AI Box Lite S

Model: WCPAA-2

User Manual

Thank you for choosing Auto**Sky**!

The **AutoSky** Ai Box Lite S seamlessly transforms Wired CarPlay or Android Auto into Wireless connectivity, enabling a cable-free connection for a more streamlined and enjoyable driving experience while accessing streaming services: **Netflix and YouTube**.

Note: *USB-A and USB-C cables Included.*

The device is equipped with a single Wi-Fi module that serves both Streaming and CarPlay or Android Auto functionalities. It's crucial to understand that the auto-connect feature for CarPlay and Android Auto operates via Bluetooth. Therefore, your device will prioritize this Bluetooth connection over your hotspot connection. As a result, **when switching between CarPlay or Android Auto and Streaming, you'll need to disconnect the Bluetooth and activate your Wi-Fi.**

Despite this particular requirement, the Ai Box Lite S still provides a versatile solution for improving in-car entertainment and connectivity.

AutoSky does not endorse or recommend the use of this product while driving. The purpose of our product is intended for use while parked or stationary. Engaging with the product while operating a vehicle poses significant risks and may lead to accidents, injuries, or violations of traffic laws.

CAR REQUIREMENTS

Factory Wired CarPlay Required to enjoy the freedom of wireless connectivity on the road. Compatible with most vehicles featuring built-in CarPlay and compatible devices including Iphone 6 and later models, smartphones with Android 11 or newer with 5GHz Wi-Fi Frequency Band

Scan QR Code to verify Car Models with Wired CarPlay.

EASY SETUP GUIDE

Connect your **Ai Box Lite S** to your car's CarPlay USB port using one of the included cables. Your Ai Box will connect automatically, if it doesn't please tap on the CarPlay icon on your car's radio to connect.

Once your device's Home Interface appears on your screen you will be able to connect to *CarPlay* or *Android Auto* wirelessly or watch *Netflix* and *Youtube*.

To use Wireless CarPlay or Android Auto:

- 1 Tap on **"Android Auto"** or **"CarPlay"**, your screen will show the name and pin.
- 2 Turn on your Smartphone's Bluetooth, search for *AutoSky* and confirm the pin.
- 3 Allow *Pairing, Syncing* and use of *CarPlay* or *Android Auto* as appropriate.
- 4 Once the connection is successful, you will access *CarPlay* or *Android Auto's* interface.
- 5 To exit CarPlay or Android Auto tap on **"Car"**.

To watch Netflix or Youtube:

- 1 You will need to set up a WiFi network, but first disconnect the bluetooth from your phone to avoid interference while connecting.
- 2 On your device's *home menu* Tap on **Settings**, then **WiFi**. Select the network you will use and enter the password if needed.
- 3 Go back to your device's home menu and select **Netflix** (You will need to sign in with your account) or **YouTube**.

Note: *This device features a single Wi-Fi module, requiring users to disconnect their Bluetooth and reconnect their Wi-Fi when switching between CarPlay or Android Auto features and Streaming.*

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

RF Exposure Statement

To maintain compliance with FCC'S RF Exposure guidelines, This equipment should be installed and operated with minimum distance of 20cm between the radiator and your body. This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.
