Control panel

- ① Program selection
- ② Display
- ③ Start / Stop button with indicator light
- ④ Delay Start button with indicator light
- ⑤ Turbo button with indicator light
- ⑥ Intensive lower basket button with indicator light
- ⑦ Program selector button
- ⑧ On/Off ① button

Before using for the first time

To open the door

At the end of programs with a drying phase (see “Program overview”) the door will open automatically a little in order to help the drying process. This function can be deactivated, if preferred (see “Programming options, AutoOpen”).

- Pull the handle to open the door.

If the door is opened during operation, all functions are automatically interrupted.

 Keep the area around the door free of obstructions.

To close the door

- Push the baskets in.
- Raise the door up and push until it clicks into place.

 Do not put your hand inside the door as it is closing. Danger of injury

Child Safety Lock

Use the safety lock to prevent children from opening the dishwasher door.

1. To lock the door push the slide underneath the door grip to the right.
2. To unlock the door push the slide to the left.

Display Functions

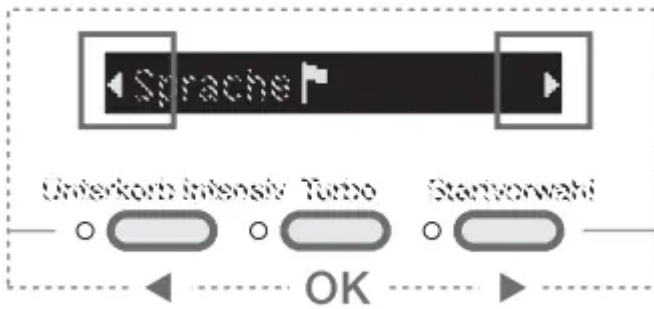

The following functions can be selected or set on the display:

- wash program
- options
- delay start
- settings

While a program is running, the display shows:

- the program segment
- the approximate remaining time
- any faults or messages

To save energy, if a button is not pressed within a few minutes the display will turn off. To show the display again, press any button.

Settings menu

You can adjust the dishwasher's electronics to suit various requirements in the Settings menu.

See the "Settings" section of this manual for more information.

The function of the buttons below the display is turned off in the Settings menu, allowing you to select and confirm menu items using these buttons.

The left and right arrows in the display indicate that additional selections are available. You can choose these selections using the left or right button below the display.

Use the center button below the display to confirm messages or settings and change to the next menu or submenu.

✓ A check will appear beside the currently selected setting.

- Press the  button to turn the dishwasher on.

A Welcome screen shows when the dishwasher is turned on for the first time.

Language

The display changes automatically to the language setting.

- Select the desired language and confirm with the center button.

The selected language set is marked with a  check.

Water hardness

The display changes to the water hardness setting.

To achieve good cleaning results, the dishwasher needs soft water. Hard water results in calcium deposits on dishware and in the dishwasher.

If your tap water hardness is above 4 °d (4 gr/gal [US]), the water should be softened.

- Your local water authority will be able to advise you of the water hardness level in your area.

- The dishwasher must be programmed to correspond to the water hardness in your area.
- In areas where the water hardness fluctuates (e. g. 37 - 50 °d [39 -52 gr/gal]) always program the machine to the higher value (in this example 50 °d [52 gr/gal]).

If there is a fault, it will help the service technician to know the hardness of your local water supply.

Please note your water hardness below:

_____ °d (gr/gal)

The water hardness was programmed at 1 °d (1 gr/gal) by factory default.

- Select the hardness of your water supply and confirm with the center button.

See "Settings - Water hardness" for more information.

Two notes appear in the display.

After confirming these notes, **i Add rinse aid** and/or **i Add salt** may appear in the display.

Confirm these notes. The display changes to the Main menu.

These basic settings are saved after the first full prog

Every dishwasher is tested before leaving the factory. Any water remaining in the machine is from the final factory test and does not indicate that the machine has been used.

Filling the salt container

To achieve good cleaning results, the dishwasher needs soft water (water that is low in minerals). Hard water results in calcium deposits on dishware and in the dishwasher.

Therefore, if your tap water hardness is above 4 °d (4 gr/gal) the water should be softened. The built-in water softener is designed for this purpose. The water softener is suitable for a water hardness up to 70 °d (73 gr/gal).

 Inadvertently filling the salt container with dishwashing detergent (including liquid detergent) will damage the water softener.

 Only use water softener salt specially formulated for dishwashers. Other salts may contain insoluble additives which can impair the water softener.

If using "Tab" products which include salt, still add salt to the machine to achieve optimal cleaning results and ensure long-term functioning of the water softener.

- Remove the lower basket from the wash cabinet and unscrew the salt container lid.

When opening the salt container, water will run out. Open the container only to refill salt.

Important: The salt container must be filled with 2 quarts (2 l) of water before adding salt for the first time so the salt can dissolve properly. Water does not have to be added with subsequent refills.

