

 AMZCHEF

Desktop range hood

Manual

1 Precautions

This product is suitable for kitchen island, living rooms, meeting rooms and other places. It is used to suck the oily fumes generated by electric grill pans, electric hot pots, multi-functional pots, electric baking pans, electric barbecue machines, etc., and pass through specific filters. After the net separates the oil fume, it discharges clean air indoors. It is a small / movable / internal circulation oil fume filtering machine.

Maintenance

- Must be repaired by professional person.
- When moving, cleaning or disassembling this product, operation must be stopped and the power supply disconnected.
- Do not attempt to replace the supply cord by yourself. If the supply cord is damaged, it must be replaced by its manufacturer, a service department or similarly qualified personnel in order to avoid a hazard.
- After each use, the oil collection cup and filter assembly need to be cleaned in time, and the filter assembly should be replaced regularly.

Usage

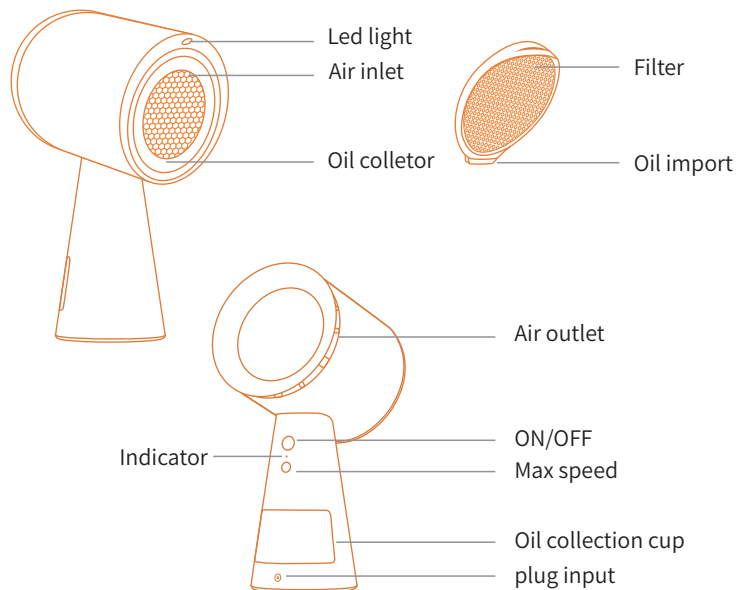

- Do not operate with wet hands.
- Do not place objects on top of the machine.
- Do not insert other objects into the air inlet and outlet.
- Please ensure that children are not allowed to play or use this machine to prevent accidents.

Limited

- This product is only suitable for household use. The manufacturer does not assume any responsibility if it is used for other purposes.
- It is forbidden to use this product with open flame cooking utensils, or place this product near a fire source.
- It is prohibited to store flammable and explosive gases in places where this product is used.
- It is forbidden to use in places with heavy humidity and easy to be exposed to water, such as bathrooms.
- Do not place the machine on an inclined or other unstable place.
- Avoid long-term direct sunlight.

2 Product Introduction

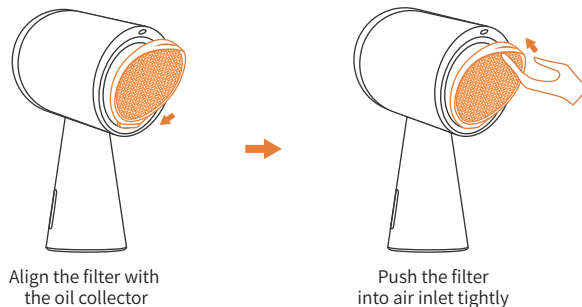

Accessory

Items	Items	Quantity
1	Desktop range hood	1
2	Adapter	1
3	Fliter	1
4	Manual	1

Only use the AC adapter provided.

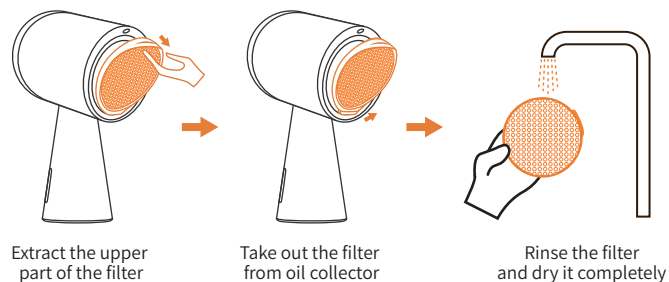

3 Product Assembly

3-1 Filter assembly

Make sure the filter is correctly placed in the right direction.

