

## Features at a Glance

\*Features may vary according to model

## Door Removal Instructions

### Getting through narrow spaces

If your refrigerator will not fit through an entrance area, you can remove the doors. Check first by measuring the entrance. To prepare for removing the doors:

1. Make sure the electrical power cord is unplugged from the wall outlet.
2. Open the freezer drawer and remove the toe grille (see Installation section).
3. Remove any food from the door shelves and close the doors. .

To remove the top hinge covers:

1. Remove the two screws from each cover over the top door hinges.
2. Lift inside edge of hinge cover and tilt back.

**To remove the refrigerator doors**

1. Trace lightly around the door's top hinges with a pencil. This makes reinstallation easier.

2. Disconnect the harness by grasping both sides of the connector firmly, depress the latch, and pull apart. Remove the two screws from the top hinge. Lift the door off of the bottom hinge and set it aside.

3. Detach the water tube from the connector located behind the refrigerator and pull the tube back out to the front of the unit. The connector releases when you press inward on the outer sleeve while pushing the tube toward the connector then while continuing to hold in the sleeve, pull the tube away.

**NOTE**

Use care while pulling the water tube from the unit to be sure that you do not kink the tube.

4. Unscrew the three lower hinge screws and slide the hinge inwards.

**Lower Hinge Removal**

**To reinstall the refrigerator doors:**

Reverse the above steps

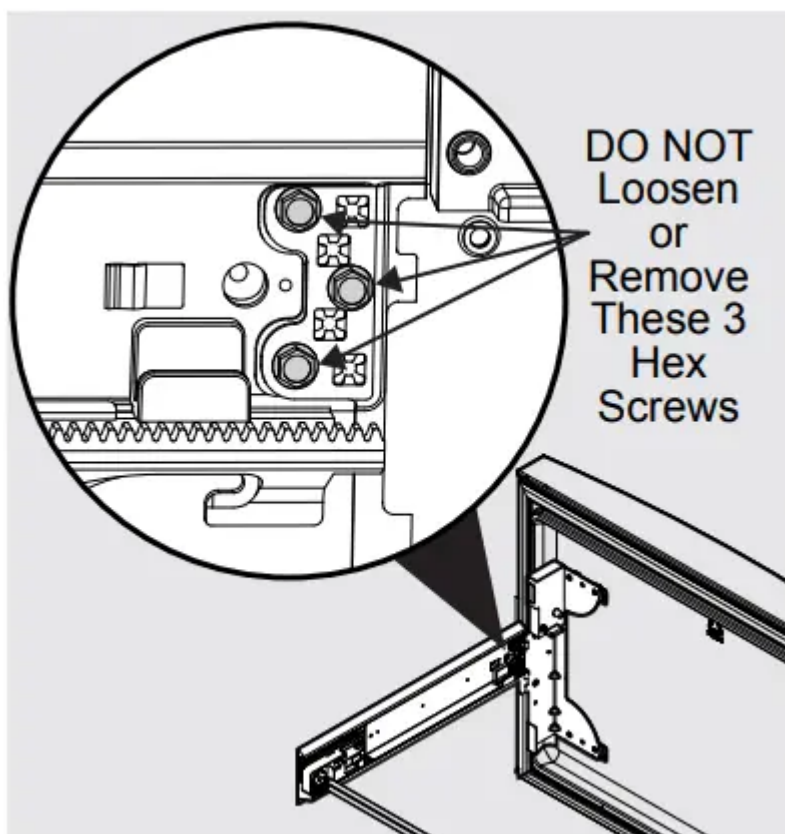

### Removing Freezer Drawer

- 1 Remove 4 hex head drawer screws.
- 2 Lift up drawer to remove.

### Re-installing Freezer Drawer

1. Lower drawer back into place.
2. Replace 4 hex head drawer screws and tighten.

## Installing Door Handles

### Door Handle Mounting Instructions for Frigidaire & Frigidaire Gallery

1. Remove handles from carton and any other protective packaging.
2. Position fresh food handle end caps over upper and lower pre-installed shoulder bolts (A) that are fastened into door, ensuring the holes for the set screws are facing towards the opposite door.
3. While holding handle firmly against door, fasten upper and lower Allen set screws (B) with supplied Allen wrench.
4. Repeat steps 2 and 3 to install opposite handle. Ensure the holes for the set screws are facing towards the first door. .
5. Position freezer handle end caps over left and right preinstalled shoulder bolts (A) that are fastened to the door, ensuring the holes for the set screws are facing down.
6. While holding handle firmly against door, loosely tighten right Allen set screw (B) with supplied Allen wrench until there is no gap between handle and door.
7. Still holding the handle firmly to the door, firmly tighten left Allen set screw (B) with supplied Allen wrench.
8. Return to the right Allen set screw (B) and firmly tighten with supplied Allen wrench.

### Mounting Refrigerator Handles

### Mounting Freezer Handle

### Door Handle Mounting Instructions for Frigidaire Professional®

1. Remove handles from carton and any other protective packaging.
2. Position fresh food handle end over upper and lower preinstalled shoulder bolts (A) that are fastened into door, ensuring the holes for the set screws are facing towards the opposite door. .

- 3 While holding handle firmly against door, fasten further most upper and further most lower Allen set screws (B) with supplied Allen wrench.
4. Repeat steps 2 and 3 to install opposite handle. Ensure the holes for the set screws are facing towards the first door.
5. Firmly tighten the inside Allen set screws.
6. Position freezer handle end over left and right pre-installed handle shoulder bolts (A) that are fastened to the door, ensuring the holes for the set screws are facing down.
7. While holding handle firmly against door, loosely tighten far right Allen set screw (B) with supplied Allen wrench until there is no gap between handle and door.
8. Still holding the handle firmly to the door, firmly tighten far left Allen set screw (B) with supplied Allen wrench.
9. Return to the far right Allen set screw (B) and firmly tighten with supplied Allen wrench.
10. Firmly tighten the inside Allen set screws.

### Mounting Freezer Handle

## Connecting Water Supply

### Before Installing The Water Supply Line, You Will Need:

- Basic Tools: adjustable wrench, flat-blade screwdriver, and Phillips™ screwdriver
- Access to a household cold water line with water pressure between 30 and 100 psi.
- A water supply line made of ¼ inch (6.4 mm) OD, copper or stainless steel tubing. To determine the length of tubing needed, measure the distance from the ice maker inlet

valve at the back of the refrigerator to your cold water pipe. Then add approximately 7 feet (2.1 meters), so the refrigerator can be moved out for cleaning (as shown).

- A shutoff valve to connect the water supply line to your household water system. DO NOT use a self-piercing type shutoff valve.
- Do not re-use compression fitting or use thread seal tape.
- A compression nut and ferrule (sleeve) for connecting a copper water supply line to the ice maker inlet valve.

### **To Connect Water Supply Line To Ice Maker Inlet Valve**

1. Disconnect refrigerator from electric power source.
2. Place end of water supply line into sink or bucket. Turn ON water supply and flush supply line until water is clear. Turn OFF water supply at shutoff valve.
3. Remove plastic cap from water valve inlet and discard cap.
4. If you use copper tubing - Slide brass compression nut, then ferrule (sleeve) onto water supply line. Push water supply line into water valve inlet as far as it will go ( $\frac{1}{4}$  inch/6.4 mm). Slide ferrule (sleeve) into valve inlet and finger tighten compression nut onto valve. Tighten another half turn with a wrench; DO NOT over tighten. See Figure 1.

**Figure 1**

If you use braided flexible stainless steel tubing - The nut is already assembled on the tubing. Slide nut onto valve inlet and finger tighten nut onto valve. Tighten another half

turn with a wrench; DO NOT over tighten. See Figure 2.

