

ONE PAGE FOLDED

Care & Maintenance:

- Regularly inspect and readjust to ensure stability.
- Store in a cool, dry location in the original package.

FCC Compliance Statement:

Part 15

This device complies with Part 15 of the FCC Rules, operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

• **Warning:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

• **NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator& your body.

Vacuum Suction Mount
15W Magnetic
Phone Charger

Introduction

Thank you for choosing Vacuum Suction Mount, 15W Magnetic Phone Charger. Keep your device positioned where you need it, whether at home, on the road, or taking selfies at a party. The vacuum suction mount ensures a reliable hands-free solution. The magnetic mount ensures perfect alignment and consistent charging performance. The 360° rotating magnetic mount allows for easy adjustment and comfortable viewing during GPS navigation, calls, or streaming.

Specifications

- Input Voltage/ Current: 5V/3A, 9V/2A
- Wireless Charging Output: 5W/7.5W/10W/15W

Package Contents

- 1 (One) 15W Wireless Charging Suction Mount
- 1 (One) Adhesive Disc
- 1 (One) Adhesive Metal Ring
- 1 (One) USB-A to USB-C Power Cable
- 1 (One) User Manual

Safety Instructions:

Read all instructions before using this product and keep them for future reference.

- Read all the instructions before using the product, and use the product as intended.
- Secure and adjust before driving. Do not adjust your Phone Charger while driving.
- Keep close supervision of this product if being used around children.
- Do not place magnetic strip cards or similar magnetically sensitive items between the phone and the adhesive ring. The magnet could damage these items.
- Do not drop, puncture or disassemble this product.
- This product should not be exposed to dripping or splashing.
- Avoid long exposure to direct sunlight, which may cause damage.
- Use a clean, soft cloth to clean. Do not use any corrosive cleaners/oils to clean.

WARNING:

- Use caution while using this device while operating a motor vehicle.
- This product is not a substitute for safe driving.
- Always follow local, state, and federal guidelines when operating a motor vehicle.
- Check with your vehicle manufacturing for compatibility with this product before use.
- Discontinue use of this product if the product becomes damaged.

Getting to Know Your Product:

Before using your Phone Charger, remove all components from the package.

Placement and Usage:

The Phone Charger will not adhere to textured surfaces, ensure that surfaces are smooth and dry for ideal placement.

To ensure smooth and firm mounting, use the included Adhesive Pad for textured surfaces.

To Mount Your Phone Charger:

- Remove the protective film from the vacuum suction base.
- Choose your desired smooth, dry surface, and press the vacuum suction base firmly onto it.
- Simultaneously, turn the locking dial lever of the vacuum suction base clockwise to secure in place.
- Turn the Phone Charger's magnet up to 360° and tilt up to 180° for a landscape or portrait view.
- Tilt the mount's stem up to 270° for a preferred viewing angle.
- Turn the locking dial lever counterclockwise to release the vacuum suction and dismount.
- The Phone Charger can be used at home, in a vehicle, and anywhere hands-free operations are desired.

USB Power:

The Phone Charger comes with a USB-A to USB-C cable that can be used to provide continuous wireless power to your smartphone. To use the USB cable:

- Locate the USB-C port on the Phone Charger.
- Connect the included USB-C cable to the Phone Charger's USB-C port.
- Connect the USB-A cable end to an appropriate power adapter and/or source (sold separately).
- An alternating red and blue light indicator will appear and turn steady red on the Phone Charger once power is supplied to it.
- Once your smartphone is mounted to the Phone Charger, the light indicator will turn steady blue indicating it is actively charging.

Operations:

Direct Smartphone Placement: After plugging in the Phone Charger to a power source, align and place your MagSafe compatible smartphone directly onto the Phone Charger's magnet.

Adhesive Metal Ring Placement: If your smartphone or phone case is not MagSafe-compatible, the adhesive metal ring can be used to mount your device. To use the adhesive metal ring, peel off the protective film and adhere to the back of your smartphone or phone case at the center of the smartphone.

The adhesive metal ring is a one-time use accessory and cannot be reused.

Note: The metal ring can potentially get warm while wirelessly charging your smartphone. To prevent damage or injury, avoid wirelessly charging with the adhesive metal ring for an extended period of time. Wireless charging could heat the metal ring causing burns or damage to the device. The adhesive metal ring will not adhere to textured surfaces.
