Product Description

Maono PD100W is a next-generation wireless dynamic microphone specifically designed by Maono for gaming and live streaming scenarios. It adopts bidirectional wireless transmission technology, enabling high-definition wireless audio capture between the microphone and devices such as computers, smartphones, and gaming consoles. The wireless setup frees users from cable clutter, allowing for a more flexible recording experience while keeping the desktop cleaner and more aesthetically pleasing. The microphone comes with two optional receiver types (selectable at purchase): for USB-C phones, and Apple Lightning phones—ensuring compatibility with a wide range of devices.The microphone is equipped with a one - touch noise reduction function, allowing users to quickly start clear game conversations and live streaming. It features a 3.5mm headphone output for computer audio playback or real-time monitoring of the microphone. Maono's signature smart knob allows intuitive control of microphone gain and headphone volume. Touching the mute button can quickly achieve one - touch muting to better protect user privacy. The microphone also offers multiple noise reduction options, which users can freely adjust according to their environment.
The exclusive Maono Link software provides a variety of finely tuned sound presets for different usage scenarios. With just a click in Maono Link, users can easily switch sound styles and achieve optimized audio performance for gaming, live streaming, voice-over, and more. By integrating Maono Link with Maono hardware, every Maono user can easily personalize their sound and make content creation simpler and more efficient.