3-2 Clean the filter

Avoid forcefully taking apart the filter as it could impact the product's functionality.

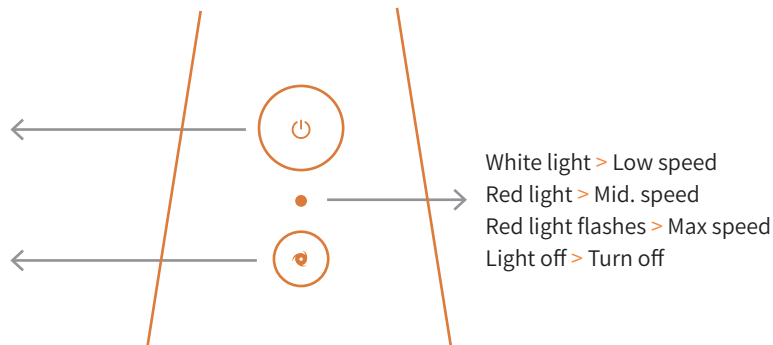

4 Product Usage

★ ON/OFF button

Short press to turn on/off the product and switch air speeds.
Sequence: On → low speed → mid. speed → Off.
Long press to turn on the front LED light when it turns on.

★ Max speed button

After turning on, press this button to activate the max speed.
This speed is capable of handling the large amount of oil fumes.
It will maintain maximum speed for 2 hours, then it will switch back to the mid. speed automatically.

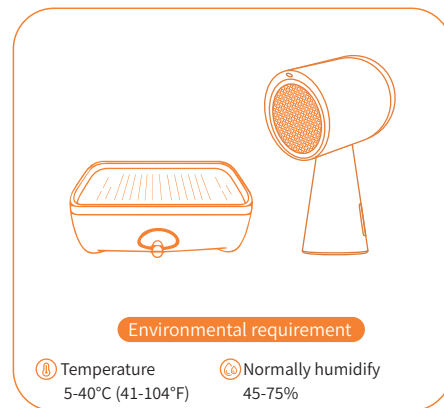

4-1 Power connection and storage

- 1 Please use the original adapter for power supply.
- 2 Prevent the cable from dangling freely (to avoid tripping).
- 3 Do not use this product if the machine is not operating normally, or if it is visibly damaged.

4-2 Guidelines for using this product with other small appliances

- 1 For better oil fume extraction efficiency, it is recommended to position this product alongside other small appliances (as shown in the right picture).
- 2 If you are using this item alongside other small appliances, ensure they are all positioned on the same surface, with a minimum gap of 8 cm between the bottom of this product and the pot's rim (the distance can be adjusted as needed according to the pot type).
- 3 Avoid directing the oil fumes towards the human body through the air outlet.
- 4 It is not allowed to relocate or apply pressure on the equipment while it is in operation.
- 5 Children, the elderly or patients who have lost the ability to take care of themselves, please use this product under adult supervision to prevent accidents.
- 6 When using this product, it should be placed out of reach of children, and children should be taught correctly not to use this product as a toy.
- 7 There must not be any objects blocking the air inlet/outlet.

4 Product Usage

4-3 Safety precautions

- 1 It is prohibited to use this product with open flame cooking utensils, and it is prohibited to place this product near fire sources.
- 2 To avoid electric shock and fire, please use the power cord provided and plug it into a suitable power outlet. Do not modify the plug itself in any way. If the power cord is damaged, to avoid danger, please notify professional maintenance personnel to replace it.
- 3 It is prohibited to excessively bend, bundle, drag, or use heavy objects to compress the power cord. Do not place the power cord close to high temperatures or sources of fire. Do not use wires to clamp into cracks or change the power cord by yourself.
- 4 It is forbidden to directly unplug and plug in the power supply with wet hands. When the machine is not used for a long time, please unplug it to prevent the insulation layer from aging and causing electric shock.
- 5 Do not move the machine or disassemble or assemble parts during operation. This may cause personal injury or machine failure. When cleaning, maintaining and replacing filter, be sure to cut off the power supply first.
- 6 If there are abnormal sounds, excessive heat, smoke, etc. during use, please stop using it immediately, cut off the power supply, and contact the customer service center.
- 7 Do not use the filter assembly without installation, as it will shorten the service life of the product.
- 8 Please use specific filter that match the machine. To ensure safety and machine performance, it is strictly prohibited to use other substitute products that have not been approved by our company or have been safety verified by a third party.
- 9 Please make sure that children are not allowed to play or use this machine to prevent accidents.
- 10 Do not subject the product to severe impacts or drops.
- 11 Do not put cotton swabs, iron wire, toothpicks, paper scraps and other small objects into the air inlet and outlet. Please place this product on a stable place to use it to prevent the machine from tipping over and causing damage to the body or parts.