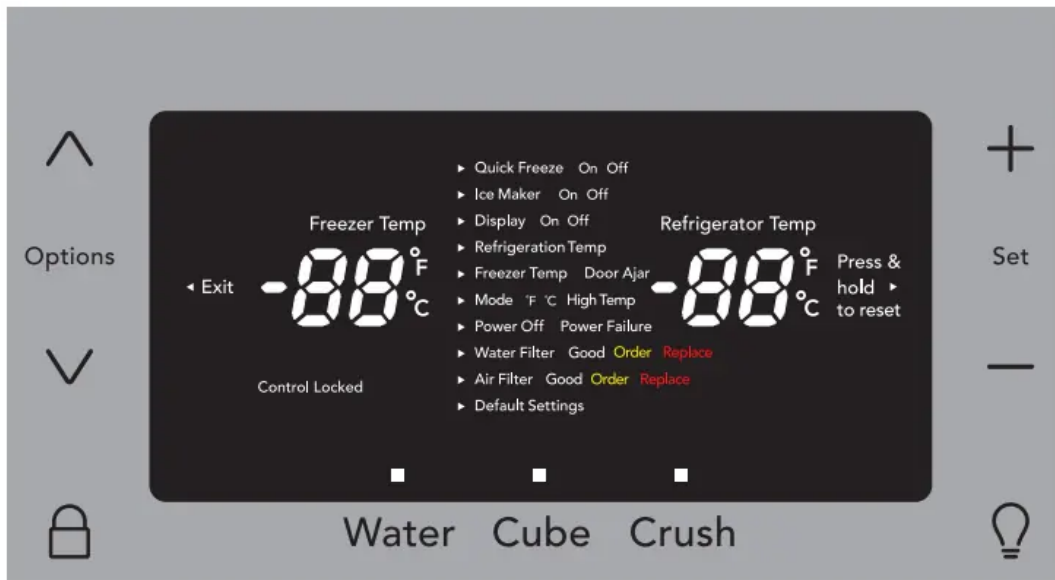

**Figure 2**

5. With steel clamp and screw, secure water supply line to rear panel of refrigerator as shown.
6. Coil excess water supply line (copper tubing only), about 2½ turns, behind refrigerator as shown and arrange coils so they do not vibrate or wear against any other surface. Do not kink tubing.
7. Turn ON water supply at shutoff valve and tighten any connections that leak.
8. Reconnect refrigerator to electrical power source.
9. To turn ice maker on, lower wire signal arm (freezer ice maker) or set the ice maker's On/Off power switch to the "On" position (fresh food ice maker).

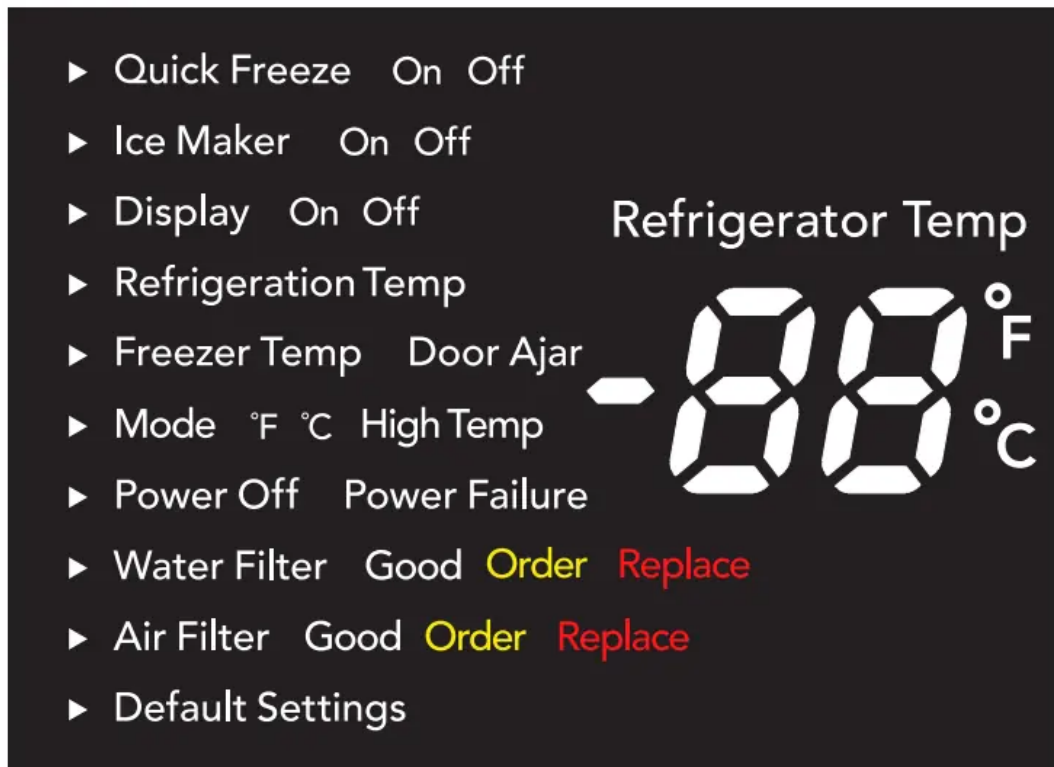

## Controls

### FRIGIDAIRE & FRIGIDAIRE GALLERY DISPENSER

User Interface (colors and options may vary by model)

Enlarged view of above user interface display menu (colors and options may vary by model)

Options May Vary

<b>Options</b> 	Used to enter and exit the options menu and make selections.
<b>Exit</b>	Toggles the options and run modes.
<b>Control Locked</b> 	While in the locked state, you will not be able to change any settings on the display nor dispense ice and water. The “Control Locked” indicator will flash and an audible warning tone is played.
<b>Quick Freeze On Off</b>	Activates a faster rate for freezing food and increases ice production in the freezer. Deactivates after 12 hours.
<b>Ice Maker On Off</b>	Toggles the ice maker in the refrigerator compartment “ON” or “OFF”. In the “Off” state, the indicator will blink when ice is dispensed.
<b>Display On Off</b>	Toggles the display of the temperature settings On and Off.
<b>Refrigeration Temp</b>	Allows the temperature setpoints to be adjusted. Control temperatures range from +33°F / +1°C to +47°F / +8°C.
<b>Freezer Temp</b>	Allows the temperature setpoints to be adjusted. Control temperatures range from -6°F / -21°C to +6°F / -15°C.
<b>Mode °F °C</b>	Toggles display from Fahrenheit to Celsius.
 <b>Light</b>	Toggles dispenser light On and Off.
<b>Power Off</b>	Press and hold for three seconds to turn off the cooling system. It also turns off the ice maker and all dispenser functions. The display will read “power off”.
<b>Water Filter</b>	Displays the current status of the water filter (Good, Order, or Replace). To reset the filter status to “Good”, press and hold the “set” key for three seconds.
<b>Air Filter</b>	Displays the current status of the air filter (Good, Order, or Replace). To reset the filter status to “Good”, press and hold the “set” key for three seconds.

<b>Default Settings</b>	While in the default option, press and hold the “set” key for three seconds to reset all refrigerator settings to their factory default settings.
<b>Set (+ or -)</b>	Selects the current menu selection option.
<b>Water</b>	Press the “water” key to select water. An indicator light will be illuminated above the active feature.
<b>Cube</b>	Press the “cube” key to select cubed ice. An indicator light will be illuminated above the active feature.
<b>Crush</b>	Press the “crush” key to select crushed ice. An indicator light will be illuminated above the active feature.

### **Setting cooling temperatures (options may vary)**

The recommended settings for a product installed in a kitchen is 37°F for the fresh food compartment and 0°F for the freezer

If your product has food freezing in the fresh food compartment, increase the temperature setting 1 or 2 degrees.

If you place food within 1 inch in front of the air ports, there may be the chance of freezing food.

### **Alarms**

#### **Power Failure**

In the event of a power failure, the power fail alert will be illuminated. Press set to acknowledge the alarm. Other modes may be turned off until the alarm is

acknowledged. While a power fail alert is displayed on the control panel, the unit will continue normal operation. The power fail alert on the control panel will be removed once in the user acknowledges the power fail condition by pressing any key on the control panel. The high temp alarm may also be illuminated until a safe operating range temperature has been reached.

### **Freezer Temp**

If the freezer temperature reaches 26°F or greater, the alarm will sound and the temperature will flash. You can disable the alarm by pressing the set key but the “High Temp” indicator will illuminate until the temperature goes below 26°F.

