Charging: no action triggered, enter sleep mode after 30 seconds, Bluetooth will disconnect

Low Battery Reminder

When the battery is low, Noddy will only chirp and not move.

In These Cases

Is it moving?

When Noddy's battery is low, it won't move even if triggered. You need to start charging; it will move after being fully charged.

Resting

When the battery is low, Noddy won't respond to any triggers. You need to start charging; it can only be woken up after being fully charged.

It's so

When Noddy overheats, it will chirp to remind you.

Dirty...

Please wipe gently with a towel.

AI Smart Pet Noddy YiNiuNiu

Startup Guide

First Startup

① Take out the included Noddy Energy Nest (Wireless Charging Base). Insert one end of the power cord into the base port, connect the other end to the charging head, and plug into a power source. The Noddy Energy Nest will then be powered on.

② Place the main Noddy unit steadily into the designated groove of the Noddy Energy Nest. Wait until the base indicator light turns orange, which means the device has entered charging mode. Once charging starts and a certain level of battery is reached, the pet will gradually wake up and can respond to touch interactions (such as slight wiggling, making cooing sounds, etc.)

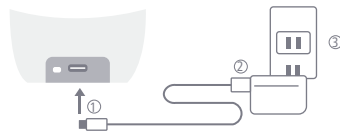

Place belly close to the Noddy Energy Nest
Lightning position ⚡

Charging Precautions

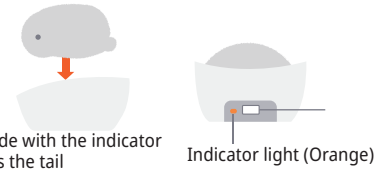

Noddy has a built-in rechargeable battery. Please be sure to charge it according to the following method before first use.

Step 1: Set up the Noddy Energy Nest

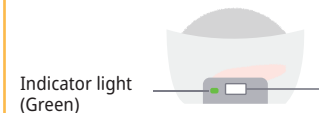

Please connect in the order of Noddy Energy Nest, then the included charging cable. When connected, the indicator light will flash 3 times and then turn pale purple.

Step 2: Set up Noddy

The side with the indicator light is the tail
Please fix Noddy's abdomen on the flat surface inside the Noddy Energy Nest, and move it appropriately to find the position where the indicator light turns orange. Orange indicates charging has started.

Step 3: Charging in Progress

As charging progresses, Noddy will start to activate. When fully charged, the indicator light will turn green. The full charging time is approximately 3.5 hours.
