

Installation & Inspiration Guide

**Amazing Results In
3 Easy Steps!**

No Tools Necessary | 20-Minute Installation

Flower, Shrub & Tree Kit

Ground Cover & Flower Bed Kit

Container & Hanging Basket Kit

Vegetable Garden Kit

Raindrip Kits

It's easy to customize your system to fit your landscape. For outdoor use only.

1 Year Limited Warranty

Flower, Shrub & Tree Kit

Kit No. SDFSTH1P - with timer
Kit No. SDFSTXP - without timer

Includes everything you need to water your flowers, shrubs and trees without any additional tools needed!

Ground Cover & Flower Bed Kit

Kit No. SDGCBHP - with timer

Includes adjustable sprinkler heads that are ideal for watering your ground cover and flower beds and use 50% less water than traditional sprinklers.

Container & Hanging Basket Kit

Kit No. R560DP - with timer

Completely customizable kit to water your potted plants, hanging baskets or planter boxes.

Vegetable Garden Kit

Kit No. R567DT - without timer

Includes 1/4" dripper line for custom placement that results in better growth and higher yields while using less water than traditional methods.

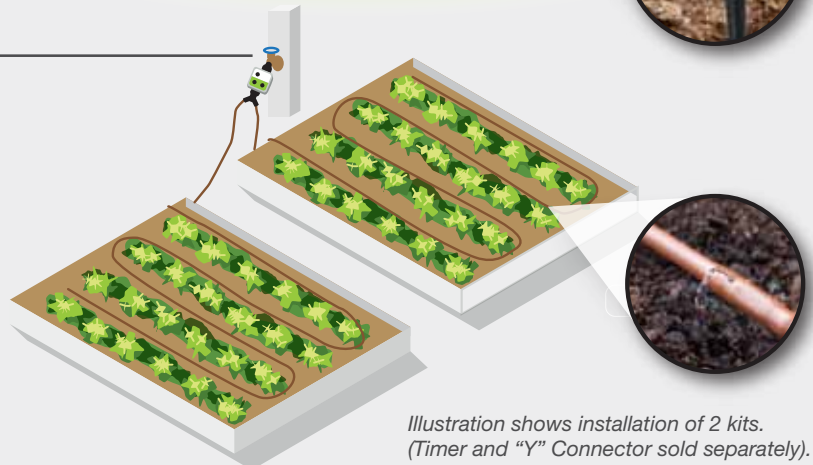

Illustration shows installation of 2 kits. (Timer and "Y" Connector sold separately).

Get Started!

Installation is quick, easy and tool-free. We've organized our parts by step. Grab bag number one to get started.

STEP 1

- 1 - Universal Faucet Timer*
- 1 - Filter/Pressure Regulator
- 1 - "Y" Connector
- * (2) AA Alkaline batteries not included (Timer in Kit No. SDFSTH1P only)

STEP 2

- 1 - Universal Tee
- 1 - Universal End Plug
- 1 - 50 ft. Pre-assembled Supply Tubing
- 5 - Wire Stakes
- 10 - Goof Plugs

