

1. Install the Atmotube app

Enables data viewing and storage via Bluetooth. It's free on the App Store and Google Play.

2. Charge your device

Make sure your device is fully charged. To charge Atmotube, use the included USB Type-C cable and connect it to a power supply for at least 2 hours. The LED light will change its color from orange to green once the Atmotube is fully charged.

3. Unplug the device from the power cable

Ensure the device is fully charged and unplugged before starting. This is necessary for accessing the complete LED indications during setup.

4. Pairing the Atmotube

Please follow the in-app instructions to pair the Atmotube with your smartphone. By default, the Atmotube is already in connection detection mode. The LED on the device should blink blue while searching for the smartphone. Once the pairing is successful, the LED will stop blinking blue.

Note: By default, the GPS feature on the Atmotube is disabled. To activate GPS, navigate to the settings in the mobile application and enable the GPS option.

LED Indicator Air Quality Score (AQS)

- GOOD
- MODERATE
- POLLUTED
- VERY POLLUTED
- SEVERELY POLLUTED

When you press the button, the LED shows the current AQS level.

PORTABLE AIR POLLUTION MONITOR

Quick Start Guide

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
