

CHARGING

To begin charging, first connect your device to the car's power source by plugging the retractable 2-in-1 cable into your car charger.

Once the mount is powered, press the clamp open button to extend the clamp arms.

Place your phone into the cradle, where the clamp arms will hold it securely against the charging area to initiate wireless charging.

If your phone does not begin charging immediately, ensure that the cable is firmly connected to both the power source and the mount, and verify that your phone is correctly centered within the charging area.

PRODUCT FEATURES

MONSTER®

**3-IN-1 WIRELESS CHARGING
CAR MOUNT**
WITH 2-IN-1 RETRACTABLE CABLE
DASHBOARD | WINDSHIELD | AIR VENT CLIP

USER MANUAL

MODEL: 2MNCM1013

Made in China.

Compatible with wireless charging enabled smart phones*. Wireless charging performance may be affected by thick, metal, or magnetic phone cases. For best results, ensure your case is compatible with wireless charging.

MOUNTING

Insert the Dash Mount Ball Head (A) into the Ball Joint Socket (C) located on the back of the wireless charger. Turn the locking nut (B) clockwise to assemble and secure the charger.

DASHBOARD / WINDSHIELD

Place the Dash Mount on your dashboard or windshield in the desired location. Secure the suction cup using the (7) Suction lock lever.

Connect your wireless charger to your car's power source using the retractable charging cable.

Place your phone onto the wireless charger to begin charging.

AIR VENT CLIP

Rotate the rolling ball to release the hook.

Attach the hook to your air vent, then rotate the ball backwards to tighten.

Connecting the Ball joint to the car mount

SAFETY WARNINGS

Do not attempt to pierce, strike, or apply strong pressure to the unit with sharp or heavy objects. Strong impacts or shocks could cause irreversible damage.

Dropping or mishandling the mount may cause irreversible damage to the unit and its batteries. Do not expose to or submerge in water.

Keep the unit away from small children at all times or ensure strict supervision by an adult. The unit contains small parts and may pose a choking hazard.

Do not use the unit in the vicinity of flammable fumes or gases (such as propane tanks or large engines).

Do not expose the mount to fire, direct sunlight, dust, high levels of humidity, or other hot locations, as this may cause the battery to generate heat, ignite, or explode.

Do not attempt to operate the unit using any method other than directed.

Please use a safe, certified charger to power your device. Keep the charger dry at all times to prevent corrosion of electronic circuits.

Do not use harsh chemicals, cleaning solvents, or strong detergents to clean the unit.

Do not attempt to disassemble or modify the unit in any way. Immediately discontinue use if the unit has any visibly exposed parts or appears multifunctional in any way.

FCC STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions

(1) This device may not cause harmful interference, and
(2) this device must accept any interference received, including interference that may cause undesired operation. Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna. -Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.

Input: 5V/3A, 9V/2A, 12V/1.67A
Output: 5W/7.5W/10W/15W
Cable Length: 80 cm