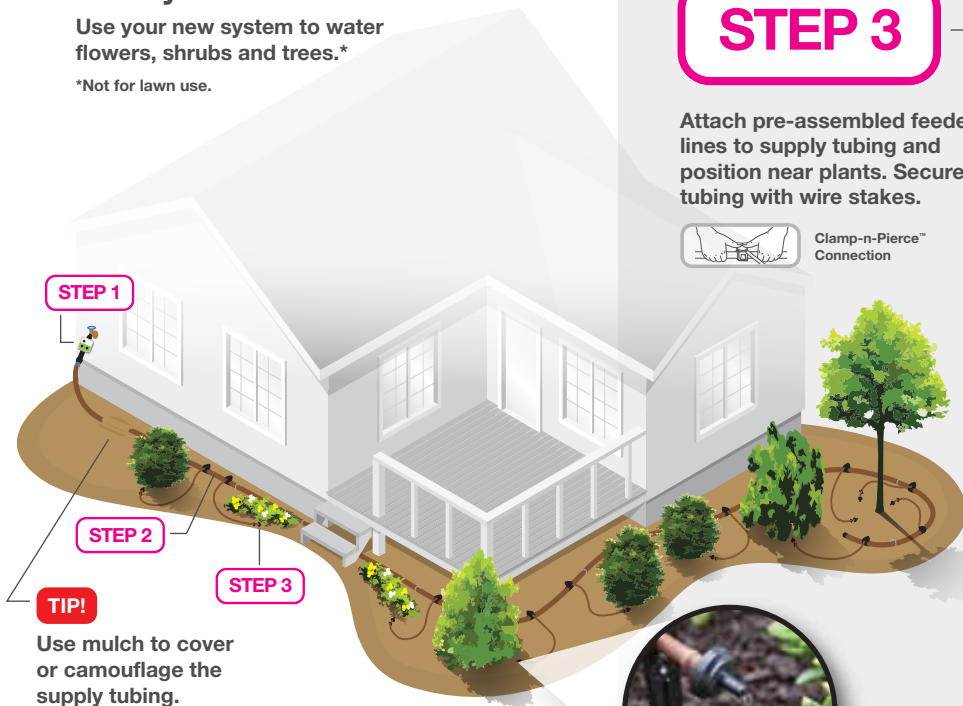

STEP 3

- 10 - Support Stakes
- 10 - Pre-assembled 3 ft. Feeder Lines, 2 GPH drippers

The System

Use your new system to water flowers, shrubs and trees.*

*Not for lawn use.

TIP!

Use mulch to cover or camouflage the supply tubing.

raindrip

A Better Way to Water.

raindrip.com

TOOL-FREE

1·2·3
easy

STEP 1

Connect the timer and filter/pressure regulator to your outdoor faucet.

STEP 2

Connect the supply tubing to the filter/pressure regulator and lay out in the area you want to water.

STEP 3

Attach pre-assembled feeder lines to supply tubing and position near plants. Secure tubing with wire stakes.

Clamp-n-Pierce™ Connection

Outdoor Faucet

TIP!

Use the "Y" Connector to convert your faucet into two separate outlets

Universal Faucet Timer
(Included in Kit No. SDFSTH1P only)

Note: Hand Tighten only!

TIP!

Additional Instructions and videos for programming your timer can be found on raindrip.com

Filter/Pressure Regulator

Hose Thread Connections

50 ft. Supply Tubing

TIP!

Fill your supply tubing with water (also known as pressurizing) before installing your feeder lines

Feeder Lines

Wire Stakes

TIP!

Use the plastic stake to position and secure each dripper

TIP!

Connect another roll of supply tubing to expand your system

Make sure not to use more than 200 ft. of supply tubing and do not exceed 150 GPH per faucet connection

Remove endcap to connect another roll of supply tubing.

After your system is installed, remove the end cap and turn on faucet to flush out any dirt that may be in the line. Replace cap before beginning normal watering.

Ground Cover & Flower Bed Kit

Kit No. SDGCBHP

Configurations and Applications

Water outdoor plants anywhere!

It's easy to customize your system to fit your landscape.

Underground (optional)

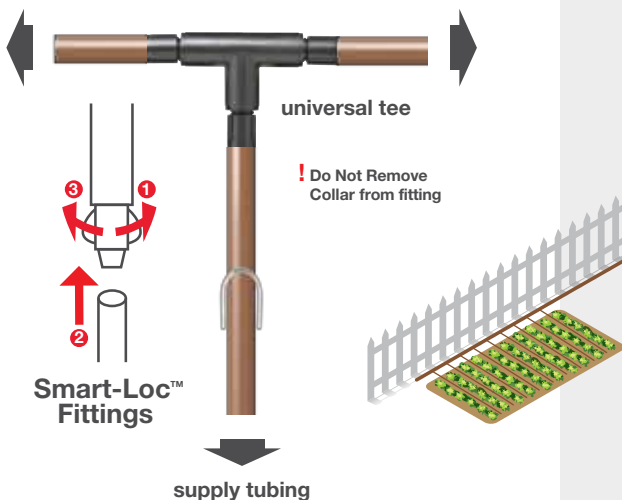

Bury supply tubing underground in order to water a planter box or run underneath a concrete pathway.

Direction and Distance

Branch supply tubing in opposite directions with a universal tee fitting and extend for long distances with extra supply tubing.

