Fault Diagnosis

Fault	Solution
Cannot reduce noise	Make sure controller switch is power on. Working light keeps lighting. Power run out, should recharge.
Noise cancelling effect not good	Covered the whole ear by headphone cap, the band on top of head.
Do not work	Run out power, should charging on time. Bad connect caused by oxidized or pollution on 3.5mm jack 3.5mmjack haven't totally insert the audio port

Remarks

The is professional ANC music headphone, which is special design for reduce 50-1000Hz low frequency noise, so will have limited effect to reduce shrilled high frequency noise.
Initial use effect will be a bit different to the sample headphone in our exclusive shop, because samples are already pass warm up process. The new headphone will give play to proper sound effect after 2-3 month warm up.
