

PRODUCT DESCRIPTION

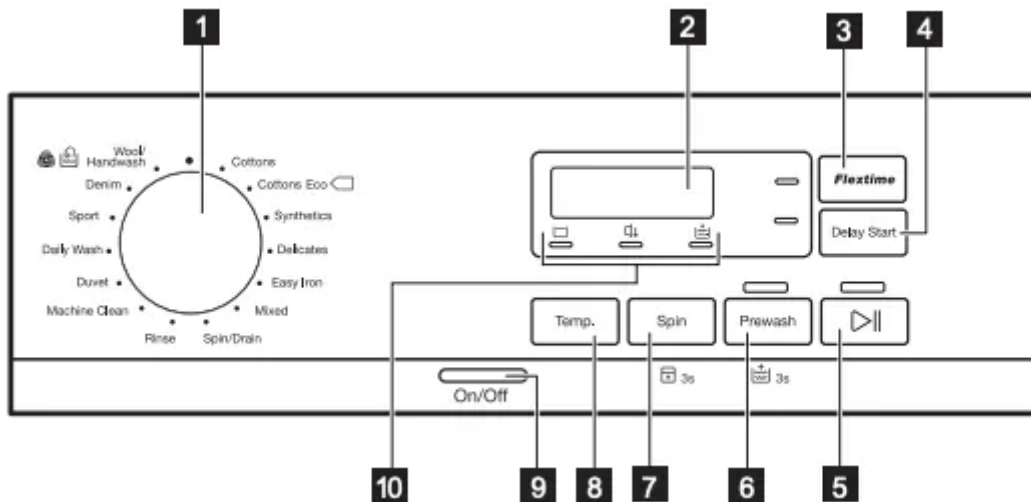

APPLIANCE OVERVIEW

1. Hinge supports
2. Detergent dispenser
3. Control panel
4. Magnetic plate
5. Door handle
6. Rating plate
7. Plate with rubber beater
8. Drain pump filter
9. Front feet for levelling the appliance
10. Drain hose
11. Mains cable
12. Inlet hose connection
13. Back feet for levelling the appliance

CONTROL PANEL

CONTROL PANEL DESCRIPTION

The permanent options are set by holding pressed the relative button for 3 seconds at least.

1. Programme dial
2. Display
3. Flextime touch button
4. Delay Start touch button
5. Start/Pause touch button 
6. Prewash touch button and permanent Extra Rinse option 
7. Spin reduction options touch button and permanent Child Lock option 
8. Temp. touch button
9. On/Off push button
10. Option indicators:
 - Rinse Hold
 - Quiet
 - Extra Rinse

DISPLAY

A	 Door locked indicator.
B	 Child safety lock indicator.
C	18:88° The digital indicator can show: <ul style="list-style-type: none">▪ Programme duration (e. g. 2:40).▪ Delay time (e. g. 2h).▪ Cycle end (0:00).▪ Warning code (e.g. E20).▪ Temperature (88°).▪ Spin speed (1888, no spin indicator - - -).

DIAL AND BUTTONS

INTRODUCTION

The options/functions are not available with all washing programmes. Check the compatibility between options/ functions and washing programmes in the "Programme Chart". An option/ function can exclude another one, in this case the appliance doesn't allow you to set incompatible options/ functions.

FLEXTIME

This option may be advisable to shorten the washing programme.

Use this option for items with normal or light soil or items to refresh.

Touch this button once to decrease the duration. In case of smaller load, touch this button twice to set an extra quick programme.

After each touching the new programme duration is shown on the display. The relevant indicator illuminates. This option is not available for every programme. For more details, refer to Programme options compatibility in "Programmes" chapter.

DELAY START

With this option you can delay the start of a programme to a more convenient time.

Touch the button repeatedly to set the required delay. The time increases in steps of 1 hour up to 20 hours.

After touching the Start/Pause  button, the relevant indicator illuminates and the selected delay time and the appliance begins the countdown. The door is locked.

START/PAUSE

Touch the Start/Pause  button to start, pause the appliance or interrupt a running programme.

PREWASH

With this option you can add a prewash phase to a washing programme.

The relevant indicator illuminates.

