This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.

Thank you for choosing our products. You can learn how to use the device by reading this manual. This device is mainly used to connect to your mobile phone via Bluetooth and provides a variety of practical functions and services to facilitate your operation of your mobile phone. The company reserves the right to modify the contents of this manual without prior notice.

Charging reminder

Please use the standard charger provided by our company to charge your device; we will not be responsible for any malfunctions caused by using a non-standard charger.

Operating Instructions

Power button: Press and hold to turn the device on or off, press briefly to turn the screen on or off, and click once in the menu to return to the main interface.

Touch gestures: Swipe down to access the app bar; swipe up to access the menu; swipe left or right to switch watch faces.

Connecting the smart case to the phone

First, you need to download and install the " Fere Fit " app on your phone. There are two ways to do this.

1. iOS/Android phone users

Scan the QR code below using your mobile browser or WeChat to open the interface. Select Android/iOS and then open the download in your mobile browser.

The QR code below is for downloading the Fere Fit app.

Android/iOS

2. For Android phones, search for " Fere Fit " on Tencent App Store or Google Play Store to download. For Apple phones, search for " Fere Fit " on App Store to download.

After downloading, you will be prompted for various permissions during the installation process. Click "agree" or "allow" for all permissions. Only after the smart case is successfully connected to your phone can all functions be realized.

Bluetooth 5.3 connection method

After installation, open " Fere Fit " and turn on your phone's Bluetooth. **Fere Fit** will display an activation notification; tap "OK". Tap "More" in the bottom right corner, enter the device scanning section, search for the Bluetooth address, and tap "Connect". Some Android phones require GPS to be enabled to find the smart case's Bluetooth name.

How to verify a successful Bluetooth connection

the smart case pulls up the status bar on the standby screen, if Bluetooth 5.3 is green, it means that Bluetooth is successfully connected; if the Bluetooth icon is gray, it means that Bluetooth is not connected.

Simple solutions to common problems

Because the Bluetooth protocols of different mobile phone brands are not standardized, the Bluetooth connection between the phone and the smart case may sometimes be unstable. You can try turning off Bluetooth on the phone and then reconnecting, or restore the smart case to factory settings.

Function Introduction

Selfie : After connecting to the app, turn on the selfie function and you can preview it in real time through the screen on your smartphone case.