- Place the provided funnel over the salt container and carefully fill it with salt. The salt container holds approx. 4.4 lbs (2 kg) of salt, depending on the type of salt.
- Clean any excess salt from the threads of the container opening. Screw the lid on **firmly**.
- Immediately after each refill, run the "Rinse & Hold" program without a load. This will remove any traces of salt from inside the wash cabinet.

Refill salt message

- As soon as the  **Insufficient salt** message is displayed, refill the salt container
- Confirm with the center button.

The "Insufficient salt" message goes out.

If a sufficiently high concentration of salt has not yet formed, the Insufficient salt message may continue to be displayed after adding the salt. In this case, confirm again with the center button.

The Insufficient salt message is turned off if you have programmed the dishwasher to a water hardness below 4 °d (4 gr/gal).

If using "Tab" detergent products in your dishwasher, the messages can be turned off if desired (see "Settings - Deactivate indicators").

If you switch to using detergent that does not contain salt or rinse aid, it is important to remember to replenish the salt and rinse aid and to turn the indicators back on.

Rinse aid

Rinse aid is needed to prevent spotting on dishes and glassware. The rinse aid is filled in the reservoir and the set amount will be automatically dosed.

 Filling the rinse aid reservoir with detergent will damage the reservoir. Only pour rinse aid formulated for residential dishwashers into the reservoir.

When using “Tab” detergents rinse aid is not needed.

Adding rinse aid

- Press the button on the lid of the rinse aid reservoir in the direction of the arrow until the flap springs open.

- Add rinse aid only until it is visible in the opening.

The rinse aid reservoir holds approx. 3.7 oz. (110 ml).

- Close the flap firmly so that it clicks into place. Otherwise water can enter the rinse aid reservoir during a program.
 - Wipe up any spilled rinse aid. This prevents over-foaming occurring during the next program.
- You can adjust the rinse aid dosage for best results (see "Settings - Rinse aid").

Rinse aid indicator

When the  **Refill rinse aid** message appears, the reservoir contains sufficient rinse aid for 2-3 programs only.

- Add rinse aid once the program has finished.
- Confirm with the center button.

The "Refill rinse aid" message will go out.

If using "Tab" detergent products in your dishwasher, the messages can be turned off if desired (see "Settings - Deactivate indicators").

If you switch to using detergent that does not contain salt or rinse aid, it is important to remember to replenish the salt and rinse aid and to turn the indicators back on.

Loading the dishwasher

Do not wash items soiled with ash, sand, wax, grease or paint in the dishwasher. Ash and sand do not dissolve and will be distributed throughout the inside of the dishwasher. Wax, grease and paint will cause permanent discoloration and damage to the dishwasher.

- Scrape food from dishes before placing them in the dishwasher, rinsing is not necessary.
- Some foods contain natural dyes, e.g. carrots or tomatoes. Plastic items may discolor permanently if they come in contact with food dyes.
- All items can be placed anywhere in the baskets.
- Load dishes so that water can reach all surfaces. Do not place dishes or cutlery inside other pieces.
- Make sure that all items are securely positioned.
- Hollow items such as cups and glasses should be placed upside down in the baskets.
- To ensure good water coverage, tall, narrow and hollow items, i.e. vases or champagne glasses, should be placed in the center of the basket rather than in the corners.
- Concave based items such as mugs or bowls, should be placed at an angle so that water does not pool.
- The spray arms must not be blocked by items that are too tall or hang through the baskets. Check clearance by manually rotating the spray arms.
- Place very small items in the cutlery tray or basket so they do not fall to the bottom of the wash cabinet.
- Food residue and spilled liquids should be cleaned from the sides of the dishwasher door. These are outside of the wash cabinet and are not cleaned by water from the spray arms.

Items not recommended for dishwashing

- Cutlery with wooden handles
- Wooden cutting boards
- Glued items such as old knives with handles glued together around the shank of the blade
- Handmade craft items, antique, metal trimmed or decorative glassware
- Plastic items that are not heat resistant
- Copper, brass, tin or aluminum
- Dishes with color painted over the glaze. These dishes may fade over time
- Fine glassware and crystal items should only be washed using the "China & Crystal" program*. Otherwise clouding or etching may occur after frequent washing.

- Cast iron pots and pans

* depending on model

If unsure whether your china and crystal are dishwasher safe, please check with the manufacturer. The China & Crystal program*, although extremely gentle and thorough can cause the china and crystal to "wear" if they are not dishwasher safe.

Glassware:

- There are no standard guidelines for washing glassware, when in doubt wash by hand.
- When purchasing new dishes, glasses and cutlery, make sure they are dishwasher safe. Only wash items marked "dishwasher safe" in the dishwasher.
- If fine glassware is washed in the dishwasher select the "China & Crystal" program*. This will reduce the risk of clouding.

Silver and aluminum:

- Silver or aluminum items may tarnish.
- Silverware previously cleaned with a silver polish may be damp or spotted at the end of a program where water has adhered to the polish. This can be rubbed off with a soft, dry cloth. Silver that has been cleaned in an immersion dip is usually dry at the end of a program, but may tarnish.
- If left to dry, foods containing sulfur can discolor silver. These include egg yolk, onions, mayonnaise, mustard, fish and marinades.
- Silverware may tarnish or pit if washed next to stainless steel.
- Leave space between these metals.
- Clean aluminum items, e.g. grease filters, with domestic dishwasher detergent only.

