

Overview

The KISSAIR 30L Towel Warmer is a 2-in-1 device designed to heat and dry towels. It features a large-capacity bucket that can accommodate up to three oversized towels (45" x 70") or one large blanket. The unit uses PTC heating technology to warm the interior while keeping the outer shell cool to the touch. It includes a 24-hour programmable timer with four keep-warm settings (15, 30, 45, and 60 minutes) and an automatic shut-off function for safe operation.

Features

Heating & Drying Performance

The towel warmer begins heating within 1 minute and reaches optimal warmth in approximately 10 minutes. It can also be used to dry wrung-out towels.

2 In 1 Towel Warmer

Heating & Drying

Heating dry towels

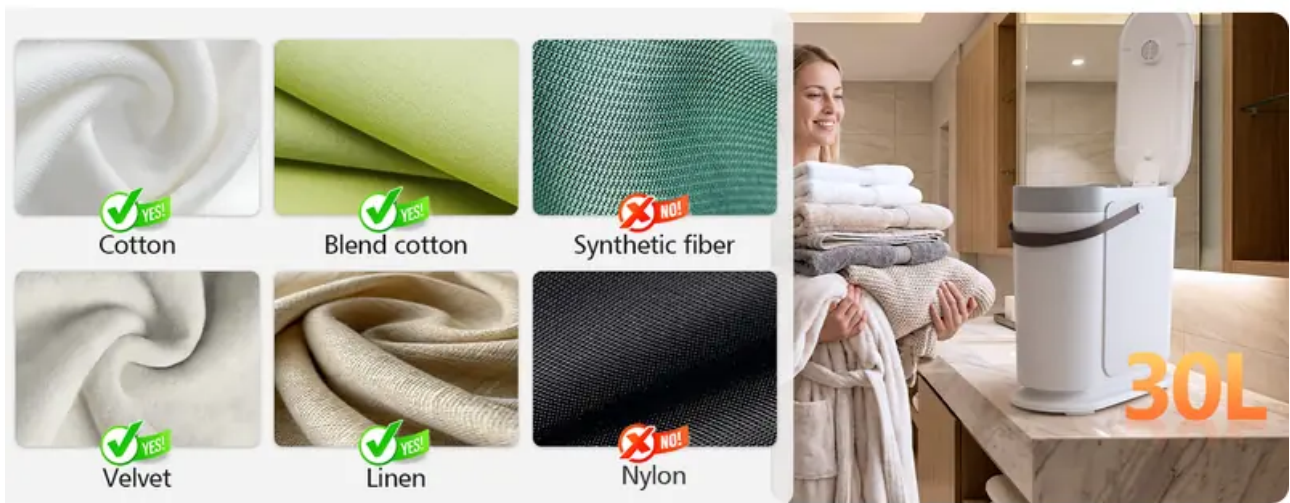

Drying wrung-out wet towels

Large Capacity (30L)

The 30-liter bucket can hold:

- Up to three 45" x 70" oversized bath towels
- One large bathrobe
- One large blanket
- Smaller items such as underwear, pajamas, and socks

Smart Timer & Auto Safety Control

The control panel allows you to set a timer from 1 to 24 hours. Four keep-warm levels are available: 15, 30, 45, and 60 minutes. The unit automatically shuts off after the selected keep-warm period ends.

Safe Heating & Fragrance Comfort

PTC heating technology maintains the inner wall temperature between 60–70°C while the outer shell remains cool. The double-layer bucket lid helps retain heat. Aromatherapy pads can be added to the unit to release a fresh scent during operation.

