| ● Red light | Charging while the device is off |
| ● Red light | Abnormal status (out of paper, lid open) |
| ☀ Red light flashing | low battery status |
| ● Green light | Fully charged |

02. Preparing for printing

- 01 Press and hold the power button for 3 seconds to turn on.
- 02 Place your finger on the OPEN marking on the back and open the ribbon compartment cover with the slot facing upwards.

- 03 With the ribbon passing through both guide slots, pull the ribbon out 3cm.

Notice

Loose carbon ribbon

If you notice the ribbon is loose, rotate the gear clockwise until the ribbon tightens. ◦

- 04 Insert the ribbon as instructed, ensuring the ribbon paper passes through the label printer's output tray.

- 05 Close the ribbon compartment cover.

After powering on, inserting or changing consumables will trigger the ribbon pre-tensioning function, and you will hear the ribbon spinning; this is normal.

FCC Caution.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
