

Car Smart Converter Wireless Carplay Box

User Manual

Please read the manual carefully before use. We recommend keeping this manual for future reference.

Note: Before using this product, please enable WIFI and Siri on your phone! Otherwise, the product cannot be used!

Note: WIFI is prohibited from connecting to any WiFi network!

1. Plug it into the USB or Type-C port in the car for data transfer; it cannot be a USB port that only supports charging.

Use USB Connection

2. The central control screen will automatically switch to the CarPlay interface; for some vehicle models, it is necessary to manually select CarPlay!

3. On your phone, turn on Bluetooth → search for "Carplay_box_****"
→ tap to connect

After Bluetooth is connected, please wait 5 seconds on your phone for the screen to jump/switch.

4.Allow CarPlay to be used

Connect to CarPlay

Your contacts and other information will appear on this car's display without unlocking your iPhone.

Connect

Use CarPlay with "LTT"?

CarPlay automatically connects your iPhone to your car's built-in display, and can access your phone while it is locked.

Not Now

Use CarPlay

If our CarPlay Box shows no display, has delays, freezes, or fails to work in your car, please connect it to the local area network (LAN) to update the CarPlay Box.

Apple System Update

1. Connect to WiFi: carplay_box_xxxx | Password: 12345678
2. On your phone, open the browser and enter 192.168.43.1
3. After entering the interface, click "Check Cloud Version" (to check the cloud version) and then click "Start Download" (to start downloading).
4. After the download is complete, click "Update Firmware" (to update the firmware) and wait for the update to finish.

Android System Update

1. Connect to WiFi: carplay_box_xxxx | Password: 12345678
2. On your phone, open the browser and enter 192.168.43.1
3. After entering the interface, turn on your phone's mobile data, click "Check Cloud Version" (to check the cloud version), and then click "Start Download"
4. Once the download completion is displayed, reconnect to the WiFi:

carplay_box_xxxx, Repeat the operation of the first step.

5. After connecting to the WiFi, click "Update Firmware" (to update the firmware) and wait for the download to complete.

Note: Do not cut off the power during the upgrade! After the upgrade is completed, the product will restart automatically. There is no need to manually plug in or unplug the product, so as to avoid upgrade interruption and system crash caused by incomplete upgrade. After each update and upgrade, the CarPlay logo interface will refresh automatically. This indicates that the upgrade has been completed, and you can use it normally!

Note: If the device still fails to work or your issue is not resolved after the upgrade, please inform us of your in-vehicle infotainment system model (e.g., "BMW 530Li 2017 Model"). We will perform a back end upgrade within 5 working days. After this backend upgrade, please upgrade the CarPlay Box again, and it will be ready for use!

Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

NOTE: This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