### **Fresh Food Temp**

If the fresh food temperature reaches 55°F or greater, the alarm will sound and the temperature will flash. You can disable the alarm by pressing the set key but the “High Temp” indicator will illuminate until the temperature goes below 55°F.

### **Door Ajar**

If the freezer or fresh food doors have been left open for five minutes or more, an alarm will sound and the door ajar indicator will illuminate on the display. Press the set key to reset any system alarms.

### **Flapper**

When “Cube” or “Crush” is selected, if the flapper (or ice chute door) is being held open by a jammed ice cube, an alarm will sound for two minutes. The alarm will reset after two minutes or when the ice cube is removed and the set key is pressed to reset.

## **Sabbath Mode**

The Sabbath Mode is a feature that disables portions of the refrigerator and its controls in accordance with observance of the weekly Sabbath and religious holidays within the Orthodox Jewish community.

Sabbath Mode is turned ON and OFF by simultaneously pressing and holding both the “v” and “+” for five seconds. The display shows “Sb” while in Sabbath mode.

In the Sabbath Mode, the High Temp alarm is active for health reasons. For example, if the door is left ajar the High Temp alarm is activated. The refrigerator will function normally once the door is closed, without any violation of the Sabbath/Holidays. The High Temp alarm is permitted when cabinet temperature is outside the safe zone for 20 minutes. The alarm silences itself after 10 minutes while the High Temp icon stays lit until the Sabbath mode is exited.

## **CONTROLS - NON-DISPENSER MODELS**

### User Interface In-Door Controls (options may vary)

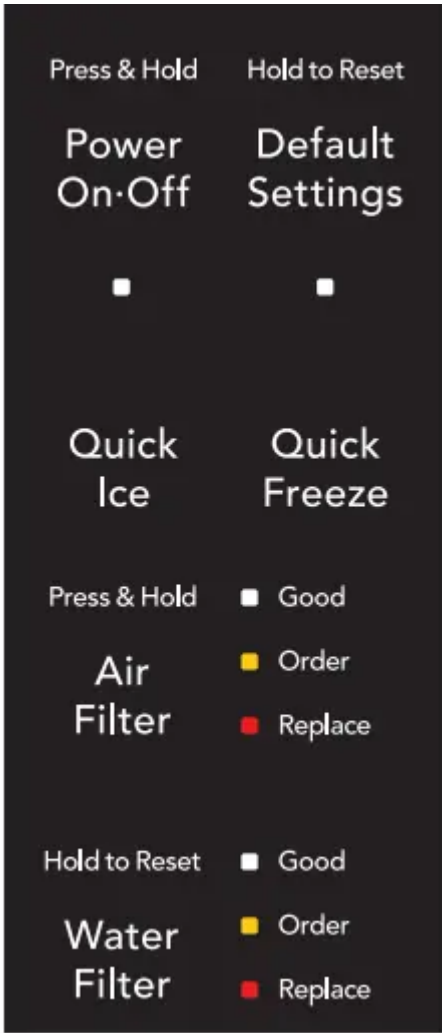

An indicator light will be illuminated above most active features. Touch the icon to activate the options below.

Power On Off	Press and hold for three seconds to turn off the cooling system to clean the refrigerator. The digital displays will read OFF.
Default Settings	Resets all refrigerator settings such as temp, temp display and tones to their factory default settings.
Quick Freeze	Activates a faster rate for freezing food.
Quick Ice	Temporarily increases cooling for freezer to increase the production of ice
Air Filter	Filter condition status is always displayed when door is open. Press and hold for three seconds to reset after filter change.
Water Filter	Press and hold for three seconds to reset after filter change.
Alert Reset	Tones emitted by each key press can be turned off based on user preference. The sounds are muted when the red indicator is lit. Warning signals will stay active.
F/C	Touch to toggle display from Fahrenheit to Celsius

### Setting cooling temperatures

Press the + or – indicator to adjust the temperature to the desired setting.

The temperature setting will begin to blink with the first touch. The display will time out after 10 seconds and return to the basic display.

## Alarms

Door Ajar	If the door has been left open for an extended period of time, an alarm will sound and the door ajar indicator will display on the bottom display of the control panel. The alarm is turned off by closing the door. The alert reset key will blink to prompt the reset of any active alarms. Press this key to reset any system alarms.
High Temp	In the event of a high-temperature condition, the temperature display will blink and display "HI". After 20 minutes, the alarm will sound and the high temp indicator will be red on the bottom of the control panel. Upon acknowledging the alarm, the highest temperature reached will be displayed and the refrigerator will resume normal operation. In case the high temp alarm is not acknowledged at the first alarm sound time out, when the door is first opened, the alarm sound will be repeated.
Power Fail	In the event of a power failure, the power fail alert will be displayed and the temperature display will blink until the alert reset icon is pressed, acknowledging the alarm. Other modes may be turned off until the alarm is acknowledged. The power fail alert is turned off and the refrigerator will resume normal operation. The high temp alarm may also be illuminated until a safe operating range temperature has been reached.

### **"Sabbath Mode"**

The Sabbath Mode is a feature that disables portions of the refrigerator and its controls for, in accordance with observance of the weekly Sabbath and religious holidays within the Orthodox Jewish community.

Sabbath Mode is turned ON and OFF by simultaneously pressing and holding the freezer temp "-" and the refrigerator temp "+" indicators for five seconds. The display shows "Sb" while in Sabbath mode.

In the Sabbath Mode, the High Temp alarm is active for health reasons. For example, if the door is left ajar the High Temp alarm is activated. The refrigerator will function normally once the door is closed, without any violation of the Sabbath/Holidays. The High Temp alarm is permitted when cabinet temperature is outside the safe zone for 20 minutes. The alarm silences itself after 10 minutes while the High Temp icon stays lit until the Sabbath mode is exited.

### **User Interface In-Door Controls (options may vary)**

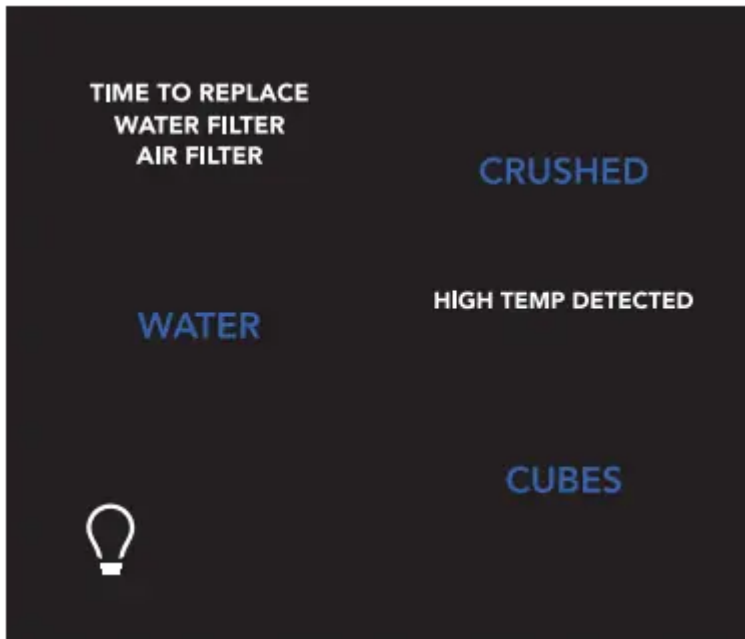

POWER ON-OFF	Press and hold for three seconds to turn off the cooling system. It also turns off the ice maker and all dispenser functions. The display will read "OFF".
DEFAULT SETTINGS	Press and hold for three seconds to reset all refrigerator settings to their factory default settings.
ICE MAKER ON-OFF	The Ice Maker is on if the LED above the Icon is illuminated. Ice dispensing will still function. Press and hold the button for 3 seconds to toggle the Ice Maker on and off.
POWERPLUS FREEZE	Activates a faster rate for freezing food and increases ice production in the freezer. Deactivates after 12 hours.
AIR FILTER	Displays the current status of the air filter (GOOD, ORDER, or REPLACE). To reset the filter status to "GOOD", press and hold for three seconds.
WATER FILTER	Displays the current status of the water filter (GOOD, ORDER, or REPLACE). To reset the filter status to "GOOD", press and hold for three seconds.
MUTE ALARM	Tones emitted by each key press can be turned off based on user preference. The sounds are muted when the red indicator is lit. Warning signals will stay active.
REFRIGERATOR TEMP	Allows the temperature setpoints to be adjusted. Press the "-" or "+" indicator to adjust the temperature to the desired setting. Control temperatures range from +33°F / +1°C to +47°F / +8°C.
FREEZER TEMP	Allows the temperature setpoints to be adjusted. Press the "-" or "+" indicator to adjust the temperature to the desired setting. Control temperatures range from -6°F / -21°C to +6°F / -15°C.
C/F	Toggles display between Celsius and Fahrenheit.

