INSTRUCTION

DOUMAO DiMi

INSTRUCTIONS

Device Start-up:

Press and hold the power button for 3 seconds. The indicator light will turn on, indicating that the device has started successfully.

Device Upgrade:

Tap the device screen, select Firmware Upgrade in System Settings, and the upgrade will be completed immediately.

Charging Instructions:

Please use a Type-C charger and the original data cable for charging.

Open your phone, search for and access the "DouMax AI" Mini Program Select "DouMax QIM" to enter, tap "Add D-device" enter the device ID# and verification code, then tap "Confirm" to complete device binding.

DouMax AI Mini Program

3. After binding, wait for the DK announcement to play on the screen. At the same time, the device will announce: "Network connected. You can wake me up by saying 'DouDouDou DouDou' to interact with me." The device is now ready for normal use.

4. The device defaults to 4G mobile network. If users need to switch to Wi-Fi, they can select Wi-Fi in the device settings and follow the prompts to complete the switch.

① Wi-Fi Mode --> 4G Mode

Enter the device settings interface, find and turn on the "Mobile Network" switch.

The system will pop up a prompt "Switching network mode requires restarting the device." Tap "Confirm".

Wait for the device to restart. After restarting, the 4G mobile network will take effect.

4. 以上为示例图

Method 1:

Open the device page in the corresponding Mini Program, tap **My Network** on the left sidebar and tap **Mobile Network** to enter the network configuration.

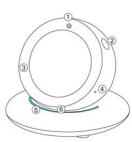

Method 2:

On the phone's WiFi page, scan the QR code displayed on the screen. You will be redirected to the Mini Program, then follow the prompts to complete the network configuration.

Notes:

- The device defaults to 4G mobile network out of the factory and can be used directly after binding.
- To configure a WiFi network, go to **More Settings** to perform the setup.
- Only one of 4G or WiFi can be used at a time. Switching between modes requires a restart before the configuration takes effect.
- The verification code can be found on the label on the back of the packaging box.

BUTTON INSTRUCTION

The diagram shows two views of a smart ring. The top view is a circle with 12 numbered points: 1 (top), 2 (top-right), 3 (left), 4 (bottom-right), 5 (bottom), 6 (bottom-left), 7 (top-left), and 8 (top). A blue band is shown around the ring. The bottom view shows the underside of the ring with 4 numbered points: 9 (top), 10 (top-left), 11 (bottom-left), and 12 (bottom-right). A blue band is also shown around the ring.

COMMON PROBLEM

1. Device fails to charge
Solution: Please use a 3C-certified charger. The charging port is a standard Type-C port.
2. Device fails to power on
Solution: Please check whether DouMiao DIMI has power or is connected to a power supply, and verify that the power button is not stuck.
3. Device fails to connect to the network
Solution: Check if your home network is working properly. If it is, please reconfigure the network (refer to the network configuration process).
4. Inaccurate content recommendations
Solution: Try switching to a different character — the platform provides a large selection of characters. Please also submit your feedback to us.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
