

beambox® Name:beambox Findpro Model No.:BOXFM1 Works with Find Hub Works with Apple Find My User Guide	iOS (Apple Find My) 1 Quick Start Guide Before Use: • A Apple device with iOS14.5 or a higher version and with two-factor authentication enabled. • The 'Apple Find My' function has been enabled. • Bluetooth has been enabled. • Stable Wi-Fi or cellular network connection. • Location service enabled: Go to 'Settings' > Privacy & Security > Location Service. • Turn on the location service. Go to 'Settings' > Privacy & Security > Location Services, and find 'Find'. Check 'During the use of the App'. Power On: Press and hold the button for 5 seconds. The device will emit a beep and power on. (To confirm whether the device is powered on, double-press the button. If the device emits a sound, it is already powered on and does not need to be restarted.) Add the device to your mobile phone: Open the 'Find My' App and select 'Add Items' > 'Other Supported Items' > 'pair with device BOXFM1. • Choose a custom name to name your device, select an emoji, then tap 'Continue'.	• Tap "Agree" to confirm that this device is linked to your Apple ID, then tap "Continue" again; • Tap "Done". You can now add this device to your Items and view it in the Find My app. If you are unable to add your device: Please make sure your device is ready for setup; If you have two or more devices to set up, ensure that only one device is near your phone at a time; If your device still cannot connect, please try resetting it. Find My Network Location Tracking When the device is outside Bluetooth range, it can no longer connect directly through the app. You can enable Lost Mode and enter contact information such as your phone number. If an iPhone detects the lost device nearby, the Find My network will anonymously update its location, and you will receive notifications and the latest location information in the Find My app. Remove Device To remove the device from your account, select Remove Item in the Find My app. Re-enter Pairing Mode After Removal After the device is removed from the app, it will not power off and will remain in pairing mode. If the device is not paired again within 10 minutes, it will automatically exit pairing mode. To pair the device again, press the device button	once. The device will emit a sound and re-enter pairing mode, allowing it to be paired with the app again. 2.Main Features Locate your items If your lost item is not nearby, the Find My app can still help you locate it using the Find My network, which is made up of hundreds of millions of iPhone, iPad, and Mac devices worldwide. Nearby devices can securely send the location of your lost item to iCloud, and you can then view its location in the Find My app. All information is anonymously encrypted to protect everyone's privacy. Play Sound (Find Item) Tap Play Sound in the app, and the device will play a ringtone to help locate it. 3.Device Operation Instructions Power On Press and hold the button for 5 seconds. A confirmation tone will sound, and the device will power on and enter Pairing Mode.After powering on, the device automatically enters Pairing Mode, which will remain active for 10 minutes before timing out.	Check Device Status Double-press the button: • Not paired: confirmation tone. • Paired and connected: one short beep. • Paired but disconnected: one long beep. • No sound: device is in Sleep Mode (powered off). Re-enter Pairing Mode If Pairing Mode times out, press the button once. The device will emit a tone and re-enter Pairing Mode. Read Serial Number If Pairing Mode times out, press the button once. The device will emit a tone and re-enter Pairing Mode. Reset With the device powered on, press the button 4 times within 2 seconds, then press and hold it. Continue holding while the device emits a repeating "di-di-di" tone until the Reset Successful tone is heard. Power Off While the device is powered on, press the button 5 times within 2 seconds. The device will emit a confirmation tone and enter Sleep Mode (powered off).
FAQs Q1: Unable to connect/Pairing failed? Ensure Bluetooth and location Services are enabled on your phone.Confirm that your phone model and system version are compatible with the device.Check if the device is already linked to another phone. One device can only be bound to a single Apple ID at a time.If all the above are confirmed, try restarting your phone and attempt pairing again. Q2: Why Isn't the Device Making Any Sound? Ensure the device is functioning properly and has sufficient battery.Make sure the device is connected to your phone. Try placing your phone close to the device and test again. If there's still no response, try unpairing and then re-pairing the device. Q3: When can my device be located by other Apple devices? After the device has been disconnected from the owner's iPhone for about 15 minutes, it can be detected by nearby Apple devices through the Find My network, allowing its location to be updated. Q4: Why is the Location Inaccurate? Bluetooth accessory positioning relies on nearby Apple devices. If there are few Apple devices around or your phone's own positioning is inaccurate, location inaccuracies may occur. Try taking your device to a place with more people and Apple devices. Q5: Will the device disclose privacy? This device is designed with user privacy in mind.Location data is anonymized and not linked to your personal identity. Important: Do not lend your device to others, as this may expose you to privacy risks or account-related issues.	Q6: How can I confirm that the device is powered on? Double-press the device button. If you hear a sound, the device is powered on. If there is no sound, press and hold the button for 5 seconds to power it on. Q7: Not receiving alerts after separating from the device? Make sure notifications for the Find My app are enabled in iPhone Settings.If Focus Mode is turned on, confirm that notifications for the Find My app are not being silenced.In the Find My app, verify that 'Notify when left behind' is enabled and properly configured, including the selected distance and conditions. Q8: How to Replace the Battery? • Press down on the battery cover with two fingers and rotate it counter-clockwise until it stops. Then, use the opening gap to remove the cover. • Remove the old battery and insert a new coin cell battery, ensuring that the positive (+) side faces up. • Reinstall the battery cover and rotate it clockwise until it locks into place. Then, press and hold the power button for 5 seconds to turn on the device.	Android™ (Google's Find Hub) Before You Start This item only supports the Find Hub app. Please make sure to download and install this app on the Google Play before use. The device is compatible only with Android devices running Android 9 and above. This item does not support Huawei devices. Once the item is paired with a device, it will be locked and cannot be paired with another device. Quick Instructions • Power On: Press and hold the button for 5 seconds. The device BOXFM1 will emit a beep and power on. (To confirm that the device is powered on, double-press the button. If the device emits a sound, it is already powered on and does not need to be restarted.) • Open the Find Hub app on your Android phone. • When the pairing pop-up appears, tap Connect. • Tap Accept & Continue. • Assign a name to the device to complete the setup. Once connected, you can use the device functions: Ring Device, Tap Play Sound in the app, and the device will play a ringtone. • Remove Device: In the app, select the device and choose Remove Item to remove it from your account. Device Operation Instructions • Power On: Press and hold the button for 5 seconds. A confirmation tone will sound, indicating that the device has powered on successfully.	• Factory Reset: With the device powered on, press the button 4 times within 2 seconds. After hearing a confirmation tone, press and hold the button. During this process, the device will emit a repeating "di-di-di" sound. Continue holding the button until the 'Reset Successful' tone is heard. The device will then be restored to its factory settings. • Power Off: While the device is powered on, press the button 5 times consecutively within 2 seconds. A confirmation tone will sound, and the device will enter Sleep Mode (Power Off).
