Undercounter/Freestanding Refrigerated  
Beverage Centers

(071309J)

**IMPORTANT - PLEASE READ AND FOLLOW**

- Before beginning, please read these instructions completely and carefully.
- Do not remove permanently affixed labels, warnings, or plates from the product. This may void the warranty.
- Please observe all local and national codes and ordinances.
- Please ensure that this product is properly grounded.
- The installer should leave these instructions with the consumer who should retain for local inspector's use and for future reference.

**A GFI shall be used if required by NFPA-70 (National Electric Code), federal/state/local laws, or local ordinances.**

- The required use of a GFI is normally related to the location of a receptacle with respect to any significant sources of water or moisture.
- Viking Range Corporation will NOT warranty any problems resulting from GFI outlets which are not installed properly or do not meet the requirements below.

**If the use of a GFI is required**, it should be:

- Of the receptacle type (breaker type or portable type NOT recommended)
- Used with permanent wiring only (temporary or portable wiring NOT recommended)
- On a dedicated circuit (no other receptacles, switches or loads in the circuit)
- Connected to a standard breaker of appropriate size (GFI breaker of the same size NOT recommended)
- Rated for Class A (5 mA +/- 1 mA trip current) as per UL 943 standard)
- In good condition and free from any loose-fitting gaskets (if applicable in outdoor situations)
- Protected from moisture (water, steam, high humidity) as much as reasonably possible

**WARNING:**

To reduce the risk of fire, electrical shock, or injury when using your refrigerated beverage center, follow basic precautions including the following:

**•FOR YOUR SAFETY•**

DO NOT STORE OR USE GASOLINE OR OTHER FLAMMABLE VAPORS AND LIQUIDS IN THE VICINITY OF THIS OR ANY OTHER APPLIANCE. THE FUMES CAN CREATE A FIRE HAZARD OR EXPLOSION.

**It is your responsibility to be sure your refrigerated beverage center is:**

- located so the front is not blocked to restrict incoming or discharge air flow.
- properly leveled.
- located in a well ventilated area.
- connected to the proper kind of outlet, with the correct electric supply and grounding. A 115 volt, 60 Hz, 15 amp fused electrical supply is required. **NOTE:** Time delay fuse or circuit breaker is recommended.
- not used by anyone unable to operate it properly.
- used only for its intended purpose.
- properly maintained.

**•SAVE THESE INSTRUCTIONS•**

**PROPER DISPOSAL OF YOUR OLD REFRIGERATION PRODUCT**

**⚠ DANGER**  
**SUFFOCATION HAZARD**  
 Remove doors from your old refrigeration unit. Failure to do so can result in child entrapment, which can cause death or brain damage.

**IMPORTANT:** Child entrapment and suffocation are not problems of the past. Junked or abandoned refrigerated beverage centers are still dangerous, even if they will sit for "just a few days." If you are getting rid of your refrigerated beverage center, please follow the instructions below to help prevent accidents.

**BEFORE YOU THROW AWAY YOUR OLD REFRIGERATION PRODUCT:**

- Take off the doors.
- Leave the shelves in place so that children may not easily climb inside.

**GENERAL INFORMATION**

**Unpack**

1. Remove banding from bottom of carton. Lift carton up and off of the unit.
2. Remove all tape and packaging material from the outside and inside of the cabinet.
3. Keep all carton packaging until your refrigerated beverage center has been thoroughly inspected and found to be in good condition.

**AREA REQUIREMENTS**

**Units Certified for Indoor Use - (Black outer cabinet)**

MUST BE INSTALLED IN AN AREA PROTECTED FROM THE ELEMENTS, SUCH AS WIND, RAIN, WATER (SPRAY OR DRIP).

1. Place unit so the front side will be completely unobstructed to provide proper air flow. The unit may be closed in on the top and three sides, but the front **MUST BE** unobstructed for air circulation and proper operation. Installation should be such that the cabinet can be moved for servicing if necessary.
2. Unit should be in a well ventilated area with temperature above 55°F (13°C) and below 110°F (43°C). Best results are obtained at temperatures between 65°F (18°C) and 80°F (27°C) for built-in products and 65°F (18°C) and 90°F (32°C) for freestanding products.
3. Provisions for electricity should be determined before placing unit in proper place.

**Units Certified for Outdoor Use - (Outdoor models contain a T after the base model number (ex. VUAR153T/VUAR143T) and have a stainless steel outer cabinet.)**

1. Place unit so the front side will be completely unobstructed to provide proper air flow. The unit may be closed in on the top and three sides, but the front **MUST BE** unobstructed for air circulation and proper operation. Installation should be such that the cabinet can be moved for servicing if necessary.
2. Unit should be in a well ventilated area with temperature above 40°F (4.4°C) and below 110°F (43°C). Best results are obtained at temperatures between 60°F (16°C) and 100°F (38°C).
3. Provisions for electricity should be determined before placing unit in proper place.

## CUSTOM WOOD FRAME INSTALLATION INSTRUCTIONS (DFUR MODEL)

Note: Weight of wood panel must not exceed 20 lbs.

### Wood Screws

1. A #10 pan head wood screw should be used to properly secure the wood frame. A total of 10 screws will be needed.
2. Only use pan head screws.
3. DO NOT select a screw that is longer than the wood thickness at the screw locations.
4. Use recommended pilot holes for the frame material. (See chart)

Working Material	Wood Screw Size #10
Hardwood	3/32 (0.24 cm)
Softwood	5/64 (0.20 cm)

### Assembling Door Hinge Brackets

(Disregard if hinge brackets are already attached)

1. Attach the top and bottom door hinge brackets to the door with the #10-32 machine screws and a 1/8" allen head driver as shown in Figure 1 below.
2. Press in the shoulder bushings to the top and bottom door hinge brackets. Make certain that the shoulder is to the outside of the door as shown in Figure 1 below.
3. Test fit the door to the unit to make certain door will hang correctly. The door is hung correctly when the top of the door is parallel to the top of the unit. (See Figure 2) Adjustments can be made by loosening the door hinge machine screws and moving the door hinge brackets on the door.
4. Tighten all four (4) machine screws after adjustments have been made.
5. Remove the door from the unit by removing the units top hinge set screw and angling the door off of the bottom hinge pin.

