

Bluetooth Ergonomic Keyboard w/Nano Receiver

USER'S GUIDE

Ver.:1.00

CAUTION: To use this product properly, please read the user's guide before installation

Federal Communication Commission Interference Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Caution: Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate this equipment.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Radiation Exposure Statement:

The product comply with the FCC portable RF exposure limit set forth for an uncontrolled environment and are safe for intended operation as described in this manual. The further RF exposure reduction can be achieved if the product can be kept as far as possible from the user body or set the device to lower output power if such function is available.

Functional Introduction

1. Key Function (* compound key, Press with Fn key)			
Keys	Mac	Win	Key Function
	Brightness-	Brightness-	Decrease display brightness
	Brightness+	Brightness+	Increase display brightness
	Previous	Previous	Switch to the previous media track
	Play / Pause	Play / Pause	Switch between playing and pausing media
	Next	Next	Switch to the next media track
	Mute	Mute	Mute (turns off) the computer's sound
	Volume down (Voice-)	Volume down (Voice-)	Decrease the computer's sound volume.
	Volume up (Voice+)	Volume up (Voice+)	Increase the computer's sound volume.
	/	Homepage (www/e)	Start the default Web browser and loads the home Web page
	/	Outlook(E-mail) →Default	Start the default e-mail program
	/	My Computer	My Computer
	/	Favorites	Open My favorite after into Internet browser application
2	FnLock	FN Lock	
3		Switching Between Win / Mac Systems

LED1	1	Nums lock : White LED
LED2	A	Cap lock : White LED
LED3	  	Low battery Warning : Red LED 2.4G : Purple LED BT1 : Blue LED BT2 : Green LED

Battery and Power Management:

Step 1: Take the battery cover off.

Step 2: Insert the battery as shown inside the battery compartment.

1

2

Step 3: Replace the cover.

Step 4: Turn on power switch

****Warning:**

*Please insert the battery with the correct position according to the instruction labeled on the mouse & Keyboard.

Switch Connection Channel

Connect via USB nano receiver

2.4G Mode – Purple LED

1. Insert the battery into the keyboard, then follow the steps below.

2. In the meantime, to open the cover under the keyboard, take the nano receiver out.

3. Plug the Nano receiver into the USB A port on your computer.
4. Once press 2.4G button 2.4G and switch to 2.4 G mode(Purple light flashes), plug the receiver then connect successfully.

*2.4G Mode

Purple LED Blinking

Pairing(LED OFF when paired or failed after 10 Sec)

Red LED Blinking for 10 Sec

Low battery Warning

5. If pairing is not successful, the LED blinks for 5 seconds and then turns off. Once pairing is successful, the LED turns off immediately.

6. Power On:

When powered on without the receiver inserted, the LED will blink slowly for 5 seconds.

When powered on with the receiver inserted, the LED will remain steadily lit for 2 seconds.

Connect via Bluetooth in windows

Bluetooth Mode

Once press the BT1  / BT2  button and switch to bluetooth mode (Blue or Green light flashes), press the BT1/BT2 button for 3s, indication will flash rapidly. Pairing name of "ST63682-1 or ST63682-2" will appear in the bluetooth searching, press "pair" to connect.

1. On your PC, select Start  > Settings  > Bluetooth & devices 
> Turn on Bluetooth > Add device > Bluetooth.
2. Mouse switch to BT mode and press Connect Button.
3. Find "ST63682-1 or ST63682-2" and press connect.

Swift pair

On your PC, select Start  > Settings  > Bluetooth & devices  > View more devices > Turn on the Show notifications to connect using Swift Pair.

2. Mouse switch to BT mode and press Connect Button.
3. Windows will show a notification " [ST63682-1 or ST63682-2](#)" and Selecting "Connect" starts pairing.

Connect via Bluetooth in Mac

1. Click on "Apple menu" (top left corner of your screen).
2. Go to System Preferences-> Bluetooth-> Turn Bluetooth on to set up Bluetooth device and find " [ST63682-1 or ST63682-2](#)" press connect.

* Bluetooth 1 Mode

Blue LED Blinking

Pairing(LED OFF when paired or failed after 10 Sec)

Red LED Blinking for 10 Sec

Low battery Warning

* Bluetooth 2 Mode

Green LED Blinking

Pairing(LED OFF when paired or failed after 10 Sec)

Red LED Blinking for 10 Sec

Low battery Warning

Reset USB receiver connection

Mouse and keyboard are not working on USB receiver ?

Make sure both keyboard and mouse are powered on and the channels are set to (). Make sure USB receiver is securely plugged into a USB port, or try different USB ports. If it is plugged into a USB hub, plug it directly into a USB port on your computer.

Reset Bluetooth connection

Mouse and keyboard are not working on Bluetooth?

Make sure both keyboard and mouse are powered on and the channels are set to (or). Make sure to turn on Bluetooth function on your computer. Set them in pairing mode, find them on the pairing list on your computer and complete the pairing.

Note:

Under Bluetooth connection, mouse and keyboard should automatically reconnect to their last connected computer, if it is not, you can always re-pair again.

Power saving features:

To conserve the battery power, the mouse offers power management functions as below:

The mouse goes into “Saving Mode” after inactivity. There may be a slight delay while the mouse re-establishes Bluetooth connection from power saving or sleeping mode.

Establishing a Bluetooth Connection

The Bluetooth mouse can work in any Bluetooth environment. Before connecting your Bluetooth mouse with your computer, make sure your computer has a working Bluetooth configuration with Human Interface

Device (HID) profile. If your computer does not support Bluetooth, you need to obtain and install a commercially available Bluetooth dongle which converts your computer to a Bluetooth environment.

Troubleshooting

A. Mouse does not work upon installation or is not detected

Try one or more of the following:

- Make sure the batteries are installed correctly and turn the switch on. Replace a fresh set of batteries if it still does not work.
- Verify that the computer is Bluetooth enabled.
- Press the connection button to reset the Bluetooth connection between your mouse and your computer. Make sure it has been detected by the Operating Systems properly.

B. The screen cursor does not move properly

If your screen cursor lags behind the movement, then your Bluetooth connection may not be able to transmit all of the data from the mouse with the necessary speed. This may be caused by interference from other radio sources, obstructions in the radio wave path, excessive distance from the computer, or a combination of the above.

✖ Try the following actions to improve your Bluetooth connection and optimize your mouse performance:

- Remove any metallic objects from the line of sight between your computer and the Bluetooth mouse.
- If you are using a computer with a built-in Bluetooth antenna, try reorienting the computer until you get a better data rate.
- If you are using a Bluetooth dongle, use a USB extension cable and place the Bluetooth dongle onto your desktop or somewhere in sight of your Bluetooth mouse.
- Move the mouse closer to your Bluetooth dongle.
- Turn off the mouse and turn it on again for better connection.
- Disconnect any Bluetooth audio devices, such as headsets, that may be

connected to your computer.

Switch off any other devices operating in the 2.4 GHz radio spectrum, such as Wi-Fi network, mobile telephones, etc., or move their antennas further away from your computer.