PRESS & HOLD	HOLD TO RESET
<b>POWER ON-OFF</b>	<b>DEFAULT SETTINGS</b>
	
	
<b>ICE MAKER ON-OFF</b>	<b>POWERPLUS FREEZE</b>
PRESS & HOLD	
HOLD TO RESET	 GOOD
<b>AIR FILTER</b>	 ORDER
	 REPLACE
HOLD TO RESET	 GOOD
<b>WATER FILTER</b>	 ORDER
	 REPLACE

Dispenser Controls (options may vary)

WATER	Press the “WATER” key to select water.
CUBES	Press the “CUBES” key to select cubed ice.
CRUSHED	Press the “CRUSHED” key to select crushed ice.
 light	Toggles dispenser light on and off.

## Alarms

### Power Failure

In the event of a power failure, the power fail alert will be illuminated. Press “mute alarm” to acknowledge the alarm. Other modes may be turned off until the alarm is acknowledged. While a power failure alert is displayed on the control panel, the unit will continue normal operation. The power fail alert on the control panel will be removed once the user acknowledges the power fail condition by pressing any key on the control panel. The high temp alarm may also be illuminated until a safe operating range temperature has been reached.

### Freezer Temp

If the freezer temperature reaches 26°F or greater, the alarm will sound and the temperature will flash and the dispenser control will display “HIGH TEMP DETECTED”. You can disable the alarm by pressing “mute alarm” but the “HIGH TEMP DETECTED” indicator will illuminate until the temperature goes below 26°F.

### **Fresh Food Temp**

If the fresh food temperature reaches 55°F or greater, the alarm will sound and the temperature will flash and the dispenser control will display “HIGH TEMP DETECTED”. You can disable the alarm by pressing “mute alarm” but the “HIGH TEMP DETECTED” indicator will illuminate until the temperature goes below 55°F.

### **Door Ajar**

If the freezer or fresh food doors have been left open for five minutes or more, an alarm will sound and the door ajar indicator will illuminate on the display. Press “mute alarm” to reset any system alarms.

### **Flapper**

When “CUBES” or “CRUSHED” is selected, if the flapper (or ice chute door) is being held open by a jammed ice cube, an alarm will sound for two minutes and the current selection will blink on the dispenser control. The alarm will reset after two minutes or when the ice cube is removed.

### **Sabbath Mode**

The Sabbath Mode is a feature that disables portions of the refrigerator and its controls in accordance with observance of the weekly Sabbath and religious holidays within the Orthodox Jewish community.

Sabbath Mode is turned ON and OFF by simultaneously pressing and holding both the freezer “-” and the refrigerator “+” for five seconds. The display shows “Sb” while in Sabbath mode.

In the Sabbath Mode, the High Temp alarm is active for health reasons. For example, if the door is left ajar the High Temp alarm is activated. The refrigerator will function normally once the door is closed, without any violation of the Sabbath/Holidays. The High Temp alarm is permitted when cabinet temperature is outside the safe zone for 20 minutes. The alarm silences itself after 10 minutes while the High Temp icon stays lit until the Sabbath mode is exited.

## **Automatic Ice & Water Dispenser**

### **Priming the water supply system**

1. Begin filling the system by pressing and holding a drinking glass against the water dispenser paddle.
2. Keep the glass in this position until water comes out of the dispenser. It may take about 1½ minutes.

3. Continue dispensing water for about four minutes to flush the system and plumbing connections of any impurities (stopping to empty the glass as necessary).

**Dispenser  
(varies by model)**

### **Ice maker operation & care**

After the refrigerator is installed properly and has cooled for several hours, the ice maker can produce ice within 24 hours. The ice maker will fill the ice bin from the rear. You must dispense some ice to force the ice forward in the bin. This will allow the bin to fill completely.

### **Ice Maker and Storage Bin Capacity**

This ice maker should produce 2.0 to 2.5 pounds of ice per 24 hours. In a Standard Depth model, the ice bin will hold about 6.5 pounds of ice. In a Counter Depth model, the ice bin will hold about 4 pounds of ice.

### **Turning the fresh food ice maker on and off**

Ice production is controlled by the ice maker's On/Off feature on the control panel. Pressing the On/Off feature turns the ice maker on & off.

### **Using the ice maker after installation**

Before making ice for the first time, be sure to prime the water supply system. Air in new plumbing lines can result in two or three empty ice maker cycles. Furthermore, if the system is not flushed, the first ice cubes may be discolored or have an odd flavor.

### **Ice maker/dispenser tips**

- If your refrigerator is not connected to a water supply or the water supply is turned off, turn off the ice maker as described in the previous section.

- The following sounds are normal when the ice maker is operating:
  - Motor running
  - Ice dropping into ice bin
  - Water valve opening or closing
  - Running water
- If you need a large quantity of ice at one time, it is best to get cubes directly from the ice bin.
- Ice cubes stored too long may develop an odd flavor. Empty the ice bin as explained below.
- When dispensing cubed ice, it is normal to have a small quantity of little pieces along with the whole cubes.
- To avoid splashing, dispense ice into your container before adding liquids.
- It is normal for ice to fill to the top of the ice bin.

### **Cleaning the ice maker**

Clean the ice maker and ice bin at regular intervals, especially prior to vacation or moving.

1. Turn off the ice maker.
2. Remove the ice bin by pulling straight out.
3. Empty and carefully clean the ice bin with mild detergent. Do not use harsh or abrasive cleaners. Rinse with clear water.

**Removing Ice Bin**

4. Allow the ice bin to dry completely before replacing in the freezer.
5. Replace the ice bin. Turn the ice maker on.

**Remove and empty the ice bin if:**

- An extended power failure (one hour or longer) causes ice cubes in the ice bin to melt and refreeze together after power is restored, jamming the dispenser mechanism.
- You do not use the ice dispenser frequently. Ice cubes will freeze together in the bin, jamming the dispenser mechanism.

Remove the ice bin and shake to loosen the cubes or clean as explained above.

## **Automatic Ice Maker - Freezer**

### **Operation & Care of the Freezer Ice Maker (select models)**

After the refrigerator is installed properly, the ice maker can produce ice within 24 hours. When using the ice maker for the first time, and in order for it to work properly, it is necessary to clear air from the water tubing and the filter. Furthermore, if the system is not flushed, the first ice cubes may be discolored or have an odd flavor. Once the ice maker begins making ice, allow the bin to fill completely, then discard the first FULL bin of ice on a Standard Depth model, and the first TWO FULL bins of ice on a Counter Depth model.

### **Ice Maker and Storage Bin Capacity**

This ice maker should produce between 2 and 2.5 pounds of ice per 24 hours depending on usage conditions. In a Standard Depth model, the ice bin will hold about 12 pounds of ice. In a Counter Depth model, the ice bin will hold about 7 pounds of ice.

### **Turning the ice maker on and off**

The ice maker is turned off and on by lifting/ lowering the ice maker's wire signal arm. To gain access to the ice maker, pull the freezer drawer out. Lift the wire signal arm to turn the ice maker OFF and lower the wire signal arm to turn it ON.

