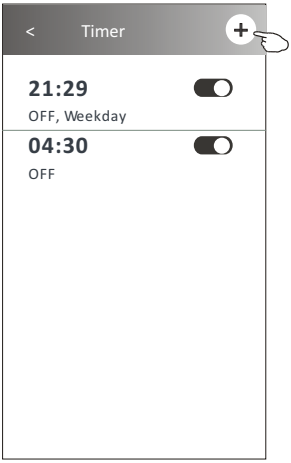

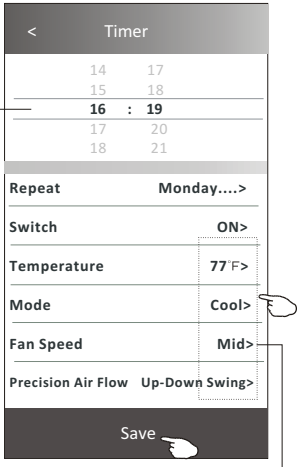

Control form2-Timer(off) setting

1.Tap the Timer button.
2.Tap + in the upper right corner of the Timer main screen.
3.Set the Time/Repeat Date/Switch(ON)/Temperature/Mode/
Fan speed/Air Flow as your desired and then tap Save.
4.The timer will appear on the Timer main screen.

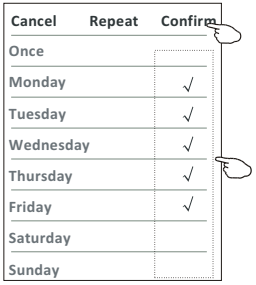

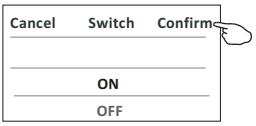

Slide up or down to select time

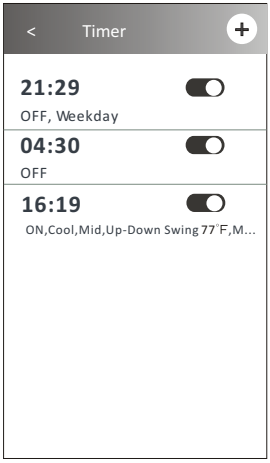

Tap repeat> then tap your desired repeat days orOnce, then tap Confirm your selection.

Tap Switch> then slide the screen to chooseON and Confirm.

Tap Temperature/Mode/Fan Speed/ Air Flow > oneby one then setas your desired as mentionedon the previous chapter and tapConfirm the setting.

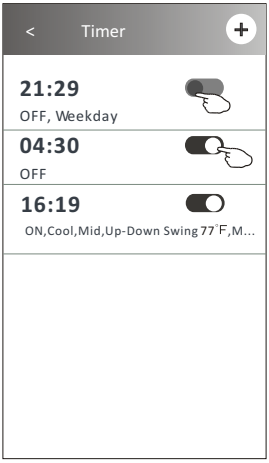

Control form2-Timer management

1.Change the Timer setting:
Tap anywhere of the timer list bar except the switch bar to get into the Timer setting screen, change the setting and then tap save.

2.Enable or Disable the Timer:
Tap the left of the switch to disable the Timer.
Tap the right of the switch to enable the Timer.

3.Delete the Timer:
Slide the list bar of the Timer from right to left until Delete button appear, then tap delete.

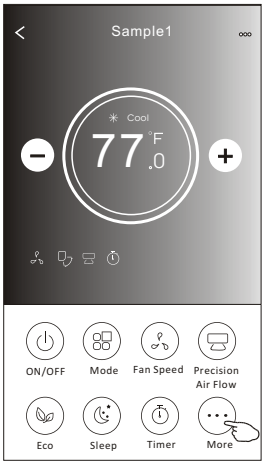

Slid left to disable the Timer.

Slid right to enable the Timer.

Control form2-More functions

1.Tap the More button to operate additional functions if it appears on the screen.

Note:
Some air conditioner model don't have the more button.

Note: The appearance maybe different , some icons will be hidden if the air conditional do no have this function or do not enable on the current mode.