- Use this option to add a pre-wash phase at 30 °C before the washing phase. This option is recommended for heavily soiled laundry, especially if containing sand, dust, mud and other solid particles.

This option can increase the programme duration.

PERMANENT EXTRA RINSE

With this option you can permanently have an extra rinse when you set a new programme.

To activate/deactivate this option, hold down the Prewash button until relevant  indicator comes on/goes off.

SPIN

When you set a programme, the appliance automatically sets the maximum spin speed allowed except programme Denim.

Push this button to set additional spin options:

- Decrease the spin speed. The display shows only the spin speeds available for the set programme.
- No spin  comes on display. Set this option to deactivate all spin phases. The appliance performs only the draining phase of the selected washing programme. Set this option for very delicate fabrics. The rinse phase uses more water for some washing programmes
- Rinse hold . The related indicator comes on.

The final spin is not performed. The water of the last rinse is not drained out to prevent the fabrics from creasing. The washing programme ends with water in the drum.

The door stays locked and the drum turns regularly to reduce creasing. You must drain the water to unlock the door.

If you touch the Start/Pause  button, the appliance performs the spinning phase and drains the water.

- Quiet . The related indicator comes on.

The intermediate and the final spinning phases are suppressed and the programme ends with water in the drum. This helps to reduce creasing. The door stays locked. The drum turns regularly to reduce creasing. You must drain the water to unlock the door.

As the programme is very quiet, it is suitable for use at night time when cheaper electricity tariffs are available. In some programmes the rinses are performed with more water.

If you touch the Start/Pause  button, the appliance performs only the draining phase.

The appliance empties the water out automatically after approximately 18 hours.

CHILD LOCK

With this option you can prevent children from playing with the control panel.

- To activate/deactivate this option, hold down the Spin button  until  comes on/goes off on the display.

The appliance will default to this option after you switch it off.

The Child Lock function may not be available for a few seconds after switching the appliance on.

TEMP.

When you select a washing programme, the appliance automatically proposes a default temperature.

Touch this button repeatedly until the desired temperature value appears on the display. When the display shows the  indicators, the appliance does not heat the water.

ON/OFF

Press this button for a few seconds to activate or deactivate the appliance. Two different tunes sound while switching the appliance on or off.

As the Stand-by function automatically deactivates the appliance after several minutes to reduce the energy consumption, you may need to activate the appliance again.

For more details, refer to Stand-by paragraph in Daily Use chapter.

PROGRAMMES

PROGRAMME CHART

Programme Default temperature Temperature range	Reference spin speed Spin speed range (rpm)	Maximum load	Programme description (Type of load and soil level)
Cottons 40 °C 90 °C - Cold	1200 rpm (1200 - 400)	7 kg	White cotton and coloured cotton. Normal and heavy soil.
 Cottons Eco ¹⁾ 40 °C 60 °C - 40 °C	1200 rpm (1200 - 400)	7 kg	White cotton and fast-coloured cotton. Normal soil. The energy consumption decreases and the time of the washing programme is extended, ensuring good washing results.
Synthetics 40 °C 60 °C - Cold	1200 rpm (1200 - 400)	3 kg	Synthetic items or mixed fabric items. Normal soil.
Delicates 30 °C 40 °C - Cold	1200 rpm (1200 - 400)	2 kg	Delicate fabrics such as acrylics, viscose and mixed fabrics requiring gentler washing. Normal soil.
Easy Iron 40 °C 60 °C - Cold	800 rpm (800 - 400)	3 kg	Synthetic items requiring a gentle wash. Normal and light soil. ²⁾
Mixed 30 °C 40 °C - Cold	1200 rpm (1200 - 400)	3 kg	Synthetic and mixed fabrics. Normally soiled.
Spin/Drain	1200 rpm (1200 - 400)	7 kg	All fabrics, except woollens and delicate fabrics. To spin the laundry and to drain the water in the drum.
Rinse	1200 rpm (1200 - 400)	7 kg	All fabrics, except woollens and very delicate fabrics. Programme for rinsing and spinning the laundry. The default spin speed is the one used for cotton programmes. Reduce the spin speed accordingly to the type of laundry. If necessary, set the Extra Rinse option to add rinses. With a low spin speed, the appliance performs delicate rinses and a short spin.