Figure 1

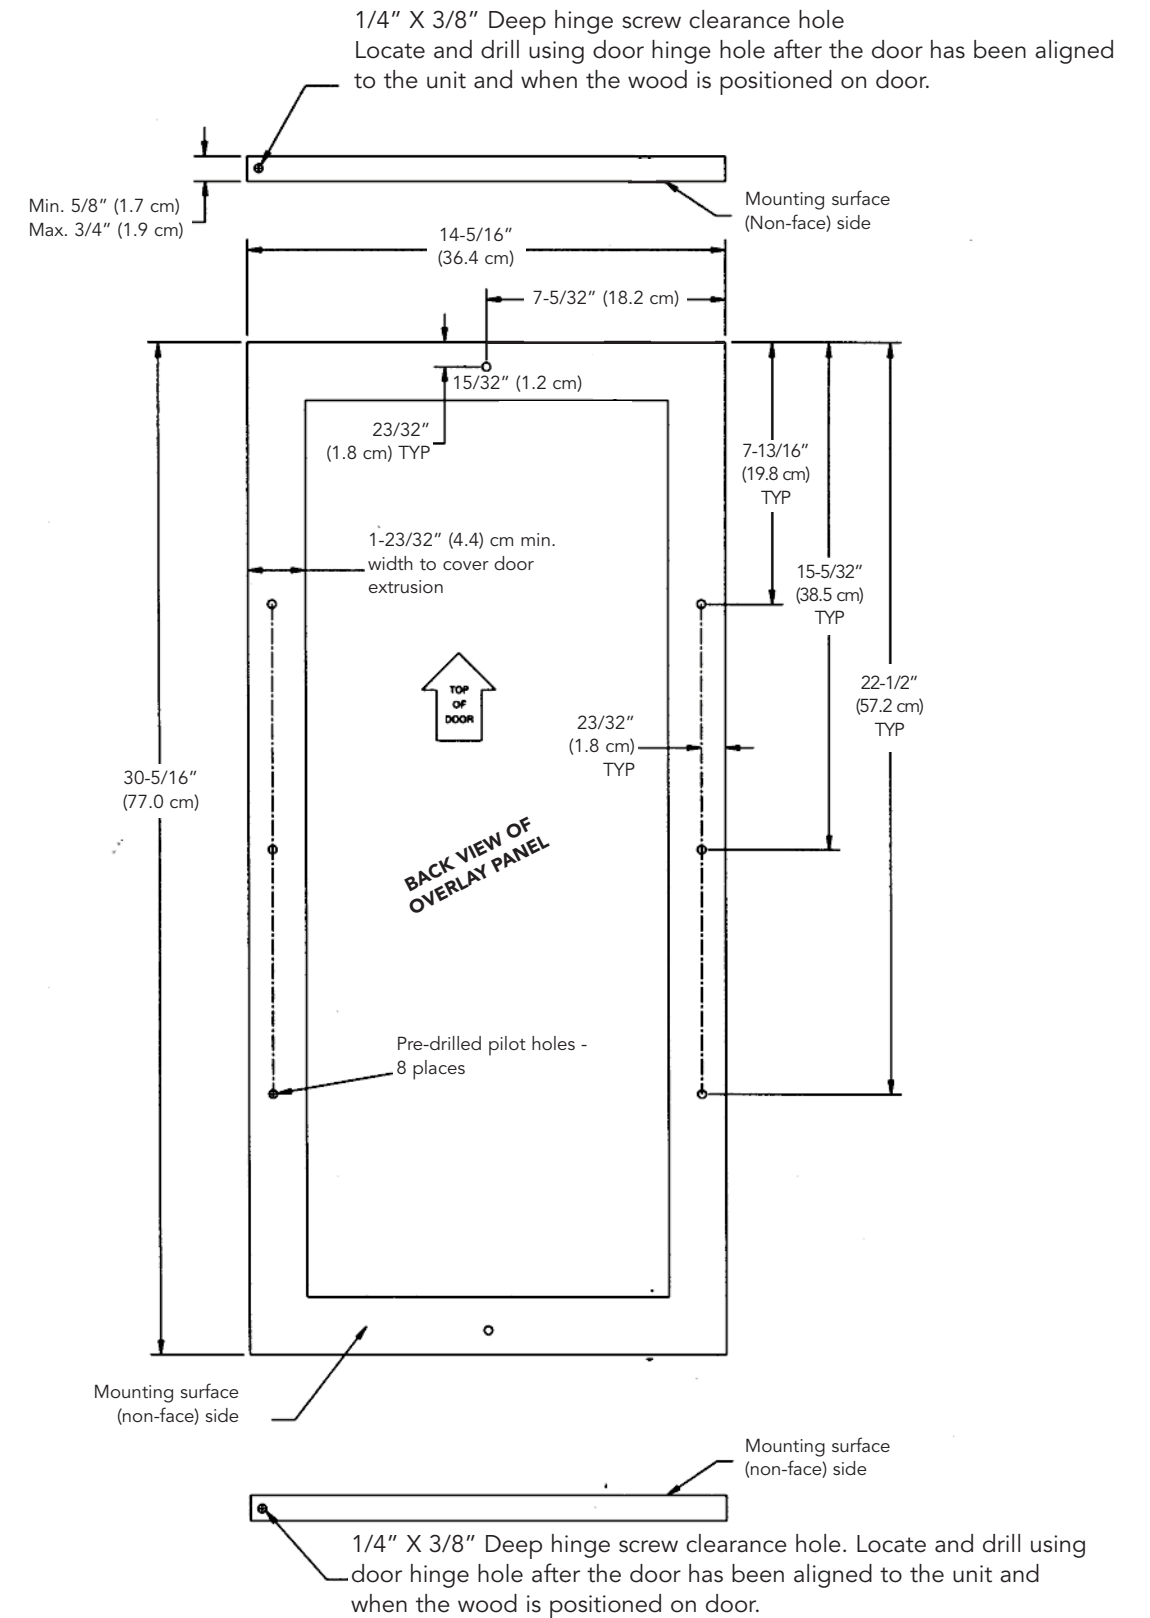

Figure 2

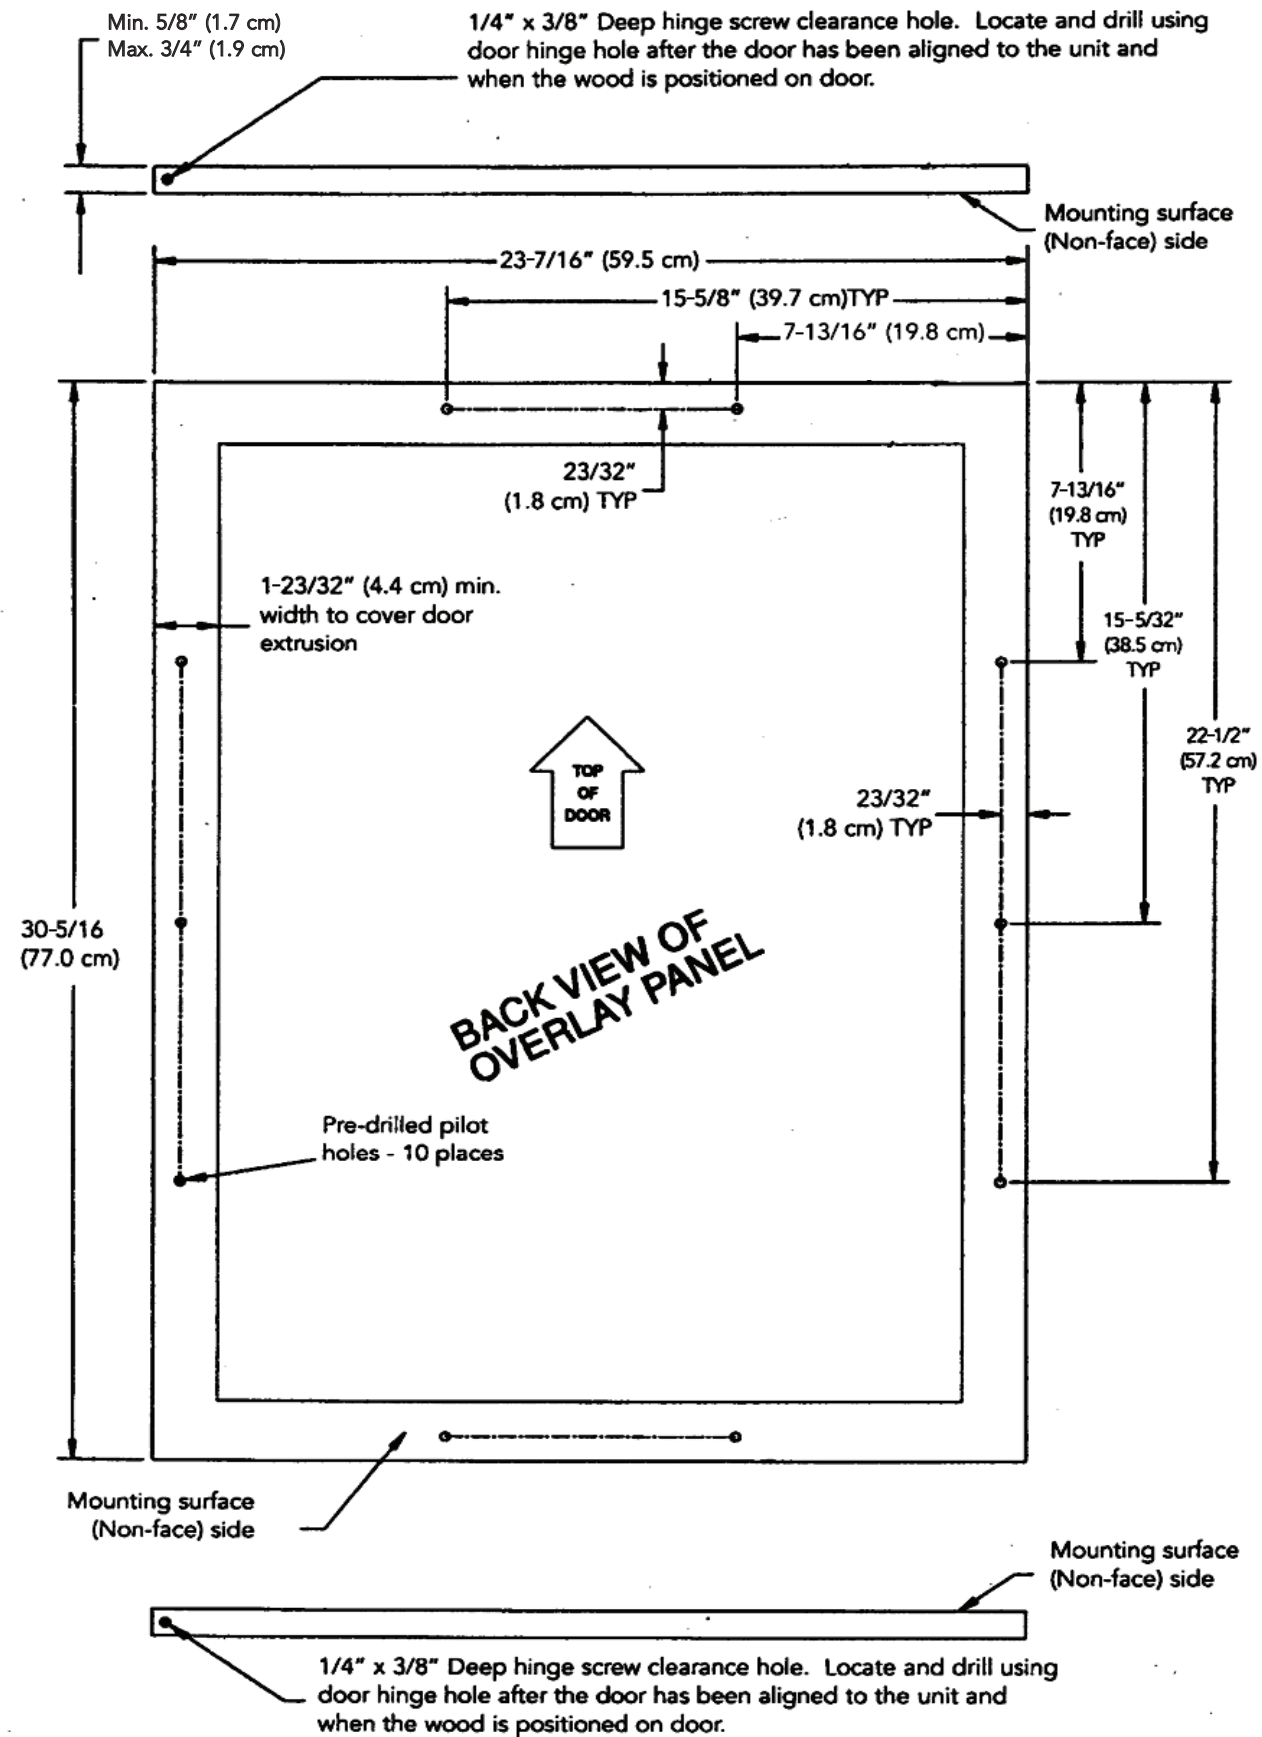

## Selecting and Preparing the Wood Frame - 15" W. DFUR Model

FOR A 3-1/2" TOE KICK  
(COVERS THE ENTIRE DOOR EXTRUSION)

## Selecting and Preparing the Wood Frame - 24" W. DFUR Model

FOR A 3-1/2" TOE KICK  
(COVERS THE ENTIRE DOOR EXTRUSION)

## Attaching the Handle

Attach the handle of your choice by drilling mounting holes through panel. Countersink or counterbore holes from back side of panel for handle screw heads to be flush.

## Attaching the Wood Frame to the Door (DFUR MODEL)

1. If the door is attached to the unit, remove by unscrewing the top allen head set screw at the top hinge. Remove the door by angling the door off of the bottom hinge pin.
2. Peel back the door gasket to expose the screw holes.
3. Set the wood frame flush to the front of the door in the desired location. Clamp the wood frame to the door if necessary.
4. Insert the wood screws through the back of the door into the pilot holes in the wood frame and tighten.
5. Reinstall the door gasket by pressing into the door channel. Make certain the corners are inserted fully.
