

NM2 PRO

User Manual

Congratulations on purchasing the flagship NU31 NM2 Pro mouse!

This ergonomic gaming mouse features top-tier hardware, a comfortable shape, and the latest PixArt PAW3950 gaming sensor. The NM2 Pro supports a polling rate of up to 8000 Hz, while the main buttons use F1 optical switches rated for 100 million clicks.

We believe high-quality gaming devices should be accessible to everyone, and that new technology should be for the masses. With the NM2 Pro, we've aimed to balance quality, performance, and affordability.

We're sure you'll enjoy using this device. If you have any questions or run into any issues, feel free to reach out to us at nubi.gg — we're here to help.

Thank you for your trust!

FCC Statement

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

RF Exposure Information

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
