

USING THE MICROWAVE

Features

1000 Watts

1. Door Handle. Pull to open the door. The door must be securely latched for the microwave to operate.

2. Door Latches.

3. Window with Metal Shield. Screen allows cooking to be viewed while keeping microwaves confined in the oven.

4. Charcoal Filter Door. Push down two button to open the door. You can change charcoal filter easily.

5. Control Panel and Selector Guide.

6. Cooktop Light.

7. Grease Filter .

8. Removable Turntable. Turntable and support must be in place when using the oven. The turntable may be removed for cleaning.

9. Rating Plate.

NOTE: Oven vent(s) and oven light are located on the inside walls of the microwave oven

Cooking Controls

1 Microwave Cooking Time and Auto Features

Press	Turn and push dial to enter
Cook Time Press once (Cook Time I) to microwave any time between 15 seconds and 99 minutes. Press twice (Cook Time II) to microwave any time between 15 seconds and 99 minutes.	Amount of cooking time
Power Level	Power level 1–10
Add 30 sec.	Starts immediately!
Defrost Weight/Time Press once (Weight Defrost) Press twice (Timed Defrost)	Food weight up to one pound Amount of defrosting time

Sensor Features

Press	Turn and push dial to enter	Option
Popcorn	Starts immediately!	more/less time
Beverage	Starts immediately!	
Cook	Food type	more/less time
Reheat	Food type	more/less time

Using the Dial

You can make selections on the oven by turning the dial and pressing it to enter the selection. Pressing the dial can also be used in place of the START/PAUSE button for quicker programming of the oven.

Cook Time (Do not use the shelves when microwave cooking.)

Cook Time I

Allows you to microwave for any time between 15 seconds and 95 minutes.

Power level 10 (High) is automatically set, but you may change it for more flexibility.

1. Press the TIME COOK button.

2. Turn the dial to set the cook time and press the dial to enter.
3. Change power level if you don't want full power. (Press POWER. Turn the dial to select. Press the dial to enter.)
4. Press the dial or the START/PAUSE button to start cooking.

You may open the door during Time Cook to check the food. Close the door and press the dial or START/PAUSE to resume cooking.

NOTE: You may change the cook time at any time during cooking by turning the dial. You may also change the power level by pressing the POWER button.

Cook Time II

Lets you change power levels automatically during cooking. Here's how to do it:

1. Press the TIME COOK button.
2. Turn the dial to set the first cook time and press the dial to enter.
3. Change the power level if you don't want full power. (Press POWER. Turn the dial to select. Press the dial to enter.)
4. Press the TIME COOK button again.
5. Turn the dial to set the second cook time and press the dial to enter.
6. Change the power level if you don't want full power. (Press POWER. Turn the dial to select. Press the dial to enter.)
7. Press the dial or the START/PAUSE button to start cooking.

At the the **Cook I, Time Cook II** counts down.

NOTE: You may change the cook time at any time during cooking by turning the dial. You may also change the power level by pressing the Power Level button.

Add 30 Sec

This is a quick way to set and start cooking in 30 second blocks each time the Add 30 Second button is pressed. The cook time may be changed by turning the dial at any time during cooking.

The power level will automatically be set at 10 and the oven will start immediately.

The power level can be changed as time is counting down. Press the Power Level button, turn the dial and press to enter.

Weight Defrost (Do not use the shelves when microwave cooking.)

Weight Defrost automatically sets the defrosting times and power levels to give even defrosting results for meats, poultry and fish weighing up to one pound.

- Remove meat from package and place on microwave-safe dish.

1. Press the DEFROST button once.

2. Turn the dial to the food weight, using the Conversion Guide at right. For example, dial .5 for .5 pounds (8 oz.) Press the dial to enter.
3. Press the START/PAUSE button to start defrosting.
4. Turn the food over if the oven signals TURN FOOD OVER.
 - Remove defrosted meat or shield warm areas with small pieces of foil.
 - After defrosting, most meats need to stand 5 minutes to complete defrosting.

Conversion Guide

If the weight of food is stated in pounds and ounces, the ounces must be converted to tenths (.1) of a pound.

Time Defrost (Do not use the shelves when microwave cooking.)

Use Time Defrost to defrost for a selected length of time.

1. Press the DEFROST button three times.
2. Turn the dial to select the time you want. Press the dial to enter.
3. Press the START/PAUSE button to start defrosting.
4. Turn the food over if the oven signals TURN FOOD OVER.

You may change the defrost time at any time during defrosting by turning the dial.