### Ice maker tips

- The following sounds are normal when the ice maker is operating:
  - Motor running
  - Ice dropping into ice bin
  - Water valve opening or closing
  - Running water
- Ice cubes stored too long may develop an odd flavor. Empty the ice bin as explained below.

### Quick Freeze Function

Your refrigerator is equipped with a Quick Freeze Function for freezing food at a faster rate, but it can also increase ice production. This function terminates automatically after 12 hours. This function affects only the ice maker in the freezer.

### Cleaning the ice maker

Clean the ice maker and ice bin at regular intervals, especially prior to vacation or moving.

- 1 Turn off the ice maker.
2. Remove the ice bin.
3. Empty and carefully clean the ice bin with mild detergent. Do not use harsh or abrasive cleaners. Rinse with clean water.

4. Allow the ice bin to dry completely before replacing in the freezer.
5. Replace the ice bin. Turn the ice maker on.

Remove and empty the ice bin if an extended power failure (one hour or longer) causes ice cubes in the ice bin to melt and refreeze together after power is restored. Remove the ice bin and shake to loosen the cubes or clean as explained above.

## Storage Features

### Change the Position of a Shelf

1. Remove all food from shelf.
2. Lift the front edge up and pull the shelf out.
3. Replace by inserting the mounting bracket hooks into the desired support slots.
4. Lower the shelf and lock into position.

**Flip Shelf**

**Slide-Under Shelf (varies by model)**

### Reposition the Air Seal

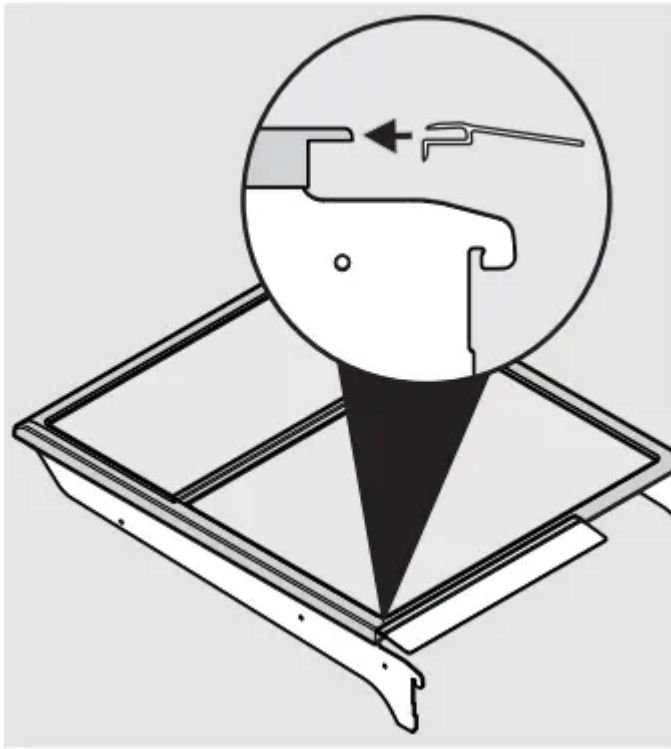

**For slide-out shelves & crisper shelves:**

1. Remove air seal by pushing down on the flap with a downward rotation.
2. Position the air seal towards the outside end of the shelf to avoid the air tower when shelf is pushed back into place.
3. Install seal by sliding lower tab of seal up into bottom rear slot of shelf with seal at a downward angle then pulling up on seal flap until seal sits snug on back of shelf and flap sits at about a 10 degree angle from shelf surface.

**For slide-under shelves:**

1. Remove air seal by pushing seal straight back.
2. Position the air seal towards the outside edge of the shelf to avoid the air tower when shelf is pushed back into place.
3. Install seal by sliding the open channel end of the seal onto back edge of shelf until seal sits snug on back of shelf and flap sits at about a 10 degree angle from shelf surface.

## Drawers

Your refrigerator includes a variety of storage drawers.

### Crispers

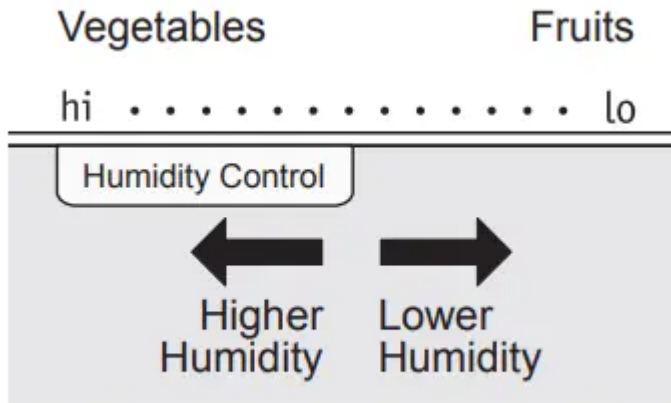

Crisper drawers are designed for storing fruits, vegetables, and other fresh produce.

### Opening Crisper Drawer

Crisper humidity control

Crisper drawers include a sliding control for adjusting the humidity inside the crisper. Leafy vegetables keep best when stored with the Humidity Control set on Higher Humidity. Fresh fruits keep best when stored with the Humidity Control set on Lower Humidity.

### Adjusting Crisper Humidity

To remove the Crisper Drawer for cleaning:

1. Pull the drawer out until it stops.
2. Lift the front slightly and remove the drawer.

### Removing Crisper Drawer

#### Deli drawer

Ideal for storage of deli meats and cheese

## Doors

### Storage bins (varies by model)

The doors to your fresh food compartment use a system of modular storage bins. All of these bins are removable for easy cleaning. Some of them have fixed positions, while others can be adjusted to your needs.

Door bins are ideal for storing jars, bottles, cans, and large drink containers. They also enable quick selection of frequently used items.

### To change the position of an adjustable door bin:

1. Remove all food from door bin.
2. Grip the bin firmly with both hands and lift it upward.
3. Remove the bin.
4. Place the bin just above desired position.
- 5 Lower the bin onto supports until locked in place.

### **Adjustable Door Bin**

6 Place bin liner into bin.

### **Accessories (varies by model)**

#### **Removable Can Dispenser**

The can dispenser holds six (12 ounce) cans. Insert cans into top of bin and dispense from the bottom.

**Can Dispenser**

**Dairy compartment**

Use the dairy compartment, at the top of the fresh food compartment door, for shortterm storage of cheese, spreads, or butter. The dairy compartment is designed to be warmer than the open area and includes a lift-up cover and a dairy divider (select models).

**Dairy Compartment**

**Freezer Features (varies by model)**

## Freezer Baskets

### To Remove Upper Freezer Basket

1. Find the side where the basket frame is aligned to the clip opening. The basket frame should be aligned to both front and rear clips on the same side (either left or right side).
2. If the basket frame is not aligned to the left or right side, push the basket sideways (to either side) until it is aligned.
3. By grabbing the basket wire frame close to the frontal clip, pull up to take the basket frame out.
4. Grab the basket frame close to the rear clip and pull up until it comes out of the clip.
5. Once one side of the basket is off the clips or retainers, slide the basket sideways until the other side of the frame is aligned with the clip openings on the opposite side of the freezer.
6. In the same way, pull up the basket frame from the frontal and rear clips until it is out of the clips.
7. Remove the basket.

Reverse the steps to reinstall the basket.

### Removing Freezer Basket Instructions

1. Locate the basket clips in the rear corners of the basket and pull them out to remove.

2. Open fresh food doors completely.
3. Lift the basket up and remove.

### Replacing Freezer Basket Instructions

1. Place freezer basket back inside the freezer drawer.
2. Replace clips by sliding them back into the slots.

### Dividers Removal

Lift up on the front of the upper divider and pull out.

### Upper Basket Divider

queeze handle and lift up in the center of the divider to move it side-to-side. (The divider cannot be removed.)

**Plastic Lower Basket Divider**

### **Tilt Wire Shelf**

The freezer tilt wire shelf (located on the inside of the freezer drawer) is not designed to be removed.

