

iMeshing APP instruction manual

1. Software overview

1.1 Overview

iMeshing is a mobile APP that allows you to control your lighting and fan lighting devices with your iPhone or Android phone.

The color temperature, brightness and the gear of the fan light can be controlled through the mobile phone APP, and different modes can be set. Just keep the lights or fan lights powered on, open the pool iMeshing APP, and synchronize the Settings and controls of multiple devices by pairing one or more devices. The operation is very simple, easy to learn and use!

1.2 Functions

- With one device name, multiple devices can be controlled synchronously;
- In different rooms, different devices in the room can be individually controlled.

1.3 Performance

iMeshing APP has good usability and compatibility, hundreds of mobile phone actual test verification, compatible with most of the current market smart phones. The APP is small and convenient, occupies less system resources, and has low requirements for mobile phone configuration. The control delay is small, the operation feel is good, and the iMeshing visual feeling is smooth.

2. Running environment

This APP requires Android 4.3 and iOS 8.0 or above. Mobile phone configuration is unlimited.
