5 Test The Product

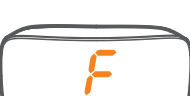

5A. Charge the Bark Control Collar before use

You can charge the product via PC, Power Bank or Charger with output voltage of 5V for 1-2 hours.

Charging

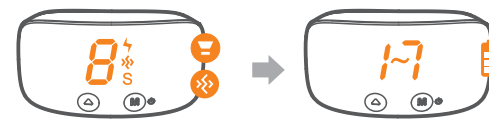

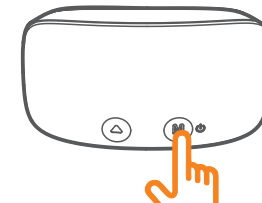

Full Battery

Note:

- Improper charger means one with output voltage over 5V, which can usually be seen on the surface of it.
- The product can be charged both when it is turned off and on.

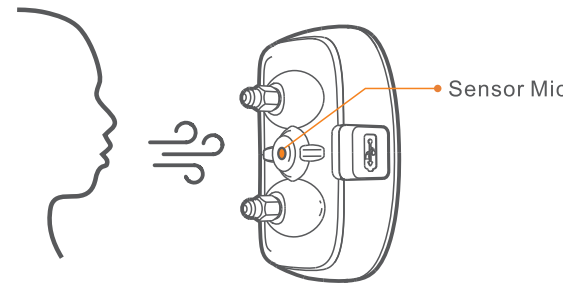

5B. Turn on the product

First power on prompt, then battery prompt

Press and hold the **M** for 2 seconds to turn it on

5C. Blow into the sensor Mic to trigger the product

3

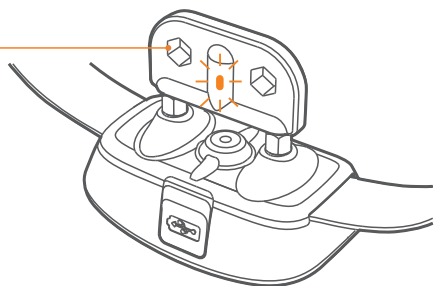

5D. The Bark Control Collar responds with execution order

When the product is triggered by blow, it will deliver beep, vibration and E-Shock by order and the function icons are on.

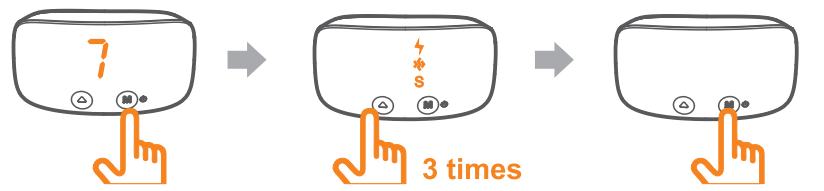

Note: The hexagon hole on the Test Unit Tool can be used to fasten or unfasten the Probes to the Contact Points.

Hold the Test Unit Tool on the contact points when test the E-Shock function.

If the product responds as described above, you've succeeded at setting up the bark control collar properly.

5E. Turn off the product

Touch **M** to access view mode.
In the view mode, tap **A** 3 times to access the setting mode.
Long touch **M** to turn off, accompanied by 2 beeps and vibration.

7 Mode Setting

The following instruction will guide through the process of switching modes.

Touch and hold **M** to turn on the device and enter the viewing mode.

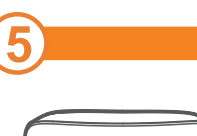

In the viewing mode touch **A** 3 times to access the setting mode.

Touch **M** to select function for setting, accompanied by beeps.

Touch **A** to select the level of the function.

Repeat step 3&4 to set parameters for all functions.

Stop Operation! The setting mode is exited automatically after 3 seconds of inactivity

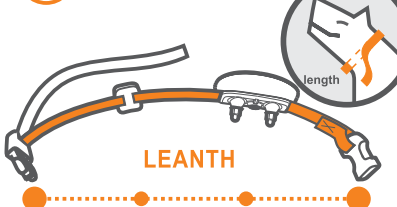

5

8 Put the Product on Your Dog

Note: have a look if you have a small dog!

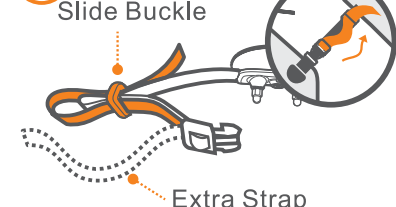

PROPER USE OF THE SLIDE BUCKLE can prevent the collar from becoming loose around your pet's neck.

1

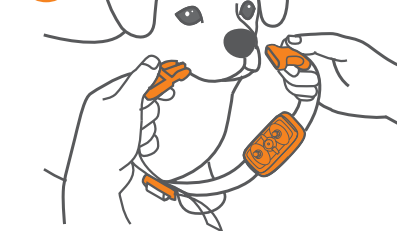

Determine the circumference of the collar that fits the dog's neck.

2

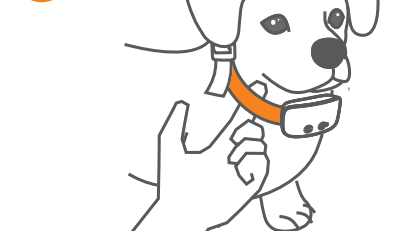

Re-thread the extra strap into the slide buckle.

3

Wear the collar around the dog's neck in a personally comfortable way. Make sure the device is just in front of the dog's throat

4

Please ensure to fit the product snugly, yet loose enough to allow one finger to fit between the strap and your dog's neck.

9 Frequently Asked Questions Answers

Q: Why doesn't the product work when the dog barks?

There may be three reasons for this problem. The first is that the trigger sensitivity is not high enough, so try to increase the trigger sensitivity. Second, the probe does not touch the skin, so try to adjust the belt tightness to ensure good skin contact. Third, the training level is not high enough, so try to increase the training level.

Q: Why is the product triggered sometimes in a noisy environment though the dog isn't barking?

A: Though we have optimized the barking detection to the best, some environment noises may have similar frequency to barking, which may have small chance to activate the product. Please lower the sensitivity level.

Q: Can I use the product when there are other dogs playing around?

A: Dogs will bark when playing and get excited, for the comfort and safety of your pet, we don't suggest using this product in such environment.

Q: How do I know if I can use this product for my pet?

A: The product is designed for healthy dogs over 6 months old, weighing no less than 8 pounds. Most importantly, this product cannot be used on unhealthy or aggressive dogs, and if you are unsure whether this product is appropriate for your pet, please consult your veterinarian or a certified trainer.

Q: Can this product stop my dog's howl?

A: No, this Bark Control Collar is designed to detect the barking only. It cannot detect or stop the howling.

Q: Can I charge this product with any type of charger?

A: No, you are suggested to charge this product with charger of 5V output voltage, because charger with output voltage of 9V or 12V may cause damage to the product.

Q: Will my dog stop barking completely?

A: The Bark Control Collar effectively and humanely stops all barking when it is worn. It should only be worn during periods of unwanted barking.

Q: Is the Bark Control Collar safe and humane?

A: Yes. The Bark Control Collar is designed to get your dog's attention, not to punish him. However, the initial Static Shock correction may startle your dog.
