

This LED light is only for use with 5V/2A USB power adapters. UL-certified adapters are recommended.

RF Wireless Remote Advanced

RGB LED Controller Instruction

- 22 Dynamic Modes
- 20 Static Colors
- Seamless Switch
- Adjustable Speed
- Adjustable Brightness
- Card-Type RF Remote
- Ultra Slim Design
- Dynamic Demo Mode
- Easy Remote Pairing
- Direct Color Select

Functions

1. Turn On/Standby

Press this key to turn on unit or switch into standby mode. When powered on, the unit will automatically display the mode which was set before power off.

2/9. Dynamic Mode Adjustment

Switch into dynamic mode from static color, or switch between dynamic modes.

3/10. Dynamic Speed Adjustment

Adjust displaying speed of dynamic mode. Press "SPEED+" to increase speed and press "SPEED-" to decrease speed. Unit will switch into dynamic mode if you press this key at static color mode.

4/5. Static Color Adjustment

Switch into static color mode from dynamic mode, or switch between static colors.

6. Direct Color Select

Straightforward key for choosing static color. When pressing one specific color key, the LED light will play the same static color. These colors are included in "COLOR+" and "COLOR-" operation.

7/8. Brightness Adjustment

Adjust static color brightness. Press "BRIGHT+" to increase brightness and press "BRIGHT-" to decrease brightness. Unit will switch into static color mode if you press this key at dynamic mode.

11. Demo Mode

Press this key to switch into Demo Mode, which displays the R/G/B 3-color changing mode.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