Programme Default temperature Temperature range	Reference spin speed Spin speed range (rpm)	Maximum load	Programme description (Type of load and soil level)
Machine Clean 60 °C	1200 rpm	-	Maintenance cycle with hot water to clean and freshen the drum and to remove residue that may cause odour. For the best result use this cycle once a month. Before running this cycle, remove all items from the drum. In the washing phase compartment of the detergent dispenser, put the flap of the compartment in upward position. Pour a cup of chlorine bleach or a washing machine cleaner in the washing phase compartment. DO NOT use both together.  After the drum cleaning, run a further rinse cycle with empty drum and no detergent to remove any residue of bleach.
Duvet 40 °C 60 °C - Cold	800 rpm (800 - 400)	3 kg	Single synthetic blanket, padded clothes, duvets, down jackets and similar items.
Daily Wash 40 °C 60 °C - Cold	1200 rpm (1200 - 400)	3 kg	Cottons and Synthetics. Short programme for lightly soiled daily laundry.
Sport 30 °C 40 °C - Cold	1200 rpm (1200 - 400)	3 kg	Mixed fabric sportswear. Light soil items or items to refresh.
Denim 40 °C 40 °C - Cold	800 rpm (1200 - 400)	3 kg	Special programme for Denim clothing with delicate washing phase to minimize colour fading and marks. For better care a reduced load size is recommended.

Programme Default temperature Temperature range	Reference spin speed Spin speed range (rpm)	Maximum load	Programme description (Type of load and soil level)
 Wool/Hand-wash 40 °C 40 °C - Cold	1200 rpm (1200 - 400)	1.5 kg	Machine washable wool, hand washable wool and other fabrics with «hand washing» care symbol ³⁾ .

1) Standard programmes for the Energy Label consumption values. According to regulation 1061/2010, these programmes are respectively the «Standard 60°C cotton programme» and the

«Standard 40°C cotton programme». They are the most efficient programmes in terms of combined energy and water consumption for washing normally soiled cotton laundry.

The water temperature of the washing phase may differ from the temperature declared for the selected programme.

2) To reduce creasing, this cycle regulates the water temperature and performs a soft wash and spin phase. The appliance adds some rinses.

3) During this cycle the drum rotates slowly to ensure a gentle wash. It can seem that the drum doesn't rotate or doesn't rotate properly, but this is normal for this programme.

CONSUMPTION VALUES

Stated values are obtained in laboratory conditions with relevant standards. Different causes can change the data: the quantity and type of laundry and ambient temperature. Water pressure, the supply voltage and the temperature of inlet water may also affect the washing programme duration.

Technical specifications may be changed without prior notice to improve the quality of product.

Programmes	Load (kg)	Energy consumption (kWh)	Water consumption (litre)	Approximate programme duration (minutes)	Remaining moisture (%) ¹⁾
Cottons 60°C	7	1.20	79	190	53

The information given in the chart above is compliant with the EU Commission regulation 1015/2010 implementing directive 2009/125/EC .

SETTINGS

ACOUSTIC SIGNALS

This appliance has different acoustic signals, that operate when:

- You activate the appliance (special short tune).
- You deactivate the appliance (special short tune).
- You touch the buttons (click sound).
- You make an invalid selection (3 short sounds).
- The programme is completed (sequence of sounds for about 2 minutes).
- The appliance has a malfunction (sequence of short sounds for about 5 minutes).

To deactivate/activate the acoustic signals when the programme is completed, touch the Flexitime and the Delay Start buttons simultaneously for about 2 seconds. The display shows On/Off

If you deactivate the acoustic signals, they continue to operate when the appliance has a malfunction.

BEFORE FIRST USE

1. Make sure that the electrical power is available and the water tap is open.
2. Pour 2 litres of water into the detergent compartment marked by . This action activates the drain system.
3. Pour a small quantity of detergent into the compartment marked by .
4. Set and start a programme for cotton at the highest temperature without any laundry in the drum.

This removes all possible dirt from the drum and the tub.

DAILY USE

WARNING! Refer to Safety chapters.

ACTIVATING THE APPLIANCE

1. Connect the mains plug to the mains socket.
2. Open the water tap.
3. Press the On/Off button for a few seconds to activate the appliance.