## **Storing Food and Saving Energy**

### **Ideas for storing foods**

#### **Fresh food storage**

- Keep the fresh food compartment between 34°F and 40°F with an optimum temperature of 37°F.
- Avoid overcrowding the refrigerator shelves, which reduces air circulation and causes uneven cooling.
- Avoid placing food in front of air ports. (See Controls Section for illustration.)

#### **Fruits and vegetables**

- Store fruits and vegetables in crisper drawers, where trapped moisture helps preserve food quality for longer time periods.
- Wash items and remove excess water.
- Wrap any items that have strong odors or high moisture content.

## **Meat**

- Wrap raw meat and poultry separately and securely to prevent leaks and contamination of other foods or surfaces.
- Use the deli drawer to store meat/poultry for short-term storage. Any meat to be kept longer than two days should be frozen.

## **Frozen food storage**

- Keep the freezer compartment at 0°F or lower.
- A freezer operates most efficiently when it is at least  $\frac{2}{3}$  full.

## **Packaging foods for freezing**

- To minimize food dehydration and quality deterioration, use aluminum foil, freezer wrap, freezer bags, or airtight containers. Force as much air out of the packages as possible and seal them tightly. Trapped air can cause food to dry out, change color, and develop an off-flavor (freezer burn).
- Wrap fresh meats and poultry with suitable freezer wrap prior to freezing.
- Do not refreeze meat that has completely thawed.

## **Loading the freezer**

- Prior to grocery shopping, activate “quick freeze” so that on your return you can ensure your newly purchased food designated for the freezer will be preserved as quickly as possible.
- Activating “quick freeze” also will help your freezer more efficiently maintain the selected temperature after placing new purchases with pre-existing frozen foods.
- Avoid adding too much warm food to the freezer at one time. This overloads the freezer, slows the rate of freezing, and can raise the temperature of frozen foods.
- Leave a space between packages, so cold air can circulate freely, allowing food to freeze as quickly as possible.

## **Ideas for saving energy**

### **Installation**

- Locate the refrigerator in the coolest part of the room, out of direct sunlight, and away from heating ducts or registers.
- Do not place the refrigerator next to heatproducing appliances such as a range, oven, or dishwasher. If this is not possible, a section of cabinetry or an

added layer of insulation between the two appliances will help the refrigerator operate more efficiently.

- Level the refrigerator so that the doors close tightly.

### **Temperature settings**

- Refer to the “Controls” section for procedures on temperature settings.

### **Food storage**

- Avoid overcrowding the refrigerator or blocking cold air vents. Doing so causes the refrigerator to run longer and use more energy.
- Cover foods and wipe containers dry before placing them in the refrigerator. This cuts down on moisture build-up inside the unit.
- Organize the refrigerator to reduce door openings. Remove as many items as needed at one time and close the door as soon as possible.
- Do not place a hot container directly on a cold shelf. Remember, such an extreme temperature change may damage the glass.

## **Normal Operating Sounds and Sights**

### **Understanding the sounds you may hear**

Your new, high-efficiency refrigerator may introduce unfamiliar sounds. These sounds normally indicate your refrigerator is operating correctly. Some surfaces on floors, walls, and kitchen cabinets may make these sounds more noticeable.

The following is a list of major components in your refrigerator and the sounds they can cause:

- A. Evaporator** Refrigerant through the evaporator may create a boiling or gurgling sound.
- B. Evaporator fan** You may hear air being forced through the refrigerator by the evaporator fan.
- C. Defrost heater** During defrost cycles, water dripping onto the defrost heater may cause a hissing or sizzling sound. After defrosting, a popping sound may occur.
- D. Automatic ice maker** When ice has been produced, you will hear ice cubes falling into the ice bin. Ice maker fan, water valve activation, and refrigerant gas fluid may create sounds from its operation.
- E. Electronic control & automatic defrost control** These parts can produce a snapping or clicking sound when turning the cooling system on and off.

- F. Condenser fan You may hear air being forced through the condenser.
- G. Compressor Modern, high-efficiency compressors run much faster than older models. The compressor may have a highpitched hum or pulsating sound.
- H. Water valve Makes a buzzing sound each time it opens to fill the ice maker.
- I. Drain pan (not removable) You may hear water dripping into the drain pan during the defrost cycle.
- J. Condenser May create minimal sounds from forced air.
- K. Motorized damper May produce a light humming during operation.
- L. Ice dispensing paddle When dispensing ice, you will hear a snapping, clicking, or popping sound.

Features vary by model

## Changing the Filter

### Air filter (Frigidaire Professional)

The air filter is located under the utility bin.

## Replacing your PureAir Ultra™ air filter

To ensure optimal filtering of refrigerator odors, you should change the air filter every six months (the filter status light on the Touch Panel prompts you to replace the filter after six months).

1. Open the air filter door.
2. Remove the old filter and discard it.
3. Unpack the new filter and slide it into the housing. The open face of the filter should be installed facing downward.
4. To close the air filter door, push the top and bottom to lock the door closed.
5. Press and hold the Air Filter Reset button on the control panel for three seconds. When the display changes from “Replace” to “Good,” the status has been reset.
6. The Air Filter Reset will turn itself off after a few seconds.

## Ordering replacement filters

Order new filters by calling 877-808-4195, online at [www.frigidaire.com/store](http://www.frigidaire.com/store), or through the dealer where you bought your refrigerator. You may want to consider ordering extra filters when you first install your refrigerator.

Air Filter Replacement cartridge,  
part #PAULTRA

### **Air filter (Frigidaire Gallery)**

The air filter is located at the top of the air tower. Replacing your PureAir Ultra IITM air filter To ensure optimal filtering of refrigerator odors, you should change the air filter every six months (the filter status light on the Touch Panel prompts you to replace the filter after six months).

1. Insert fingers in circled area.
2. Push clips in to release front cover.
3. Remove front cover by pulling towards you and lifting up.
4. Replace air filter by sliding into slots.
5. Installation of front cover is reverse of removal.

### **Ordering replacement filters**

Order new filters by calling 877-808-4195, online at [www.frigidaire.com/store](http://www.frigidaire.com/store), or through the dealer where you bought your refrigerator. You may want to consider ordering extra filters when you first install your refrigerator.

Air Filter Replacement cartridge,  
part #PAULTRA2

### **Locating the Filters**

Your refrigerator is equipped with water filtering system. The water filter system filters all dispensed drinking water, as well as the water used to produce ice.

### **Water Filter**

The water filter is located at the top right side of the fresh food compartment.

### **Replacing the Water Filter**

In general, you should change the water filter every six months to ensure the highest possible water quality. Water Filter Status on the user interface prompts you to replace the filter after a standard amount of water (125 gallons/473 liters for PureSource Ultra IITM) has flowed through the system.

If your refrigerator has not been used for a period of time (during moving for example), change the filter before reinstalling the refrigerator.

### **Ordering Replacement Filters**

To order your replacement filters, please visit our online store at [www.frigidaire.com/store](http://www.frigidaire.com/store), by calling toll-free at 1-800-599-7569, or by visiting the dealer where you purchased your refrigerator. Frigidaire recommends that you order extra filters when you first install your refrigerator, and that you replace your filters at least once every six months.

Here is the product number to request when ordering:

PureSource Ultra IITM Water Filter

Part #EPTWUFU01

## **Care and Cleaning**

### **Protecting your investment**

Keeping your refrigerator clean maintains its appearance and prevents odor build-up. Wipe up any spills immediately and clean the freezer and fresh food compartments at least twice a year

- Never use metallic scouring pads, brushes, abrasive cleaners, or strong alkaline solutions on any surface.

