## Package Contents

User Guide

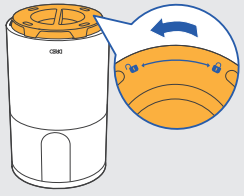

FiberCatch Pre-Filter x 6
(1 pre-installed)

# USING YOUR APPLIANCE

02

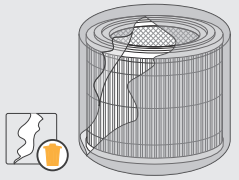

## Before Use

1

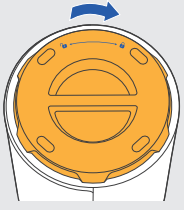

Put it upside down. Rotate the bottom cover counterclockwise to unlock and take the cover off.

2

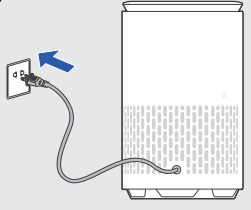

Remove the filter from its packaging then put the filter back.

3

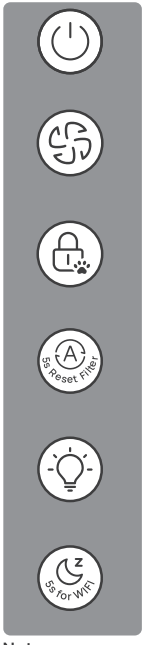

Rotate the bottom cover clockwise to lock back in place (you will hear a distinctive sound when locked).

4

Return to upright position on a flat, stable, and clear surface. Plug the appliance into the power outlet.

# Control Panel

**Power Button**
- Turn power on/off.

**Purifying Speed Button**
- Adjust purifying speed across 1-4 levels & Turbo (Turbo Mode will show up as level "H").
- Long press for 3 seconds to set a timer (0-12h) to turn the appliance on/off.

**Pet Lock**
- Long press for 3 seconds to activate/deactivate the pet lock function (display will show "LC").

**Auto Mode Button**
- Purifiy and adjust purifying speed automatically based on air quality conditions.
- Long press for 5 seconds to reset the filter change reminder after replacing the filter.

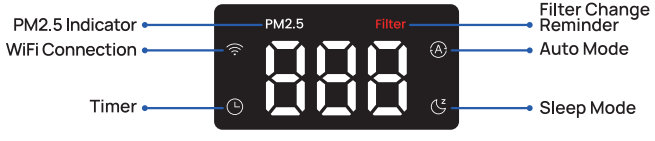

**LED Light On/Off Button**
- Turn the LED light on/off for the display, control panel, or air quality indicator.

**Sleep Mode Button**
- Touch to purify the air at the most silent power setting (display auto-off in 5s).
- Long press for 5 seconds to start WiFi connection settings.
- Press or to exit Sleep Mode.

**Note:**
Long press and for 10 seconds to enter Low Power Standby Mode and turn off WiFi. To exit, long press for 5 seconds, and WiFi connection will restart.

# LED Display

Constantly monitor the air quality in your room with the comprehensive and intuitive monitor display.
Note: You can turn off the LED display and lights using the button or through the DREO app.

## Air Quality Indicator Light

| Light Color | Air Quality Level |
|---|---|
| Blue | Excellent |
| Green | Good |
| Orange | Moderate |
| Red | Poor |

**Note:**
The Air Quality Sensor detects PM 2.5 particles but cannot detect odors. If you feel that the indoor air odor is relatively strong, it is recommended to manually switch to the highest purifying speed.

## Additional Features

### On/Off Timer
When the appliance is ON/OFF, long press for 3 seconds to set a timer (from 0-12H) for the appliance to turn ON/OFF.

### Memory
If the appliance is turned OFF or disconnected from power, it will operate under the previous settings (except the Timer setting) when it is turned ON again.

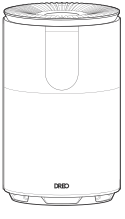

### Firmware Update
Check the firmware version on the DREO app and update regularly for the appliance to work more efficiently.

Display will show "UP " during the update process. Do not operate until the update is completed.

### Display Auto Off
Display turns off after 5 seconds in Sleep Mode.
Wake up the display with any button.

## Getting the Most Out of Your Appliance

1. Keep the doors and windows closed when the air purifier is on.
2. Do not block the air openings and keep away from curtains or walls.
3. Maintain and replace the filter on a regular basis for maximum efficiency.

# CONNECTING TO YOUR APPLIANCE

03

Before connecting the appliance to your mobile device, please scan the QR code on the left or go to the app store and search **"DREO"** , then select and download the app.

Download on the App Store

GET IT ON Google Play

Look for "**Smart Air Purifier 539AS**" when connecting your new appliance.

You can use the DREO app to connect your appliance to **Amazon Alexa** or **Google Home**. Please follow the in-app instructions to set up your voice assistant.

*NOTE: You must create a DREO account to access voice assistants.*

1. Launch DREO and sign in or create an account by following in-app instructions.
2. Enable Bluetooth on your mobile device and plug in your appliance.
3. Hold for 5 seconds to start WiFi connection settings.
   (Tip: The WiFi icon will keep flashing when pairing.)
4. Tap + **Add Device** and select **Smart Air Purifier 539AS**.
5. Follow in-app instructions to complete WiFi connection.
6. You're now ready to control the appliance on your app.
   (Tip: To restart connection settings, hold again for 5 seconds)

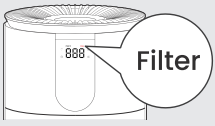

# CLEANING AND MAINTENANCE

04

## Replacing the Filter

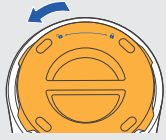

The filter life is measured by the air purifier's algorithm which is based on the working mode, fan speed, run time, and indoor air quality. It's recommended to replace the filter every 6-8 months or when the filter change reminder alerts.