6. Install the door to the unit. Use the supplied plastic washer as shown in the figure below.
7. Realigning the door may be necessary. Any final door adjustments can be made using a 1/8" allen head driver to adjust the door's hinges. (See figure below)
8. Attach the door to the unit by reversing step number 1 above.

## Hinge Hardware Installation Details

## LEG LEVELER INSTALLATION

Read Before Installing Leg Levelers

### ⚠ WARNING

Do not lay unit on top, side, back, or front. If unit is accidentally laid in any position other than right side up, then the unit must remain in the upright position for at least 24 hours before plugging the unit in.

1. Four leveling legs are pre-installed in the base of the unit at the factory.
2. The unit should be leveled from front to back and side to side. If floor conditions do not allow the unit to sit level, adjust the leg levelers by turning the required leg leveler counter-clockwise to increase the height and clockwise to reduce the height.

## ELECTRICAL CONNECTION

### ⚠ WARNING

#### ELECTRICAL SHOCK HAZARD

Failure to follow these instructions could result in fire or electrical shock.

#### Electrical Requirements

A 115 volt, 60 Hz, AC only 15 amp fused electrical supply is required. (A time delay fuse or circuit breaker is recommended.) It is recommended that a separate circuit, serving only this appliance, be provided.

- ELECTRICAL GROUND IS REQUIRED ON THIS APPLIANCE.
- DO NOT UNDER ANY CIRCUMSTANCES REMOVE THE POWER SUPPLY CORD GROUND PLUG.
- DO NOT USE AN EXTENSION CORD

#### Recommended Grounding Methods

For your personal safety, this refrigerated beverage center must be grounded. This appliance is equipped with a 7' (2.1 m) power supply cord having a 3-prong grounding plug. To minimize possible shock hazard, the cord must be plugged into a mating 3-prong grounding type wall receptacle grounded in accordance with the National Electrical Code and local codes and ordinances. If the circuit does not have a grounding type receptacle, it is the responsibility and obligation of the customer to exchange the existing receptacle in accordance with the National Electrical Code and applicable local codes and ordinances. The third ground plug SHOULD NOT, under any circumstances, be cut or removed. All UL listed refrigerated beverage centers are equipped with this type of plug.

