

Overview

The VAVSEA 4L Top-Fill Cool Mist Humidifier is an ultrasonic humidifier designed to add moisture to indoor spaces up to 25 m². It features a 4-litre tank, top-fill design, and operates quietly at less than 35 dB. The unit includes a remote control, timer, night light, and automatic shut-off when water runs out.

Package Contents:

- 1 × VAVSEA 4L Ultrasonic Humidifier (with Essential Oil Tray)

- 1 × Remote Control
- 1 × User Manual

Specifications

Brand	VAVSEA
Model Name	Cool Mist Humidifier
Model Number	1
Capacity	4 L (4000 ml)
Operation Mode	Ultrasonic
Power	27 W
Rated Voltage	110-240 V
Rated Frequency	50-60 Hz
Fog Output	180 ml/h ±30%
Noise Level	< 35 dB
Area Range	0-25 m ²
Power Cable Length	1.5 m
Product Dimensions	25 × 15 × 33 cm (9.84 × 5.91 × 13 in)
Colour	White
Runtime (max)	31 hours
Control Method	Touch panel + Remote control
Special Features	Night Light, Quiet, Remote Control, Timer, Waterless Auto-Off

Features

1. Top-Fill Design & Easy Cleaning

The wide opening at the top allows you to refill the tank without removing it. Cleaning is also simplified. **Important:** Never submerge the base in water. Always unplug the unit before cleaning. Do not fill water above the maximum level line, as this may reduce mist output or prevent operation.

2. Adjustable 3-Level Mist Output

Select from three mist levels (Low, Medium, High) to match your humidity needs. Adjust the output by pressing the mist button on the unit or using the remote control.

3. Real-Time Temperature & Humidity Display

The built-in sensor shows the current room temperature and relative humidity on the LED screen. Use this information to decide which mist level to select.

4. Sleep Mode & Whisper-Quiet Operation

To activate Sleep Mode, press and hold the **Light** button for 3 seconds, or press the **Sleep** button on the remote control. The screen light will turn off, and the unit will continue to produce mist at a low noise level (below 35 dB).

5. Aromatherapy Function

Add a few drops of your favourite essential oil to the dedicated aroma box (located on the unit). The humidifier will disperse the fragrance along with the cool mist.

6. Timer & Auto-Off

The unit includes a programmable timer (set via remote or control panel). When the water tank is empty, the humidifier automatically shuts off to prevent damage.

7. Night Light

The humidifier has a built-in night light with multiple colour options. You can cycle through colours or turn the light off completely using the **Light** button.

8. Remote Control

The included remote control allows you to adjust mist level, timer, sleep mode, and night light from a distance.

Use Guide

Setting Up the Humidifier

1. Place the humidifier on a flat, stable surface at least 30 cm away from walls and electronic devices.
2. Remove the top cover and fill the tank with clean, cool tap water. Do not exceed the **MAX** water line.
3. Replace the top cover securely.
4. Plug the power cord into a suitable electrical outlet (110-240 V, 50-60 Hz).

5. Press the **Power** button to turn on the unit.

Note: If you wish to use essential oils, add a few drops to the aroma tray (not directly into the water tank). The tray is located on the top of the unit.

Operating Instructions

Function	Action (on unit)	Action (remote)
Power On/Off	Press Power button	Press Power button
Adjust Mist Level	Press Mist button repeatedly (Low → Medium → High → Off)	Press Mist button
Set Timer	Press Timer button (1h → 2h → 4h → 8h → Off)	Press Timer button
Night Light	Press Light button to cycle colours / off	Press Light button
Sleep Mode	Press and hold Light for 3 seconds	Press Sleep button

Using the Remote Control

- The remote control operates the same functions as the touch panel.
- Point the remote toward the front of the humidifier (IR receiver).
- Maximum operating distance: approximately 5 metres.

Cleaning & Maintenance

Important: Unplug the power cord before performing any maintenance. We recommend cleaning the unit once a week to prevent bacteria and mould growth.

1. Empty any remaining water from the tank.
2. Wipe the interior of the tank with a soft, damp cloth. Do not use abrasive cleaners.
3. Clean the base with a damp cloth. **Never submerge the base in water.**
4. If mineral deposits (scale) appear, use a mixture of white vinegar and water (1:3 ratio) to soak the affected parts, then rinse thoroughly with clean water.
5. Allow all parts to air dry completely before reassembling.
6. When not in use, discard any remaining water from the tank to prevent stagnation.

Troubleshooting

Issue	Possible Cause	Solution
No mist or weak mist	Water level too low or too high; mineral buildup	Check water level (do not exceed MAX); clean the unit with vinegar solution
Unit does not turn on	Power cord not connected; water tank empty (auto-off triggered)	Check power connection; refill tank
Remote not working	Batteries depleted; IR path blocked	Replace batteries; ensure no obstacles between remote and unit
Unusual noise	Unit not level; water level too low	Place on flat surface; refill water
Water leaking	Top cover not sealed properly; tank overfilled	Ensure cover is correctly fitted; reduce water level

Warranty and Support

This product is covered by a **24-month warranty** from the date of purchase. For warranty claims, technical support, or spare parts, please contact the seller (JLMKJ Direct) through Amazon.

No additional contact details (phone number, email, or website) are provided in the product documentation. For support, refer to your Amazon order page or the seller's storefront.

Warning

This content is compiled from multiple sources and is provided for reference purposes only. It may not be complete or fully applicable to all situations. If you are unable to resolve your issue, please contact the product manufacturer or an authorized service provider for official support.