❶

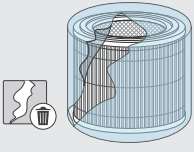

The Filter Change Reminder will flash when the filter needs to be replaced. Turn off and unplug the air purifier.

❷

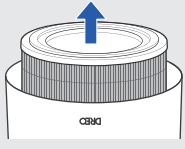

Rotate the bottom cover to unlock then take the cover off.

❸

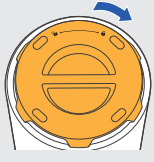

Remove the plastic packaging.

❹

Remove the old filter then put the new filter in place.

❺

Rotate the bottom cover clockwise to lock back in place (You will hear a distinctive sound when locked).

❻

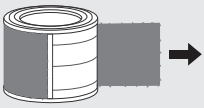

Return to upright position and long press the A for 5 seconds until it beeps, to reset the filter change reminder.

## Replacing the FiberCatch Pre-Filter

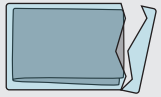

It is recommended to replace the pre-filter once every 1.5 months, depending on actual usage.

1

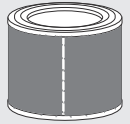

Peel off the old pre-filter.

2

Remove the plastic packaging of the new pre-filter.

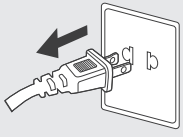

3

Replace with the new pre-filter.

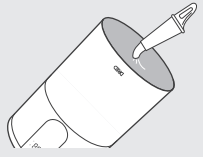

## Cleaning the Inside & Outside

1

Unplug the air purifier before any cleaning and maintenance.

2

Remove the filter and clean the inside with a dust vacuum.

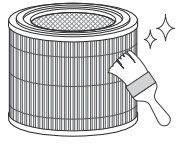

3

Wipe clean the housing with a dry, soft, non-abrasive cloth.

## Cleaning the Filter

- For optimal use, the outer pre-filter can be cleaned with a soft, dry brush once every 2-4 weeks.
- Keep away from water and humid areas. Moisture will allow mold to grow.

# TROUBLESHOOTING 05

## Related to Filter

### Where can I buy a new filter?

Please purchase directly from the DREO official website at **www.dreo.com** or through the DREO app.

### I changed the filter, but the Filter Change Reminder is still on.

The Filter Change Reminder will not automatically reset. Please press and hold the Filter Reset button to reset the reminder, the indicator will turn off after reset.

### The Filter Change Reminder has not turned on for a long period of time.

There are several factors that can impact the filter life, including the indoor air quality level, length of operation and particle density in the air. If your room has a better air quality level and/or you don't use your air purifier often, the reminder will take longer to light up.

## Related to Use

### Why is my air purifier not working?

Check if the power is connected, the power cord is damaged, or the electrical outlet is powered.

## The airflow from my air purifier is too weak.

- Make sure that there is enough space around the air purifier.
- Check if the filter packaging has been removed.
- Fan speed will be low when auto mode is switched on and air quality is good. Try to switch to higher speed.
- Replace the filter if the filter is clogged and overloaded.

## My air purifier doesn't improve the air quality.

- Check if the filter packaging has been removed.
- Make sure the windows are closed as polluted air may continue coming in from outside of the windows.
- The overloaded filter will make the fan work harder to pass the air through. Consider replacing the filter if it is clogged.
- Do not place in crowded areas and corners.
- Check if air outlet and inlet are obstructed.

## Why is my air purifier making a loud noise?

- Switch the air purifier to sleep mode or lower purifying speeds.

## Why is the Air Quality indicator is always red?

- It's recommended to move the appliance to a different location, replug it, and check the indicator light again. If the issue persists, please contact our Customer Support.

## The odor in the room is very strong, but the Air Quality Indicator is only green or blue.

- The Air Quality Sensor detects PM 2.5 particles but cannot detect odors. If you feel that the indoor air odor is relatively strong, it is recommended to manually switch to the highest purifying speed.

## Why is the Air Quality indicator always blue?

- The Air Quality sensor reports the presence of airborne particles, but it cannot detect gas. Please make sure there is no gas contamination inside your room.

## Why is my air purifier making an unusual noise?

- Make sure the air purifier is operating on a flat, stable surface.
- Do not add essential oils or diffusers into the air purifier or use in a excessively humid area. Humidity will cause mold to grow.
- If the unusual noise still exists, there may be external objects blocking the air openings. Please contact our customer support.

## Why does my air purifier produce an unpleasant smell?

- During the initial few days, new air purifiers produce a plastic smell which is normal and will dissipate eventually.
- Do not add essential oils or diffusers into the air purifier or use in a excessively humid area. Humidity will cause mold to grow.
- If the filter has absorbed pollutants to its maximum capacity, then the smell may come from the dirty filter. Please replace the filter when necessary.

If your problem is not listed or still persists, please contact our Customer Support **(see page 10)**
