7. Troubleshooting

Issue	Possible Solution
Device does not turn on.	Ensure the battery is charged. Connect to charger and attempt to power on.
Weak airflow or no cooling/heating.	Check if air ducts are blocked. Ensure you have selected the correct mode (Cool/Heat) and a sufficient speed setting.
Device does not connect to app.	Ensure Bluetooth is enabled on your phone. Ensure the device is powered on. Restart the app and/or your phone.
Battery drains quickly.	Using Max cooling/heating mode reduces battery life. Switch to a lower speed or Eco mode for extended runtime. The battery may degrade over time with normal use.
Device feels uncomfortable or warm.	Ensure it is worn correctly with plates on the back of the neck. If in Heat mode, this is normal. Switch to Fan or Cool mode if too warm.