## FINAL PREPARATION

1. Some stainless steel parts may have a plastic protective wrap which must be peeled off. The interior of the refrigerated beverage center should be washed thoroughly with hot, soapy water, rinsed and wiped dry to remove film residue and any installation dust or debris before being used. Solutions stronger than soap and water are rarely needed.
2. All stainless steel parts should be wiped with hot soapy water. If buildup occurs, do not use steel wool, abrasive cloths, cleaners, or powders. If it is necessary to scrape stainless steel to remove encrusted materials, soak with hot, wet cloths to loosen the material, then use a wood or nylon scraper. Do not use a metal knife, spatula, or any other metal tool to scrape stainless steel; scratches are almost impossible to remove.

## LIGHT ASSEMBLY REPLACEMENT - 15" W. Models

### ⚠ WARNING

#### ELECTRICAL SHOCK HAZARD

Failure to follow these instructions could result in fire or electrical shock.

**NOTE:** Please contact your Viking Range Corporation parts distributor or dealer to order new light assembly.

To replace the light, first disconnect the refrigerated beverage center's power cord. Next, remove both the green ground wire screw located on the left of the light assembly and the other screw located on the right of the light assembly with a 5-16" hex head screwdriver. (See drawing). Unplug the light unit and remove complete light assembly.

To install the new light assembly, screw in the green ground wire screw and the screw located on the right with a 5/16" hex head screwdriver and plug the light unit in.

## LIGHT BULB REPLACEMENT - 24" W. Models

### ⚠ WARNING

#### ELECTRICAL SHOCK HAZARD

Failure to follow these instructions could result in fire or electrical shock.

This unit uses a 15-watt incandescent bulb located behind the display housing.

To replace the light bulb:

1. Unscrew the old light bulb located behind the display housing.
2. Discard the old light bulb.
3. Screw new light bulb into location behind the display housing.

## ENERGY SAVING TIPS

- Reduce door openings.
- Close the door as soon as you can.
- Keep the condenser coils on bottom of the refrigerated beverage center clean. (See "Cleaning and Maintenance".)
- Adjust the temperature control to a warmer setting when practical.
- Do not put hot foods in the refrigerated beverage center.
- Install unit away from the stove or other heat sources.

## SETTING THE CONTROLS

The temperature of the refrigerated beverage center ranges from 40°F to 65°F (4°C to 18°C).

# TruProtect™ “Basic” Function “Quick” Reference

### Solid Door Models:

Function	Function Access
Turn Unit On & Off	Pressing and holding the keypad  for 5-seconds will turn the unit “ON” or “OFF”.
Adjust Temperature Set-Point	To adjust temperature set-point, touch  keypad and current set-point will be displayed. Use the  or  keypads to adjust set-point temperature.
Display “Actual” Temperature	Display represents “real-time” monitoring of the compartments stored wine and/or contents. Some temperature fluctuation around your desired set-point is normal.
Select °F or °C Display	Pressing the  keypad will toggle the display between Fahrenheit and Centigrade temperature display.
Black-Out Mode	Display automatically shuts off when door is closed.
Display Lighting	Display Lighting can be enabled with the door closed by pressing the  keypad.
Sabbath Mode	Press and hold the  keypad while pressing the  keypad four (4) times.
TruProtect™ System	System monitoring is automatically enabled unless system has been disabled. (See below.)
Door Ajar Alarm	N/A
High/Low Temp Alarm	<b>Note:</b> Alarm may occur when changing set-points in excess of 10°F, and/or high usage, this is normal.
Power Failure Alarm	<b>Note:</b> Alarm will occur upon initial installation, since unit was run at factory to verify quality, this is normal.
Reset Alarms	Close door to reset Door Ajar alarm. Press  keypad to reset all other alarms.
Disable/Enable TruProtect™	Press and hold the  keypad for 5-seconds to “disable” or “enable” TruProtect™ System.

### Glass Door Models:

Control Confirmation/Comment
Display will be blank <b>38°F</b> when refrigeration system is off. Lights will still function, but will time-out 15 minutes after each activation, if door is left open or display lighting is on, to prevent overheating.
“Set” will appear in display <b>55°F</b> when in set-point mode. “SET” mode will automatically time-out in 10 seconds if no keypad activity occurs, or you may exit “SET” mode by pressing the  keypad a second time.
Temperature variation in “compartment air”, above and below set-point, is a normal effect of refrigeration system cycling on and off. Stored items will not experience the full temperature swing of the compartment air due to the dampening effect of their thermal mass.
<b>55°F = 13°C</b>
In addition, the control panel is hidden when door is closed.
Option available on Glass Door Models only.
Display will flash <b>SA</b> four (4) times, then unit will enter Sabbath Mode. The display, audible alarms, LED and lights will be disabled. Sabbath Mode will automatically time-out in 36 hours, or can be exited by repeating the enable keypad routine.
LED displays steady green  when TruProtect™ is enabled.
Audible alarm will sound 3-times every 30-seconds, LED will flash green.
Alarm will sound 6-times every minute and LED will flash red  if product temperature excursions occur for a duration outside acceptable limits.
LED will flash amber  whenever power is interrupted to unit. No audible signal.
Note that although pressing the  keypad will reset the alarms, the alarm will resume if the “alarm condition” still exists.
LED displays steady green  when alarms enabled. LED displays steady amber  when disabled.

## SETTING THE CONTROLS (cont'd)

FOR OUTDOOR UNITS - it is recommended that in temperatures above 110°F (43.3°C) and below 40°F (4.4°C) the unit be shut off. The normal operating range for the unit is between 60°F (15.6°C) and 100°F (37.8°C).

