

Instructions for Use

Before using the device, please read the following safety information to ensure safe and proper use.

Do not disassemble or modify this equipment on your own.

Avoid subjecting the device to severe shaking, physical impact, or compression.

Keep foreign objects such as liquids or metals from entering the equipment.

Keep the equipment dry and do not use it outdoors during thunderstorms.

Avoid placing the product in harsh environments such as high humidity, dust, heat sources, and direct sunlight. Store the device in a cool, dry place.

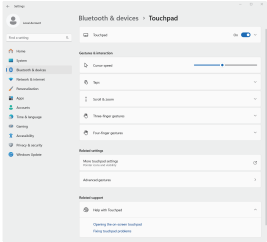

Use only chargers and accessories approved by the manufacturer.

Avoid using volatile cleaning products such as alcohol, benzene, or solvents to prevent damage and malfunction.

Disassembling or replacing parts and batteries on your own may pose a risk of electric shock and explosion.

This device is not recommended for use by minors under 13 years old. When minors under 13 or elderly individuals over 65 use it, guardians should monitor their usage and ensure intermittent use and rest.

Common Operations of Touchpad

Touchpad Presets

Open [Settings] > [Bluetooth & other devices] > [Touchpad] to configure presets or customize gestures.

Default General Operations:

Single-finger operation: Single-finger tap equals a left mouse click.

Double-finger tap: Equivalent to a right mouse click.

Double-finger swipe (up or down): Simulates mouse scroll wheel function.

Double-finger spread or pinch: Zooms in or out of the page.

Three-finger tap: Opens the "Search" page.

Three-finger swipe (left or right): Quickly switch between applications.

Three-finger swipe (up): Opens the task view.

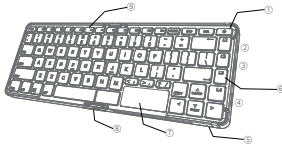

Three-finger swipe (down): Returns to the desktop.

Four-finger operation: Swipe left or right to switch desktops, tap to open the "Notification Center".

LingLong Product Manual

Make sure the device is turned off or in sleep mode before storing it.
Otherwise, prolonged exposure to a sealed environment may cause the device to overheat and result in irreversible hardware damage.

Before using the product for the first time,
please read this manual carefully and keep it in a safe place.

Federal Communication Commission Interference Statement

FCC ID: 2BVCU-LL1

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

Radiation Exposure Statement:

This device meets the government's requirements for exposure to radio waves. This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. Tests for SAR are conducted using standard operating positions (0mm) accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands.
