

96\*216mm

### Switch Panel Operation

- 1 - Red LED lights up to show the circuit is on
- 2 - Integrated sensor circuit, backlight brightness dimmable
- 3 - Area for DIY placement of the selected labels
- 4 - Manual power activation button, press to turn on/off.
- 5 - LED illumination area, back light for the label

### Backlit Brightness Dimmable

This backlit brightness dimmer function brings better user experience and improve safety driving experience.

The backlit brightness of the switch panel is automatically dimmable according to the brightness variation of the environment. The darker the surroundings is, the darker the backlit will be; The brighter the surroundings is, the brighter the backlit will be.

### What's Included

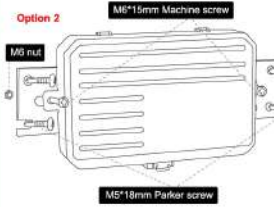

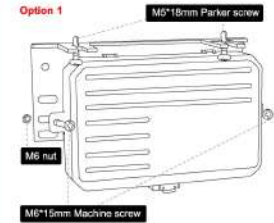

### Product Features

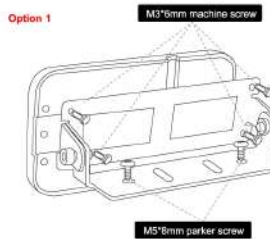

- \*Input Voltage: 12V/24V DC
- \*Max. Output Power: 1200W
- \*Max. Input Current: 60A
- \*Switch Panel Size: 4.52" \* 2.6"
- \*Switch Panel Material: High quality
- \*Circuit Control Box Size: 7.4" \* 4" \* 1.31"
- \*Circuit Control Box Material: High quality aluminum
- \*Backlit Dimmable Function: Yes
- \*Operating Temperature: -40 °C - +105 °C
- \*Over-Voltage Protection, Over-Current Protection, Reverse Polarity Protection and Thermal Protection

### Circuit Box Mounting

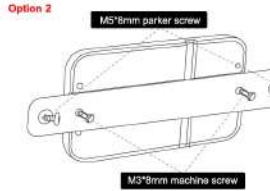

### Switch Panel Mounting

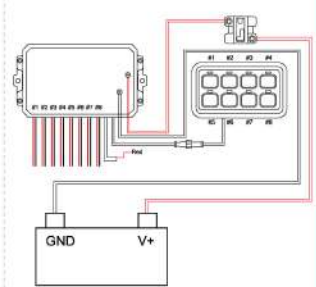

**Adjustable Mount Bracket**

- Check to make sure the plug & play wiring is long enough to mount the desired location.
- Check the clearance behind drilling location. Make sure you will not drill through and damage any components in the vehicle.
- Use bracket to mark the drill location, fix and mount the bracket with the switch panel, then proceed to the wiring installation.

**Note:** Please do not attempt to extend the plug & play wire. Cutting or splicing may void the warranty and damage the product.

### Installation Guide

- 18AWG Wire (A):**  
Recommended connection, the vehicle's ACC
- 8AWG Wire Red (A)**  
Recommended connection, the vehicle's battery +
- 8AWG Wire Red (B)**  
Recommended connection, circuit breaker
- 8AWG Wire Black**  
Recommended connection, Ground, the vehicle's battery -

The panel comes configured with the following fuses:

Circuit 1	Circuit 2	Circuit 3	Circuit 4
5A	5A	10A	10A
Circuit 5	Circuit 6	Circuit 7	Circuit 8
20A	20A	30A	30A
