TALLAC DISHWASHERS

www.zlinekitchen.com

ZLINE Kitchen and Bath provides Attainable Luxury, where the kitchen and bath of your dreams is never out of reach. Through our unique designs and unparalleled quality, we're dedicated to providing you an elevated experience in the heart of your home. With an endless selection of features and finishes, our inspiration is your reality.

ZLINE is fueled by a passion for innovation; A relentless pursuit of bringing the highest end luxury designs and professional features into everyone's homes. Because we continually strive to improve our products, we may change specifications and designs without prior notice.

⚠ WARNING: This product can expose you to chemicals including nickel, which is known to the State of California to cause cancer. For more information, go to www.P65Warnings.ca.gov.

ZLINE
ATTAINABLE **LUXURY**®

WARRANTY

COVERAGE

ZLINE Kitchen and Bath dishwashers parts will be warrantied for one year from the original purchase date for the original purchaser of the product.

TERMS

This warranty applies only to the original purchaser of the product installed for normal residential use. This is defined as a single-family, residential dwelling in a non-commercial setting. Commercial settings include but are not limited to: schools, churches, hotels, restaurants, vacation rentals such as Airbnb, day care centers, private clubs, fire stations, common areas in multi-family dwellings, nursing homes, food service locations, and institutional food service locations such as hospitals or correction facilities. This warranty is non-transferable and will not be extended based on the date of installation. The warranty applies only to products installed in the continental United States and the District of Columbia. Warranty shall not apply and ZLINE Kitchen and Bath is not responsible for damage resulting from negligence, improper maintenance, misuse, abuse, alteration of or tampering with the appliance, accident, natural disaster, improper electric supply, unauthorized service or repair, improper installation, or installation not in accordance with the instructions contained in the manual or the local codes.

WHAT IS NOT COVERED

1. Installation or start-up damages or problems caused by improper installation or use.
2. Damage related to unauthorized service or unauthorized parts.
3. Installation in any commercial or non-residential application.
4. Aesthetic damage, scratches, or natural wear caused by normal use.
5. Second-hand, open box products, or products purchased from an unauthorized retailer.

SAFETY INSTRUCTIONS

To prevent accidents, which could cause serious injury or death, as well as dishwasher damage, read these instructions before installation and/or use.

When using the dishwasher, carefully follow the precautions in this manual. These are provided in order to save time and effort and to help ensure optimum dishwasher performance. Be sure to observe all listed warnings and cautions. Look carefully at **WARNING** icons with an exclamation mark inside.

WARNING:

Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

CAUTION:

Indicates a potentially hazardous situation which, if not avoided, may result in injury. It may also be used to alert against unsafe practices.

NOTICE:

Indicates a potentially hazardous situation which, if not avoided, may result in damage to the dishwasher, the tableware, the equipment, or the environment.

SAFETY INSTRUCTIONS

Read these installation instructions completely before installing and follow them carefully. Save these installation instructions and pass them on to any future user.

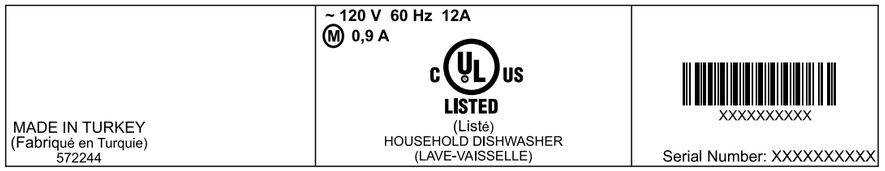

- In addition to these instructions, the dishwasher shall be installed:
    - In accordance with all local codes or, in absence of a local code,
    - In the United States, with the National Electric Code,
    - In Canada, with the Canadian Electric Code C22.1-latest edition/ Provincial and Municipal codes and/or local codes.

When installing the dishwasher, follow basic precautions, including the following:

- Please check the standards and local codes for placement of dishwasher.
- Installation and repair should be performed by a qualified installer: an insured licensed plumber, contractor, or trained installer. Installation performed by persons other than this could result in improper installation and property damage. Work by unqualified persons could be dangerous and will void the warranty.
- The information in this user manual must be followed to minimize the risk of fire or explosion and to prevent property damage, personal injury, or loss of life.
- To reduce the risk of electric shock, fire, or injury to persons, the installer must ensure that the dishwasher is completely enclosed at the time of installation.
- Never connect the ground wire to gas lines, or hot water pipes, plumbing lines.
- Only connect the dishwasher to the power supply when all installation and plumbing work is complete.
- Before installation or service, disconnect the power supply to the work area by unplugging the unit, “tripping” the circuit breaker or removing the fuse.
- If the dishwasher is installed in a location that experiences freezing temperatures (e.g. in a vacation home, cabin, etc.), drain all the water from the dishwasher’s interior. Water system ruptures that occur as a result of freezing are not covered by warranty.
- Dishwasher must be secured to adjacent cabinetry using the brackets provided. Failure to do this may cause damage to property or bodily injury.

SAFETY INSTRUCTIONS

- Ensure that any plastic wrappings, bags, small pieces etc. are disposed of safely and kept out of the reach of children. Danger of suffocation!
- Remove the door to the washing compartment when removing an old dishwasher from service or discarding it. Ensure that the appliance presents no danger to children while being stored for disposal. The dishwasher drain hose must be installed with a drain loop at least 28” off the cabinet floor. Otherwise the dishwasher may not drain properly.
- This dishwasher is intended for residential use only and should not be used in commercial establishments. This appliance is not applicable for outdoor usage. The manufacturer disclaims responsibility for damage or injury caused by improper use of this appliance.
- Do not operate the appliance if damaged, malfunctioning, partially disassembled, or if it has missing or broken parts.
- New installation - If the dishwasher is a new installation, most of the work must be done before the dishwasher is moved into place.
- Replacement - If the dishwasher is replacing another dishwasher, check the existing dishwasher connections for compatibility with the new dishwasher, and replace parts as necessary.
- Old appliances may contain materials that can be recycled. Please contact the local recycling authority about the possibility of recycling these materials.
- Use only detergents or wetting agents recommended for use in a dishwasher and keep them out of the reach of children.
- The model and serial number information on the label are located on the right-hand side of the inner door of the dishwasher.

SAFETY INSTRUCTIONS

- When loading items to be washed:
    - Locate sharp items so that they are not likely to damage the door seal.
    - Load sharp knives with the handles up to reduce the risk of type injuries.
- Do not wash plastic items unless they are marked “dishwasher safe”or the equivalent. For plastic items not marked, check the manufacturer’s recommendations.
- Do not touch the heating element during or immediately after use.
- Do not operate the dishwasher unless all enclosure panels are properly in place.
- Do not tamper with controls.
- Do not abuse, sit on, or stand on the door or dish rack of the dishwasher.
- The cup racks are designed to support cups, glasses, and kitchen utensils. When the cup racks are in the dishwasher, do not lean on or use the cup racks to support your body weight.
- Some dishwasher detergents are strongly alkaline. They can be extremely dangerous if swallowed. Avoid contact with the skin and eyes and keep children away from the dishwasher when the door is open.
- Consult a doctor immediately if detergent has been swallowed or inhaled.
- Do not remove the dishes from the appliance until the program is complete. Some detergent may remain on the dishes.
- Check that the detergent dispenser is empty after the completion of each wash program.
- Do not drink and play with the water in the appliance. Harmful residues could be present.
- To reduce the risk of injury, do not allow children to play in or on the dishwasher.
- Do not leave the appliance with the open door unattended to avoid stepping accidentally onto it.
- Do not use high pressure water sprays and/or steam to clean the appliance.
- Ensure that there are no visible water leaks during and after the first use of the appliance.
- To avoid floor damage and possible mold growth, do not allow wet areas to remain around or under the dishwasher.

SAFETY INSTRUCTIONS

- RISK OF INJURY: To avoid risk of injury, always use caution when opening the door during or following a wash cycle as hot water or steam may escape.
- Do not store or use flammable liquids or vapors in the area of the dishwasher, near or on the appliance.
- Under certain conditions, hydrogen gas may be produced in a hot-water system that has not been used for two weeks or more. HYDROGEN GAS IS EXPLOSIVE. If the hot-water system has not been used for such a period, before using the dishwasher, turn on all hot-water faucets and let the water flow from each for several minutes. This will release any accumulated hydrogen gas. As the gas is flammable, do not smoke or use an open flame during this time.
- Please check the water supply line periodically. It is susceptible to breakage. It becomes less flexible as time goes by. Replace it immediately when it is torn, cut, swollen, or there is water leakage.
- Please keep the dishwasher package out of the reach of children after unpacking it.

RECYCLING

- Old appliances may contain materials that can be recycled. Please contact the local recycling authority about the possibility of recycling these materials.
- Remove the door to the washing compartment when removing an old dishwasher from service or discarding it. Ensure that the appliance presents no danger to children while being stored for disposal. Before disposing the dishwasher:
    - Disconnect the appliance from the main supply.
    - Cut off the main cable and discard it.
    - Remove the door catch to prevent children and pets from getting trapped in the appliance.

BEFORE INSTALLATION

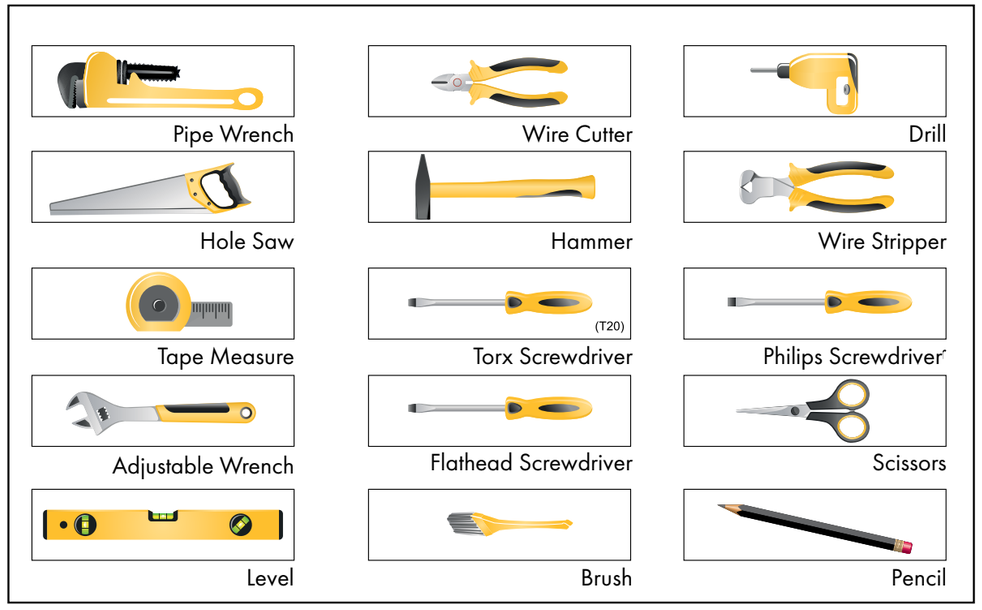

- Connect to a properly rated, protected, and sized power supply circuit to avoid electrical overload.
- The dishwasher is designed for an electrical supply of 120 V (volts), 60 Hz (hertz), AC, connected to a dishwasher-dedicated, properly grounded, electrical circuit with a fuse or breakers rated for 15 amperes.
- Do not use any extension cord or portable outlet device to connect the dishwasher to a power supply.
- This appliance must be electrically grounded. In the event of a malfunction or breakdown, grounding will reduce the risk of electric shock by providing a path of least resistance for electric current. This appliance is equipped with a cord having an equipment-grounding conductor and a grounding plug. The plug must be plugged into an appropriate outlet that is installed and grounded in accordance with all local codes and ordinances.

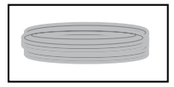

WARNING: Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service representative if there is doubt whether the appliance is properly grounded. Do not modify the plug provided with the appliance. If it will not fit the outlet, have a proper outlet installed by a qualified electrician.

BEFORE INSTALLATION

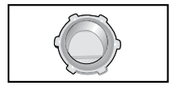

Tools which may be needed:

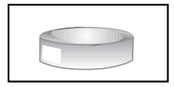

Materials which may be needed:
(Additional materials may be required to comply with local codes)

Hot Water Supply Line - Minimum 3/4" O.D. copper tubing or metal braided dishwasher supply line.

UL listed conduit connector or strain relief.

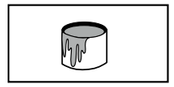

Teflon tape or other pipe thread compound to seal plumbing connections.

Shut-off valve and fittings appropriate for hot water supply line (copper tubing/compression fitting, or braided hose).

