1. Overview

The LAREX Baby Bottle Sterilizer and Dryer is a 4-in-1 electric steam sterilizer designed for baby bottles, pacifiers, pump accessories, and other baby essentials. It combines sterilization and drying functions in a single compact unit.

Key Functions

- **Auto Mode:** Sterilize and dry cycle
- **Sterilize Only:** High-temperature steam sterilization

- **Dry Only:** Hot air drying cycle
- **Thaw:** Gentle heating for baby food
- **Storage:** Can be used as sterile storage container

What's in the Box

- LAREX Baby Bottle Sterilizer and Dryer unit
- Removable tray (disassemblable/combineable)
- User manual

2. Safety Information

IMPORTANT SAFETY INSTRUCTIONS

- Read all instructions before using this appliance
- Do not immerse the base unit in water or any other liquid
- Always unplug the unit when not in use or before cleaning
- Do not operate the appliance with a damaged cord or plug
- Keep the appliance out of reach of children
- Do not touch hot surfaces; use handles or knobs
- Do not place the appliance near heat sources or in direct sunlight
- Use only on a flat, stable, heat-resistant surface
- Do not use abrasive cleaners or scouring pads on any part of the unit

3. Features

3.1 4-in-1 Functionality

The sterilizer offers four distinct operating modes to accommodate different needs:

- **Auto (Sterilize + Dry):** Complete cycle that sterilizes and then dries items automatically
- **Sterilize Only:** Uses high-temperature steam to eliminate bacteria and viruses
- **Dry Only:** Uses hot air circulation to dry items without sterilization
- **Thaw:** Gentle heating function for thawing baby food

3.2 Fast Drying Technology

The unit uses hot air technology to quickly dry baby bottles and items after sterilization. This ensures items are ready to use in a short time and can be stored safely in the sterilizer without risk of contamination.

3.3 High-Temperature Steam Sterilization

The sterilizer uses high-temperature steam to effectively eliminate 99.99% of viruses and bacteria, preventing mold growth in bottles and ensuring hygienic feeding.

3.4 Large Capacity

The unit can accommodate up to 6 bottles at once, along with other baby products such as pacifiers, spoons, toothbrushes, and teething toys.

3.5 Removable Tray System

The removable tray can be disassembled or combined to accommodate different items. This allows you to sterilize bottle parts, nipples, pacifiers, and teething toys all at once.

3.6 Easy-to-Use Controls

The unit features convenient touch controls and an LCD display. Simply place items inside, select the desired mode, and let the sterilizer work. The unit features automatic shut-off.

3.7 Effective Air Filtration

The sterilizer includes an effective air filtration system that filters harmful substances and pollutants to prevent secondary contamination of sterilized items.

4. Control Panel and Display

Control Panel Elements

Control/Display	Function
AUTO	Starts combined sterilize and dry cycle
STERILIZE	Starts sterilization-only cycle
DRY	Starts drying-only cycle
THAW	Starts gentle heating for baby food
LCD Display	Shows selected mode, cycle status, and remaining time
Touch Controls	Capacitive touch buttons for mode selection

LCD Display Indicators

- **Mode Indicator:** Shows which mode is currently active (AUTO, STERILIZE, DRY, THAW)
- **Cycle Status:** Indicates whether the cycle is running or complete
- **Time Display:** Shows remaining time for the current cycle

5. Usage Guide

5.1 Before First Use

1. Remove all packaging materials from the unit
2. Wash the removable tray and any accessories with warm soapy water
3. Rinse thoroughly and dry
4. Wipe the interior of the main unit with a damp cloth
5. Place the unit on a flat, stable, heat-resistant surface

5.2 Preparing Items for Sterilization

1. Disassemble bottles into their component parts (bottle, collar, nipple, cap)
2. Rinse items with clean water to remove milk residue
3. Place items upside down on the removable tray to allow water drainage
4. Arrange items with space between them for steam circulation
5. Place smaller items (nipples, pacifiers) on the upper tray if using the combined configuration

5.3 Operating the Sterilizer

Auto Mode (Sterilize + Dry)

1. Add the recommended amount of water to the water reservoir
2. Place prepared items on the tray
3. Close the lid securely
4. Press the **AUTO** touch button
5. The LCD display will show the cycle progress
6. The unit will automatically shut off when the cycle is complete

Sterilize Only Mode

1. Add water to the reservoir
2. Place items on the tray
3. Close the lid
4. Press the **STERILIZE** touch button
5. The sterilization cycle will run for approximately 8-10 minutes
6. Unit will shut off automatically when complete

Dry Only Mode

1. Place clean, wet items on the tray
2. Close the lid
3. Press the **DRY** touch button
4. Hot air circulation will dry the items
5. Unit will shut off automatically when complete

Thaw Mode

1. Place frozen baby food container in the unit
2. Close the lid
3. Press the **THAW** touch button
4. The unit will gently heat the food to thaw it
5. Monitor the process and remove food when thawed

5.4 Using as Storage

After sterilization and drying, items can be left in the closed unit to maintain sterility until needed. Ensure the unit is completely dry before using as storage to prevent mold growth.

5.5 Tips for Best Results

- Always use fresh, clean water for each sterilization cycle
- Do not overcrowd the tray - allow space for steam circulation
- Place bottles upside down to prevent water accumulation
- Clean the unit regularly to prevent mineral buildup
- Use distilled water if you have hard tap water to reduce mineral deposits

6. Cleaning and Maintenance

6.1 Regular Cleaning

The unit is easy to clean. Follow these steps after each use:

1. Unplug the unit and allow it to cool completely
2. Remove the tray and wash with warm soapy water
3. Wipe the interior of the main unit with a soft, damp cloth
4. Dry all parts thoroughly before reassembling

6.2 Descaling

To remove mineral deposits from hard water:

1. Mix a solution of equal parts white vinegar and water
2. Pour the solution into the water reservoir
3. Run a sterilization cycle without any items inside
4. After the cycle, rinse the reservoir with clean water
5. Run an additional cycle with clean water to remove any vinegar residue

Note: Descaling is recommended every 2-4 weeks depending on water hardness and frequency of use.

6.3 Cleaning the Air Filter

1. Locate the air filter (refer to the product diagram)
2. Remove the filter carefully
3. Rinse under running water

4. Allow to air dry completely
5. Reinstall the filter

7. Technical Specifications

Product Dimensions	14.88 x 13.19 x 7.83 inches
Item Weight	4.84 pounds
Material	Plastic (BPA-free)
Model Number	BS01
Capacity	Up to 6 bottles
Sterilization Time	8-10 minutes
Modes	Auto, Sterilize, Dry, Thaw
Care Instructions	Clean after use
Additional Features	Automatic shut-off, LCD display, touch controls, removable tray

Compatible Items

- Standard and wide-neck baby bottles
- Bottle nipples and collars
- Pacifiers
- Breast pump accessories
- Teething toys
- Baby spoons and utensils
- Baby toothbrushes

Note: The sterilizer is suitable for all types of baby bottles. The removable tray can be disassembled or combined to accommodate different item sizes and quantities.