2. Tap the "  " to switch on/off the indoor LED display.
Display

3. Tap the "  " to switch on/off the buzzing if it is available on the screen.
Buzzer

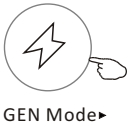

4. Tap the "  " button to activate the Anti-Mildew function, if it is available on the screen.
Anti-Mildew

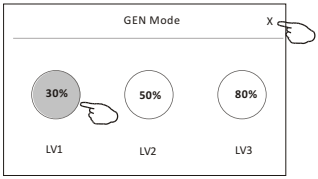

After AC turning off , it will start drying , reduce residual moisture and prevent mould, after function finish, it will automatically turn off.

5. Tap the "  " button to switch on/off the healthy function, if it is available on the screen.
Health

It activate the antibacterial ioniser function.This function only for models with the ioniser generator.

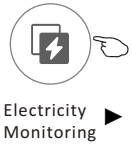

6. Tap the "GEN Mode" button, if it is available on the screen.
In this Mode, you can choose one of the three levels of current.
The air conditioner will maintain proper current to save energy.

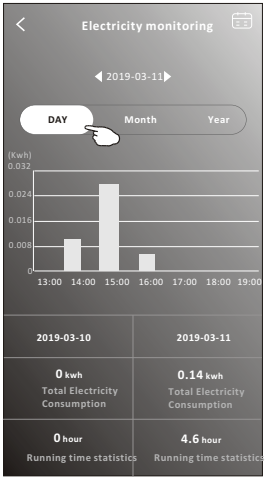

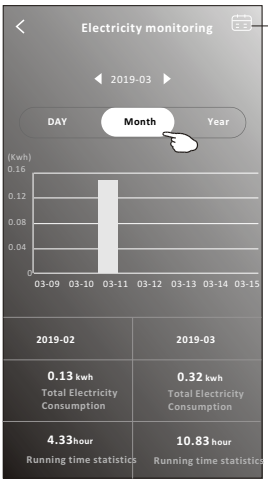

Control form2-More functions

7. Tap the "Electricity Monitoring" button if it is available on the screen.
In this function, you can monitor the air conditioner electricity consumption.

You cantap this button to pop up the calenderthen select the date.

8. Tap the " " button, if it is available on the screen.

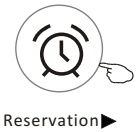

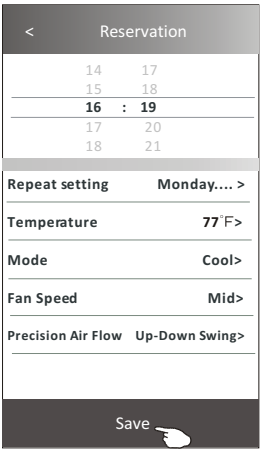

Check the details of the Self-Cleaning function on User Manual.

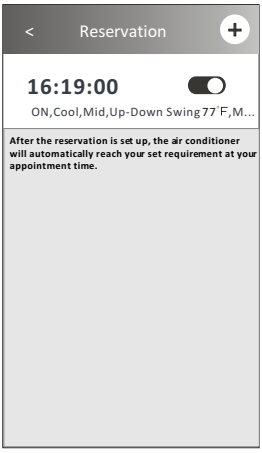

9. Tap the "8℃ Heat" button , if it is available on the screen.
This function help keep the room temperature over 8℃.
Check the details of the 8℃ Heat function on User Manual.

10.Tap the "Reservation" button , if it is available on the screen.
You can set the time, repeat day, temperature, mode, fan speed, air flow as you desired and then tap Save to activate the function.
The air conditioner will automatically reach your settings at the appointment time.

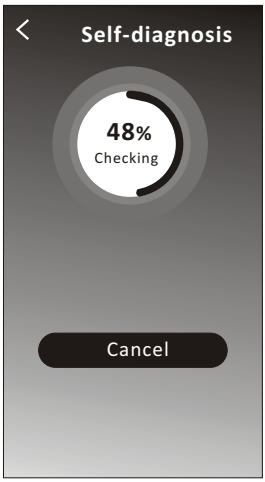

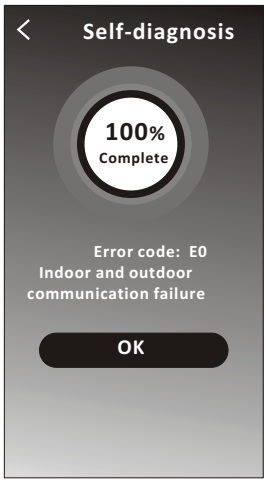

Control form2-More functions

11.Tap the "Self-diagnosis" button, if it is available on the screen.
The air conditioner will automatically diagnosis itself and indicate the Error code and the problem instructions if possible.