Watch a Smart-Loc™ Connection Video

[YouTube.com/user/RaindripInc](https://www.youtube.com/user/RaindripInc)

1. Expose the tapered end of the adaptor by rotating the collar all the way up the thread.
2. Using force, insert tubing onto tapered end.
3. Twist collar over the tubing to secure in place.

raindrip
A Better Way to Water.

raindrip.com

Planter Box (Away from House)

Bury supply tubing to reach a planter box if necessary

TIP!

Avoid placing supply tubing on turf that gets mowed

For grassy areas that are mowed you can bury your supply tubing

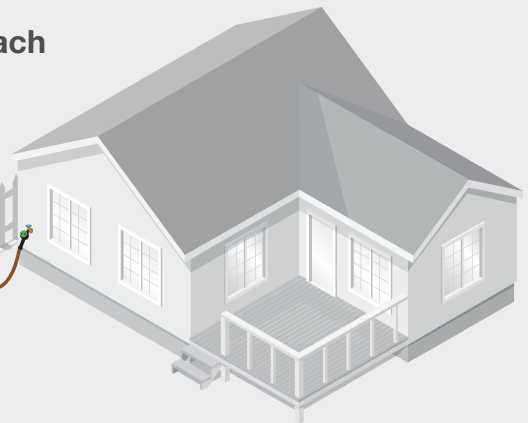

Under Concrete Pathway

Run supply tubing under a concrete pathway

Extended Reach

Extend your system long distances

Multi-directional

Branch supply tubing in multiple directions

TIP!

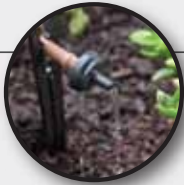

Fittings are reusable

Specifications and Scheduling

This guide is an aid to help you get started.

GPH = Gallons Per Hour

2 GPH Feeder Line

Trees

Shorter than 15 feet

3 Feeder Lines

Taller than 15 feet

5 Feeder Lines

Shrubs

Shorter than 4 feet

1 Feeder Line

Taller than 4 feet

2 Feeder Lines

Flowers and Ground Cover

1 Feeder Line spaced every 12-18 inches

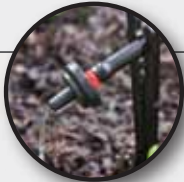

1/2 Circle up to 6 1/2 ft. Spray Radius and 24 GPH Max Sprinkler

Ground Cover & Flower Beds

1 Feeder Line spaced every 8-10 feet

1/2 GPH Dripper

Containers

Smaller than 1 foot wide

1 Dripper

Larger than 1 foot wide

2+ Drippers

Planter Boxes

1 Dripper spaced every 12-18 inches

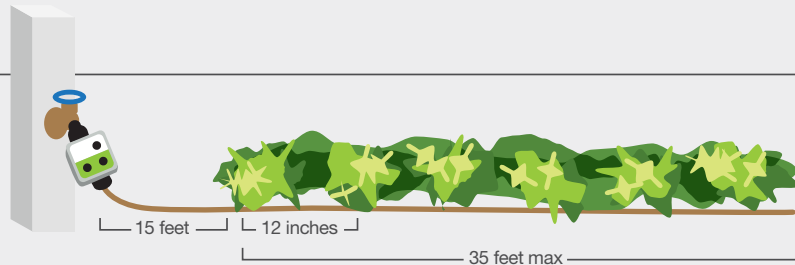

1/2 GPH (every 12") 15 ft. Lead-in

Veggies

Plant every 12 inches

1 Covers 35 feet

Your Timer Watering Schedule Start Point!

Your specific watering schedule will depend on plant type, soil type, climate, and type of watering device.

Here are two suggested start point watering schedules for your automatic timer; adjust as needed.

Once a day every day

FREQUENCY 24 hours

RUN TIME 15 minutes

-OR-

Once every 2 days

FREQUENCY 48 hours

RUN TIME 30 minutes

TIP!

Watch the health of your plants for wilting due to under or over watering

TIP!

Check for dry or wet soil about 3 inches below the surface

TIP!

Adjust your watering schedule as needed to keep your plants looking vibrant and healthy

TIP!

Clean filter at the beginning of every season

Expansion and Customization*