Silicone

Glue

BEFORE INSTALLATION

The parts required for positioning the dishwasher are in plastic bags. Check that all of the following parts are contained in plastic bags.

MANUAL BAG

The dishwasher comes with a manual bag containing the product manual.

DISHWASHER PARTS BAG 1

a. Hose Clamp

DISHWASHER PARTS BAG 2

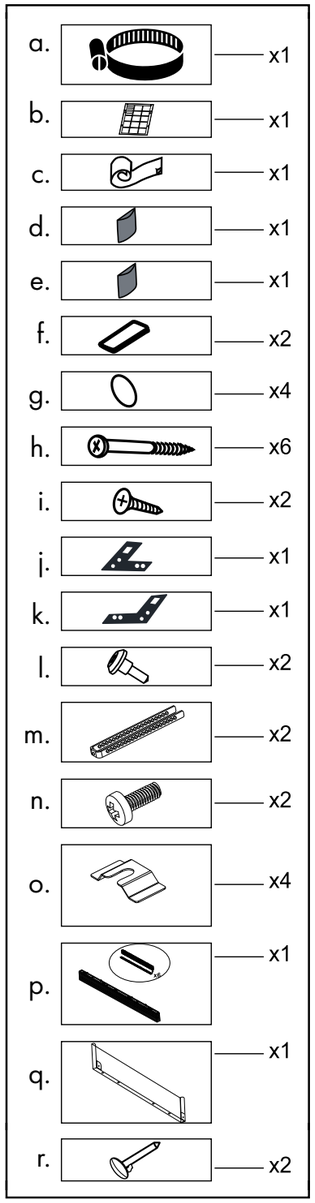

b. Mounted plan
c. Steam Protection Foil
d. Side Trim Strips (Left)
e. Side Trim Strips (Right)
f. Door Fixing Strips
g. Hole Covers

DISHWASHER PARTS BAG 3

h. Screws Ø 5/32″ x 53/32″
i. Screws Ø 5/32″ x 19/32″
j. Mounting Bracket Left
k. Mounting Bracket Right
l. Screws Ø 5/32″ x 27/32″

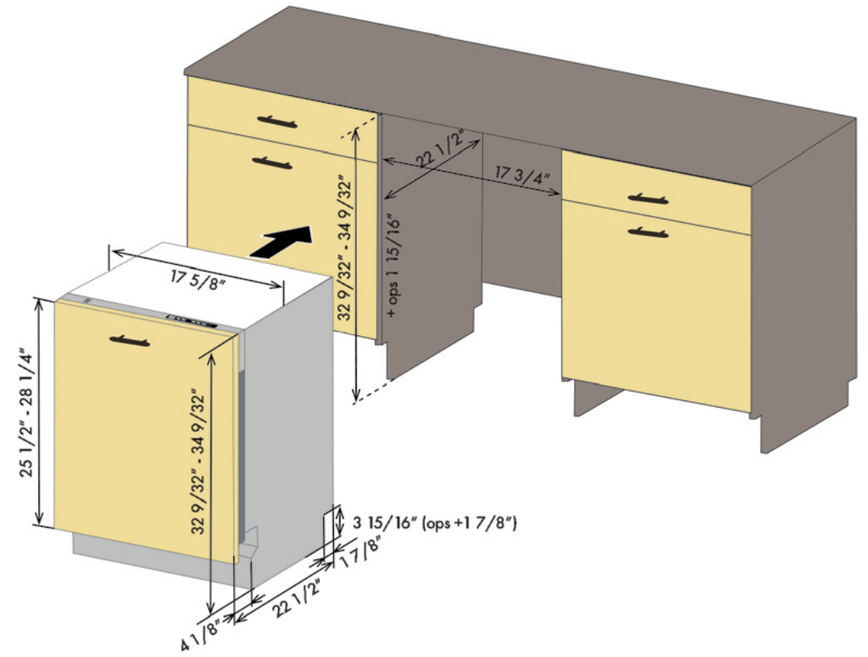

DISHWASHER PARTS BAG 4

m. Kick Plate Bracket
n. Screws Ø 5/32″ x 7/32″
o. U-Clip
p. Adjustable Plinth Cover
q. Adjustable Bracket Metal
r. Stopper Pin

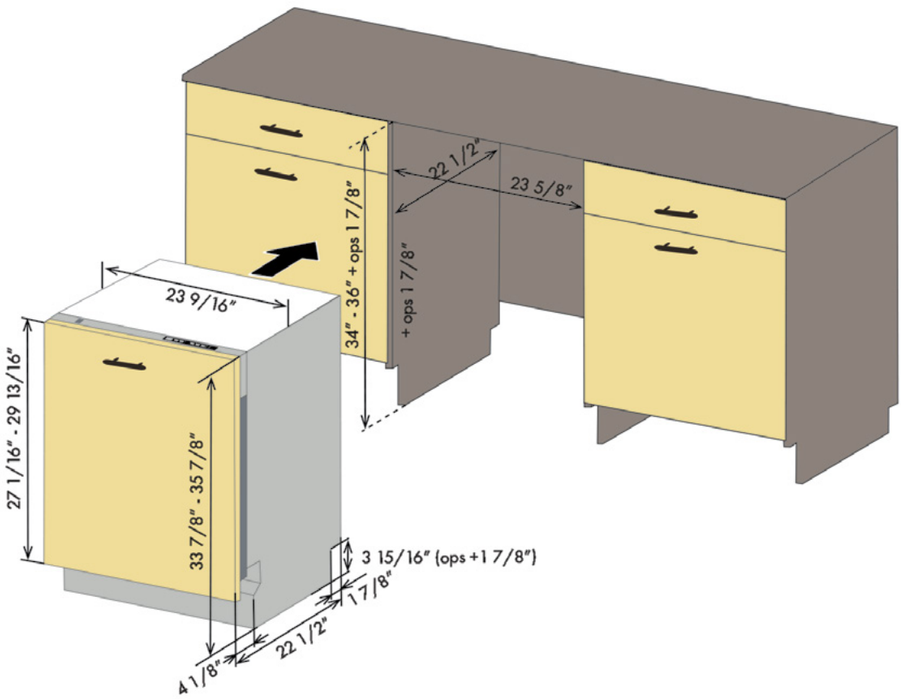

BEFORE INSTALLATION

18″

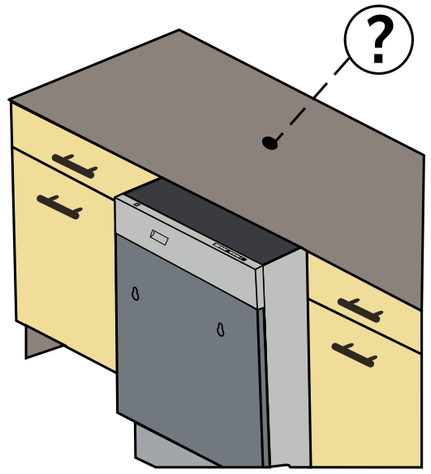

24″

INSTALLATION

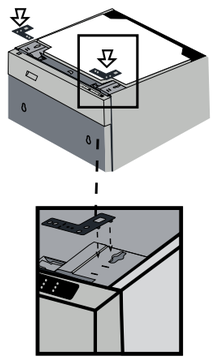

The mounting brackets in the plastic bag should be used when the dishwasher is installed in the cabinetry. Use of any parts other than mounting brackets may result in damage to property or bodily injury.

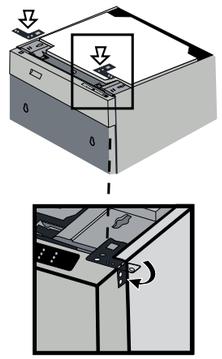

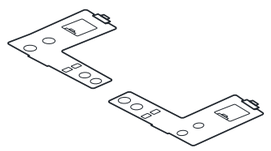

If the material (wood) under the countertop can be drilled or screws mounted into, align the brackets in this manner.

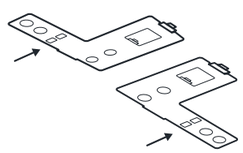

If the material (granite, slate, stone, etc) of the countertop can not be easily drilled or screws mounted to, align the brackets in this manner.

Place the two mounting brackets into the top corner of the dishwasher.

Bend brackets at arrows to mount to side of cabinets

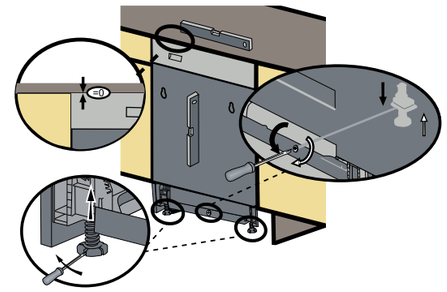

INSTALLATION

ADJUSTING HEIGHT

1. Before the dishwasher is placed into the cabinetry, the front legs will be completely retracted. Place into the cabinetry.
2. Adjust the leg level with a flathead screwdriver to stabilize the dishwasher and raise it to the enclosure height.
3. Adjust the back leg level with a Philips screwdriver to balance and raise the dishwasher to the enclosure height.
4. Make sure the dishwasher is plumb. The dishwasher can be positioned with a small clearance under the counter top.

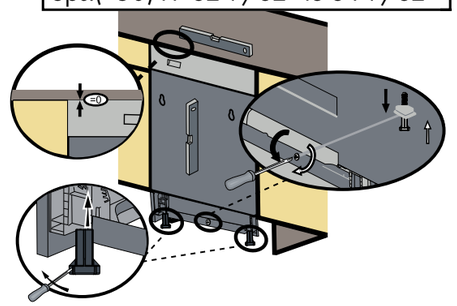

- For front legs, turn the legs in the direction of the black arrows with a flathead screwdriver to allow for the dishwasher to move downwards.
- To adjust the rear leg, using a flathead screwdriver, turn the height adjustment screw in the middle of the lower front panel as shown in the image. Turning the screw counter-clockwise (in the direction of the black arrow) will lower the rear dishwasher foot down. Turning the screw clockwise will raise the rear dishwasher foot.

18"

If the height of the enclosure is 32 9/32" to 34 9/32", use short supports as shown in the figure.

ops.(+50) H=32 9/32" to 34 9/32"

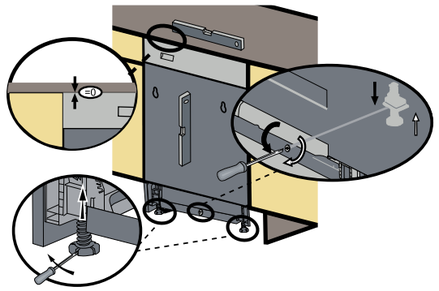

If the height of the enclosure is above 32 9/32", use long supports as shown in the figure.

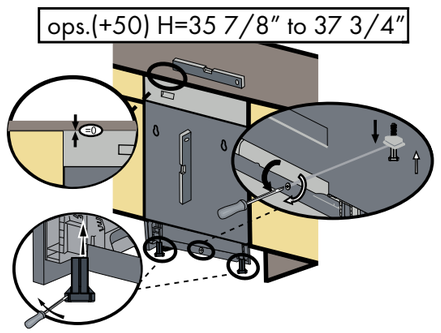

INSTALLATION

24"

If the height of the enclosure is 33 7/8" to 35 7/8", use short supports as shown in the figure.

If the height of the enclosure is above 35 7/8", use long supports as shown in the figure.

Using a level, be sure to check the dishwasher is level front to back and square to the floor and countertop.

INSTALLATION

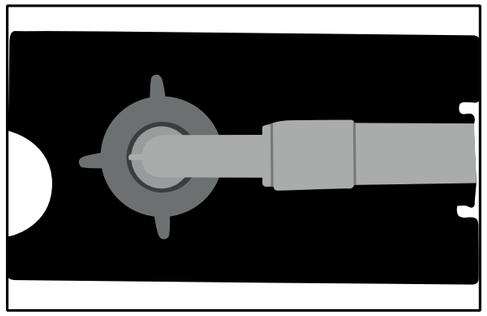

WATER SUPPLY CONNECTION

Water supply may be connected to the dishwasher in one of two ways:

- With metal braided hose.
- With copper tubing

Braided Hose/Copper Tubing

- After connections are made, turn on the water supply to check for leaks.
- Hot water supply line: Use minimum 3/4" O.D. copper tubing or metal braided dishwasher supply line.
- Water Inlet valve of dishwasher has 3/4"-11.5NH inlet coupling thread dimension according to ASME B1.20.7-1991.
- When buying a water inlet hose for the dishwasher, please choose the thread dimension of the inlet hose that is compatible with the indicated water inlet valve inlet coupling thread dimension (3/4"-11.5NH) of the dishwasher.
- Temperatures required for soldering and sweating will damage the dishwasher's water inlet valve, so if any such operation is needed, keep the heat source min. 77/8" away from the dishwasher's water inlet valve.
- There should not be any sharp bends in the water line that may restrict the water flow.
- Teflon tape or pipe thread compound must be used for sealing the connection. Before connecting the copper water supply line to the dishwasher, flush it with hot water to clear any foreign material.