12. Tap the "  " button if it is available on the screen.
Photosensitive

This function allow the air conditioner to turn on/off the display automatically according to the light intensity.

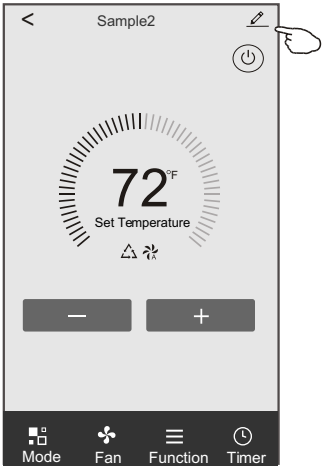

13. Tap the "  " button if it is available on the screen.
Soft Wind

In this function, the air conditioner will blow soft airflow through the micro holes on the deflector.

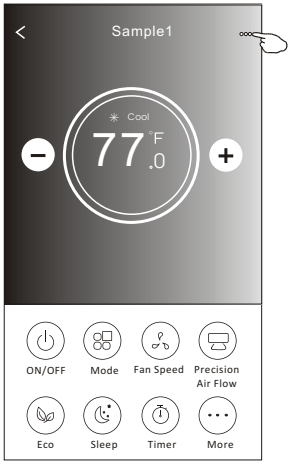

Device details and management

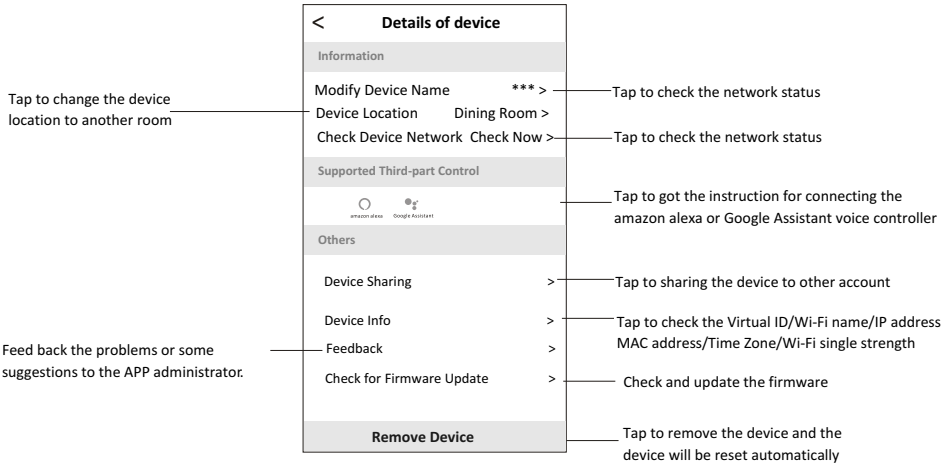

Tap ✎ on control form1 or tap ... on control form2 , get into the device details screen.
Here you can get some useful information and sharing the device to other accounts.
Check the following pictures and instructions carefully.

Control form1

Control form2

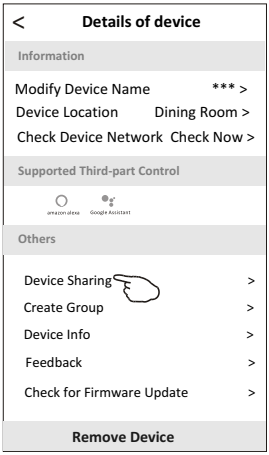

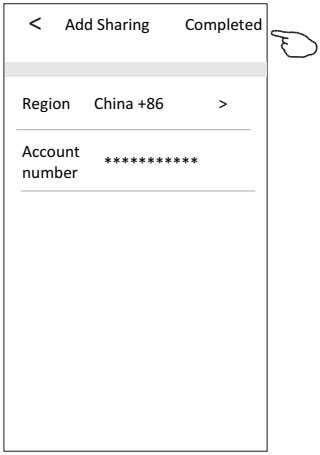

Device details and management

How to share the devices to other accounts?

