1) Legs

- Carefully turn the table upside-down onto its tabletop.
- Pull legs so that they are fully extended.
- Push the hinged brace down until it locks in place. This will stabilize the legs and insure that the table will not fold.
- Return the table onto its feet.

2) Optional Undershelf

- Place the undershelf underneath the table, taking note of which end of the undershelf the leg notches are located.
- Raise the end with leg notches upward and hook onto front-to-back crossbracing, as shown in *figure 1*.
- Repeat on remaining end of table, as shown in *figure 2*. Undershelf is now in place.

Removal of Optional Undershelf

- Unhook the end without leg notches and lower, as seen in *figure 1*.
- Unhook the end with leg notches.
- Remove undershelf from under the table.