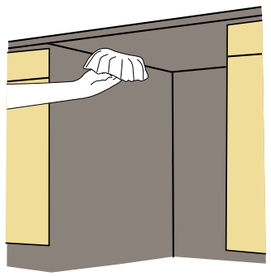

INSTALLATION

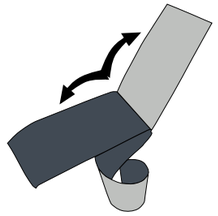

STEAM PROTECTION FOIL

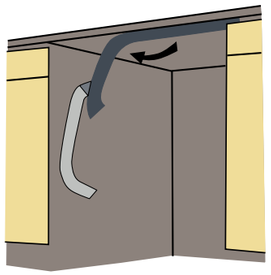

Steam will be output when the dishwasher door is opened during the operation of the dishwasher and after completion of the working cycle. In order to prevent the resulting steam from collecting and damaging at the underside of the counter top, use a steam protection foil included in the plastic bag.

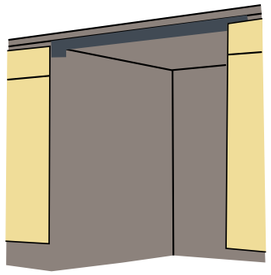

Fitting the Protection Foil

Clean the surface with a damp cloth before applying steam protection to the underside of the countertop.

CAUTION

CAUTION: Steam protection foil must be applied where the steam escapes when door is first opened. Failure to install the steam protection foil during installation can lead to damage to the cabinets and countertop.

INSTALLATION

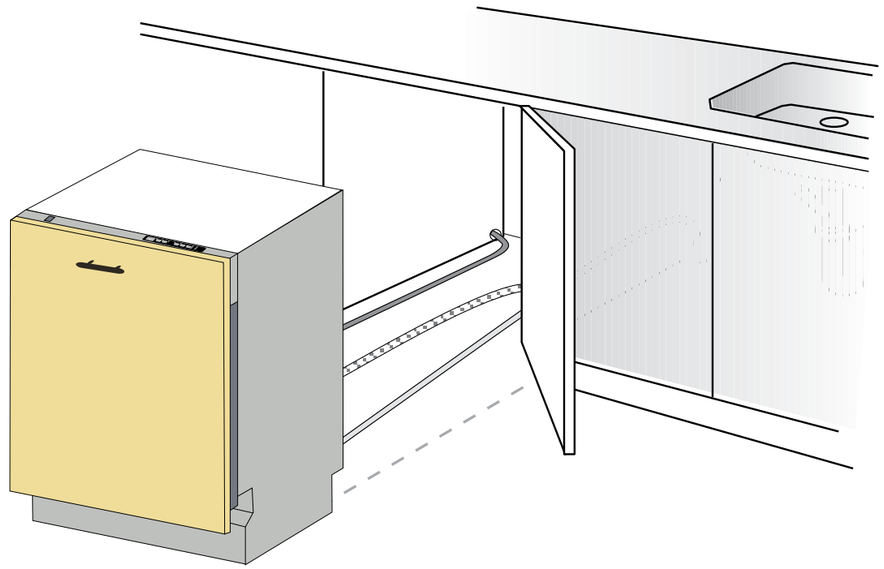

PLACEMENT OF DISHWASHER INTO THE OPENING

Now, place the dishwasher into the opening and get ready to connect all hoses and electrical connections.

- The power-supply receptacle for the appliance shall be installed in a cabinet or on a wall adjacent to the undercounter space in which the appliance is to be installed.
- There shall be an opening through the partition between the compartments specified in the above bullet point that is large enough for the attachment plug to pass through. The longest dimension of the opening shall not be more than 38 mm (1.5 in).
- The edges of the opening specified in the above bullet point shall, if the partition is wood, be smooth and rounded, or, if the partition is metal, be covered with an edge protector provided for this purpose by the manufacturer.
- Care shall be exercised, when the appliance is installed or removed, to reduce the likelihood of damage to the power-supply cord.

CAUTION

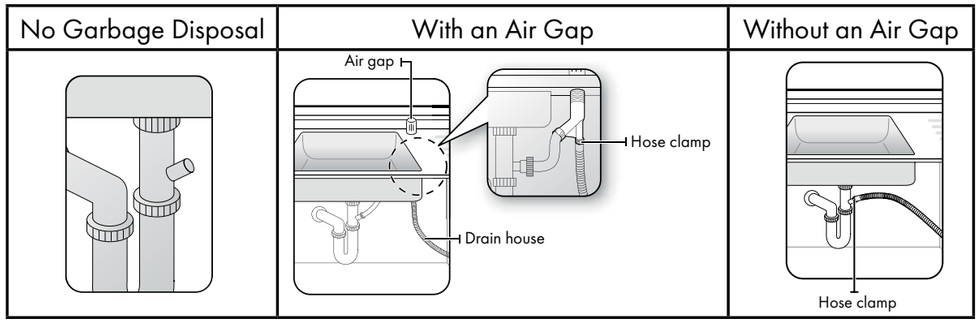

CAUTION: Make sure all hoses are pulled through the side opening of the cabinet, no hoses are kinked and all slack is taken out as shown in the figure.

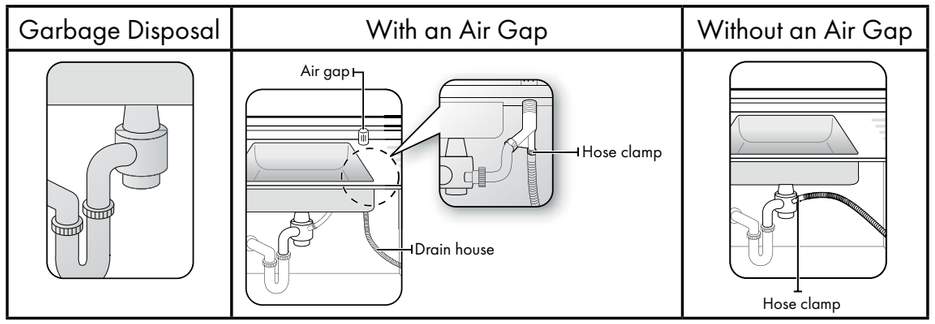

INSTALLATION

DRAIN HOSE CONNECTION

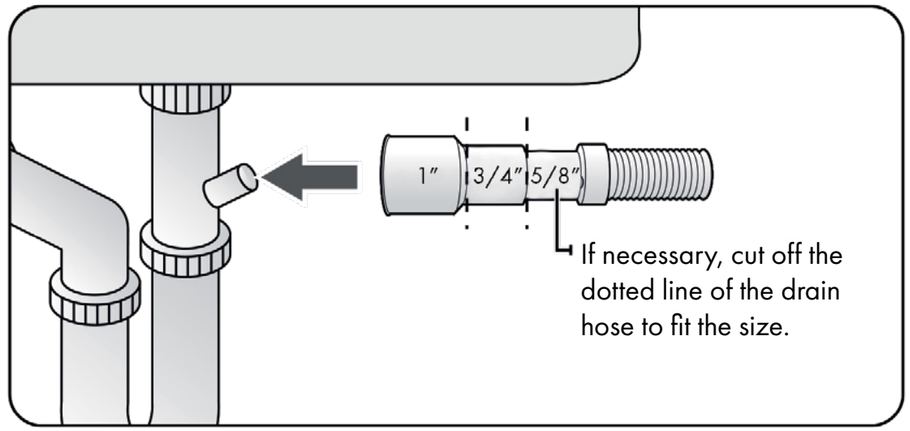

1. Check the parts on the sink to which the drain hose will be connected.
2. There are several ways to insert the drain hose into the drain hose connector of the sink, as shown in the following figures. Connect the drain hose in accordance with the water pipe installation regulations in your region.

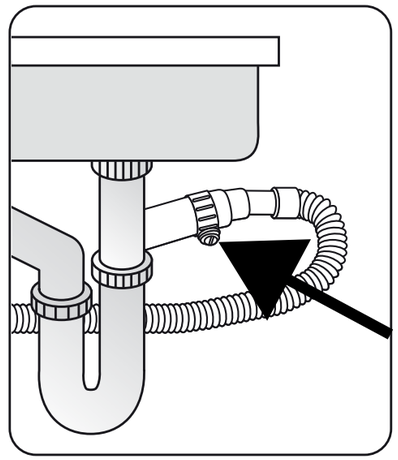

INSTALLATION

3. Check the size of the sink's drain hose connector. If needed, cut the drain hose so its end fits onto the sink connector (5/8", 3/4", or 1" - as shown below). If the end of the drain hose does not fit onto the drain hose connector of the sink, use an adapter, purchasable at a plumbing/hardware supply store.

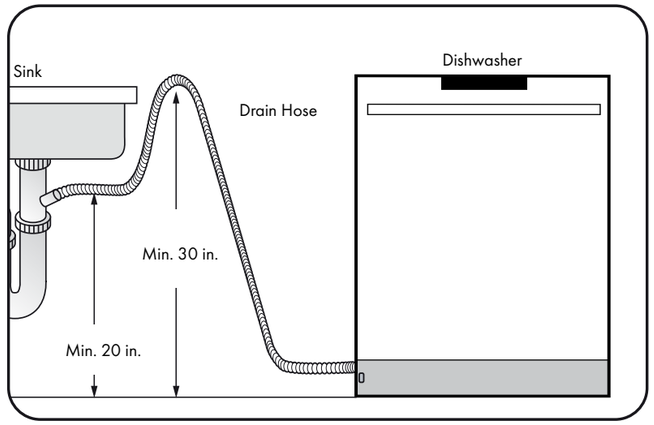

4. Slide a hose clamp over the end of the drain hose. Attach the drain hose to the sink connector, slide the hose clamp to the end of the hose, and then tighten the hose clamp.

Note: Use a hose clamp. Failure to do so may cause water leakage.

INSTALLATION

5. If there is no air gap, using the supplied drain hose bracket, find a location inside the cabinet to hang the middle of the drain hose well above the sink cabinet base to prevent backflow.

6. When drilling a hole for the drain hose on the cabinet wall, take caution not to damage the drain hose by sharp edges of the hole. On wooden walls, use sanding to soften the edges. On metal walls, use insulation tape or duct tape to cover the sharp edges around the hole.
7. Take caution not to damage the drain hose when installing the dishwasher on the floor, wall, or cabinet. To prevent leaks or drainage problems, make sure the drain hose is not damaged, kinked, or twisted.
8. Do not cut the wrinkled area of the drain hose to fit the size. When arranging the drain hose, take caution not to touch the sharp edges of the cabinet or under-sink.

- Be careful when cutting off the end of the drain hose, as there is a risk of injury. Clean around the sink's drain connection so that it does not damage the hose. Check for any foreign items in the drain hose and remove them.
- When arranging the drain hose, make sure the drain hose is not cut, torn, or broken by any sharp edges of the floor, the product itself, or the cabinet. A damaged drain hose causes a leak.

INSTALLATION

ADJUSTING THE KICK PLATE

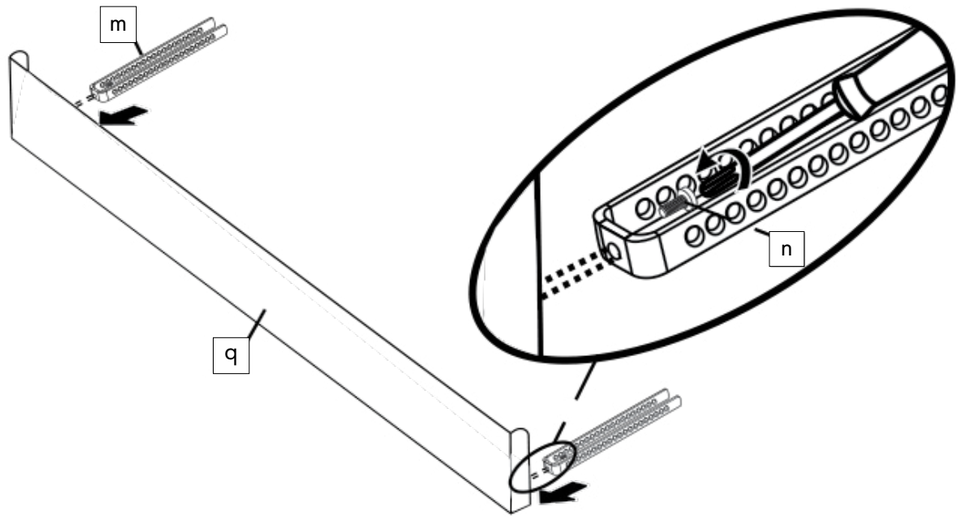

Now that the dishwasher is successfully installed, attach the kick plate to the dishwasher. The two piece kick plate can be adjusted to the height and depth needed for the kitchen.

