Clean Air with Nano Titanium Filter

Cutting Edge Technology for a Powerful Antibacterial and Deodorizing Effect

Conventional Filter

Nano Titanium Filter

Nano Titanium is a cutting edge technology that uses a TiO_2 Catalyst to provide a powerful antibacterial and deodorizing effect.

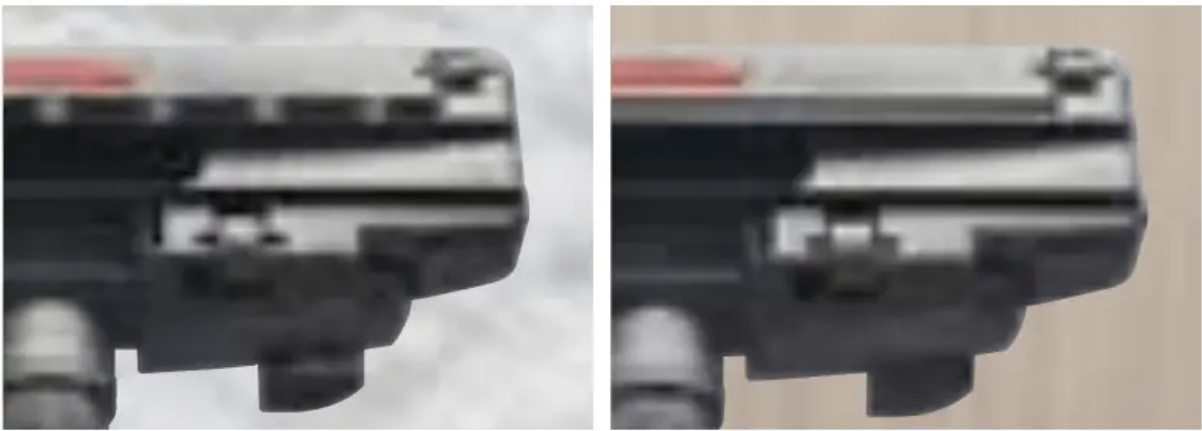

Nano Titanium particles are incredibly small (about 5nm). If you imagine the Earth's diameter is 1m, then 5nm would be the size of a golf ball compared to the Earth. The filter is packed with these minute particles which have an antibacterial effect and work to catch and resolve odors.

Designed for More Efficient Cleaning

2-Step

Rug Floor Nozzle"

The suction head can be easily adjusted in 2-way for different surfaces.

Large Wheels

The large wheels on the body assure light, smooth movement.

Telescopic Pipe"

Enables pipe length adjustment as desired.

Twist-Free Hose

Regardless of how you move or rotate the head, the hose remains free of twists.

Blower Function

You can also blow dust to clean light fittings, curtains and places such as entrances and hallways.