A short tune sounds.

LOADING THE LAUNDRY

1. Open the appliance door.
2. Shake the items before you put them in the appliance.
3. Put the laundry in the drum, one item at a time. Do not put too much laundry in the drum.
4. Close the door firmly.

CAUTION! Make sure that no laundry gets caught between the seal and the door to avoid risk of water leakage and damage to the laundry.

Washing heavily oiled, greasy stains could cause damage to rubber parts of the washing machine.

FILLING THE DETERGENT AND ADDITIVES

- Compartment for prewash phase, soak programme or stain remover.

- Compartment for washing phase.

- Compartment for fabric softener and other liquid treatments (fabric conditioner, starch).

MAX - Maximum level for quantity of liquid additives.

- Flap for powder or liquid detergent.

Always follow the instructions that you find on the packaging of the detergent products, but we recommend that you do not exceed the maximum indicated level (**MAX**). This quantity will however guarantee the best washing results.

After a washing cycle, if necessary, remove any detergent residue from the detergent dispenser.

CHECK THE POSITION OF THE DETERGENT FLAP

1. Pull out the detergent dispenser until it stops.

2. Press the lever down to remove the dispenser.
3. To use powder detergent, turn the flap up.
4. To use liquid detergent, turn the flap down.

With the flap in the position DOWN:

- Do not use gelatinous or thick liquid detergents.
 - Do not exceed to liquid detergent dose indicated on the flap.
 - Do not set the prewash phase.
 - Do not set the delay start function.
5. Measure out the detergent and the fabric conditioner.
 6. Carefully close the detergent dispenser.

Make sure that the flap does not cause a blockage when you close the drawer.

SETTING A PROGRAMME

1. Turn the programme dial to select the desired washing programme. The indicator of the Start/Pause button flashes. The display shows an indicative programme duration.
2. To change the temperature and/or the spin speed, touch the related buttons.
3. If desired, set one or more options by touching the related buttons.

If a selection is not possible an acoustic signal sounds.

STARTING A PROGRAMME

Touch the Start/Pause button to start the programme. It is not possible to start the programme when the indicator of the button is off and doesn't flash (e.g. programme dial on a wrong position).

The related indicator stops flashing and stays on. The programme starts, the door is locked. The display shows the indicator .

STARTING A PROGRAMME WITH THE DELAY START

1. Touch the Delay Start button until the display shows the desired delay time. The related indicator comes on.

2. Touch the Start/Pause  button. The appliance door locks and starts the countdown of the delay start. The display shows the indicator .

When the countdown is completed, the programme starts automatically.

Cancelling the delay start after the countdown has started

To cancel the delay start:

1. Touch the Start/Pause  button to pause the appliance. The related indicator flashes.

2. Touch the Delay Start button repeatedly until the display shows .

3. Touch the Start/Pause  button again to start the programme immediately.

Changing the delay start after the countdown has started

To change the delay start:

1. Touch the Start/Pause  button to pause the appliance. The related indicator flashes.

2. Touch the Delay Start button repeatedly until the display shows the desired delay time.

3. Touch the Start/Pause  button again to start the new countdown .

THE AUTOADJUST SYSTEM LOAD DETECTION

After touching the Start/Pause  button:

1. The AutoAdjust System starts estimating the weight of the load to calculate the real programme duration. During this phase the two dots separating hours from minutes are blinking

2. After about 15-20 minutes new cycle duration is displayed. The appliance automatically adjusts the programme duration to the load to achieve perfect washing results in the minimum possible time.

INTERRUPTING A PROGRAMME AND CHANGING THE OPTIONS

When the programme is running, you can change only some options:

1. Touch the Start/Pause  button. The related indicator flashes.

2. Change the options. The given information in the display changes accordingly.

3. Touch the button Start/Pause  again. The washing programme continues.

CANCELLING A RUNNING PROGRAMME

1. Press the button On/Off to cancel the programme and to deactivate the appliance.

2. Press the button On/Off again to activate the appliance.

If the AutoAdjust System has completed and the water filling has already started, the new programme starts without repeating the AutoAdjust System. The water and the detergent are not drained out in order to avoid waste.