18″

1. If the installed height of the dishwasher is above 32 9/32" using the short front leg supports, install the metal back plate with 5 1/4"/135 mm height (q) and the kick plate brackets (m). Using a Philips screwdriver, secure the two kick plate brackets using the (o) 5/32″ x 7/32″ screws.

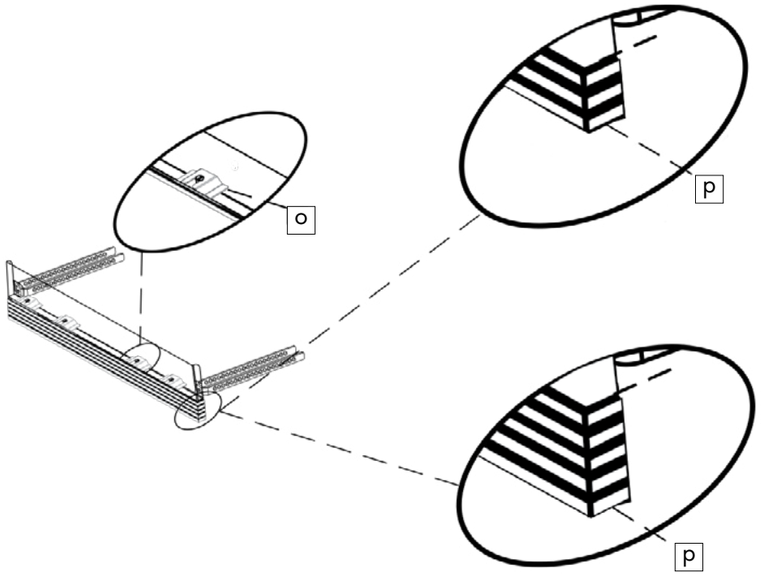

24″

1. If the installed height of the dishwasher is above 35 7/8" using the short front leg supports, install the metal back plate with 5 1/4" 135 mm height (q) and the kick plate brackets (m). Using a Philips screwdriver, secure the two kick plate brackets using the (o) 5/32″ x 7/32″ screws.

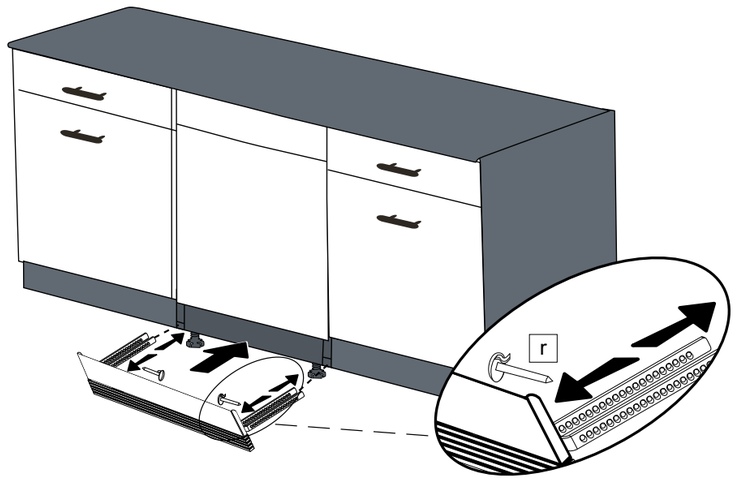

INSTALLATION

2. Depending on the overall height required to cover the remaining gap, the plastic plinth panel height can be adjusted in 3/8" increments by removing/adding each section. It is attached through the side holes of the metal back plate and secured using the U-shaped clips to hold the pegs.

3. The metal back plate and adjustable plinth panel should be assembled with the kick plate brackets mounted as shown in the diagram below.

4. Depending on the desired cabinet depth, the kick plate brackets (m) depth can be set using the stopper pins (r) inserted into the holes.
5. The panel assembly should be inserted into the corresponding rectangle slots above both the front support legs.

INSTALLATION

INSTALLER CHECKLIST

The installer must have completed and checked the following:

- The dishwasher is square and level.
- The dishwasher is fastened securely to the cabinetry.
- The dishwasher door opens and closes freely. The dishwasher door must close without hitting any cabinetry or counter top.
- The inlet water supply is turned on and checked for leaks.
- The drain hose has been connected and checked for leaks. There must be no kinks or obstructions in the drain hose.
- The drain hose must be installed with a 30" high drain loop for drain hook-ups without any air removed.
- The spray arms are free and rotate freely.
- The rinse cycle has been run.
- The water level will be below the filter screen after the end of the wash program. It is normal to find some water in the drain filter area.

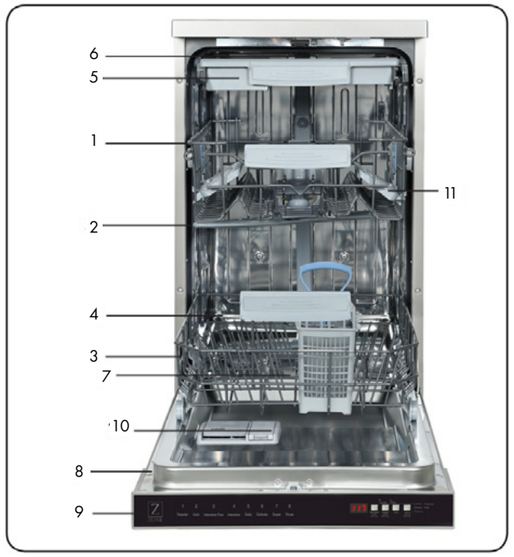

NOTE: If the installer connects the water drain hose to a trap spigot under the sink, remove the plastic membrane. If the entire membrane is not removed, remaining food can cause a blockage in the drain hose spigot. Ensure a hose clamp is used to secure the hose to the spigot.

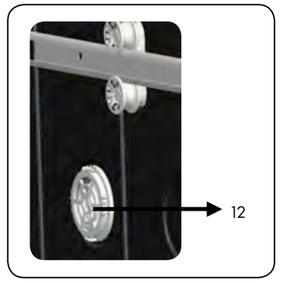

FINAL INSTRUCTIONS

1. Press the On/Off button to turn the dishwasher on.
2. Power indicator light comes on.
3. Use the Program Select button to choose a washing program.
4. Start the program with the Start/Pause/ Cancel button.
5. Run the dishwasher through one complete cycle. When the wash cycle is completed, use the On/Off button to turn the dishwasher off.
6. If the dishwasher does not operate properly, refer to the troubleshooting section.

- If dishwasher is not operating properly after following these steps: Contact ZLINE at 1-614-777-5004 to schedule an authorized service agent to inspect the new dishwasher for any function related failure.
- The manufacturer warranty does not cover installation, conversion, or customer education service visits.

OPERATION (18")

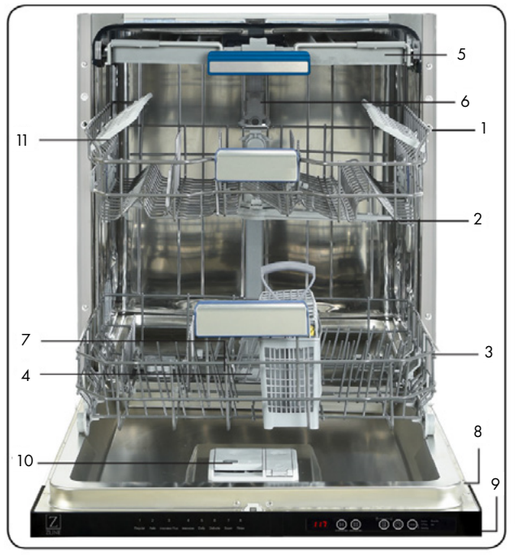

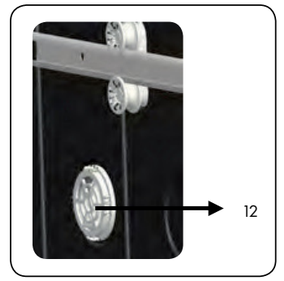

1. Upper Basket with Racks

Total power	1400 W (watts)
Heater power	1100 W (watts)

OPERATION

BEFORE USING THE APPLIANCE

Preparing The Dishwasher For First Use

- Make sure the electricity and supply water specifications match the values indicated in the installation instructions for the dishwasher.
- Open the door of the dishwasher.
- Remove all packaging material inside the dishwasher.
- Set the water softener level.
- Set the rinse aid dosage.
- Fill the rinse aid compartment.
- Place the dishes in accordance with the instructions in this manual.
- Put adequate amount of detergent into the detergent dispenser.
- Make sure that the upper and lower spray arms rotate freely.
- Select program according to amount of dirt.
- Close the door of the dishwasher. (Push the baskets in, then lift the door upwards and push until it clicks into position)

CAUTION: To prevent injuries, ensure that your hand is not jammed or crushed between the door and appliance

WARNING: All functions are automatically interrupted if the door is opened while the appliance is running.

CAUTION: There may be a escape of hot steam when you open the door of the dishwasher. Be careful of getting injured.

OPERATION

MAINTENANCE INFORMATION

1. When the dishwasher isn't in operation:
    - Disconnect the plug and close the tap.
    - Leave the door slightly open to prevent odor formation.
2. Select the dry option to remove water droplets.
3. Place dishes in the dishwasher properly to achieve the best energy consumption, washing and drying performance. Please see the program and consumption table for more information.
4. Rinse dirty dishes before placing them in the dishwasher.
5. Only use the Rinse program when necessary.
6. Do not place the dishwasher near a refrigerator because it will reach high temperatures.
7. If the dishwasher is located in an area that is at risk of freezing, close the tap, disconnect the inlet hose from the tap and drain the water inside the hose and the dishwasher completely. Dispense outside of the metropolitan region.

OPERATION

DETERGENT USAGE

WARNING: Use a detergent specifically designed for use in domestic dishwashers.

- Use powder, gel, and tablet detergents in the market that have been designed for household dishwashers.
- Detergent should be put into the compartment prior to starting the dishwasher.
- Add the proper detergent for the selected program to ensure the best performance.
- Use less detergent if the dishes are only lightly soiled. Using excess detergent can leave a film on dishes and in the dishwasher resulting in poor wash performance.
- Do not use detergent tablets for shorter wash cycles. The tablet may not dissolve completely, causing detergent residue on dishes and inefficient cleaning.

NOTE: The amount of detergent needed depends on the cycle, load size, and soil level of dishes. Too much detergent in soft water may cause glass corrosion and does not dissolve in water.

WARNING: Do not use too much detergent if your water supply is soft.

WARNING: Keep detergents in cool, dry places out of reach of children. See the detergent manufacturer's instructions for further information.

WARNING: Detergent tablets do not fully dissolve with short programs. To prevent detergent residues on the tableware, use the tablets with long programs.

WARNING: Do not use detergent in Rinse cycle. If you do not know the hardness of your water supply, use 3 tsp detergent. Increase the amount of detergent if there are white water marks, especially on the surface of the glassware.

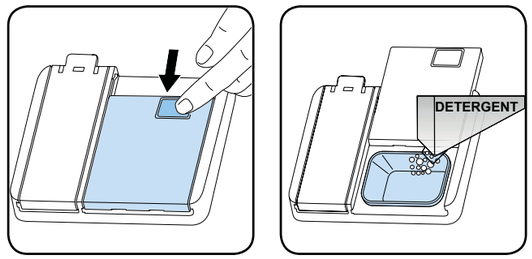

- If more information is needed concerning the detergent, contact detergent manufacturers directly.
- Check that the detergent dispenser is empty after the completion of each wash program.

OPERATION

FILLING THE DETERGENT

NOTE: The dispenser should be refilled just before the start of each program.

1. Push the latch to open the detergent container as shown in the image.

2. Put the detergent into the dispenser.
3. Detergent cup has level lines inside. Measure the right detergent amount using these lines. Detergent cup can take 1.35 oz/40 cm^3 detergent. Open the dishwasher detergent and pour 0.84 oz /25 cm^3 into the larger compartment if the dishes are heavily soiled. Pour 0.50 oz /15 cm^3 if they are less soiled. Add more detergent into the dishwasher depending on the degree of soil and on the water hardness level in your area.
4. Close the door of dispenser.