Power level is automatically set at 3, but can be changed. You can defrost small items quickly by raising the power level after entering the time. Power level 7 cuts the total defrosting time in about half; power level 10 cuts the total time to approximately 1/3. However, food will need more frequent attention than usual.

A dull thumping noise may be heard during defrosting. This is normal when oven is not operating at High power.

Defrosting Tips

- Foods frozen in paper or plastic can be defrosted in the package. Closed packages should be slit, pierced or vented AFTER food has partially defrosted. Plastic storage containers should be partially uncovered.
- Family-size, prepackaged frozen dinners can be defrosted and microwaved. If the food is in a foil container, transfer it to a microwave-safe dish.
- Foods that spoil easily should not be allowed to sit out for more than one hour after defrosting. Room temperature promotes the growth of harmful bacteria.
- For more even defrosting of larger foods, such as roasts, use Auto Defrost. Be sure large meats are completely defrosted before cooking.
- When defrosted, food should be cool but softened in all areas. If still slightly icy, return to the microwave very briefly, or let it stand a few minutes.

About changing the power level

Power Level

The power level may be entered or changed immediately after entering the time for Time Cook, Time Defrost or Express Cook. The power level may also be changed during time countdown.

1. First, follow directions for **Cook Time, Time Defrost** or **Combination Speed Cook**.
2. Press the **Power Level** button.
3. Turn the dial clockwise to increase and counterclockwise to decrease the power level. Press the dial to enter.
4. Press the **Start/Pause** button to start cooking.

Variable power levels add flexibility to microwave cooking. The power levels on the microwave oven can be compared to the surface units on a range. Each power level gives you microwave energy a certain percent of the time. Power level 7 is microwave energy 70% of the time. Power level 3 is energy 30% of the time. Most cooking will be done on High (power level 10) which gives you 100% power. Power level 10 will cook faster but food may need more frequent stirring, rotating or turning over.

A lower setting will cook more evenly and need less stirring or rotating of the food. Some foods may have better flavor, texture or appearance if one of the lower settings is used. Use a lower power level when cooking foods that have a tendency to boil over, such as scalloped potatoes.

Rest periods (when the microwave energy cycles off) give time for the food to "equalize" or transfer heat to the inside of the food. An example of this is shown with power level 3—the defrost cycle. If microwave energy did not cycle off, the outside of the food would cook before the inside was defrosted.

Here are some examples of uses for various power levels:

High 10: Fish, bacon, vegetables, heating liquids.

Med-High 7: Gentle cooking of meat and poultry; baking casseroles and reheating.

Medium 5: Slow cooking and tenderizing for stews and less tender cuts of meat.

Low 2 or 3: Defrosting; simmering; delicate sauces.

Warm 1: Keeping food warm; softening butter.

Sensor Features

Humidity Sensor

What happens when using the Sensor Features:

The Sensor Features detect the increasing humidity released during cooking. The oven automatically adjusts the cooking time to various types and amounts of food.

Do not use the Sensor Features twice in succession on the same food portion-it may result in severely overcooked or burnt food. If food is undercooked after the countdown, use Time Cook for additional cooking time.

NOTE: Sensor features will not operate when the oven is hot. If one of the sensor cooking buttons is pressed when the temperature inside the oven is greater than 200°F, "OVEN TOO HOT FOR SENSOR COOKING---USING ALTERNATE METHOD" will be displayed. The oven will automatically change to cook by time (follow the directions in the display) or once the oven is cool enough, the sensor features will function normally.

- The proper containers and covers are essential for best sensor cooking.
- Always use microwave-safe containers and cover them with lids or vented plastic wrap. Never use tight sealing plastic containers-they can prevent steam from escaping and cause food to overcook.
- Be sure the outside of the cooking containers and the inside of the oven are dry before placing food in the oven. Beads of moisture turning into steam can mislead the sensor.

Cook

Because most cooking containers must be covered during Auto Cook, this feature is best with foods that you want to steam or retain moisture.

NOTE: Use of the metal shelf with Auto Cook is not recommended.

Recommended Foods

A wide variety of foods including meats, fish and vegetables can be cooked using this feature.

Foods not recommended

Foods that must be cooked uncovered, foods that require constant attention, foods that require addition of ingredients during cooking and foods calling for a dry look or crisp surface after cooking should not be cooked using this feature. It is best to Time Cook them.

Popcorn (Do not use the shelves when microwave cooking.)