1. Tap "Device Sharing" and pop up Device Sharing screen.
2. Tap "Add Sharing".
3. Select the region and enter the account which you want to sharing.
4. Tap "Completed", the account will appear on your sharing list.
5. The received sharing members should hold pressing the home screen and slide down to refresh the device list, the device will appear on the device list.

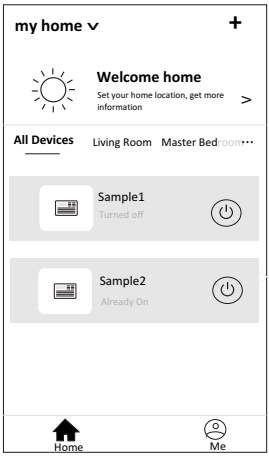

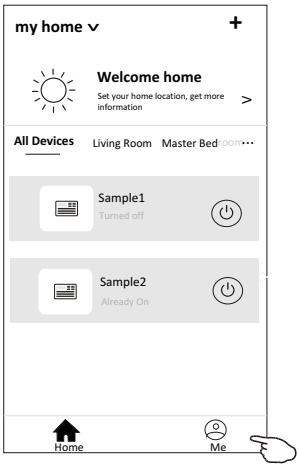

Hold the bar about 3s then you can delete the sharing account.

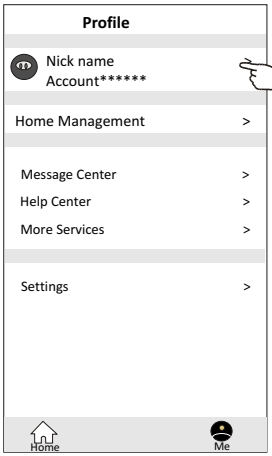

Hold on and slide down to refresh the device list

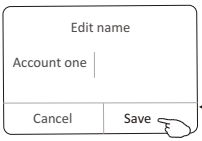

Account management

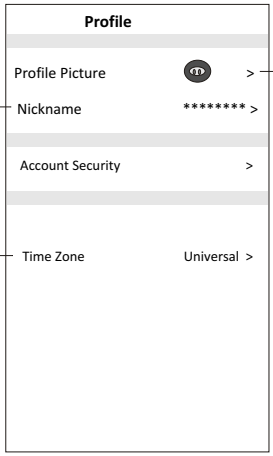

Account Profile setting

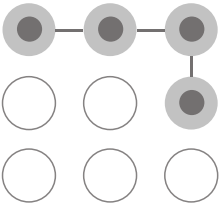

Change the nick name of your account

Select a picture for the account from local album

Select the time zone

Set a pattern password for launching the APP

Change the password like reset password on page7

Tap the switch to enable or disable the Pattern password

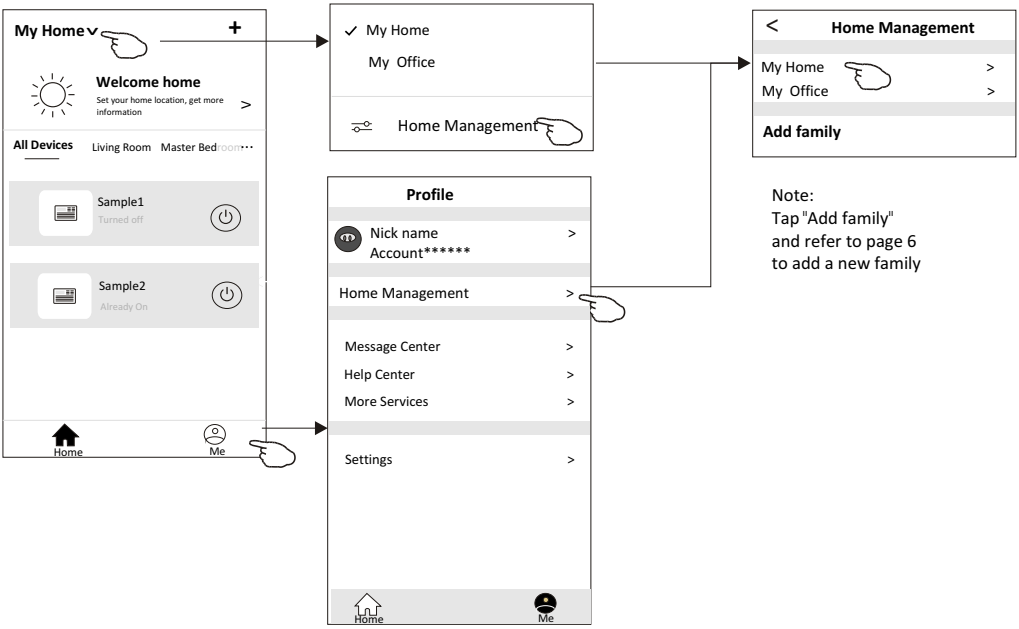

Please carefully to deactivate the account for all data will be deleted.