There is also an alternative way of cancelling:

1. Rotate the selector knob to the "Reset" position.
2. Wait for 1 second. The display shows  Now, you can set a new washing programme.

OPENING THE DOOR - ADDING GARMENTS.

If the temperature and level of the water in the drum are too high and/or the drum is still rotating you should not open the door.

While a programme or the delay start operates, the appliance door is locked. The display shows the indicator .

1. Touch the Start/Pause  button. In the display the related door lock indicator goes off.
2. Open the appliance door. If necessary, add or remove the items. Close the door and touch the Start/Pause  button.

The programme or the delay start continues.

END OF THE PROGRAMME

When the programme has finished, the appliance stops automatically. The acoustic signals operate (if they are active). The display shows 

The indicator of the Start/Pause  button goes off.

The door unlocks and the indicator  goes off.

1. Press button On/Off to deactivate the appliance.

After five minutes from the end of the programme, the energy saving function automatically deactivates the appliance.

When you activate the appliance again, the display shows the end of the previous programme. Turn the programme dial to set a new cycle.

2. Remove the laundry from the appliance.
3. Make sure that the drum is empty.
4. Keep the door and the detergent dispenser slightly ajar to prevent mildew and odours.
5. Close the water tap.

DRAINING WATER OUT AFTER END OF CYCLE

If you have chosen a programme or an option that does not empty out the water of the last rinse, the programme is completed, but:

- The time area shows  and the display shows the door locked .
- The indicator of the Start/Pause  button starts flashing.
- The drum still turns at regular intervals to prevent creases in the laundry.
- The door stays locked.
- You must drain the water to open the door:
 1. If necessary, touch the Spin button to decrease the spin speed proposed by the appliance.
 2. Press the Start/Pause  button: the appliance drains the water and spins.

The option indicator Rinse Hold  or  disappears.

If you have set Quiet  and the spin speed is not changed, when you press the Start/Pause

button, the appliance only drains the water.

3. When the programme is completed and the door locked  indicator goes off, you can open the door.
4. Press the On/Off button for a few seconds to deactivate the appliance.

STAND-BY FUNCTION

The Stand-by function automatically deactivates the appliance to reduce the energy consumption when:

- You do not use the appliance for 5 minutes when no programme is running. Press the button On/Off to activate the appliance again.
- 5 minutes after the end of the washing programme. Press the On/Off button to activate the appliance again. The display shows the end of the last programme. Turn the programme dial to set a new cycle.

If the dial is rotated to the "Reset" position, the appliance automatically turns off in 30 seconds.

If you set a programme or an option that ends with water in the drum, the Stand-by function doesn't deactivate the appliance to remind you to drain the water.

HINTS AND TIPS

WARNING! Refer to Safety chapters.

THE LAUNDRY LOAD

- Divide the laundry into: white, coloured, synthetics, delicates and wool.
- Follow the washing instructions on the laundry care labels.
- Do not wash white and coloured items together.
- Some coloured items can discolour with the first wash. We recommend that you wash them separately for the first couple of times.
- Button up pillowcases, close zippers, hooks and poppers. Tie up belts.
- Empty pockets and unfold.
- Turn multilayered fabrics, wool and items with printed illustrations inside out.
- Pre-treat tough stains.
- Wash heavy soil stains with a special detergent.
- Be careful with curtains. Remove the hooks and put the curtains in a washing bag or pillowcase.
- Do not wash laundry without hems or with cuts.
- Use a washing bag to wash small and/or delicate items (e.g. underwired bras, belts, tights, etc.).
- A very small load can cause balance problems with the spin phase leading to excessive vibration. If this occurs:
 - a. interrupt the programme and open the door (refer to "Daily Use" chapter);
 - b. manually redistribute the load so that the items are spaced evenly around the tub;
 - c. press the Start/Pause button. The spin phase continues.

STUBBORN STAINS

For some stains, water and detergent is not sufficient.

We recommend that you pre-treat these stains before you put the items in the appliance.

Special stain removers are available. Use the special stain remover that is applicable to the type of stain and fabric.