To use the **Popcorn** feature:

1. Follow package instructions, using Cook Time if the package is less than 1.5 ounces or larger than 3.5 ounces. Place the package of popcorn in the center of the turntable. Press the Popcorn button. The oven starts immediately.
2. If you open the door while POPCORN SENSOR is displayed, an error message will appear. Close the door, press Cancel/Off and begin again.

If food is undercooked after the countdown, use **Cook Time** for additional cooking time.

How to Adjust the Automatic Popcorn Setting to Provide a Shorter or Longer Cook Time

If you find that the brand of popcorn you use underpops or overpops consistently, you can add or subtract 20–30 seconds to the automatic popping time.

To subtract or add time for sensor cook, turn the dial when the time appears.

Beverage (Do not use the shelves when microwave cooking.)

Press the **Beverage** button. Then oven start immediately.

Drinks heated with the Beverage feature may be very hot. Remove the container with care.

Reheat (Do not use the shelves when microwave cooking.)

The **Reheat** feature reheats servings of previously cooked foods or a plate of leftovers.

1. Place the cup of liquid or covered food in the oven. Press Reheat and choose food type.
2. The oven signals when steam is sensed and the time remaining begins counting down.

Do not open the oven door until time is counting down. If the door is opened, close it and press **Start/ Pause** immediately.

After removing food from the oven, stir, if possible, to even out the temperature. Reheated foods may have wide variations in temperature. Some areas of food may be extremely hot.

If food is not hot enough after the countdown use **Cook Time** for additional reheating time.

Selection	Food to Reheat
1	Plate
2	Soup
3	Veggies
4	Pasta

Some Foods Not Recommended for Use With Reheat

It is best to use Cook Time for these foods:

- Bread products.
- Foods that must be reheated uncovered.
- Foods that need to be stirred or rotated.
- Foods calling for a dry look or crisp surface after reheating.

To subtract or add time for sensor cook, turn the dial when the time is shown.

Cook (Do not use the shelves when microwave cooking.)

1. Place covered food in the oven and close the door. Press the **Cook** button. ENTER FOOD TYPE appears in the display.
2. Turn the dial to the desired food type. Press to enter.

See the Sensor Food Type Guide below for specific foods and instructions. The oven starts immediately.

NOTE: If the door was open while the control was being set, close the door and press the **Start/Pause** button to begin cooking.

If food is undercooked after the countdown, use **Cook Time** for additional cooking time.

Do not open the oven door before the countdown time is displayed steam escaping from the oven can affect cooking performance. If the door is opened, close the door and press Start/Pause immediately.

If ground meat was selected, the oven may signal you to drain and stir the meat. Open the door, drain the meat and close the door. Press the Start/Pause button if necessary to resume cooking

Cooking Tips

- When oven signals and countdown time is displayed, the door may be opened for stirring, turning or rotating food. To resume cooking, close the door and press START/PAUSE.
- Match the amount of food to the size of container. Fill containers at least 1/2 full.
- Be sure outside of container and inside of oven are dry.
- After completion of Cook cycle, if food needs additional cooking, return food to oven and use Time Cook to finish cooking.

To subtract or add time for sensor cook, turn the dial when the time is shown.

Sensor Food Type Guide

<i>First Selection - Food Type</i>	<i>Second Selection</i>	<i>Serving Size</i>	<i>Comments</i>
<i>Chicken</i>	<i>Bone-In Boneless</i>	<i>2 to 8 pieces</i>	Use oblong, square or round dish. Cover with vented plastic wrap.
<i>Fish</i>	—	<i>4 to 16 oz.</i>	Use oblong, square or round dish. Cover with vented plastic wrap.
<i>Ground Meat (Beef, Pork, Turkey)</i>	—	<i>8 to 32 oz.</i>	Use round casserole dish. Crumble meat into dish. Cover with vented plastic wrap.
<i>Potatoes</i>	—	<i>8 to 32 oz.</i>	Pierce skin with fork. Arrange in a star pattern in center of turntable.
<i>Vegetables</i>	<i>Canned</i>	<i>4 to 16 oz.</i>	Use microwave-safe casserole or bowl. Cover with lid or vented plastic wrap.
<i>Vegetables</i>	<i>Fresh</i>	<i>4 to 16 oz.</i>	Use microwave-safe casserole or bowl. Add 2 tablespoons water for each serving. Cover with lid or vented plastic wrap.
<i>Vegetables</i>	<i>Frozen</i>	<i>4 to 16 oz.</i>	Use microwave-safe casserole or bowl. Follow package instructions for adding water. Cover with lid or vented plastic wrap.