NOTE: The door is always open at the end of a program.

WARNING: Follow instructions on the package of the detergent when using liquid dishwasher detergent, concentrated powder detergent, or tablet detergent.

WARNING: Amounts may vary using liquid or concentrated powder detergent. Tablet detergents should be placed in detergent container.

WARNING: Deviations are possible depending on how dirty the dishes are and how hard the water is in your location.

WARNING: Use only the proper amount of detergent. Continued use of too much detergent may cause dishwasher damage.

OPERATION

Using Combined Detergents

- Detergent manufacturers also manufacture combined detergents that are called 2 in 1, 3 in 1, 5 in 1, etc.
- The 2 in1 detergents contain detergent salt or rinse aid. While using the 2 in 1 detergents, it should be observed which functions the tablet consists of.
- The other tablet detergents also have detergent, rinse aid, salt, various extra functions.
- Generally, combined detergents produce sufficient results under certain usage conditions only. Such detergents contain rinse aid and/or salt in preset amounts.

Points to consider when using this type of products:

- Always make sure to check the specifications of the products and whether or not it is a combined product.
- Check if the detergent used is appropriate for the hardness of the water that the dishwasher will use.
- Observe the instructions on packagings when using such products.
- If such detergents are in the form of tablets, never put them into the interior section or the cutlery basket of the dishwasher. Always put the tablets into the detergent compartment in the detergent dispenser.
- They produce good results for certain types of usage only. If using this type of detergents, contact the manufacturers and find out about the suitable conditions of use.
- When the conditions of use of such products and the dishwasher settings are appropriate, they ensure savings in rinse aid consumption.
- Contact the detergent manufacturers if wash results are not optimal (if the dishes stay calcareous and wet) after having used 2 in 1 or 3 in 1 detergents. The scope of warranty for the dishwasher does not cover any complaints caused by the use of these types of detergents.
- Recommended usage: To obtain better results while using combined detergents, add rinse aid into the dishwasher and adjust the rinse aid setting to the lowest position.

OPERATION

CAUTION: Solubility of the tablet detergents produced by different companies can vary depending on the temperature and time. Therefore, it is not recommended to use such detergents in short programs. It is more suitable to use powder detergents in such programs.

WARNING: Should any problem that has not been encountered before arise with the use of this type of detergents, contact the detergent manufacturers directly.

If no longer using combined detergents:

- Fill the rinse aid compartment.
- Make the suitable rinse aid setting.

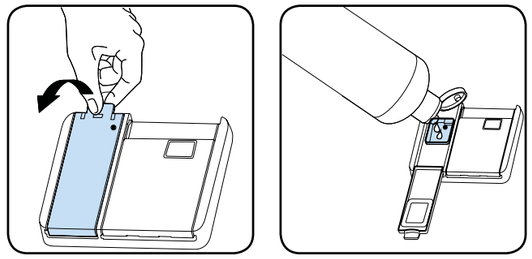

RINSE-AID USAGE

Rinse-aid makes dishes sparkle and helps them to dry without spotting. Rinse-aid is required for stain-free utensils and clear glasses.

- Filling the rinse aid reservoir with detergent will damage the reservoir. Only pour rinse aid formulated for residential dishwashers into the reservoir.

NOTE: When the Rinse Aid indicator lights up, the rinse aid reservoir contains sufficient rinse aid for 2 - 3 programs only. When using “Tab” detergents, rinse aid is not needed.

FILLING THE RINSE-AID AND SETTING

1. To fill the rinse aid compartment, open the rinse-aid compartment door.
2. Fill the compartment with rinse-aid to the MAX level and then close the door. Be careful not to overfill the rinse aid compartment and wipe up any spills.
3. Close the door until it click. Otherwise, water can enter the rinse-aid reservoir during a program.

In order to change the rinse-aid setting, follow the below steps before turning on the dishwasher:

1. Open the door of the dishwasher,
2. Press and hold “Start/Pause + On/Off” key for 3 seconds,
3. Immediately after "--" is seen on the display and the machine gives an audible warning, release "Start/Pause + On/Off" key, press and hold "Program Selection + Cancel" key until "rA" is represented on the display. The machine will display the last setting.
4. The amount of rinse aid is adjusted by pressing “Program Selection + Cancel” key.
5. After the adjustment, turn off (by pressing Start/Pause + On/Off key) the dishwasher to save the selected rinse-aid amount.

NOTE: If the dishes are not drying properly or are spotted, increase the level. If blue stains form on the dishes, decrease the level.

Level	Brightener Dose	Indicator
1	Rinse - aid not dispensed	r1 is shown on the display
2	1 dose is dispensed	r2 is shown on the display
3	2 doses are dispensed	r3 is shown on the display
4	3 doses are dispensed	r4 is shown on the display
5	4 doses are dispensed	r5 is shown on the display

LOADING THE DISHWASHER

Places the dishes into the dishwasher properly is the best for energy consumption, washing and drying performance.

- Load round and deep items, such as pots with long handles, pot lids, plates, salad plates, and cutlery sets, into the lower basket.
- The upper basket is designed for dessert plates, salad bowls, cups, and glasses.
- When placing long stem glasses and goblets, lean them against the basket edge, rack, or glass supporter wire and not against other items. Do not lean long glasses against one another as they cannot remain steady and may receive damage. It is better to arrange the thin narrow parts into the middle sections of baskets.
- Place spoons among the other cutlery sets in order to prevent them from sticking to one another. Use the cutlery grid in order to obtain the best result. To avoid any possible injuries, always place such long-handle and sharp-pointed dishes as serving fork, bread knife, etc. with their sharp points facing down or horizontally on the baskets.

WARNING: Place dishes into the dishwasher in a way that they will not prevent the upper and lower spray arms from spinning.

NOTE: Place all large and very dirty items in the lower rack.

WARNING: Do not put items that can absorb water (sponges, household cloths, etc.) into the dishwasher.

NOTE: Place all containers such as cups, glasses, and pots into the dishwasher with the opening facing downwards (so that no water can collect).

NOTE: Dishes and cutlery should not be placed above each other.

OPERATION

NOTE: Do not overload the dishwasher and pay attention to manufacturer instructions regarding which dishes and untensils are appropriate for use in a dishwasher. Only with suitable dishes will there be optimal washing results and appropriate use of energy.

High temperature water and dishwasher detergent may form a chemical synthesis that can damage certain items.

WARNING: Be careful when loading and unloading sharp items. Load sharp knives with the handles up to reduce the risk of personal injury.

Follow the below steps before loading dishwasher.

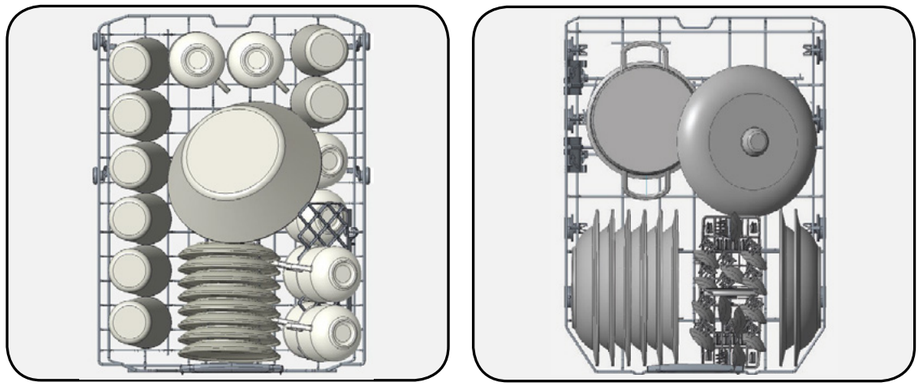

1. Open the door.
2. Remove coarse food leftovers from tableware.
3. Load the dishwasher.

NOTE: If the dishwasher door is opened while it is running, all functions are automatically interrupted. Once the door is closed functions will continue to work.

OPERATION (18")

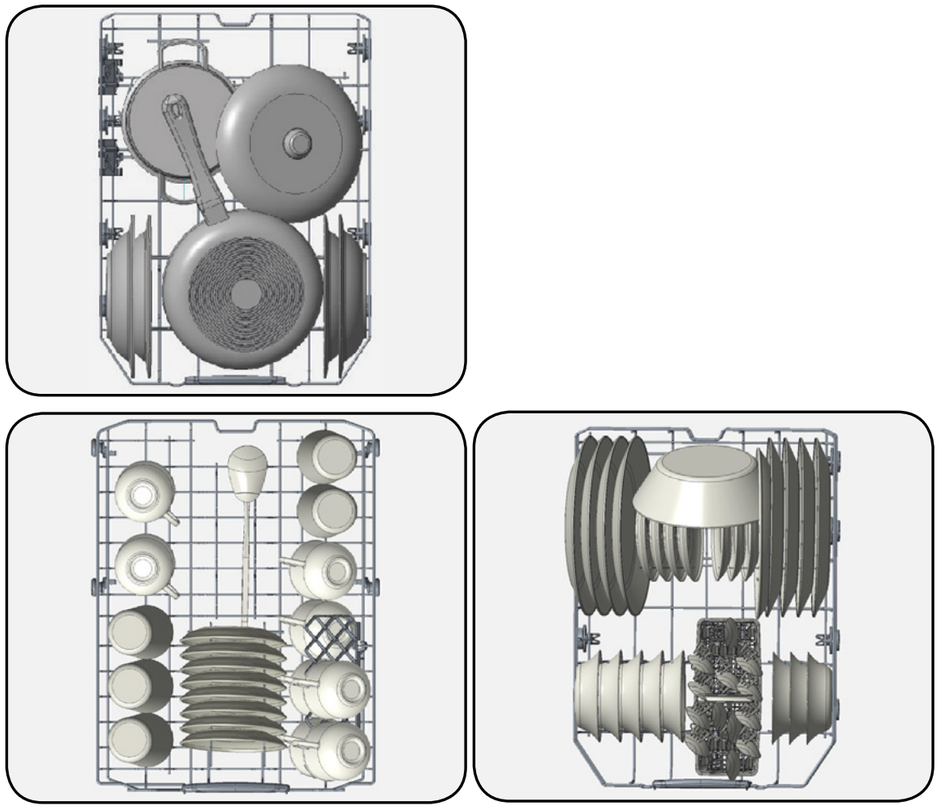

UPPER RACK

Load the upper rack with dessert plates, cups, glasses etc.

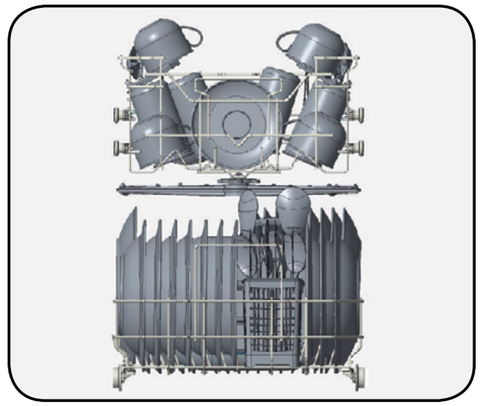

LOWER RACK

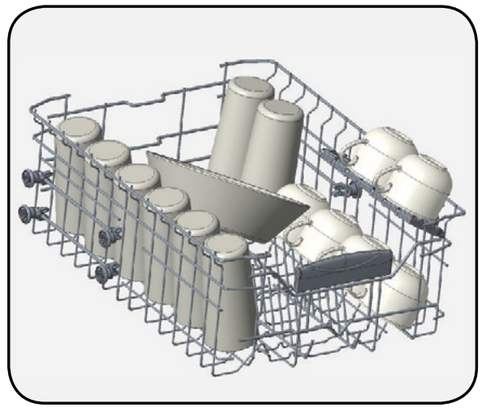

Load the lower basket with items that are round and deep, such as pots with long handles, pot lids, plates, salad plates, and cutlery sets. The lower rack should not be used for small items, such as cups and wine glasses.