DETERGENTS AND OTHER TREATMENTS

- Only use detergents and other treatments specially made for washing machines:
 - powder detergents for all types of fabric, excluding delicate. Prefer powder detergents containing bleach for whites and laundry sanitization

– liquid detergents, preferably for low temperature wash programmes (60 °C max) for all types of fabric, or special ones for woollens only.

- Do not mix different types of detergents.
- To help the environment, do not use more than the recommended quantity of detergent.
- Follow the instructions that you find on packaging of the detergents or other treatments without exceeding the indicated maximum level **MAX**
- Use the recommended detergents for the type and colour of the fabric, the programme temperature and the level of soil.

ECOLOGICAL HINTS

- Set a programme without the prewash phase to wash laundry with normal soil.
- Always start a washing programme with the maximum load of laundry allowed.
- If you pre-treat the stains or use a stain remover, set a programme with a low temperature.
- To use the correct quantity of detergent, check the water hardness of your domestic system. Refer to "Water hardness".

WATER HARDNESS

If the water hardness in your area is high or moderate, we recommend that you use a water softener for washing machines. In areas where the water hardness is soft it is not necessary to use a water softener.

To find out the water hardness in your area, contact your local water authority.

Use the correct quantity of water softener. Follow the instructions that you find on the packaging of the product.

CARE AND CLEANING

WARNING! Refer to Safety chapters.

EXTERNAL CLEANING

Clean the appliance with mild soap and warm water only. Fully dry all the surfaces.

CAUTION! Do not use alcohol, solvents or chemical products.

CAUTION! Do not clean the metal surfaces with chlorine-based detergent.

DESCALING

If the water hardness in your area is high or moderate, we recommend that you use a water descaling product for washing machines.

Regularly examine the drum to check for limescale. Regular detergents already contain water softening agents, but we recommend to run a cycle with an empty drum and a descaling product occasionally.

Always follow the instructions that you find on the packaging of the product.

MAINTENANCE WASH

The repeated and prolonged use of low temperature programmes can cause detergent deposits, fluff residues, bacterial growth inside the drum and the tub. This could generate bad odours and mildew. To eliminate these deposits and clean the inner part of the appliance, run a maintenance wash regularly (at least once a month).

Refer to Cleaning the drum chapter.

DOOR SEAL WITH DOUBLE LIP TRAP

This appliance is designed with a self cleaning draining system, allowing light fluff fibers that fall off the clothes to be drained out with the water, in such a way that there is no need by the customer to access this area for regular maintenance and cleaning.

Regularly examine the seal and remove all objects from the inner part. Coins, buttons, other small items forgotten in the pockets of your clothes are deposited during the washing cycle in the special double lip trap in the porthole seal, where they can be conveniently recovered at the end of the cycle.

CLEANING THE DRUM

Regularly examine the drum to prevent unwanted deposits.

Rust deposits in the drum may occur due to rusting foreign body in the washing or tap water containing iron. Clean the drum with special products for stainless steel.

Always follow the instructions that you find on the packaging of the product. Do not clean the drum with acidic descaling products, scouring products containing chlorine or iron or steel wool.

For a thorough clean:

1. Remove all laundry from the drum.
2. Run the Machine Clean programme. For more details, refer to washing programme table.
3. Add a small quantity of powder detergent into the empty drum, in order to rinse out any left residues.

CLEANING THE DETERGENT DISPENSER

To prevent possible deposits of dried detergent or clotted fabric softener and/or formation of mould in the detergent dispenser drawer, once in a while carry out the following cleaning procedure:

1. Open the drawer. Press the catch downwards as indicated in the picture and pull it out.

2. Remove the top part of the additive compartment to aid cleaning and flush it out under running warm water, to remove any traces of accumulated detergent. After cleaning, put the top part back into position.

3. Make sure that all detergent residue is removed from the upper and lower part of the recess. Use a small brush to clean the recess.

4. Insert the detergent drawer into the guide rails and close it. Run the rinsing programme without any clothes in the drum.

CLEANING THE DRAIN PUMP

WARNING! Disconnect the mains plug from the mains socket.

Regularly check the drain pump filter and make sure that it is clean.

Clean the drain pump if:

- The appliance does not drain the water.
- The drum does not turn.
- The appliance makes an unusual noise because of the blockage of the drain pump.
- The display shows the alarm code **E20**

WARNING!