### General Tips and Suggestions

- After making a temperature adjustment, allow 24 hours for your refrigerated beverage center to reach a new temperature setting.
- The motor will start and stop often. It must do this to maintain the temperature setting.
- Unplug the refrigerated beverage center before working on anything with the electrical system.
- Exercise caution when sweeping, vacuuming, or mopping near the front of the unit. Damage to the grill and/or the light fixture switch can occur.

## WINE SHELVES

To load wine bottles on wine shelves, alternate the necks of the bottles, front to back (see illustrations below). The glass shelf above the wine shelf creates the separate temperature area. Do not remove if storing wine.

15" W. Wine Shelf

24" W. Wine Shelf

**NOTE:** The bottom wine shelf on a 24" W. model holds 4 bottles. Bottles do not alternate front to back.

## CLEANING AND MAINTENANCE

Any piece of equipment works better and lasts longer when maintained properly and kept clean.

### Condenser

The condenser tubing inside the cabinet does not require frequent cleaning; however, satisfactory cooling depends on adequate ventilation over the coils. Be sure that nothing obstructs the required air flow openings in front of the cabinet. Spiders and insects can nest in and around the refrigerated beverage center causing damage to the unit. Frequently brush or vacuum lint and dirt from the condenser coils for efficient performance by unscrewing the grill on the bottom front of cabinet.

### Cabinet

The cabinet can be washed with mild soap and water and thoroughly rinsed with clear water. Never use abrasive scouring powders.

### Interior

Wash interior compartment with mild soap and water. Do not use abrasive powder, solvent, polish cleaner or undiluted detergent.

### Stainless Steel Parts

All stainless steel parts should be wiped regularly with hot soapy water. Use a liquid cleaner designed for stainless steel when soapy water will not do the job. **Do not use** steel wool, abrasive cloths, cleansers, or powders. Do not permit citrus or tomato juice to remain on stainless steel surfaces, as citric acid will permanently discolor stainless steel.

### Brass Parts

**CAUTION:** All brass parts are coated with an epoxy coating. **DO NOT USE BRASS OR ABRASIVE CLEANERS ON THE BRASS PARTS.** All brass parts should be wiped regularly with hot soapy water. When hot soapy water will not do the job, use every day non-abrasive household cleaners.

### Glass Door (Indoor Units only)

Use a glass cleaner or mild soap and water with a soft cloth to clean the glass door. Do not use any abrasive powders. On full overlay models, use caution when cleaning near logo area.

### Door Gasket

The vinyl gasket may be cleaned with mild soap and water, a baking soda and water solution, or a mild scouring powder.

### Painted Surfaces

Wash with warm soapy water. **DO NOT USE** steel wool, abrasive cleansers, ammonia, acids or commercial oven cleaners which may damage the finish.

## TROUBLESHOOTING CHART

Problem	Possible Cause	Solution
Odor in cabinet	•Unit interior needs cleaning.	•Clean inside of unit.
Noisy operation	•Unit not level.	•Adjust leveling legs.
Unit vibrates.	•Unit not level.	•Adjust leveling legs.
	•Weak floor.	•Rebuild floor or move to a different location.
Interior lighting not working.	•Light burned out.	•Replace light.
	•No power at outlet.	•Test outlet with lamp.
Appliance will not run.	•Control panel turned "OFF".	•Turn unit on with on/off pad on control panel.
	•Power cord not plugged into power source	•Plug unit into power source
	•House fuse blown.	•Reset house fuse.
Appliance runs too long.	•Prolonged door openings.	•Reduce number and/or duration of openings.
	•Control panel set too cold.	•Raise temperature of unit via control panel.
	•Condenser needs cleaning.	•Clean condenser.
Moisture collects inside of unit.	•Too many door openings	•Reduce number of door openings.
	•Prolonged door openings.	•Reduce duration of door openings.
	•Hot, humid weather increases condensation.	•Move unit to cooler location. •As humidity decreases, moisture will disappear.
Moisture collects on outside surface of the unit.	•Hot, humid weather increases	•Move unit to a cooler location.
	•Control improperly set.	•Reset to slightly warmer temperature.
Interior too hot/too cold	•Control improperly set.	•Reset control to desired temperature.
	•Faulty thermometer.	•Recheck with second thermometer.

SERVICE DIAGNOSTICS

# TruProtect™ “Advanced” Function “Quick” Reference

Solid Door Models:

Function	Function Access
Show Room Mode	Enable the Show Room Mode by pressing and holding the  keypad while performing a “Power On Reset”, (POR), i.e. - disconnect and reconnect the power supply to unit. Exit Show Room Mode by initiating a POR only.
Service Diagnostics	<p>“Enter” and “Exit” Service Diagnostics mode by pressing and holding the  keypad while pressing the  keypad 4-times within 5-seconds. Service Diagnostics mode also will automatically exit after 5-minutes of no keypad entry.</p> <p><u>Display Error Code Reference:</u>                      The microprocessor in the control continually monitors critical refrigeration system components for proper operation. If component parameters exceed normal operating specifications, the display will automatically flash the respective error code as follows:</p> <ul style="list-style-type: none"> <li><b>E1</b> ⇨ Compressor fault, (high/low amps).</li> <li><b>E2</b> ⇨ Condenser fan motor fault, (high/low amps).</li> <li><b>E3</b> ⇨ Evaporator thermistor “sensor B” fault, (out-of-range).</li> <li><b>E4</b> ⇨ Display thermistor “sensor A” fault, (out-of-range).</li> </ul> <p>Please call a qualified service technician if any of these codes are displayed.</p>

Glass Door Models:

