

# Wireless Microphone

## User Manual

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must

accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction

## Introduction

Thanks for choosing our product.

This product is a smart wireless microphone that provides professional-grade recording output. Plug and play, no app required. Multiple uses: It can be used in online live broadcast, video Vlog shooting, program interview, recording, video teaching and other occasions.

This product consists of three parts: charging box, microphone transmitter and receiver (as shown in the figure below, some models have no charging box, Based on the actual object )

Charging box

Microphone transmitter

Receiver

## ID Diagram

- ① Windproof Net
- ② Indicator light
- ③ Battery Level Display
- ④ Switch key
- ⑤ Microphone clip
- ⑥ port to connect phone
- ⑦ port of receiver
- ⑧ Indicator light
- ⑨ Charging box indicator
- ⑩ Charging box Type-C charging port

## How to use

Step 1: Long press the power button on the microphone, and the connection indicator light will flash, indicating successful power on.

Step 2: Connect one end of the receiving end to the phone interface.

Step 3: The indicator light for the connection between the receiver and transmitter remains on, indicating a successful connection. Open the camera live streaming app on your phone and use the microphone to listen.

Switch key

Indicator light always on

Note: oppo / vivo / iqoo / realm brand mobile phones can be used normally only when they go to the settings (search "OTG" - turn on OTG power supply)

## About UI

### Microphone Transmitter

| Function        | Button                                                           | LED                                                                                                        |
|-----------------|------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------|
| Power on        | Long press the 2S power button/ Take it out of the charging case | The green light remains on                                                                                 |
| Power off       | Long press the 2S power button/ Place it in the charging dock    | All lights are off                                                                                         |
| Noise reduction | AI noise reduction                                               | The green light stays on constantly.                                                                       |
| Reverberation   | Double-click the power button                                    | Open: Connect green light for breathing and flashing;<br>Off: Restore the current indicator light to be on |
| Charging        |                                                                  | When charging, the battery light is always red and on, while the fully charged light is off                |
| Low electricity |                                                                  | The battery level is below 20%, and the red light flashes slowly                                           |

Note: By default, noise reduction is turned on and reverberation is turned off when turned on;

### Receiver

| Function             | Operate | LED                                                                   |
|----------------------|---------|-----------------------------------------------------------------------|
| Not connected        |         | Two green lights flashing                                             |