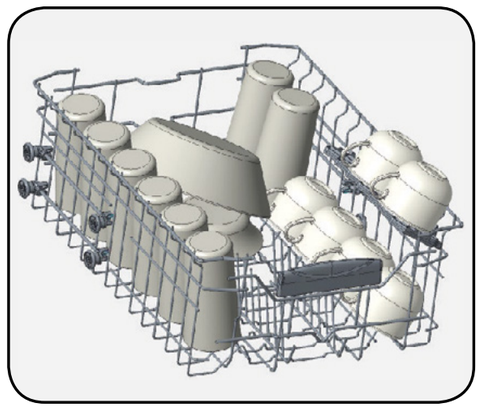

OPERATION (18")

INCORRECT LOADS

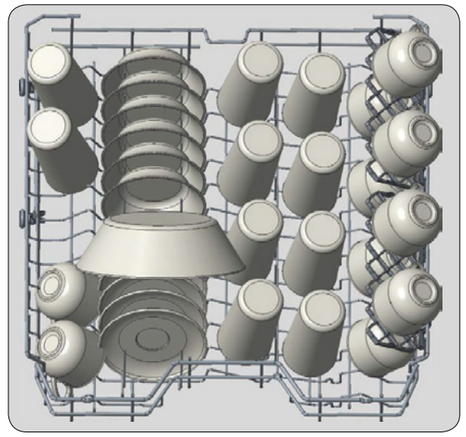

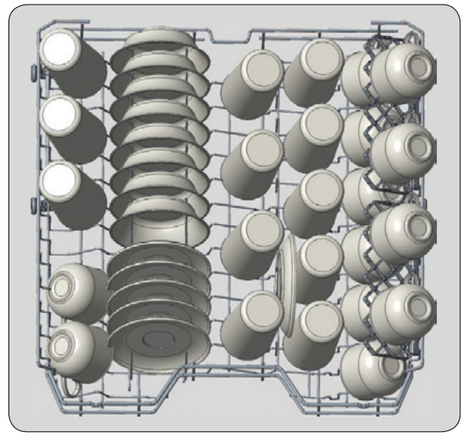

OPERATION (24")

UPPER RACK

Load the upper rack with dessert plates, cups, glasses etc.

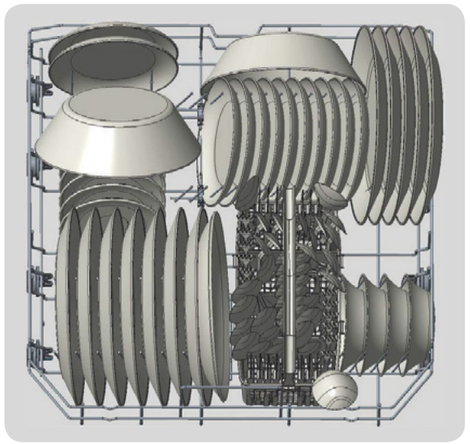

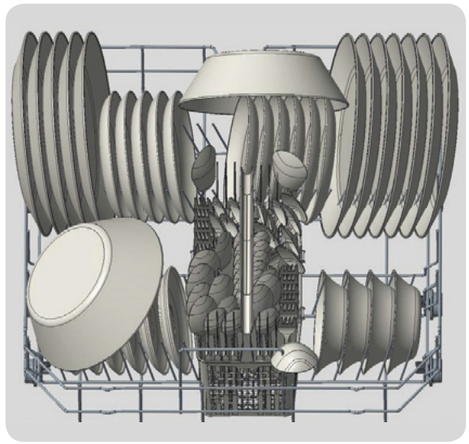

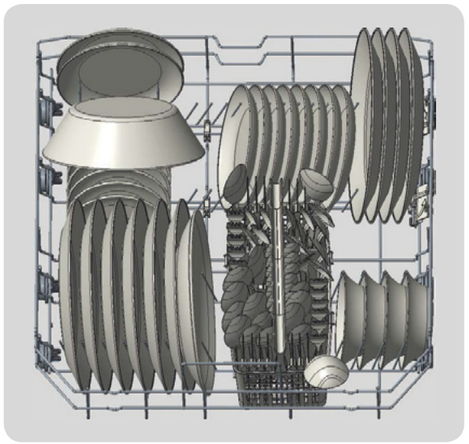

OPERATION (24")

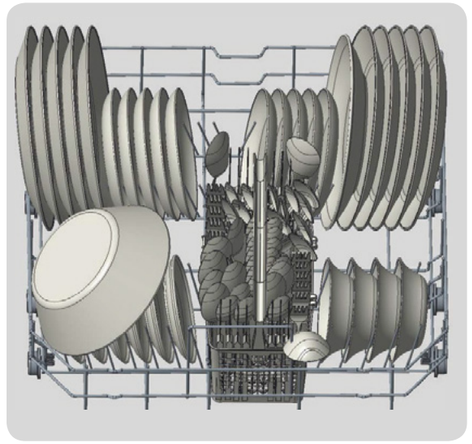

LOWER RACK

Load round and deep items, such as pots with long handles, pot lids, plates, salad plates, and cutlery sets into the lower rack. The lower rack should not be used for small items such as cups and wine glasses.

NOTE: Place all large and very dirty items in the lower rack.

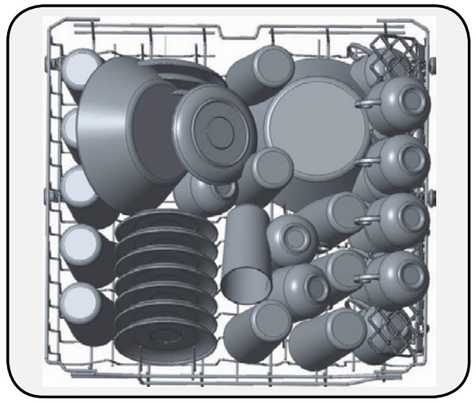

WARNING

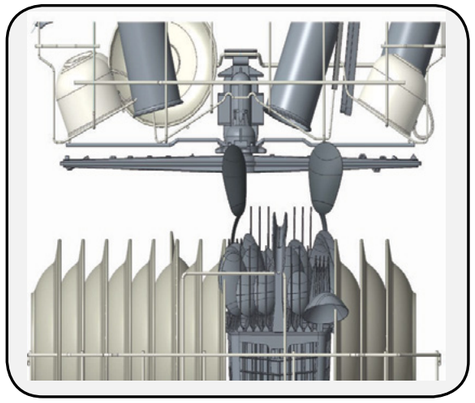

WARNING: Large knives and other utensils with sharp tips and edges must be placed horizontally into the upper rack due to risk of injury. Other smaller knives and sharp utensils should be placed with sharp side down in the cutlery basket.

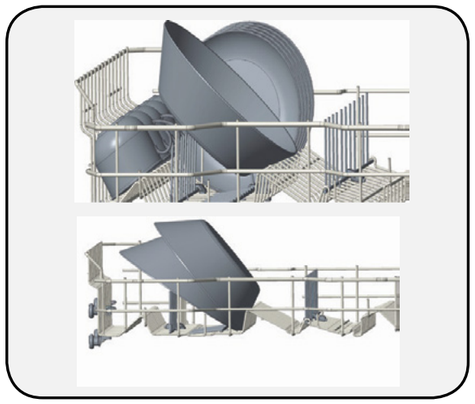

NOTE: Make sure that large items do not interfere with the rotation of the spray arms, and do not prevent the detergent dispenser from opening.

OPERATION (24")

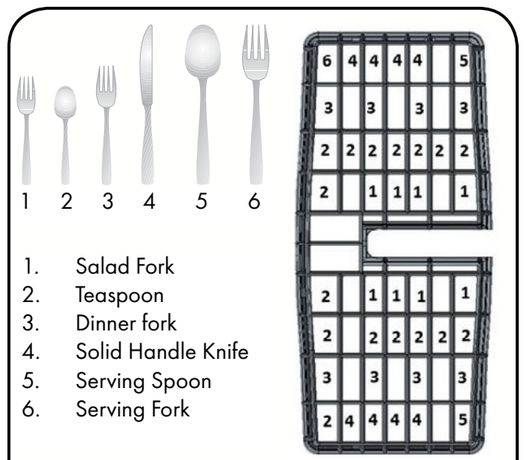

INCORRECT LOADS

CUTLERY BASKET

Cutlery basket load pattern for 8 place settings.

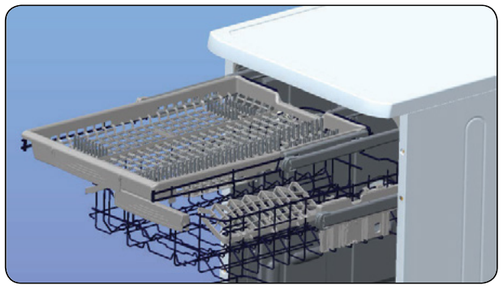

WARNING

WARNING: Sharp cutlery may have shifted position during the wash operation and can be also wet and slippery. Carefully remove them to prevent injury.

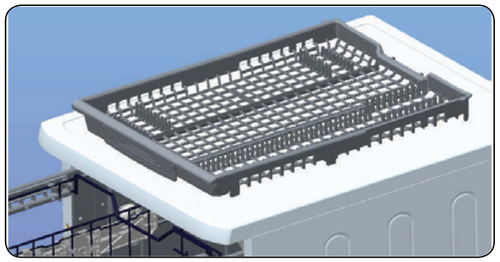

NOTE: Small items should be placed in the cutlery basket because small items can fall through the holders from the baskets.

OPERATION

The upper cutlery basket is designed for the placement of large and small cutlery and utensils.

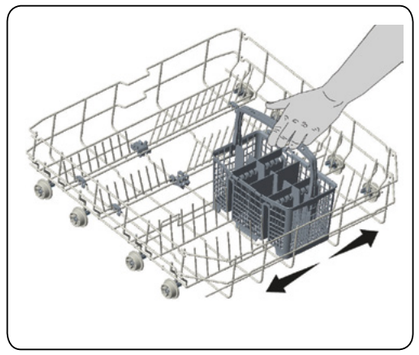

It is easily removed from the dishwasher, allowing ease of use when removing items, along with the basket, after washing.

WARNING: Knives and other sharp objects must be placed horizontally in the cutlery basket.

SILVERWARE BASKET (24” ONLY)

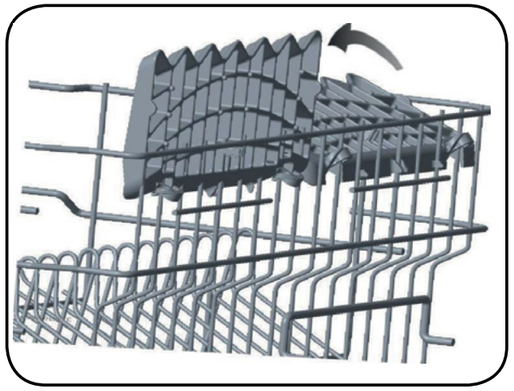

- The silverware basket is designed to wash dishes such as knifes, forks, spoons, etc. in a cleaner manner.
- The cutlery basket can be moved, creating a wider space in the lower basket for dishes of different sizes.

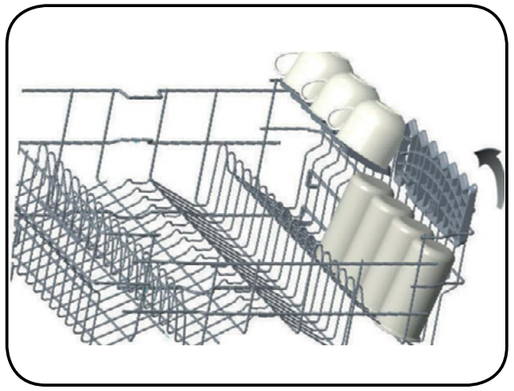

OPERATION

TOP BASKET

Rack with height adjustment

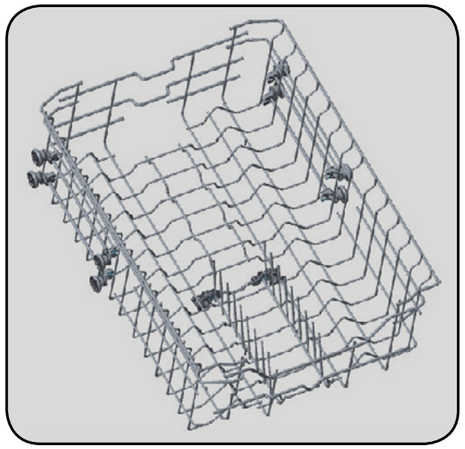

- These racks are designed to increase the capacity of top basket. Place cups and glasses on these racks. These racks are adjustable and can accommodate glasses of different sizes.
- Height adjustment brackets mounted on the basket allow racks to be in two different positions.
- Place long knives, forks and spoons on these racks horizontally for them not to block the movement of spray arms

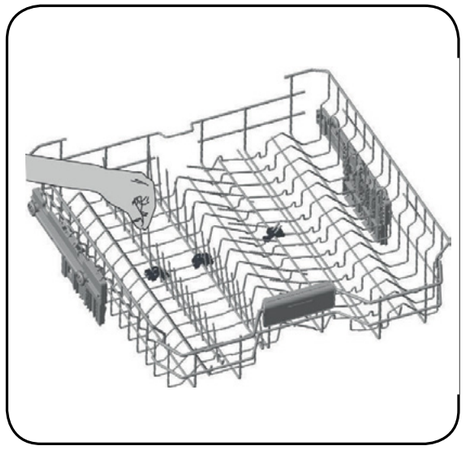

The top basket horizontal wire located on top basket allows for plates and bowls. Wash kitchenware such as pans or pots by closing the horizontal wire.