Control Confirmation/Comment				
Show Room Mode will disable the refrigerator system and fans while allowing the internal lights, display and user interface panel to function. Lights will time out after 15-minutes of continuous on-time while in Show Room Mode as a safety feature. The 15-minute light-on time can be reactivated by closing and opening the door or by pressing the keypad.				
Service Diagnostics Mode enables service technicians to identify the firmware and software versions, test status of “model specific” system components and sensors and change state of components where applicable, (i.e. - compressor on/off, etc...). While in Service Diagnostics Mode, tests are incremented by pressing the  keypad and specific component state can be changed to “on” and “off” by pressing the  and  keypads respectively. The following component tests are available:				
Test #	Component Description	OK	Off/Open	On/Shorted
0	Temp Sensor A	<b>0 -</b>	<b>00</b>	<b>01</b>
1	Temp Sensor B	<b>1 -</b>	<b>10</b>	<b>11</b>
2	Compressor	n/a	<b>20</b>	<b>21</b>
3	Interior/Ice Maker Fan	n/a	<b>30</b>	<b>31</b>
4	Reverse Gas Solenoid	n/a	<b>40</b>	<b>41</b>
5	Condenser Fan	n/a	<b>50</b>	<b>51</b>
6	Mullion Heater	n/a	<b>60</b>	<b>61</b>
7	Door A Sense	n/a	<b>70</b>	<b>71</b>
8	Door B Sense	n/a	<b>80</b>	<b>81</b>
9	Door C Sense	n/a	<b>90</b>	<b>91</b>
<b>Note:</b> Must use magnet to change state of Door C Sense.				

## SERVICE INFORMATION

It is assumed that your refrigerated beverage center has been properly installed in accordance with all specifications and local codes and the appliance has been properly grounded. If your refrigerated beverage center should fail to operate, review the troubleshooting chart before calling for service.

If service is required:

1. Call your dealer or authorized service agency. The name of the authorized service agency can be obtained from the dealer or distributor in your area.
2. Have the following information readily available:
  - Model number
  - Serial number
  - Date of purchase
  - Name of dealer from whom purchased

If you are unable to obtain the name of an authorized service agency, or continue to have service problems, call Viking Range Corporation, 1-888-VIKING1 (845-4641), or write to:

**VIKING RANGE CORPORATION  
PREFERRED SERVICE  
1803 Hwy 82W  
Greenwood, Mississippi 38930 USA**

Record the following information indicated below. You will need it if service is ever required. The serial number and model number for your refrigerated beverage center is located on the front of the unit at the base of the door frame.

Model Number \_\_\_\_\_ Serial Number \_\_\_\_\_

Date of Purchase \_\_\_\_\_ Date Installed \_\_\_\_\_

Dealer's Name \_\_\_\_\_

Address \_\_\_\_\_

**If service requires installation of parts, use only authorized parts to ensure protection under the warranty.  
This manual should remain with the refrigerated beverage center for future reference.**

## UNDERCOUNTER/FREESTANDING REFRIGERATED BEVERAGE CENTER WARRANTY (Units certified for Outdoor Use)

### ONE YEAR FULL WARRANTY

Built-in/freestanding undercounter refrigerated beverage centers and all of their components and accessories, except as detailed below\*, are warranted to be free from defects in material or workmanship under normal household use for a period of one (1) year from the date of original retail purchase. Viking Range Corporation, warrantor, agrees to repair or replace, at its option, any part which fails or is found to be defective during the warranty period.

\*Painted and decorative items are warranted to be free from defective materials or workmanship for a period of ninety (90) days from the date of original retail purchase. ANY DEFECTS MUST BE REPORTED TO THE SELLING DEALER WITHIN NINETY (90) DAYS FROM DATE OF ORIGINAL RETAIL PURCHASE.

### FIVE YEAR LIMITED WARRANTY

Any sealed refrigeration system component, as listed below, is warranted to be free from defective materials or workmanship in normal household use during the second through the fifth year from the date of original retail purchase. Viking Range Corporation, warrantor, agrees to repair or replace, at its option, any part which fails or is found to be defective during the warranty period.

**Sealed Refrigeration System Components:** Compressor, Evaporator, Condenser, Connecting Tubing, Dryer/Strainer

It is recommended that in temperatures above 100°F (37.8°C) and below 40°F (4.4°C) the unit be shut off. The normal operating range for the unit is between 60°F (15.6°F) and 100°F (37.8°C).

**NINETY (90) DAY RESIDENTIAL PLUS WARRANTY** This warranty applies to applications where use of the product extends beyond normal residential use. Examples are, but not limited to, bed and breakfasts, fire stations, private clubs, churches, etc. This warranty excludes all commercial locations such as restaurants, food service locations and institutional food service locations.

This warranty extends to the original purchaser of the product warranted hereunder and to each transferee owner of the product during the term of the warranty.

This warranty shall apply to products purchased and located in the United States and Canada. Products must be purchased in the country where service is requested. Warranty labor shall be performed by an authorized Viking Range Corporation service agency or representative. Warranty shall not apply to damage resulting from abuse, accident, natural disaster, loss of electrical power to the product for any reason, alteration, improper installation, improper operation or repair or service to the product by anyone other than an authorized Viking Range Corporation service agency or representative. Warranty shall not apply to damage resulting from indoor units being used in outdoor situations. This warranty does not apply to commercial usage. Warrantor is not responsible for consequential or incidental damage whether arising out of breach of warranty, breach of contract, or otherwise. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Owner shall be responsible for proper installation, providing normal care and maintenance, providing proof of purchase upon request, and making the appliance reasonably accessible for service. If the product or one of its component parts contains a defect or malfunction during the warranty period, after a reasonable number of attempts by the warrantor to remedy the defects or malfunctions, the owner is entitled to either a refund or replacement of the product or its component part or parts. Replacement of a component part includes its free installation. Warrantor's liability on any claim of any kind, with respect to the goods or services covered hereunder, shall in no case exceed the price of the goods or service or part there of which gives rise to the claim.

