

TB2 Desktop Wireless Charger Instruction

1. Product Introduction

TB2 desktop wireless charger is designed for desktop placement, equipped with USB + Type-C dual output ports and comes with a standard USB charging cable. With 5W wireless output, it enables convenient charging for home and office use.

2. Specifications

- Model: MX-668
- Input: 5V $\overline{=}$ 4A
- Wireless Output Power: 5W
- Output Ports: USB + Type-C
- Accessory: 1 $\times$ USB Charging Cable

3. Operation Instructions

- 1). Connect the included USB cable to a 5V/4A power adapter for power supply.
- 2). Wireless Charging: Place wireless-charging-enabled phone flat on the charging pad, charging starts automatically.
- 3). Wired Charging: Plug cable into USB or Type-C port to charge devices; all ports can work simultaneously.

4. ▲ WARNING

- 1). Do not disassemble or modify internal components to avoid short circuit, overheating or fire hazard.
- 2). Keep away from water and damp surroundings. Unplug immediately if soaked and stop usage.
- 3). Do not put coins, keys, magnets or other metal items on the wireless charging area to prevent overheating damage.
- 4). Keep away from children to avoid accidental ingestion, bump injury or electric shock.
- 5). Unplug and discontinue use once the unit overheats, emits strange odor or deforms.
- 6). Only use certified 5V/4A power adapter; non-standard high-power adapters are prohibited.

5. Notes

- 1). Thick metal magnetic phone cases reduce charging efficiency; remove before wireless charging.
- 2). Unplug power when not in long-term use to lower standby power consumption.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 20 centimeters from the device surface at all times. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
