

Sound card microphone

operating instruction

1、Feature Overview

①Power button ②Mute key ③status hole ④display screen ⑤
chandelier ⑥headset jack ⑦TYPE-C joggle ⑧acceptor

2、direction for use

Set up the live phone:

Setting 1: Turn off Bluetooth on your phone.

Setting 2:

- (1) Huawei/Honor/Xiaomi/Redmi are generally not required to set up these brand phones.
- (2) OPPO series phones:
 1. Default recording device: Set as external device
 2. Before connecting to the receiver each time, turn on the OTG switch on your phone.
- (3) Other brands like VIVO phones:

Before connecting to the receiver each time, turn on the OTG switch on your phone.

This plug-and-play smart sound card microphone requires no app. Ideal for live streaming (live commerce, influencer broadcasts, talent shows), mobile karaoke, earphone recording, and Bluetooth music playback.

The sound card microphone consists of three parts: the sound card microphone, the receiver, and the remote control.

(1) Sound card microphone instructions:

- ① Power button: Long press for 3 seconds to power on or off, short press to switch decorative light mode.
- ② Mute button: Press once to turn off the microphone, then press again to turn it on.
- ③ Status indicator lights: The green light indicates a 2.4G connection (connected to the receiver), with flashing meaning no connection and steady light indicating successful connection. The blue light indicates a Bluetooth connection, with flashing meaning no connection

and steady light indicating successful connection.

④Display: Shows battery level after startup and volume level when adjusting volume.

⑤Decorative lights display: 3 modes available—breathing display, scrolling display, slow light-up, and off.

⑥Headphone jack: Use a 3.5mm headphone jack for monitoring purposes.

⑦Type-C port: For charging and connecting to OTG for live streaming.

(2) Receiver instructions:

After the receiver is powered on and connected successfully, connect it to the phone for wireless live streaming.

1. Switch key: Hold for 3 seconds to power on, or hold for 3 seconds to power off.

2. Light status: The indicator flashes when the sound card microphone is not connected, and stays on after successful pairing (the sound card microphone automatically pairs with the receiver upon startup, ideally both devices should be powered on simultaneously).

3. TYPE-C male connector: Designed for connecting to TYPE-C interface mobile phones.

4. Apple Head Mount: A connector for Apple Head Interface phones.

5. 3.5mm headphone jack: Connect your live-streaming or music-recording phone using a 3.5mm cable.

6. 3.5mm output jack: Connects to external speakers via a 3.5mm cable for external playback.

7. Charging indicator: The red light stays on when charging with a DC5V/2A charger, and turns off when the battery is fully charged.

(3) Remote control instructions:

The remote control is used to operate the microphone on the sound card

and play sound effects.

Key functions

Noise reduction key: Switch between noise reduction levels.

Flashback key: When the microphone is in use, the background music will automatically fade out after enabling the flashback key.

Mode keys: Short press for Original Sound, KTV, Professional, and Voice Change to select different mode functions.

Reverb +/-button: adjusts the microphone's reverb volume.

Music +/-key: adjusts the volume of the accompaniment.

Monitor +/-keys: Adjust headphone volume;

Microphone +/-buttons: Adjust the microphone volume.

Previous/Next key: Adjusts the previous/next track function for Bluetooth accompaniment songs.

Play/Pause button: controls the playback and pause of Bluetooth accompaniment songs.

Internal recording: When using karaoke on your computer, select 'Internal Recording On' to record the original performance. If you choose 'Internal Recording Off', the original performance won't be recorded even if enabled. You can turn this on or off as needed. Note: The mobile accompaniment feature requires no selection.

Turn off the original vocal key: When this option is enabled, the song will mute the vocals.

Special Effects: The product offers various live sound effects. Short press the corresponding button to trigger the sound effect. Select the sound effect based on your needs.

Ear feedback: When enabled during live streaming, you can hear your voice in the live room but not in the monitor headphones. When disabled, your voice is audible in the monitor headphones.

3、Product Parameter

Bluetooth version: V5.3

Bluetooth range: 15 meters (barrier-free)

Wireless transmission: 2.4G

Lithium battery voltage: 3.7V

Charger: DC5V/2A

Charging time: about 3 hours

4、matters need attention

*Do not place the machine in a high-temperature environment, including direct sunlight.

*Do not place the machine near a fire or in an overheated environment.

*Do not place the machine in a damp or overly humid place.

*Do not attempt to charge the device using any other method except the provided charging cable.

*Do not disassemble the machine. Any attempts to repair or modify it are prohibited.

*Please note that falls, impacts, scratches, or any other actions affecting the machine's functionality should be avoided. If any damage occurs, such as overheating, deformation, or corrosion, stop using the product immediately and contact the seller.

5、warn, caution

*If the machine emits an unusual odor, has a temperature higher than normal, or shows abnormal color or shape changes, stop using it immediately and contact the seller or us using the contact information on the warranty card.

*The equipment should not be exposed to water droplets or splashes, and should not be placed on objects such as vases or similar objects filled with liquid.

*This product is not a children's toy. Children under 14 must be accompanied by a parent.

*Using the device at high volume for extended periods may damage your hearing.

6、How to charge

Connect the accessory to the standard 5V output charger using the USB-C charging cable. The display will flash to indicate charging status. When fully charged, the screen will show a 100% battery level.

kindly reminder:

- 1、 Use the DC5V /2A charger to power the device. Charging with a device that outputs excessive voltage may damage or prevent charging.
- 2、 When not in use for a long time, it is recommended to charge the device every 3 months to better protect the battery.
- 3、 When the device has been used for more than 3 months, the battery level indicator may take some time to light up after charging.
- 4、 It is recommended to use the device after it is fully charged.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
