

1. Overview

This manual provides instructions for the ZENY 38-inch Acoustic Guitar Beginner Kit. This is a full-size, right-handed acoustic guitar designed for beginners and students. The kit includes essential accessories to start playing.

2. Package Contents

- One (1) 38-inch Acoustic Guitar (Right-handed)
- One (1) Nylon Carrying Case

- One (1) Shoulder Strap
- One (1) Pitch Pipe
- One (1) Guitar Pick
- One (1) Extra Set of Strings

3. Product Specifications

Specification	Detail
Brand	ZENY
Model Number	Zeny01026
Color (as described)	Blue
Guitar Dimensions (L x W x H)	38" x 14" x 3.25"
Scale Length	24.5 inches
Item Weight	Approximately 4.3 lbs (4.7 lbs per product description)
Number of Strings	6
String Material	Alloy Steel
Hand Orientation	Right
Top Material	Wood
Body Material	Wood
Neck Material	Wood
Fretboard Material	Wood
Bridge System	Fixed
Finish	Glossy, smooth

4. Features and Components

4.1 Guitar Body

The guitar features an all-wood construction with a glossy finish. The body is designed for a balanced tone and comfortable playability.

4.2 Neck and Fretboard

The neck is made of wood and is attached to a wooden fretboard. It is designed with a comfortable profile for beginner hand positioning.

4.3 Strings and Action

The guitar is strung with six alloy steel strings. It is set up with a low string height (action) to reduce finger fatigue and make fretting easier for beginners.

4.4 Tuning Machines

Located on the headstock, these geared pegs are used to adjust the tension and pitch of each string.

4.5 Accessories

- **Nylon Carrying Case:** Used for storage and transport to protect the guitar from dust and minor impacts.
- **Shoulder Strap:** A leather-ended strap to help hold the guitar securely while playing in a standing position.
- **Pitch Pipe:** A simple wind instrument used to provide reference pitches for tuning the guitar strings.
- **Guitar Pick:** A plectrum for plucking or strumming the strings.
- **Extra Strings:** A full replacement set of six alloy steel strings.

5. Use Guide

5.1 Initial Setup and Inspection

1. Carefully remove the guitar and all accessories from the packaging.
2. Inspect the guitar for any visible damage that may have occurred during shipping.
3. Remove the guitar from the nylon case.
4. No assembly is required. The guitar is ready to use out of the box.

5.2 How to Tune the Guitar

Proper tuning is essential for the guitar to sound correct. Use the included pitch pipe or an electronic tuner.

1. Familiarize yourself with the standard tuning for the six strings, from the thickest (lowest pitch) to thinnest (highest pitch): E, A, D, G, B, E.
2. Blow into the corresponding hole on the pitch pipe to hear the reference pitch for each string.
3. Pluck a string and turn its corresponding tuning peg on the headstock until the pitch of the string matches the reference pitch from the pipe.
 - Turning the peg away from you (clockwise for pegs on the left side of the headstock) generally tightens the string and raises the pitch.
 - Turning the peg towards you loosens the string and lowers the pitch.
4. Repeat this process for all six strings. New strings may stretch and go out of tune quickly; retune as necessary.

5.3 Basic Playing Position

- **Sitting:** Sit upright. Rest the curve of the guitar body on your right leg (for right-handed players). Support the neck with your left hand.
- **Standing:** Attach the shoulder strap to the strap pins located on the body of the guitar. Adjust the strap length so the guitar rests comfortably against your body.

5.4 Using the Accessories

- **Guitar Pick:** Hold the pick between your thumb and index finger. Use it to strum across the strings near the soundhole or to pluck individual strings.
- **Carrying Case:** Always store the guitar in the case when not in use to protect it. Ensure the guitar is dry and clean before placing it in the case.

5.5 String Replacement

When strings become old, corroded, or break, use the included extra set.

1. Loosen the old string completely by turning the tuning peg.
2. Unwind the string from the tuning peg and remove the opposite end from the bridge at the bottom of the guitar.
3. Insert the ball end of the new string into the corresponding hole in the bridge.
4. Route the string along the fretboard, through the appropriate notch in the nut, and to the tuning peg.

5. Wind the string onto the peg, leaving a small amount of slack. Turn the peg to tighten the string until it is close to pitch, then fine-tune.
6. After installing all new strings, they will require frequent tuning as they stretch over the first few hours of play.

6. Care and Maintenance

- Wipe down the guitar body, neck, and strings with a soft, dry cloth after each use to remove oils and dirt.
- Store the guitar in its case in a stable environment. Avoid extreme temperatures and humidity, which can warp the wood.
- Do not lean the guitar against surfaces where it can fall. Always place it in its case or on a dedicated guitar stand.
- Over time, you may need to adjust the truss rod (located inside the soundhole at the neck joint) to maintain optimal string action. This adjustment is recommended for experienced users or a professional guitar technician.

7. Troubleshooting

Issue	Possible Cause & Solution
Guitar will not stay in tune	New strings are stretching. Retune frequently. If problem persists, strings may not be wound properly on the pegs or the tuning machines may be faulty.
Buzzing sound when fretting notes	String action may be too low, or the guitar neck may need adjustment. Check for proper fretting technique first.
String breaks	Replace with the included extra string set. Ensure the string is not catching on a sharp edge on the bridge or nut.
Very quiet or poor sound	Ensure the guitar is properly tuned. The issue may be related to string age or technique.

8. Warranty and Support

This product is covered by a **1-year warranty** from the date of purchase. The warranty covers defects in materials and workmanship under normal use.

Manufacturer: ZENY

For warranty service or support, contact the seller from whom you purchased the product or refer to the contact information provided with your purchase documentation.