Other Features

Cooking Complete Reminder

To remind you that you have food in the oven, the oven will display **YOUR FOOD IS READY** and beep once a minute until you either open the oven door or press the **CLEAR/OFF** button.

Start/Pause

In addition to starting many functions, **START/PAUSE** allows you to stop cooking without opening the door or clearing the display.

Clear/Off

Press the **CLEAR/OFF** button to stop and cancel cooking at any time..

Timer On/Off

The Timer operates as a minute timer and can be used at any time, even when the oven is operating.

1. Press the **Timer** button.
2. Turn the dial to select the minutes. Press the dial to enter.
3. Turn the dial to select the seconds. Press the dial to enter
4. Press the dial or **Timer** to start.

To cancel, press the **Timer** button.

When time is up, the oven will signal. To turn off the timer signal, press **Timer**.

NOTE: The **TIMER** indicator will be lit while the timer is operating.

Steam Clean

Use **Stem Clean** for easy wiping inside with steam.

1. Press the **Steam Clean** button.
2. Put steam bowl with 1/4 cup of water.
3. Press the dial or **Start/Pause** to start.
4. After steam clean, remove turntable and turn table support and wipe out inside of oven cavity with paper towel or soft cloth

Turntable On/Off

Turntable

For best cooking results, leave the turntable on. It can be turned off for large dishes.

1. Press the **Turntable On/Off** button..

Sometimes the turntable can become too hot to touch.

Be careful touching the turntable during and after cooking.

Chef Connect

Use the Chef Connect feature for connecting your microwave to a GE range to sync your vent fan, cooktop surface lights and clock via Bluetooth technology.

1. You must have a **Chef Connect** enabled range. To pair your microwave for the first time, initiate the Chef Connect process on the GE range. Refer to the range owner's manual for instructions

2. On the microwave, hold Chef Connect button for 3 seconds. The Bluetooth icon on the display will start flashing as the microwave starts to search and pair with your GE Range. The icon will remain ON after pairing successfully.

If a GE Range is not found within 2 minutes during search mode the microwave will stop searching and the Bluetooth icon will turn OFF.

On initial setup, the setup protocol will start.

If the Chef Connect feature is enabled the default settings are as follows:

- Display clock sync: ON
- Auto surface light: ON
- Auto vent fan: OFF
- Auto off: 15 minutes

3. Turn the dial to select surface light **Sync On/Off**. Press the dial to confirm. If on, it allows the microwave surface lights to turn on at HIGH level automatically when the paired range's cooktop burner turns ON. If OFF, the microwave surface lights will not automatically turn on when a cooktop burner turns on.

4. Turn the dial to select **Vent Fan Sync ON/OFF**. Press the dial to confirm. If ON, it allows the microwave vent fan to turn on at LOW speed automatically when the paired range's cooktop burner turns on. If OFF, the vent fan will turn ON automatically when a cooktop burner is

Pairing is now complete, the Chef Connect feature is now on.

Note: If there is no sync option selected during set up, 5 minutes after icon turns ON, the units will return to stand by mode and use the default settings.

After completing the setting per above steps, your microwaves vent fan and surface light could be set to turn on automatically when the cooktop burner is turned on. The cooktop and range clock display will be synced to display the same time. The vent fan and cooktop light will be set to automatically turn off 15 minutes after the cooktop burner is turned OFF.

If desired, the light, fan, and auto off settings can now be changed using option in Settings.

Press Chef Connect once to temporarily turn OFF communication between the microwave and range. Press again to turn communication back ON. The icon will illuminate when ON.

In the case of an unintended disconnect such as lost power to the microwave or range the connection will remain after power resumed. For very short power interruptions, the power may need to be reset in order to reconnect

Note: To unpair the microwave from the range, press and hold the Chef Connect button on the microwave for 3 seconds. The Bluetooth icon will start to flash. Press cancel or wait 2 minutes for the flashing to stop. You may need to unpair when the GE range is replace or serviced

Mute On/Off

You can control sound using Mute On/Off button.

Control Lock-Out

You may lock the control panel to prevent the oven from being accidentally started during cleaning or being used by children.

To lock or unlock the controls, press and hold 3 seconds.

When the control panel is locked, CONTROL LOCKED will be displayed briefly anytime at button or dial is pressed

Set Clock

1. Press the Settings button and turn the dial to select Clock Set. Press the dial to enter..
2. Turn the dial to set hours. Press the dial to enter.
3. Turn the dial to set minutes. Press the dial to enter.