Account management

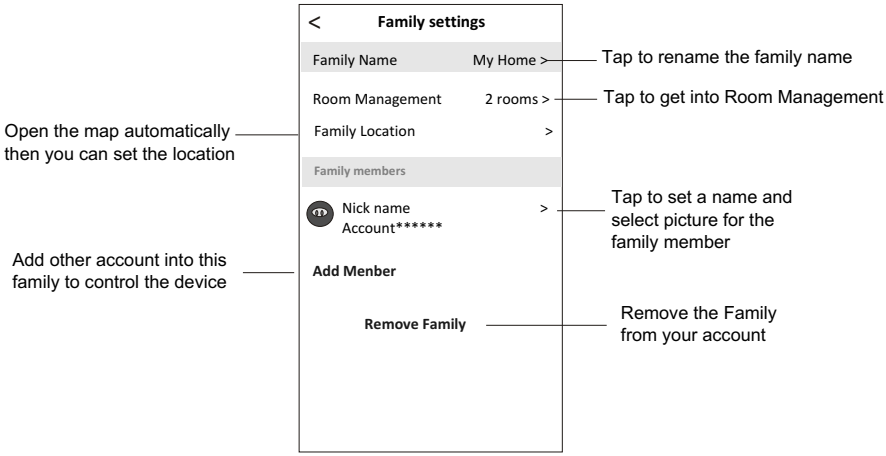

Home(Family) management

1.Tap the name of home at the left upper corner of the Home Screen and select the Home Management. Or tap Me and tap Home Management.

2. Tap one of the families in the family list and get into Family Settings screen.

3.Set the family as the following indicators.

Notice

1. **For technical update, there is maybe deviation of the actual items from what is on the manual. We express our apologies. Please refer to your actual product and APP.**
2. **Smart air conditioner APP can be altered without notice for quality improvement and also be deleted depending on the circumstances of manufacturing firms .**
3. **In case Wi-Fi signal strength is weakened, smart App may be disconnected. So make sure the indoor unit near to wireless router.**
4. **DHCP server function should be activated for wireless router.**
5. **The internet connection may fail because of a firewall problem. In this case, contact your internet service provider.**
6. **For smart phone system security and network setting, make sure Smart air conditioner APP is trusted.**

Trouble Shooting

Description	Analysis of cause
Air conditioner can't be configured successfully	1. Check the mobile connected WLAN router SSID and password is correct; 2. Check whether there are additional settings of WLAN router as shown below. 1) Firewall by router itself or by PC 2) MAC address filtering 3) Hidden SSID 4)DHCP server Reboot WLAN router, mobile device and air conditioner (WLAN module) and connect air conditioner by CF mode again. Before rebooting, check nobody has already connected to same air conditioner.
Mobile can't control air conditioner	1. When air conditioner (WLAN module) is rebooted and app displays Device remove, ignoring this confirmation will lead to mobile device losing control permission of the air conditioner. You will need to connect the air conditioner by CF mode again. 2. In case of power failure, mobile device will lose control permission of air conditioner for 3 minutes after power failure. (Notification will now show up on the mobile device.) If you cannot control the app (air conditioner) even after power restored, you will need to connect the air conditioner by CF mode again.
Mobile can't find air conditioner	1. App display Air conditioner Device offline. Please check the following conditions. 1)The air conditioner has been reconfigured. 2)Air conditioner out of power. 3)Router out of power. 4)Air conditioner can't connect to router. 5)Air conditioner can't connect to network through the router. 6)Mobile device can't connect to network. 2. After adding the device, it disappears in device list . Hold and slide down to refresh the device list. If it has no change, shut down the app and start again.