OPERATION

18″

24″

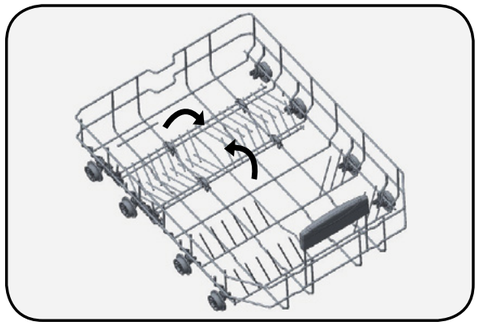

NOTICE: Bringing the wires to the horizontal position by holding them from the tips may cause them to bend. Therefore, it will be appropriate to bring the wires in the middle to horizontal or vertical position by holding them from their stems and pushing.

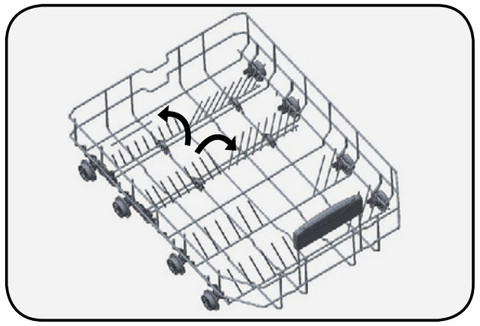

OPERATION

LOWER BASKET FOLDING RACKS

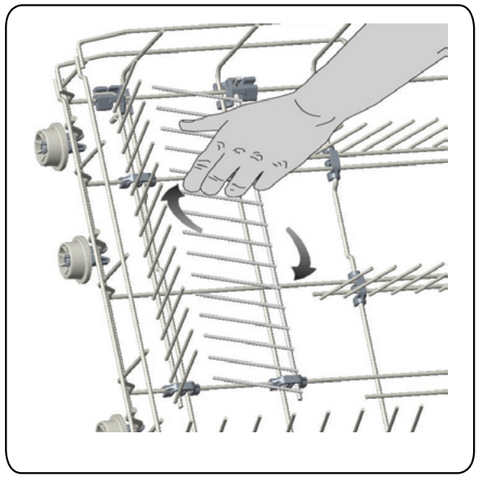

Folding racks consisting of four parts that are located on the lower basket of the dishwasher are designed for big items easier such as pots, pans, etc. If desired, each part can be folded separately or all of them can be folded and larger spaces can be obtained. Use folding racks by raising them upwards, or by folding.

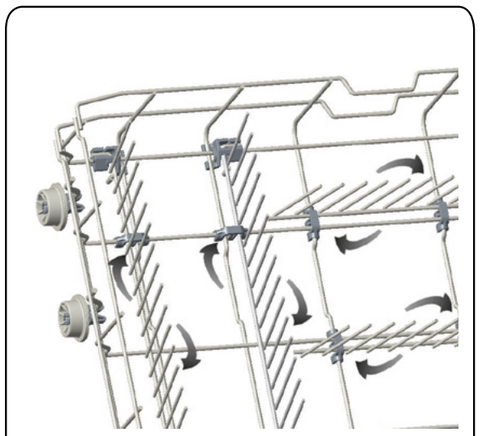

18″

24″

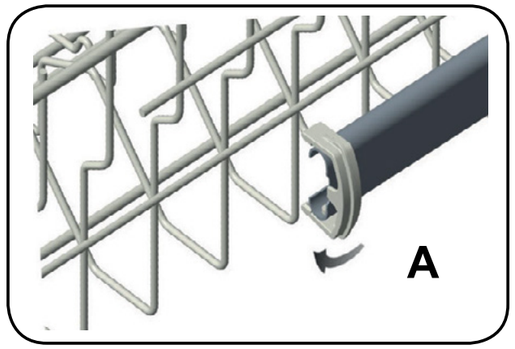

OPERATION

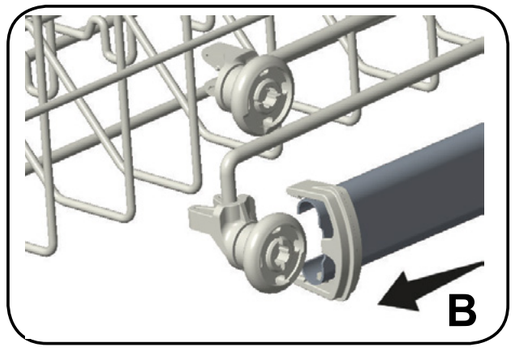

HEIGHT SETTING (WHEN BASKET IS EMPTY):

The height setting of the upper rack may be changed using the wheels which are preset at two height levels.

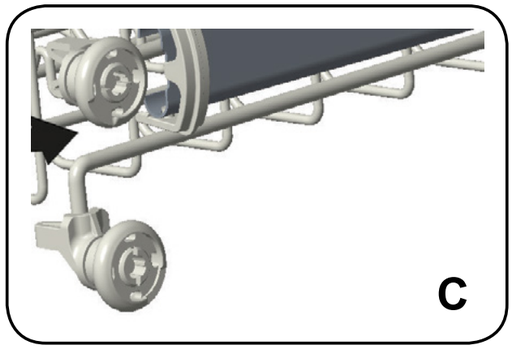

CAUTION: Make sure that the rack is empty. Changing the height setting while the rack contains tableware could cause the contents to dislodge, causing personal injury or damage to the tableware.

1. Release the latches on both the right and left tracks of the upper rack by turning them to the outside A.

2. Pull out the rack completely B.

3. Place the rack into the tracks again at the desired height C.

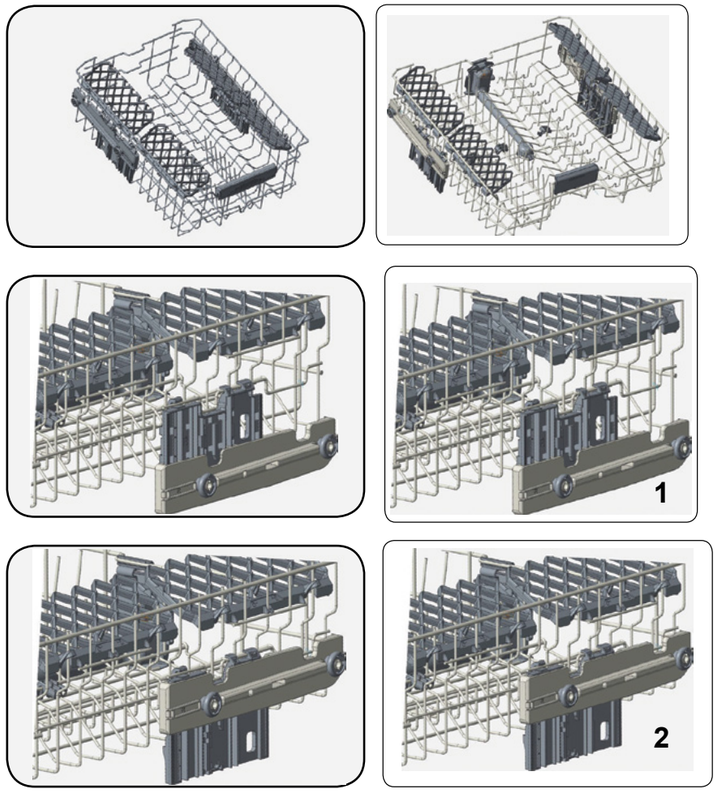

4. Push the latches back into the correct position.

OPERATION

HEIGHT SETTING (WHEN BASKET IS FILLED):

The upper basket includes a mechanism which enables the height of the basket to be adjusted up or down without having to remove the basket. Hold the basket on both sides and pull it up or push it down, ensuring both sides of the upper basket are in the same position.

18″ 24″

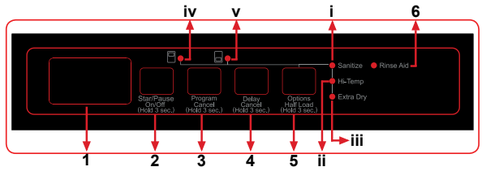

- The basket height adjustment mechanism on the top basket of the dishwasher is designed to let the height of the top basket move upwards or downwards, without removing it from the dishwasher when it is full and create large spaces at the top or bottom area of the dishwasher as needed.
- Basket of the dishwasher is set to upper position by default. In order to raise the basket, hold it from both sides and pull it upwards. In order to lower it, hold it from both sides again, and leave it. In loaded basket adjustment mechanism, make sure that both sides are in the same position. (up or down)

NOTICE: Make sure that both levers catch in the same height position.

OPERATION

KEYS

ON/OFF KEY

This key is used as On/Off key if the corresponding button is held down for 3 seconds. Otherwise, it can be used as Start/Pause key. It is used to turn on or turn off the dishwasher. Dishwasher will turn on with Regular program and the number and the duration of the regular program will appear on the display. Each of program number and the duration will sequentially represent for 2 seconds on the display. In Off position, the display will turn off.

START/PAUSE KEY

It is used to start or pause a selected program and functions.

PROGRAM SELECTION/CANCEL KEY

- It is used to select the washing program determined from the programs table.
- The cancel key is activated when Program Selection/Cancel Key is held down for 3 seconds.

DELAY TIMER KEY

It should be pressed to make the time delay settings.

HALF LOAD KEY (24”)

It is used to add Half Load functions to the selected program.

OPTIONS KEY

It is used to add auxiliary functions to the selected program.

PREPARING THE DISHWASHER

1. Open the door of the dishwasher.
2. Place the dishes in accordance with the instructions in the user manual.
3. Make sure that the upper and lower spray arms rotate freely.
4. Put adequate amount of detergent into the detergent dispenser.
5. Check if the rinse aid indicator light and add rinse aid if needed.

OPERATION

PROGRAM SELECTION

1. Press the On/Off key to turn on the dishwasher. Note that the door of the dishwasher is OPEN position.
2. Refer to the “Programs Table” to determine a washing program suitable for the dishes.
3. Press program selection key until the number of the program selected appears on the display.

- In order to start the selected program, Start/Pause key must be pressed and the door of the dishwasher must be closed within 4 seconds after the Start/Pause key is pressed.
- If the door is not closed within 4 seconds, the dishwasher will not start. In this case; to start the selected program, the door must be opened, the Start/Pause key must be pressed and the door must be closed again within 4 seconds after the Start/Pause key is pressed.
- If the door of the dishwasher is opened when the dishwasher is running, the dishwasher stops working. If the door is closed back within 4 seconds after the door is opened, the dishwasher will continue.
- If the door stays open for more than 4 seconds, Start/Pause key must be pressed and the door of the dishwasher must be closed within 4 seconds after the Start/Pause key is pressed.

OPERATION

	Programs		Duration (min)	Descriptions
18″	Regular	Dirty	140	Standard program for daily, regular or typical use to completely wash a load of normally soiled dishes.
		Clean	105	
	Auto	Dirty	155	This program automatically adjusts the temperature and the quantity of water, the energy consumption and the program duration.
		Clean	110	
	Intensive Plus		165	Suitable for heavily soiled dishes that are kept waiting.
	Intensive		130	Suitable for heavily soiled dishes
	Daily		117	Suitable for normally soiled daily dishes.
	Delicate		90	Suitable for lightly soiled delicate dishes.
	Super		50	Suitable for normally soiled daily dishes with faster program.
	Rinse		15	Suitable to rinse dishes that you plan to wash later.
24″	Regular	Dirty	145	Standard program for daily, regular or typical use to completely wash a load of normally soiled dishes.
		Clean	122	
	Auto	Dirty	155	This program automatically adjusts the temperature and the quantity of water, the energy consumption and the program duration.

Compatibility of Programs and Options		Options			
		Half Load	Sanitize	Hi-Temp	Extra Dry
Programs	Regular	✓	✓	✓	✓
	Auto	✓	✓	✓	✓
	Intensive Plus	✓	✓	✓	✓
	Intensive	✓	✓	✓	✓
	Daily	✓	✓	✓	✓
	Delicate	✓	X	X	✓
	Super	✓	✓	✓	✓
	Rinse	✓	X	X	X

NOTE: The program duration may change according to the amount of dishes, the water temperature, the ambient temperature and selected additional functions.

