

WIRELESS CONVERSION ADAPTER

Interconnection of Locomotives

User manual

Welcome to use

Thank you for buying our(WIRELESS
CONVERSION ADAPTER)product!

please make sure your car supports Android
AUTO or Apple Carplay or before using this
product.

Usage method

1. Product Installation

Please plug the wireless conversion box into
your car center control data port (USB or
TypeC),normally is under the car center
control screen or inside the car armbox.

2. Starting the Product

The auto central control will automatically
identify the wireless conversion box, and the
indicator light of the conversion box will light
up until the connection prompt interface
pops up on the auto central control screen (if
the individual auto central control cannot
automatically identify, it is necessary to
manually click the mobile phone
interconnection function icon on the screen).
Follow the prompts to prepare your phone for
pairing and connection.After the function
icon is enabled, the pairing interface will be
entered.

3. Pairing Connection

Open the [Settings]–[General]–[CarPlay Car] options Page on your iPhone, Search for a device known as "CarPlayBox_" and click on it, In the information window that pops up, select [Match]–[Allow]–[Use Carplay] for wireless connection.

OTA upgrade

In order to bring you a better experience, this product supports OTA online upgrade function. If the wireless conversion box does not work properly or performance issues occur after the phone has upgraded the system, it is recommended to upgrade the wireless conversion box firmware to the latest version. If the wireless conversion box is working properly, firmware upgrade is usually not recommended.

Upgrade method

1. Visit background page:

Use the mobile phone to connect the

WIRELESS CONVERSION ADAPTER:

"**ADAPTER**", enter the password:

"88888888". Open the Internet Explorer of the mobile phone, enter IP address:

"192.168.2.1", and

click "Visit" or "Go" to enter the online upgrade background page. (If you can't get in, check that your phone's Wifi is properly connected to the **WIRELESS CONVERSION ADAPTER**.)

2. Firmware upgrade or downgrade:

After entering the background page, will automatically be on-line inspection if there is a new version of the firmware. If the message "New version found" is displayed, click "Upgrade" until the message indicates that the upgrade is complete; if the message "It is the latest version" is displayed, you do not need to upgrade the firmware, or click "Historical version" to select an old firmware version for online upgrade.

Note:

1. Please insert the wireless conversion box into the ordinary charging USB port for firmware upgrade or downgrade, do not power off or insert or remove the **WIRELESS CONVERSION ADAPTER** during the period.
2. If the upgrade is abnormal, turn off the power to automatically power off the USB port, and then try the upgrade or downgrade again.
3. After the upgrade or downgrade is completed, reinsert the wireless conversion box into the central control USB data port of the car. At this time, the device number has been randomly updated, and you need to re-operate the Bluetooth and Wifi connection in the phone.