- Do not remove the filter while the appliance operates.
- Do not clean the pump if the water in the appliance is hot. Wait until the water cools down

Proceed as follows to clean the pump:

1. Open the pump cover.
2. Place a suitable bowl below the drain pump access to collect the water that flows out.
Always keep a rag nearby to dry up any water spillages when removing the filter.
3. Turn the filter 180 degrees in anti-clockwise direction to open it, without removing. Let the water flow out.
4. When the bowl is full of water, turn the filter back and empty the container.
5. Repeat the steps 4 and 5 until the water stops to flow out.

6. Turn the filter anti-clockwise to remove it

7. If it is necessary, remove fluff and objects from the filter recess.

Make sure that the impeller of the pump can rotate. If it does not rotate, contact the Authorised Service Centre.

8. Clean the filter under the water tap.

9. Put the filter back into the special guides by turning it clockwise. Make sure that you tighten the filter correctly to prevent leakages.

10. Close the pump cover.

When you drain the water with the emergency drain procedure, you must activate the drain system again:

1. Put 2 litres of water in the main wash compartment of the detergent dispenser.
2. Start the programme to drain the water.

CLEANING THE INLET HOSE AND THE VALVE FILTER

EMERGENCY DRAIN

If the appliance cannot drain the water, carry out the same procedure, described in 'Cleaning the drain pump' paragraph. If necessary, clean the pump.

When you drain the water with the emergency drain procedure, you must activate the drain system again:

1. Put 2 litres of water in the main wash compartment of the detergent dispenser.
2. Start the programme to drain the water.

FROST PRECAUTIONS

If the appliance is installed in an area where the temperature can reach values around 0° C or drop below, remove the remaining water from the inlet hose and the drain pump.

1. Disconnect the mains plug from the mains socket.
2. Close the water tap.
3. Put the two ends of the inlet hose in a container and let the water flow out of the hose.
4. Empty the drain pump. Refer to the emergency drain procedure.
5. When the drain pump is empty, install the inlet hose again.

WARNING! Make sure that the temperature is higher than 0 °C before you use the appliance again. The manufacturer is not responsible for damages caused by low temperatures.

TROUBLESHOOTING

WARNING! Refer to Safety chapters.

INTRODUCTION

The appliance does not start or it stops during operation.

First try to find a solution to the problem (refer to the table). If the problem persists, contact the Authorised Service Centre.

WARNING! Deactivate the appliance before carrying out any check.

In case of major problems, the acoustic signals operate, the display shows an alarm code and the

Start/Pause  button may flash continuously:

- EH0 - The mains supply is unstable. Wait until the mains supply is stable.
- E91 - No communication between electronic elements of the appliance. Switch it off and switch on again. The programme was not finished properly or the appliance stopped too early. If the alarm code appears again, contact the Authorised Service Centre.

- E10 - The appliance does not fill with water properly. After the proper check, start the appliance again by pressing Start/Pause  the alarm code will appear again.
- E20 - The appliance does not drain the water.
- E40 - The appliance door is open or not closed correctly. Please check the door!

If the appliance is overloaded, remove some items from the drum and/or hold the door shut while touching the Start/Pause  button until the  indicator stops flashing (see the picture below).

POSSIBLE FAILURES

Problem	Possible solution
<p>The programme does not start.</p>	<ul style="list-style-type: none"> • Make sure that the mains plug is connected to the mains socket. • Make sure that the appliance door is closed. • Make sure that there is no damaged fuse in the fuse box. • Make sure that the Start/Pause  has been touched. • If the delay start is set, cancel the setting or wait for the end of countdown. • Deactivate the Child Lock function if it is on. • Check the position of the knob on the selected programme.
<p>The appliance does not fill with water properly.</p>	<ul style="list-style-type: none"> • Make sure that the water tap is open. • Make sure that the pressure of the water supply is not too low. For this information, contact your local water authority. • Make sure that the water tap is not clogged. • Make sure that the inlet hose has no kinks, damages or bends. • Make sure that the connection of the water inlet hose is correct. • Make sure that the filter of the inlet hose and the filter of the valve are not clogged. Refer to 'Care and cleaning'.
<p>The appliance fills with water and drains immediately</p>	<ul style="list-style-type: none"> • Make sure that the drain hose is in the correct position. The hose may be positioned too low. Refer to "Installation instruction".
<p>The appliance does not drain the water.</p>	<ul style="list-style-type: none"> • Make sure that the sink spigot is not clogged. • Make sure that the drain hose has no kinks or bends. • Make sure that the drain filter is not clogged. Clean the filter, if necessary. Refer to "Care and cleaning". • Make sure that the connection of the drain hose is correct. • Set the drain programme if you set a programme without drain phase.