Clock Mode

Clock Mode can be set for 12 hours and 24 hours.

1. Press the Settings button and turn the dial to select Clock Mode. Press the dial to enter.
2. Turn the dial to set 12 hours or 24 hours Clock Mode. Press enter to activate.

Display Speed

Display Speed can be adjusted for Slow, Normal, or Fast

1. Press the OPTIONS button and turn the dial to select DISPLAY SPEED. Press the dial to enter.
2. Turn the dial to select slowest to fastest. Press the dial to enter.

Sound Level

Sound Level can be adjusted for Mute, Low, Normal or Loud

1. Press the Settings button and turn the dial to select Sound Level. Press the dial to enter.
2. Turn the dial to set Sound Level (Mute, Low, Normal, or Loud). Press enter to activate.

Surface Light Sync

1. Press the Settings button and turn the dial to select Surface Light Sync. Press the dial to enter.
2. Turn the dial to select sync mode (Off, Low, High).
3. Press the dial to activate.

Vent Fan Sync

1. Press the Settings button and turn the dial to select Vent Fan Sync. Press the dial to enter.
2. Turn the dial to select Vent Fan Sync mode (Boost, High, Medium, Low, Off). Select Off to disable this feature. Vent fan will turn on manually.
3. Press the dial to activate.

Sync Auto Off

1. Press the Settings button and turn the dial to select Sync Auto Off Press the dial to enter.
2. Turn the dial to select Sync Auto Off (up to 15 minutes and manual). Press enter to activate.

Reset Filter

Hold 3 Sec Filter Replace Reminder

The charcoal/grease filter should be replaced when it is noticeably dirty / discolored (usually after 6-12 months, depending on hood usage) or filter replacement LED is on.

When the Filter Replace LED turned on, replace filter and press Reset Filter

Surface Light

Press Surface Light once for bright light, twice for the night light or a third time to turn the light off.

Vent Fan

The vent fan removes steam and other vapors from surface cooking.

Press Vent Fan once for high fan speed, twice for medium fan speed, three times for low fan speed or a fourth time to turn the fan off.

Vent fan will turn on automatically when the cooktop burner is turned on with Chef Connection.

Automatic Fan

An automatic fan feature protects the microwave from too much heat rising from the cooktop below it. It automatically turns on if it senses too much heat.

If you have turned the fan on you may find that you cannot turn it off. The fan will automatically turn off when the internal parts are cool. It may stay on for 30 minutes or more after the cooktop and microwave controls are turned off.

CARE AND CLEANING

Helpful Hints

An occasional thorough wiping with a solution of baking soda and water keeps the inside fresh.

Be certain the oven control is turned off before cleaning any part of this oven.

How to clean the Inside

Walls, Floor, Inside Window, Metal and Plastic Parts on the Door

Some spatters can be removed with a paper towel; others may require a damp cloth. Remove greasy spatters with a sudsy cloth, then rinse with a damp cloth. Do not use abrasive cleaners or sharp utensils on oven walls.

Never use a commercial oven cleaner on any part of your microwave.

Removable Turntable and Turntable Support

To prevent breakage, do not place the turntable into water just after cooking. Wash it carefully in warm, sudsy water or in the dishwasher. The turntable and support can be broken if dropped. Remember, do not operate the oven in the microwave mode without the turntable and support seated and in place.

How to clean the Outside

We recommend against using cleaners with ammonia or alcohol, as they can damage the appearance of the microwave oven. If you choose to use a common household cleaner, first apply the cleaner directly to a clean cloth, then wipe the soiled area.

Case

Clean the outside of the microwave with a sudsy cloth. Rinse and then dry. Wipe the window clean with a damp cloth.

Control Panel

Wipe with a damp cloth. Dry thoroughly. Do not use cleaning sprays, large amounts of soap and water, abrasives or sharp objects on the panel—they can damage it. Some paper towels can also scratch the control panel.

Door Panel

Before cleaning the front door panel, make sure you know what type of panel you have. Refer to the eighth digit of the model number. “S” is stainless steel, “L” is CleanSteel and “B”, “W” or “C” are plastic colors.

Stainless Steel (on some models)

The stainless steel panel can be cleaned with Stainless Steel Magic or a similar product using a clean, soft cloth. Apply stainless cleaner carefully to avoid the surrounding plastic parts. Do not use appliance wax, polish, bleach or products containing chlorine on Stainless Steel finishes.

