Pulsing Orange: Battery 35% –70%

Pulsing Green: Above 70%

Solid Green: Fully charged

PAIRING WITH APP

1. Enter pairing mode:

With helmet off, press and hold Power button for 3s until the rear LED flashes red.

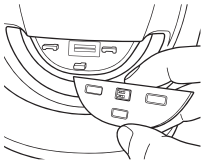

2. Search device:

Launch Lumos App, allow permissions, and tap + on All Devices page.

3. Complete pairing:

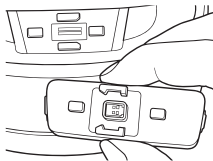

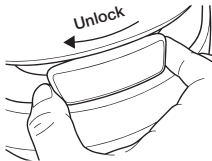

Select your helmet, tap **Pair**, then tap **Continue** once **Paired**.

REPLACEABLE ELECTRONIC MODULE

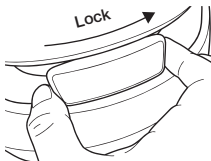

Front Light Removal

1. Ensure the helmet is turned off.
2. Slide the module horizontally to the left.
3. Pull the module off the mounting base once it **snaps** free.

Rear Light Removal

1. Ensure the helmet is turned off.
2. Slide the module horizontally to the left.
3. Pull the module off the mounting base once it **snaps** free.

Installation

1. Align the module with the three slots on the base (refer to the "Install" arrow and lock icon).
2. Slide the module horizontally to the right until it snaps securely into place.

CAUTION

Do Not Repeatedly Remove and Install the Lights

Only remove the lights when replacing the helmet or light units. Frequent disassembly may cause unpredictable structural damage.

Do Not Ride Without Lights Installed

Never ride if the front or rear lights are missing. The lights are essential for your safety; riding without them compromises protection.

Do Not Disassemble the Light Units

Do not open or alter the light units. They feature a waterproof structure; self-disassembly will destroy the seals and cause water damage.