- Never use CHLORIDE or cleaners with bleach to clean stainless steel.
- Do not wash any removable parts in a dishwasher.
- Always unplug the electrical power cord from the wall outlet before cleaning.
- Remove adhesive labels by hand. Do not use razor blades or other sharp instruments which can scratch the appliance surface.
- Do not remove the serial plate. Removal of your serial plate voids your warranty.
- Before moving your refrigerator, raise the anti-tip brackets so the rollers will work correctly. This will prevent the floor from being damaged. Refer to the guide on the next page for details on caring and cleaning specific areas of your refrigerator.
- Pull the refrigerator straight out to move it. Shifting it from side to side may damage flooring. Be careful not to move the refrigerator beyond the plumbing connections.
- Damp objects stick to cold metal surfaces. Do not touch refrigerated surfaces with wet or damp hands

### **Vacation and moving tips**

Occasion	Tips
Short Vacations	<ul style="list-style-type: none"> <li>• Leave refrigerator operating during vacations of three weeks or less.</li> <li>• Use all perishable items from refrigerator compartment.</li> <li>• Turn automatic ice maker off and empty ice bucket, even if you will only be gone a few days</li> </ul>
Long Vacations	<ul style="list-style-type: none"> <li>• Remove all food and ice if you will be gone one month or more.</li> <li>• Turn the cooling system off (see “Controls” section for location of On/Off button) and disconnect power cord.</li> <li>• Turn water supply valve to closed position.</li> <li>• Clean interior thoroughly.</li> <li>• Leave both doors open to prevent odors and mold build-up. Block doors open if necessary.</li> </ul>
Moving	<ul style="list-style-type: none"> <li>• Remove all food and ice.</li> <li>• If using a handcart, load from the side.</li> <li>• Adjust rollers all the way up to protect them during sliding or moving.</li> <li>• Pad cabinet to avoid scratching surface.</li> </ul>

<b>Care &amp; Cleaning Tips</b>		
<b>Part</b>	<b>What To Use</b>	<b>Tips and Precautions</b>
Interior & Door Liners	<ul style="list-style-type: none"> <li>• Soap and water</li> <li>• Baking soda and water</li> </ul>	Use two tablespoons of baking soda in one quart of warm water. Be sure to wring excess water out of sponge or cloth before cleaning around controls, light bulb or any electrical part.
Door Gaskets	<ul style="list-style-type: none"> <li>• Soap and water</li> </ul>	Wipe gaskets with a clean soft cloth.
Drawers & Bins	<ul style="list-style-type: none"> <li>• Soap and water</li> </ul>	Use a soft cloth to clean drawer runners and tracks.
Glass Shelves	<ul style="list-style-type: none"> <li>• Soap and water</li> <li>• Glass cleaner</li> <li>• Mild liquid sprays</li> </ul>	Allow glass to warm to room temperature before immersing in warm water
Toe Grille Exterior & Handles	<ul style="list-style-type: none"> <li>• Soap and water</li> <li>• Mild liquid sprays</li> <li>• Vacuum attachment</li> </ul>	Vacuum dust from front of toe grille. Remove toe grille (see Installation Instructions). Vacuum backside, wipe with sudsy cloth or sponge. Rinse and dry.
Exterior & Handles	<ul style="list-style-type: none"> <li>• Soap and water</li> <li>• Non Abrasive Glass Cleaner</li> </ul>	Do not use commercial household cleaners containing ammonia, bleach or alcohol to clean handles. Use a soft cloth to clean smooth handles. DO NOT use a dry cloth to clean smooth doors.
Exterior & Handles (Stainless Steel Models Only)	<ul style="list-style-type: none"> <li>• Soap and water</li> <li>• Stainless Steel Cleaners</li> </ul>	Never use CHLORIDE or cleaners with bleach to clean stainless steel. Clean stainless steel front and handles with non-abrasive soapy water and a dishcloth. Rinse with clean water and a soft cloth. Use a non-abrasive stainless steel cleaner. These cleaners can be purchased at most home improvement or major department stores. Always follow manufacturer's instructions. Do not use

	household cleaners containing ammonia or bleach.

## Before you Call

Concern	Potential Cause	Common Solution
<b>Automatic Ice Maker</b>		
Ice maker is not making any ice.	<ul style="list-style-type: none"> <li>• Ice maker is turned off.</li> </ul>	<ul style="list-style-type: none"> <li>• Turn on ice maker. For the fresh food ice maker, press ice maker on-off button once. For the freezer ice maker, lower the arm to turn the ice maker on, or raise it and snap it in its upper position to turn the ice maker off.</li> </ul>
	<ul style="list-style-type: none"> <li>• Refrigerator is not connected to water line or water valve is not open.</li> </ul>	<ul style="list-style-type: none"> <li>• Connect the unit to the household water supply and ensure the water valve is open.</li> </ul>
	<ul style="list-style-type: none"> <li>• The water supply line is kinked.</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure that the supply line does not kink when the refrigerator is pushed into place against the wall.</li> </ul>
	<ul style="list-style-type: none"> <li>• The water filter is not seated properly.</li> </ul>	<ul style="list-style-type: none"> <li>• Remove and re-install the water filter. Be sure to seat it fully into the locked position.</li> </ul>
	<ul style="list-style-type: none"> <li>• The water filter may be clogged with foreign material.</li> </ul>	<ul style="list-style-type: none"> <li>• If water dispenses slowly or not at all, or if the filter is six months old or older, it should be replaced.</li> </ul>
	<ul style="list-style-type: none"> <li>• Freezer ice maker wire signal arm is being held up by an item not allowing it to go in the on or down position.</li> </ul>	<ul style="list-style-type: none"> <li>• Move any item or frozen ice cubes that may block the signal arm from being in the on or down position. Additionally, the ice bin itself may be out of position so that it prevents the signal arm from dropping all the way down. Be sure the bin is pushed all the way to the rear of the shelf. See Automatic Ice Maker-Freezer section in manual.</li> </ul>
Ice maker is not making enough ice.	<ul style="list-style-type: none"> <li>• Ice maker is producing less ice than you expect.</li> </ul>	<ul style="list-style-type: none"> <li>• The ice maker will produce approximately 2.0 to 2.5 pounds of</li> </ul>

		ice every 24 hours depending on usage conditions.
	<ul style="list-style-type: none"> <li>• The water filter may be clogged with foreign material.</li> </ul>	<ul style="list-style-type: none"> <li>• If water dispenses slower than normal, or if the filter is six months old or older, it should be replaced.</li> </ul>
	<ul style="list-style-type: none"> <li>• The water supply line is kinked.</li> </ul>	<ul style="list-style-type: none"> <li>• Ensure that the supply line does not kink when the refrigerator is pushed into place against the wall.</li> </ul>
	<ul style="list-style-type: none"> <li>• Saddle valve on cold water pipe is clogged or restricted by foreign material.</li> </ul>	<ul style="list-style-type: none"> <li>• Turn off household water line valve. Remove valve. Clean valve. Replace valve if necessary.</li> </ul>
	<ul style="list-style-type: none"> <li>• Heavy traffic, opening or closing of the doors excessively.</li> </ul>	<ul style="list-style-type: none"> <li>• Press Fast Freeze to temporarily increase ice production rate. (Freezer ice maker only.)</li> </ul>
	<ul style="list-style-type: none"> <li>• Freezer control is set too warm (freezer ice maker).</li> </ul>	<ul style="list-style-type: none"> <li>• Set freezer control to colder setting to improve performance of the ice maker (freezer ice maker). Allow 24 hours for temperature to stabilize.</li> </ul>
	<ul style="list-style-type: none"> <li>• Water pressure is extremely low. Cut-off and cut-on pressures are too low (well systems only).</li> </ul>	<ul style="list-style-type: none"> <li>• Have someone turn up the cut-off and cut-on pressure on the water pump system (well systems only).</li> </ul>
	<ul style="list-style-type: none"> <li>• Reverse osmosis system is in regenerative phase.</li> </ul>	<ul style="list-style-type: none"> <li>• It is normal for a reverse osmosis system to be below 20 psi during the regenerative phase.</li> </ul>
Freezer ice maker will not stop making ice (select models).	<ul style="list-style-type: none"> <li>• Ice maker wire signal arm is being held down by a package in the freezer that has fallen against ice maker.</li> </ul>	<ul style="list-style-type: none"> <li>• Move any item or frozen ice cubes that may block the signal arm from being in the off or upward position. See Automatic Ice Maker-Freezer section in manual.</li> </ul>
	<ul style="list-style-type: none"> <li>• Ice cubes are not being used frequently enough</li> </ul>	<ul style="list-style-type: none"> <li>• Remove ice container and discard ice. The ice maker will produce fresh</li> </ul>

