What is Spot?

Spot is a family of Bluetooth® trackers that you attach to your most important items to help keep track of them.

The Spot & the Spot app can alert you when you may be leaving something behind, can help you locate the item your Spot is connected to and can even help you find your phone.

Download the App

From the App Store (IOS) or Google Play (Android), search "Spot 2.0 Bluetooth Finder" & download the free app to your phone.

Getting Started

The in-app tutorial will guide you through:

- Logging in or Registering a new account
- Pairing the Spot to your phone
- Enabling the necessary permissions

*Make sure your phone's Bluetooth® is turned on

Learn 5 Key App Features:

Ring to Find Button

From the app, press the Ring to Find button to sound an alert from your Spot. Follow the sound to help locate your item.

Location History

Lost a Spot? Location History will map the last location your Spot was together with your phone. This is the last place they were connected and is likely where you left your Spot. It's a great place to start looking.

Mark as Lost

If a Spot is lost & shows disconnected, **Mark it as Lost**. The network of Spot users can help find it. If a user happens to walk past it, the app will

trigger an anonymous email from our server with details on your Spot's location.

Proximity Meter

The yellow rings are an indicator of the connected signal strength. The more yellow rings, the closer you are to a Spot. You can use this feature like a game of "hot & cold" to help locate a missing Spot.

Out of Range Alerts

If this feature is enabled, your phone will sound an alert each time your phone and Spot get too far apart (out of range). This feature can alert you before you accidentally leave an item behind.

Two-Way Bluetooth Finder

FRONT

This device complies with Part 15 of the FCC Rules.

Operation is subject to the following two conditions:

1. This device may not cause harmful interference, and
2. This device must accept any interference received, including interference that may cause undesired operation.

Warning: Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
- The device has been evaluated to meet general RF exposure requirement.
- The device can be used in portable exposure condition without restriction.

WARNINGS

1. Remove and immediately recycle or dispose of used batteries according to local regulations and keep away from children. Do NOT dispose of batteries in household trash or incinerate.
2. Even used batteries may cause severe injury or death.
3. Call a local poison control center for treatment information.
4. Non-rechargeable batteries are not to be recharged, like CR2032, which has a voltage of 3.0V.

5. Do not force discharge, recharge, disassemble, heat above 60°C or incinerate. Doing so may result in injury due to venting, leakage or explosion resulting in chemical burns.
6. Ensure the batteries are installed correctly according to polarity (+ and -).
7. Do not mix old and new batteries, different brands or types of batteries, such as alkaline, carbon-zinc, or rechargeable batteries.
8. Remove and immediately recycle or dispose of batteries from equipment not used for an extended period of time according to local regulations.
9. Always completely secure the battery compartment. If the battery compartment does not close securely, stop using the product, remove the batteries, and keep them away from children

IMPORTANT: This warning is for the safety and well being of young children. Please read it carefully and in completion.

⚠ WARNINGS

- **INGESTION HAZARD:** This product contains a button cell or coin battery.
- **DEATH** or serious injury can occur if ingested.
- A swallowed button cell or coin battery can cause **Internal Chemical Burns** in as little as **2 hours**.
- KEEP new and used batteries **OUT OF REACH OF CHILDREN**
- **Seek immediate medical attention** if a battery is suspected to have been swallowed or inserted in any part of the body.
