Use Guide

Initial Setup

Step 1: Install Batteries

Locate the battery compartment on the bottom of the unit. Open the cover and insert 2 AA batteries, observing the correct polarity (+/-) as indicated. Close the cover securely.

Step 2: Test the Device

Press the operation button briefly. You should hear the motor engage and see the gripper jaws move slightly. The device will automatically stop after a moment if no lid is present.

Opening a Jar or Bottle

Step 1: Position the Opener

Place the jar opener on top of the lid you wish to remove. Center it as much as possible. The device is designed for standard round lids.

Step 2: Activate the Grip

Press and hold the operation button. The auto-gripping jaws will descend, sense the lid's size, and clamp onto it securely. You can release the button once the grip is established; the device will continue the cycle automatically.

Step 3: Removal

The device will rotate the lid 360 degrees to break the seal. Once the lid is loose, the device will stop automatically and release its grip. Lift the opener off the jar. You may then manually unscrew the lid the rest of the way.