Plastic Color Panels

Use a clean, soft, lightly dampened cloth, then dry thoroughly.

Door Seal

It's important to keep the area clean where the door seals against the microwave. Use only mild, non abrasive detergents applied with a clean sponge or soft cloth. Rinse well.

Bottom

Clean off the grease and dust on the bottom often. Use a solution of warm water and detergent.

Replacing the LED lamp

Cooktop Light/Nite Light

Replace with a 120 volt, 40 watt (max.) halogen bulb. Order WB02X26814 from your GE supplier.

1. To replace the cooktop light/nite light, first disconnect the power at the main fuse or circuit breaker panel, or pull the plug.
2. Remove the screw from the side of the light compartment cover and lower the cover until it stops.
3. Be sure the bulb is cool before removing. Break the adhesive seal by gently unscrewing the bulb.
4. Connect LED lamp and secure using the screw. Raise the light cover and replace the screw. Connect electrical power to the oven..

Exhaust Feature

Vent Fan

The vent fan has two metal reusable vent filters. Models that recirculate air back into the room also use a charcoal filter.

Reusable Vent Filter

The metal filters trap grease released by foods on the cooktop. They also prevent flames from foods on the cooktop from damaging the inside of the oven. For this reason, the filters must always be in place when the hood is used. The vent filters should be cleaned once a month, or as needed.

Removing and Cleaning the Filters

To remove, slide them to the rear using the tabs. Pull down and out.

To clean the vent filters, soak them and then swish around in hot water and detergent. Don't use ammonia or ammonia products because they will darken the metal. Light brushing can be used to remove embedded dirt.

Rinse, shake and let dry before replacing.

To replace, slide the filters into the frame slots on the back of each opening. Press up and to the front to lock into place.

Charcoal Filter

The charcoal filter cannot be cleaned. It must be replaced. See back cover for ordering online at GEAppliances.com

If the model is not vented to the outside, the air will be recirculated through a disposable charcoal filter that helps remove smoke and odors.

The charcoal filter should be replaced when it is noticeably dirty or discolored (usually after 6 to 12 months, depending on usage). See Optional Kits , for more information.

To Remove the Charcoal Filter

To remove the charcoal filter, first disconnect power at the main fuse or circuit breaker, or pull the plug. Push down 2 buttons on the filter door. Lift the filter at the bottom until it comes free of the tabs. Slide the filter down and out.

To Install the Charcoal Filter

To install a new charcoal filter, remove plastic and other outer wrapping from the new filter. Insert the top of the filter up. Push the bottom of the filter in until it rests in place behind the tabs. Close filter door.

TROUBLESHOOTING TIPS

Oven will not start

- A fuse in your home may be blown or the circuit breaker tripped.
 - Replace fuse or reset circuit breaker.
- Power surge.
 - Unplug the microwave oven, then plug it back in.
- Plug not fully inserted into wall outlet.
 - Make sure the 3-prong plug on the oven is fully inserted into wall outlet.
- Door not securely closed.
 - Open the door and close securely.

Floor of the oven is warm, even when the oven has not been used

- Heat from the cooktop light may make the oven floor get warm.
 - This is normal.

"CONTROL LOCKE IS ON" appears on display

- The control has been locked
 - Press and hold MUTE ON/OFF for about 3 seconds to unlock the control.

You hear an unusual low-tone beep

You have tried to change the power level when it is not allowed.

Many of the oven's features are preset and cannot be changed.

SENSOR ERROR appears on display

- When using a Sensor feature, the door was opened before steam could be detected
 - Do not open door until steam is sensed and time is shown counting down on display
- Steam not detected in maximum amount of time
 - Use TIME COOK to heat for more time

Food amount too large for Sensor Reheat

- Sensor Reheat is for single servings of recommended foods
 - Use TIME COOK for large amounts of food

Things That Are Normal With Your Microwave Oven

- Steam or vapor escaping from around the door.
- Light reflection around door or outer case.
- Dimming oven light and change in the blower sound at power levels other than high.
- Dull thumping sound while oven is operating.
- TV-radio interference might be noticed while using the microwave. Similar to the interference caused by other small appliances, it does not indicate a problem with the microwave. Plug the microwave into a different electrical circuit, move the radio or TV as far away from the microwave as possible or check the position and signal of the TV/radio antenna.

Warning

This content is compiled from multiple sources and is provided for reference purposes only. It may not be complete or fully applicable to all situations. If you are unable to resolve your issue, please contact the product manufacturer or an authorized service provider for official support.