	<ul style="list-style-type: none"> • Set the drain programme if you set an option which ends with water in the tub.
<p>The spin phase does not operate or the washing cycle lasts longer than usual.</p>	<ul style="list-style-type: none"> • Set the spin programme. • Make sure that the drain filter is not clogged. Clean the filter, if necessary. Refer to "Care and cleaning". • Adjust manually the items in the tub and start the spin phase again. <p>This problem may be caused by balance problems.</p>
<p>There is water on the floor.</p>	<ul style="list-style-type: none"> • Make sure that the couplings of the water hoses are tight and there is not water leakages. • Make sure that the water inlet hose and the drain hose have no damages. • Make sure you use the correct detergent and the correct quantity of it.
<p>You cannot open the appliance door.</p>	<ul style="list-style-type: none"> • Make sure that a washing programme that ends with water in tub, has been selected. • Make sure that the washing programme is finished. • Set the drain or the spin programme if there is water in the drum. • Make sure that the appliance receives electrical power. • This problem may be caused by a failure of the appliance. Contact the Authorised Service Centre. If you need to open the door, please read carefully "Emergency door opening".

<p>The appliance makes an unusual noise and vibrates.</p>	<ul style="list-style-type: none"> • Make sure the levelling of the appliance is correct. Refer to "Installation instruction". • Make sure that the packaging and/or the transit bolts are removed. <p>Refer to "Installation instruction".</p> <ul style="list-style-type: none"> • Add more laundry in the drum. The load may be too small.
<p>The programme duration increases or decreases during programme execution.</p>	<ul style="list-style-type: none"> • The AutoAdjust System is able to adjust the programme duration according to the type and the laundry load size. Refer to "The AutoAdjust System load detection" in "Daily Use" chapter.
<p>The washing results are not satisfactory.</p>	<ul style="list-style-type: none"> • Increase the detergent quantity or use a different detergent. • Use special products to remove the stubborn stains before you wash the laundry. • Make sure that you set the correct temperature. • Decrease the laundry load.
<p>Too much foam in the drum during the washing cycle.</p>	<ul style="list-style-type: none"> • Reduce the quantity of detergent.
<p>After the washing cycle, there are some detergent residues in the dispenser drawer.</p>	<ul style="list-style-type: none"> • Make sure that the flap is in the correct position (UP for powder detergent - DOWN for liquid detergent). • Make sure you have used the detergent dispenser according the indications given in this user manual.

After the check, activate the appliance. The programme continues from the point of interruption.

If the problem occurs again, contact the Authorised Service Centre.

If the display shows other alarm codes, deactivate and activate the appliance. If the problem continues, contact the Authorised Service Centre.

EMERGENCY DOOR OPENING

In case of power failure or functioning failure the appliance door remains locked. The washing programme continues when the power is restored. If the door remains locked in case of failure, it is possible to open it using the emergency unlock function.

Before opening the door:

CAUTION! Risk of burns! Make sure that the water temperature is not too high and the laundry is not hot. If necessary, wait until they cool down.

CAUTION! Risk of injury! Make sure that the drum is not rotating. If necessary, wait until the drum stops rotating.

Make sure that the water level inside the drum is not too high. If necessary, proceed with an emergency drain (refer to «Emergency drain» in «Care and cleaning» chapter).

To open the door, proceed as follows:

1. Press the On/Off button to switch the appliance off.
2. Disconnect the mains plug from the mains socket.
3. Pull twice the emergency unlock trigger downward and open the appliance door. The emergency unlock trigger is located where indicated by the following picture.

4. Take out the laundry and then close the appliance door.