NOTE: The energy-usage label is based on the “Regular” program. This program is the most efficient in terms of its combined energy and water consumption at cleaning normally soiled dishes.

- Only use powder detergent for short programs.
- Short programs do not include drying.
- To assist drying, we recommend slightly opening the door after a cycle is complete.

AUXILIARY FUNCTIONS

The dishwasher's washing programs are designed to give the best cleaning effect, based on the type of the soil, soiling degree, and properties of the dishes to be washed. Auxiliary functions are provided in order to save time, water, and energy and to perform a more comfortable washing with conditions specific to every customer.

- Auxiliary functions may cause changes in the program duration.
- Auxiliary functions are not suitable for all washing programs. The dishwasher will buzz if a program is not compatible. The compatibility of the programs and options is shown on the “PROGRAMS AND OPTIONS TABLE” section.

TO ADD AUXILIARY FUNCTION TO THE PROGRAM (18”)

1. Select the desired washing program by pressing the program Selection key.
2. In the selected washing program, if auxiliary function is selected, the corresponding indicator will be active. If the Extra Function key is pressed again, the corresponding indicator of another auxiliary function will be active.
3. The selection of the auxiliary function will be canceled the Extra Function key is pressed six times.

TO ADD AUXILIARY FUNCTION TO THE PROGRAM (24”)

1. Select the desired washing program by pressing the Program Selection key.
2. In the selected washing program, if auxiliary function is selected, the corresponding function led will be on. If the Half Load or Options key is pressed again, the corresponding led of another auxiliary function will be on.
3. The selection of the auxiliary function will be canceled when the Half Load or Options button is pressed, until the selected option LED turns off.

SANITIZE OPTION

Sanitize function raises the water temperature in the final rinse.

- At the end of a successful sanitization, “00” is displayed on the display.

HI-TEMP OPTION

When this option is selected, both the water temperature and the washing time are increased.

EXTRA DRY OPTION

The dishwasher changes the water temperature from the value described for each different program and the extra dry is performed.

HALF LOAD OPTION

It is used to operate the dishwasher without loading it completely.

1. Load dishes in the dishwasher.
2. Turn the dishwasher on with On/Off key.
3. Select the desired program and press the Half Load key. The Half Load indicator will light on the display.
4. Press Start/Pause key to start the selected program and close the door of the dishwasher.
5. With the Half Load function, save power while using the lower and/or upper baskets of the dishwasher.

PROGRAMMING THE WASHING TIME

Delay Timer

If an economical electricity tariff is applied in the region, use the Delay Timer function to wash dishes during appropriate hours. The start of the selected program can be delayed until 19 hours. Delay Timer cannot be set after the program starts.

1. Press the Delay Timer function key after selecting the washing program and other auxiliary functions.
2. Once the Delay Timer key is pressed, Display will show “1h” and Display will show program number, program duration and delay time alternately for 2 seconds.
3. Set the desired time by pressing the Delay Timer key. Time will increase with the increments of 1 hour every time the key is pressed.
4. In order to start the selected program with delay, Start/Pause key should be pressed and the door of the dishwasher must be closed within 4 seconds.

Changing the settings while Delay Timer is enabled

While the delay timer is activated, changes can not be made. To change the settings, open the door of the machine and change the program, auxiliary functions or duration of the delay time.

OPERATION

TO CANCEL THE DELAY TIMER FUNCTION

1. Open the door of the dishwasher.
2. Press and hold Delay Timer key for 3 seconds.
3. At the end of 3 seconds, delaying process will be canceled.

- If the program is changed, the delay timer is canceled.
- Delay Timer function can not be set after the program starts.

STARTING THE PROGRAM

- Open the door of your machine. Select the program and auxiliary functions. The program duration and program number will appear on the display alternately. Press "Start/Pause + On/Off" key. Close the door within 4 seconds, the program will start. If 4 seconds is exceeded and the door is closed, program will not start.
- The total time can change while the program is running depending on the ambient temperature where the dishwasher is installed, temperature of the supply water and amount of the dishes.
- If the door is opened while the dishwasher is running, the dishwasher will switch to the standby mode. Press Start/Pause key and close the dishwasher door within 4 seconds, then the program will resume.

CANCELING THE PROGRAM

1. Press program Selection + Cancel key for 3 seconds to cancel the program.
2. After 3 seconds, "1" will appear on the display. For a couple of minutes the dishwasher will fulfill the necessary operations required to cancel the program.

- There might be residues of detergent or rinse aid left in the dishwasher and/or on the pieces being washed depending on what step the canceled program was in.

RINSE AID INDICATOR

Please check the rinse aid indicator on the control panel to see whether there is adequate amount of rinse aid in the dishwasher or not. Refill the rinse aid reservoir with rinse aid whenever rinse aid warning indicator appears on the control panel of the dishwasher.

OPERATION

END OF PROGRAM

"00" will be displayed when the washing program is over.

1. Open the door of the dishwasher.
2. Press Start/Pause + On/Off key to turn off the dishwasher.

- Leave the dishes in the dishwasher for about 15 minutes to cool down after they are washed. The dishes will dry in a shorter time if the door is left ajar during this period. This process will increase the drying effectiveness of the dishwasher.

WATER CUT - OFF WARNING

If main water is cut or water inlet tap is turned off, the dishwasher can not take water in and "FF" will flash continuously on the display. As long as the problem continues, the washing program is stopped and water inlet is checked regularly by the user. If the water inlet is provided, the dishwasher gets ready to start a new program.

OVERFLOWING WARNING

If the dishwasher intakes too much water or there is leakage at any of the components, then the dishwasher will detect this and "F1" will flash on the display. As long as the overflowing continues, safety algorithm will be active and try to discharge the water. If overflowing stops and safety is assured, "F1" will disappear. If "F1" does not disappear, there is a permanent fault. In this case, the authorized service should be contacted.

MAINTENANCE AND CLEANING

MAINTENANCE AND CLEANING

WARNING: Before cleaning or carrying out maintenance, switch off the appliance, disconnect the main plug and turn off the water tap.

The dishwasher can only be repaired by an authorized service agent. Do not try to repair the dishwasher unless any recommendation by this manual.

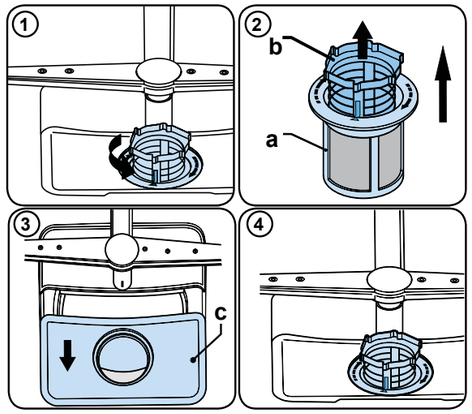

WARNING: All surfaces are susceptible to scratching. Contact with unsuitable cleaning agents can alter or discolor all surfaces.

WARNING: Keep the floor around the dishwasher clean and dry to prevent any possible injury. Keep the dishwasher washer clean, empty, and door cracked open to allow air to circulate in case of any extended unused time.

- Dishwasher door can be damaged by abrasive cleaners, scouring pads, abrasive cloths. Cleaning the dishwasher in regular intervals prolongs the dishwasher's service life.
- Unplug the dishwasher and turn off its tap before starting the cleaning.
- Do not use any cleaning supplies that contain metals or any type of abrasives when cleaning the dishwasher. Wipe with a fine cleaning material and a dampened cloth.
- **Oil and lime may accumulate in the dishwasher's washing section. In case of such accumulation:**
    - Fill the detergent compartment without loading any dishes into the dishwasher, select a program that runs at high temperature, and start the dishwasher. If this does not work, there are specialized dishwasher cleaning products available from your favorite retailer. (Please follow the manufacturer's directions to avoid any damage to your dishwasher.)

MAINTENANCE AND CLEANING

- **Cleaning the seals in the dishwasher door:**
    - Be sure to regularly check the door seals for any damage. To clean them, wipe them down with a damp, non-abrasive cloth or sponge.
- **Cleaning the dishwasher:**
    - Clean the filters and spray arms at least once a month.
- **Filters:**
    - Check if any food scraps/residue or debris have remained on the coarse and fine filters. If there is any food scraps/residue present, remove the filters and clean them thoroughly under running water.
    - a. Micro Filter
      b. Coarse Filter
      c. Metal/Plastic

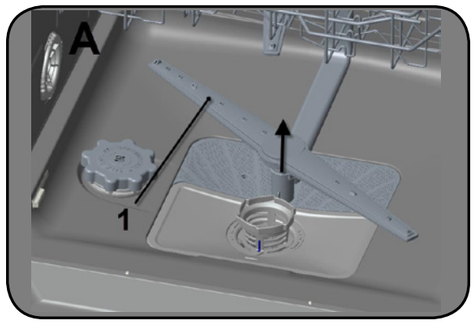

MAINTENANCE AND CLEANING

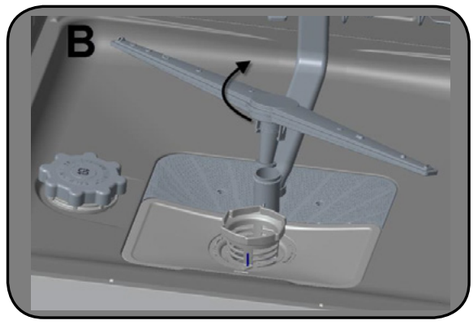

CLEANING THE SPRAY ARMS

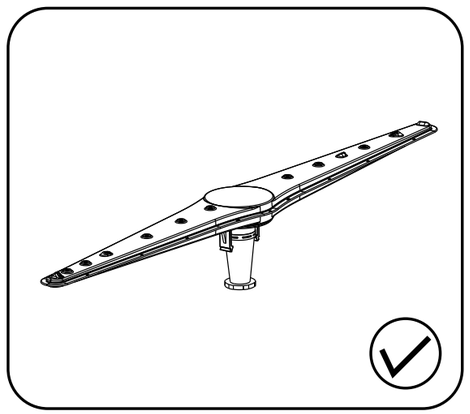

Clean the spray arms at least once a week in order for the dishwasher operates efficiently.

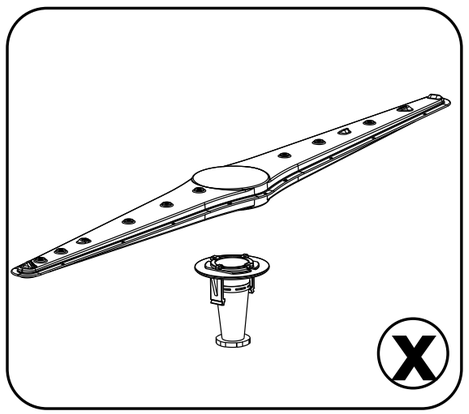

Lower Spray arm

Check if the holes on the lower spray arm (1) are clogged. If they are clogged, remove and clean the spray arm. Pull the lower spray arm up to remove it (A, B.)

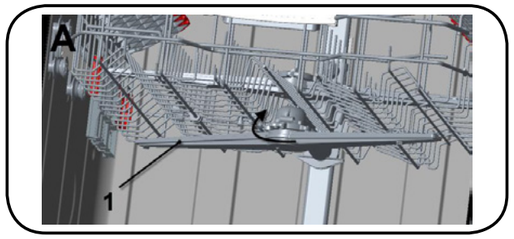

WARNING: Lower spray arm is metal and after remove the lower spray arm for maintenance and cleaning, do not disassemble the plastic part from the spray arm. This may cause injury due to possibility of sharp edge on the metal spray arm when plastic part is removed.

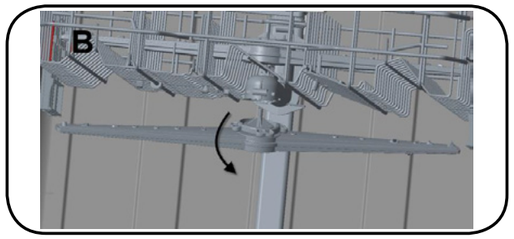

WARNING: Only 24" Dishwasher has metal lower spray arm.

MAINTENANCE AND CLEANING

Upper Spray arm

Check if the holes on the upper spray arm (1) are clogged. If they are clogged, remove and clean the spray arm. Turn its nut to left to remove the upper spray arm (A, B). Make sure that the nut is tightened well when installing the upper spray arm.

TROUBLESHOOTING