Safety Protection

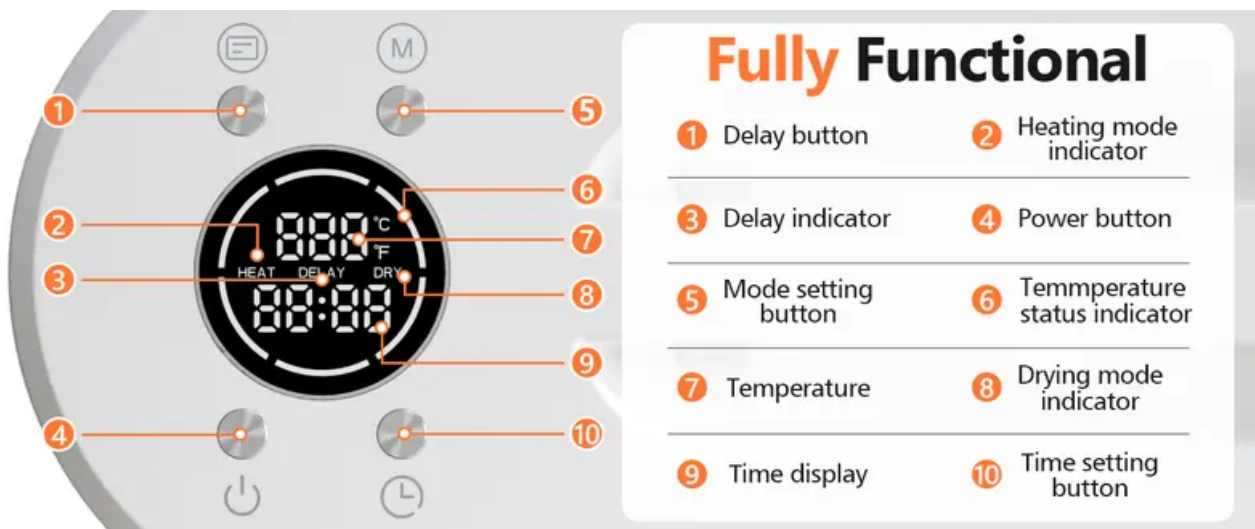

Child lock and automatic shutdown

Control Panel & Indicators

The control panel includes the following elements:

- **Power button:** Turns the unit on and off.
- **Timer button:** Sets the operating time (1–24 hours).
- **Keep-warm level selector:** Choose between 15, 30, 45, or 60 minutes of keep-warm after heating.
- **Indicator lights:** Show the current operating mode (heating, keep-warm, timer active).

Construction & Materials

- Outer shell: Plastic

- Inner bucket: Stainless steel
- Lid: Double-layer design for insulation

Use Guide

Unpacking & Initial Setup

1. Remove the towel warmer from the box.
2. Place the unit on a flat, stable, and heat-resistant surface.
3. Ensure the power cord is fully unwound and not pinched.
4. Plug the unit into a standard electrical outlet.

Video: Unboxing and Setup

The video shows the product being unpacked and guides you through product setup.

Heating Towels

1. Place dry towels (or other fabric items) inside the bucket. Do not overfill.
2. Close the lid securely.
3. Press the **Power** button. The unit will begin heating.
4. Wait approximately 10 minutes for optimal warmth.
5. To keep towels warm, select a keep-warm level (15, 30, 45, or 60 minutes) using the corresponding button.
6. To set a delayed start, use the **Timer** button to select the desired hour (1–24). The unit will start heating at the set time.

Drying Towels

The drying function is intended for **wrung-out towels only**. Do not place soaking wet items inside the unit.

1. Wring out the towel thoroughly so it is damp but not dripping.
2. Place the towel inside the bucket and close the lid.
3. Press the **Power** button.
4. Select a keep-warm level to allow the heat to evaporate moisture.
5. Monitor the towel periodically. Remove once dry.

Using Aromatherapy Pads

1. Place an aromatherapy pad (not included) in the designated area inside the bucket or lid.
2. Operate the unit as normal. The heat will help disperse the fragrance.

Safety Precautions

- Do not cover the unit with any object while in use.
- Do not immerse the unit in water or any liquid.
- Do not use the unit to heat chemical fiber towels or clothing.
- Do not use the unit to dry wet or damp items that are not wrung out.
- Keep the unit away from children and pets during operation.
- Unplug the unit when not in use.

Specifications