**WARRANTY SERVICE:** Under the terms of this warranty, service must be performed by a factory authorized Viking Range Corporation service agent or representative. Service will be provided during normal business hours, and labor performed at overtime or premium rates shall not be covered by this warranty. To obtain warranty service, contact the dealer from whom the product was purchased, an authorized Viking Range Corporation service agent, or Viking Range Corporation. Provide model and serial number and date of original purchase. For the name of your nearest authorized Viking Range Corporation service agency, call the dealer from whom the product was purchased or Viking Range Corporation. **IMPORTANT:** Retain proof of original purchase to establish warranty period.

The return of the Owner Registration Card is not a condition of warranty coverage. You, however, should return the Owner Registration Card so that Viking Range Corporation can contact you should any question of safety arise which could affect you.

Any implied warranties of merchantability and fitness applicable to the above described undercounter refrigerated beverage center are limited in duration to the period of coverage of the applicable express written limited warranties set forth above. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific rights, and you may also have other rights which may vary from jurisdiction to jurisdiction.

Specifications subject to change without notice.

## UNDERCOUNTER/FREESTANDING REFRIGERATED BEVERAGE CENTER WARRANTY (Units certified for Indoor Use)

### TWO YEAR FULL WARRANTY

Built-in/freestanding undercounter refrigerated beverage centers and all of their components and accessories, except as detailed below\*, are warranted to be free from defects in material or workmanship under normal household use for a period of two (2) years from the date of original retail purchase. Viking Range Corporation, warrantor, agrees to repair or replace, at its option, any part which fails or is found to be defective during the warranty period.

\*Painted and decorative items are warranted to be free from defective materials or workmanship for a period of ninety (90) days from the date of original retail purchase. ANY DEFECTS MUST BE REPORTED TO THE SELLING DEALER WITHIN NINETY (90) DAYS FROM DATE OF ORIGINAL RETAIL PURCHASE.

### SIX YEAR FULL WARRANTY

Any sealed refrigeration system component, as listed below, is warranted to be free from defective materials or workmanship in normal household use during the third through the sixth year from the date of original retail purchase. Viking Range Corporation, warrantor, agrees to repair or replace, at its option, any part which fails or is found to be defective during the warranty period.

**Sealed Refrigeration System Components:** Compressor, Evaporator, Condenser, Connecting Tubing, Dryer/Strainer

### TWELVE YEAR LIMITED WARRANTY

Any sealed refrigeration system component, as listed above, which fails due to defective materials or workmanship in normal household use during the seventh through the twelfth year from the date of original retail purchase will be repaired or replaced, free of charge for the part itself, with the owner paying all other costs, including labor.

**NINETY (90) DAY RESIDENTIAL PLUS WARRANTY** This warranty applies to applications where use of the product extends beyond normal residential use. Examples are, but not limited to, bed and breakfasts, fire stations, private clubs, churches, etc. This warranty excludes all commercial locations such as restaurants, food service locations and institutional food service locations.

This warranty extends to the original purchaser of the product warranted hereunder and to each transferee owner of the product during the term of the warranty.

This warranty shall apply to products purchased and located in the United States and Canada. Products must be purchased in the country where service is requested. Warranty labor shall be performed by an authorized Viking Range Corporation service agency or representative. Warranty shall not apply to damage resulting from abuse, accident, natural disaster, loss of electrical power to the product for any reason, alteration, improper installation, improper operation or repair or service to the product by anyone other than an authorized Viking Range Corporation service agency or representative. Warranty shall not apply to damage resulting from indoor units being used in outdoor situations. This warranty does not apply to commercial usage. Warrantor is not responsible for consequential or incidental damage whether arising out of breach of warranty, breach of contract, or otherwise. Some jurisdictions do not allow the exclusion or limitation of incidental or consequential damages, so the above limitation or exclusion may not apply to you.

Owner shall be responsible for proper installation, providing normal care and maintenance, providing proof of purchase upon request, and making the appliance reasonably accessible for service. If the product or one of its component parts contains a defect or malfunction during the warranty period, after a reasonable number of attempts by the warrantor to remedy the defects or malfunctions, the owner is entitled to either a refund or replacement of the product or its component part or parts. Replacement of a component part includes its free installation. Warrantor's liability on any claim of any kind, with respect to the goods or services covered hereunder, shall in no case exceed the price of the goods or service or part there of which gives rise to the claim.

**WARRANTY SERVICE:** Under the terms of this warranty, service must be performed by a factory authorized Viking Range Corporation service agent or representative. Service will be provided during normal business hours, and labor performed at overtime or premium rates shall not be covered by this warranty. To obtain warranty service, contact the dealer from whom the product was purchased, an authorized Viking Range Corporation service agent, or Viking Range Corporation. Provide model and serial number and date of original purchase. For the name of your nearest authorized Viking Range Corporation service agency, call the dealer from whom the product was purchased or Viking Range Corporation. **IMPORTANT:** Retain proof of original purchase to establish warranty period.

The return of the Owner Registration Card is not a condition of warranty coverage. You, however, should return the Owner Registration Card so that Viking Range Corporation can contact you should any question of safety arise which could affect you.

Any implied warranties of merchantability and fitness applicable to the above described undercounter refrigerated beverage center are limited in duration to the period of coverage of the applicable express written limited warranties set forth above. Some jurisdictions do not allow limitations on how long an implied warranty lasts, so the above limitation may not apply to you. This warranty gives you specific rights, and you may also have other rights which may vary from jurisdiction to jurisdiction.