4-4 Important safety measures

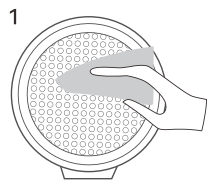

- 1 Each time the user uses this product, please clean the filter assembly and oil collection cup in time.
- 2 Please read all contents carefully before starting to use this equipment.
- 3 Basic safety precautions must be observed when using this equipment.
- 4 Please keep this user manual for further use.

5 Product Maintenance

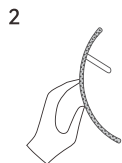

Cleaning, maintenance and related safety matters

- 1 The power supply must be disconnected and the impeller must be completely stopped before cleaning or maintenance can be performed to avoid injury.
- 2 In order to avoid odor or filter clogging after use, please clean the filter assembly and oil collection cup after each use of this product, and rinse it with warm water + dish soap (do not use hot water above 60°C for cleaning).
- 3 It is recommended to replace the filter assembly once every six months (the replacement cycle can be adjusted according to the use environment).
- 4 Before cleaning, maintaining or moving the product, the product must be turned off and unplugged.
- 5 Do not immerse the power cord or housing in water for cleaning or rinse under the faucet. Do not allow the internal parts of the product to get wet.
- 6 Do not use detergents, wire brushes, gasoline, vinegar or other volatile corrosive liquids to clean the product to avoid damage to the product.
- 7 Use a slightly damp cloth to clean the surface of the housing.
- 8 After cleaning the filter assembly, you must wait until the filter assembly is completely dry before connecting to the power source.
- 9 If it will not be used for a long time, please clean and dry the filter assembly and oil collection box, then store them back in the packaging box and place them in a dry, cool and safe place.

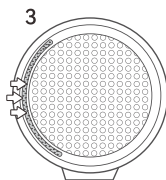

6 Disposable Filter

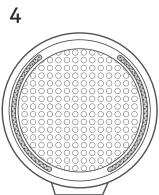

Clean the back of the filter and ensure it is dry.

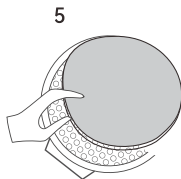

Remove the protective paper of the Velcro.

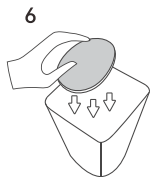

Attach Velcro to the edge of the filter.

Attach Velcro to the left and right edge of the filter.

Attach the disposable filter to the Velcro and reinstall it.

Dispose of the disposable filter after use.

7 Technical parameter

AH003			
Voltage	DC 24V	Material	ABS / PC
Power	36W	Fliter size	Φ120mm
Mode(Speed)	Low / Mid. / Max.	Ventilate capacity	Max. 3m ³ /min
Adapter	AC 100-240V 50/60Hz	Product size	210×167×374mm
			8.3×6.6×14.7inch

8 Troubleshooting

Prior to starting the Maintenance, refer to the table provided for guidance.

Trouble	Reason	Solution
Product does not work	- The power cord may not be plugged in, or it has poor contact - The power switch may not be turned on - May not use the original adapter	- Plug in the power and make good contact - Turn on the power switch - Use original adapter
Poor effect in absorbing oil smoke /water vapor	- The filter assembly is not installed properly - The filter is clogged - The air inlet/outlet is blocked - The air outlet is too close to obstacles such as walls	- Install the filter assembly correctly - Clean or replace the filters - Turn off the product and remove foreign matter from the air inlet and outlet - Make sure there are no obstructions near the air outlet
Unable to activate Max speed	- The product is not turned on yet	- Turned on the product before activating the Max speed

If the following conditions occur, please contact after-sales service:

1. It irregularly or fails to function, and the above methods are invalid;
2. Abnormal functioning occurs due to the infiltration of outside materials or water.

VIP SERVICE

Plus up to 12 months

Extension for excellent after-sales service

Thank you for choosing **amzchef** product. We sincerely hope that you are satisfied with it. This product is warranted against any electronic or mechanical defects for a period of **12 months** from the date of original purchase by the consumer. Replacement unit/parts will be warranted for the remaining portion of the original warranty period.

Questions? Problems? Concerns?

If you need any help, please feel free to contact us.

Problem + order number + a photo or a video attached in the email would help us solve the problem better and faster. We will get back to you within 24 hours once we received the email.
