

展开尺寸 1000mm * 210mm

Aroma Diffuser User Manual

Read all instructions before use this product.

Spec: 100/150/210mm
Weight: 2.0kg
Capacity: 300ml
Power: 10W
Voltage: 12V
Input: AC100V
Color: 300S-10001*

*Safety Precautions

- 1. **Keep the Device Upright**
The device should be kept upright at all times. Do not tilt or shake the device. Do not use the device if it is tilted or shaken.
- 2. **Keep Away from Fire and Flammable Materials**
Do not use the device near open flames, candles, or other flammable materials. Do not use the device in a room with flammable materials.
- 3. **Keep Away from Children and Pets**
Do not use the device in a room with children or pets. Do not use the device in a room with children or pets.
- 4. **Do Not Use in a Bedroom**
Do not use the device in a bedroom. Do not use the device in a bedroom.
- 5. **Do Not Use in a Bathroom**
Do not use the device in a bathroom. Do not use the device in a bathroom.

*WARNING

Do not use the device in a room with children or pets. Do not use the device in a room with children or pets.

*Product Feature

*Component Names

- 1. **Power Button**
- 2. **Water Level Indicator**
- 3. **Water Tank**
- 4. **Diffuser Nozzle**
- 5. **Diffuser Base**
- 6. **Diffuser Cover**
- 7. **Diffuser Filter**
- 8. **Diffuser Nozzle Cap**
- 9. **Diffuser Nozzle**

*Operating Instructions

1. **Check the Water Level**
Check the water level in the water tank. If the water level is low, add water to the water tank.
2. **Check the Water Temperature**
Check the water temperature in the water tank. If the water temperature is high, wait for the water to cool down.
3. **Check the Water Quality**
Check the water quality in the water tank. If the water quality is poor, use filtered water.
4. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
5. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
6. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.
7. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
8. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
9. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

*Maintenance

1. **Check the Water Level**
Check the water level in the water tank. If the water level is low, add water to the water tank.
2. **Check the Water Temperature**
Check the water temperature in the water tank. If the water temperature is high, wait for the water to cool down.
3. **Check the Water Quality**
Check the water quality in the water tank. If the water quality is poor, use filtered water.
4. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
5. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
6. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.
7. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
8. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
9. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

*H/VAC Connection Nozzle Description

1. **Check the Water Level**
Check the water level in the water tank. If the water level is low, add water to the water tank.

2. **Check the Water Temperature**
Check the water temperature in the water tank. If the water temperature is high, wait for the water to cool down.

3. **Check the Water Quality**
Check the water quality in the water tank. If the water quality is poor, use filtered water.

4. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.

5. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.

6. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

7. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.

8. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.

9. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

1. **Check the Water Level**
Check the water level in the water tank. If the water level is low, add water to the water tank.

2. **Check the Water Temperature**
Check the water temperature in the water tank. If the water temperature is high, wait for the water to cool down.

3. **Check the Water Quality**
Check the water quality in the water tank. If the water quality is poor, use filtered water.

4. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.

5. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.

6. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

7. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.

8. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.

9. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

*Device Operating Instructions

1. **Check the Water Level**
Check the water level in the water tank. If the water level is low, add water to the water tank.
2. **Check the Water Temperature**
Check the water temperature in the water tank. If the water temperature is high, wait for the water to cool down.
3. **Check the Water Quality**
Check the water quality in the water tank. If the water quality is poor, use filtered water.
4. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
5. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
6. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.
7. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
8. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
9. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

*Device Maintenance

1. **Check the Water Level**
Check the water level in the water tank. If the water level is low, add water to the water tank.
2. **Check the Water Temperature**
Check the water temperature in the water tank. If the water temperature is high, wait for the water to cool down.
3. **Check the Water Quality**
Check the water quality in the water tank. If the water quality is poor, use filtered water.
4. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
5. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
6. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.
7. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
8. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
9. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

*Additional Information

1. **Check the Water Level**
Check the water level in the water tank. If the water level is low, add water to the water tank.
2. **Check the Water Temperature**
Check the water temperature in the water tank. If the water temperature is high, wait for the water to cool down.
3. **Check the Water Quality**
Check the water quality in the water tank. If the water quality is poor, use filtered water.
4. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
5. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
6. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.
7. **Check the Water Level Indicator**
Check the water level indicator in the water tank. If the water level indicator is low, add water to the water tank.
8. **Check the Water Temperature Indicator**
Check the water temperature indicator in the water tank. If the water temperature indicator is high, wait for the water to cool down.
9. **Check the Water Quality Indicator**
Check the water quality indicator in the water tank. If the water quality indicator is poor, use filtered water.

*Warranty Policy

Our company provides a 2-year limited warranty from the date of purchase, offering replacement for products with manufacturing defects. This warranty is void if the product is damaged, modified, or used in an unauthorized manner. For more details, please refer to the warranty policy on our website.

*Warranty Exclusions

The warranty does not cover the following:

- Products used in an unauthorized manner.
- Products damaged by fire, flood, lightning, or other natural disasters.
- Products damaged by misuse, neglect, or unauthorized modifications.
- Products damaged by accidents, theft, or other external factors.
- Products damaged by unauthorized repairs or modifications.

*After-Sales Support

Our company provides 24-hour after-sales support. If you have any questions or need assistance, please contact our customer service team. We will provide you with the best possible solution.

*Customer Support

If you have any questions or need assistance, please contact our customer service team. We will provide you with the best possible solution.

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