Ice cubes are freezing together.	or interruption of power for prolonged time.	supply. Ice should be used at least twice weekly to keep the cubes separated.
	<ul style="list-style-type: none"> <li>Ice cubes are hollow (shells of ice with water inside). The hollow cubes break open in the bin and leak their water onto existing ice, which causes it to freeze together.</li> </ul>	<ul style="list-style-type: none"> <li>This generally occurs when the ice maker does not get enough water. This is usually the result of a clogged water filter or restricted water supply. Replace the water filter and if the condition still occurs check for a clogged Saddle Valve, water valve not turned on all the way or kinked water supply line.</li> </ul>
<b>Dispenser(Ice &amp; Water)</b>		
Dispenser will not dispense ice.	<ul style="list-style-type: none"> <li>There is no ice in the bin to be dispensed.</li> </ul>	<ul style="list-style-type: none"> <li>See the "Ice maker is not making any ice" section above.</li> </ul>
	<ul style="list-style-type: none"> <li>The refrigerator doors are not completely closed.</li> </ul>	<ul style="list-style-type: none"> <li>Be sure the refrigerator doors are completely closed.</li> </ul>
	<ul style="list-style-type: none"> <li>Dispenser paddle has been pressed too long and the dispenser motor has overheated.</li> </ul>	<ul style="list-style-type: none"> <li>The motor overload protector will reset in about three minutes and then ice can be dispensed.</li> </ul>
Ice dispenser is jammed.	<ul style="list-style-type: none"> <li>Ice has melted and frozen around auger due to infrequent use, temperature fluctuations, and/or power outages.</li> </ul>	<ul style="list-style-type: none"> <li>Remove ice container, thaw, and empty the contents. Clean container, wipe dry, and replace in proper position. When new ice is made, dispenser should operate.</li> </ul>
	<ul style="list-style-type: none"> <li>Ice cubes are jammed between ice maker and back of ice container.</li> </ul>	<ul style="list-style-type: none"> <li>Remove ice cubes that are jamming the dispenser.</li> </ul>
Dispenser will not dispense water.	<ul style="list-style-type: none"> <li>Water filter not seated properly.</li> </ul>	<ul style="list-style-type: none"> <li>Remove and reinstall the water filter. For Puresource Ultra II, be sure to rotate it to the right until it stops and the grip end is vertical.</li> </ul>
	<ul style="list-style-type: none"> <li>Water filter is clogged.</li> </ul>	

		<ul style="list-style-type: none"> <li>• Replace filter cartridge. Be sure to rotate it to the right until it stops and the grip end is vertical.</li> </ul>
	<ul style="list-style-type: none"> <li>• Household water line valve is not open.</li> </ul>	<ul style="list-style-type: none"> <li>• Open household water line valve. See CONCERN column AUTOMATIC ICE MAKER.</li> </ul>
Water not cold enough.	<ul style="list-style-type: none"> <li>• The water dispensing system is not designed to chill water.</li> </ul>	<ul style="list-style-type: none"> <li>• Add ice to cup or container before dispensing water.</li> </ul>
Water has an odd taste and/or odor.	<ul style="list-style-type: none"> <li>• Water has not been dispensed for an extended period of time.</li> </ul>	<ul style="list-style-type: none"> <li>• Draw and discard 10-12 glasses of water to freshen the supply.</li> </ul>
	<ul style="list-style-type: none"> <li>• Unit not properly connected to cold water line.</li> </ul>	<ul style="list-style-type: none"> <li>• Connect unit to cold water line that supplies water to the kitchen faucet.</li> </ul>
<b>Opening/Closing Of Doors/Drawers</b>		
Door(s) will not close.	<ul style="list-style-type: none"> <li>• Door was closed too hard, causing other door to open slightly.</li> <li>• Refrigerator is not level. It rocks on the floor when moved slightly.</li> <li>• Refrigerator is touching a wall or cabinet.</li> </ul>	<ul style="list-style-type: none"> <li>• Close both doors gently.</li> <li>• Ensure floor is level and solid, and can adequately support the refrigerator. Contact a carpenter to correct a sagging or sloping floor.</li> <li>• Ensure floor is level and solid, and can adequately support the refrigerator. Contact a carpenter to correct a sagging or sloping floor.</li> </ul>
Drawers are difficult to move.	<ul style="list-style-type: none"> <li>• Food is touching shelf on top of drawer.</li> <li>• Track that drawers slide on is dirty.</li> </ul>	<ul style="list-style-type: none"> <li>• Remove top layer of items in drawer.</li> <li>• Ensure drawer is properly installed on track.</li> <li>• Clean drawer, rollers, and track. See Care &amp; Cleaning.</li> </ul>
<b>Running of Refrigerator</b>		

Compressor does not run.	<ul style="list-style-type: none"> <li>• Freezer control is set to "OF".</li> <li>• Refrigerator is in defrost cycle.</li> <li>• Plug at electrical outlet is disconnected.</li> <li>• House fuse blown or tripped circuit breaker.</li> <li>• Power outage.</li> </ul>	<ul style="list-style-type: none"> <li>• Set freezer control.</li> <li>• This is normal for a fully automatic defrost refrigerator. The defrost cycle occurs periodically, lasting about 30 minutes.</li> <li>• Ensure plug is tightly pushed into outlet.</li> <li>• Check/replace fuse with a 15 amp time-delay fuse. Reset circuit breaker.</li> <li>• Check house lights. Call local electric company.</li> </ul>
Refrigerator seems to run too much or too long.	<ul style="list-style-type: none"> <li>• Your variable speed compressor is designed to run 100% of the time except during the defrost cycle. At times it will run faster, such as after a defrost cycle.</li> </ul>	<ul style="list-style-type: none"> <li>• It is normal for the compressor to run continuously except during defrost mode.</li> </ul>
<b>Digital Temperature Setting Display</b>		
Digital temperature displays an error.	<ul style="list-style-type: none"> <li>• Electronic control system has detected a performance problem.</li> </ul>	<ul style="list-style-type: none"> <li>• Call your Electrolux service representative, who can interpret any messages or number codes flashing on the digital displays.</li> </ul>
<b>Water/Moisture/Frost Inside Refrigerator</b>		
Moisture collects on inside of refrigerator walls.	<ul style="list-style-type: none"> <li>• Weather is hot and humid.</li> <li>• Flipper mullion</li> </ul>	<ul style="list-style-type: none"> <li>• The rate of frost buildup and internal sweating increases.</li> <li>• Adjust flipper mullion. (See "To adjust the flipper mullion" in the Installation section.)</li> </ul>
Water collects on bottom side	<ul style="list-style-type: none"> <li>• Vegetables contain and give off moisture.</li> </ul>	<ul style="list-style-type: none"> <li>• It is not unusual to have moisture on the bottom side of the cover.</li> </ul>

of drawer cover.		Move humidity control (some models) to lower setting.
Water collects in bottom of drawer.	<ul style="list-style-type: none"> <li>• Washed vegetables and fruit drain while in the drawer.</li> </ul>	<ul style="list-style-type: none"> <li>• Water collecting in bottom of drawer is normal. Dry items before putting them in the drawer or store produce in tightly sealed bags to help reduce condensation inside of the drawer.</li> </ul>
<b>Water/Moisture/Frost Outside Refrigerator</b>		
Moisture collects on outside of refrigerator or between doors.	<ul style="list-style-type: none"> <li>• Weather is humid.</li> </ul>	<ul style="list-style-type: none"> <li>• This is normal in humid weather. When humidity is lower, the moisture should disappear.</li> </ul>
<b>Food in Fresh Food Compartment</b>		
Food is freezing.	<ul style="list-style-type: none"> <li>• Temperature setting is too low.</li> <li>• Temperature sensor is covered by food (right side of fresh food area).</li> <li>• Food is covering the air ports.</li> </ul>	<ul style="list-style-type: none"> <li>• Move the setting to a higher degree.</li> <li>• Allow space for air flow to the sensor.</li> <li>• Allow space between the air ports and the food.</li> </ul>