Typical load for 10 place settings with cutlery tray

Upper basket

Lower basket

Cutlery tray

Typical load for 16 place settings with cutlery tray

Upper basket

Lower basket

Cutlery tray

Upper basket

- Load the upper basket with small, lightweight, or delicate items such as cups, saucers, glasses, dessert bowls, etc. Shallow pans can also be placed in the upper basket.
- Long items such as soup ladles, mixing spoons and long knives should be placed lying down across the front of the upper basket.

Foldable spikes

The rows of spikes can be lowered to make more room for larger items, such as casserole dishes.

- Press the yellow lever down ① and fold down the spikes ②.

Hinged cup rack

- To make room for tall items, raise the rack upwards.

Glasses can be arranged along the cup rack to give them some support during the program.

- Lower the cup rack and lean the glasses against it.

Jumbo cup rack

(depending on model):

The cup rack can be set at two different widths so that it can also accommodate large cups.

- Pull the cup rack upwards and click it back into position at the required width.

Universal support bar

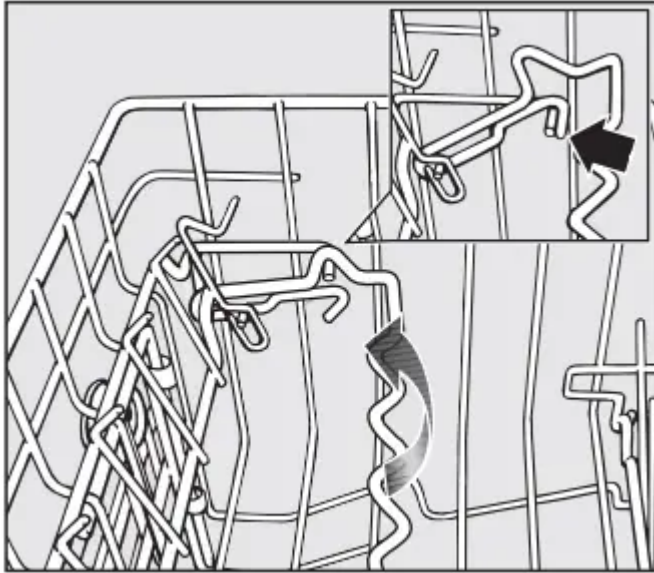

The support bar will hold tall glasses and stem ware securely.

- Fold the bar down and lean the desired glasses against it.
- If desired, a section of the cutlery tray can be removed to allow for even taller glasses.

Adjusting the height:

You can set the support bar at two different heights.

- Pull the support bar upwards and click it back into position at the required height.

Use the low setting for small glasses and tumblers.

Use the high setting for tall glasses and stem ware.

Adjusting the upper basket

In order to gain more space for taller items the upper basket can be adjusted on three levels with 2 cm between each level.

The upper basket can also be set at an angle with one side high and the other side low. Make sure, however, that the basket can slide smoothly in and out of the cabinet.

- Slide out the upper basket.

To adjust the upper basket upwards:

- Lift the basket up until it clicks into place.

To adjust the upper basket downwards:

- Pull up on the levers at the sides of the upper basket.
- Adjust the basket to the desired height and then release the levers to lock the basket in place.

Depending on the setting of the upper basket, the following plate dimensions can be accommodated.

Depending on the setting of the upper basket, a variety of plate dimensions can be accommodated.

Lower basket

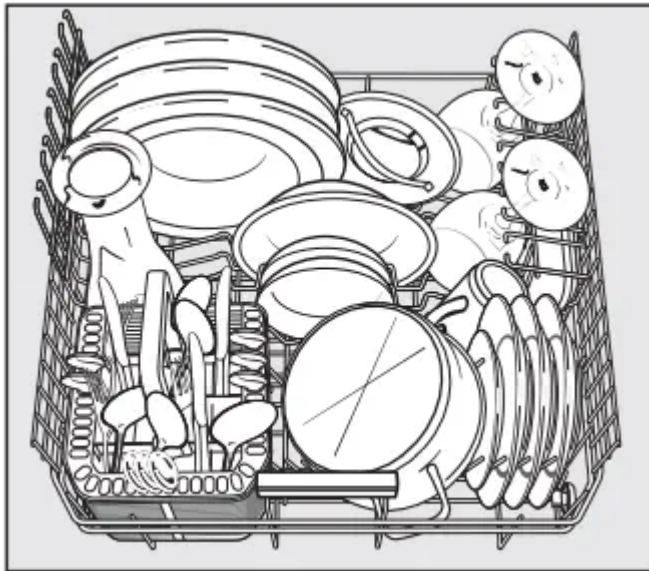

- Place larger and heavier items such as plates, serving platters, saucepans, bowls, etc. in the lower basket.

It can also be used for glasses, cups, small plates and saucers.

Dishwasher with cutlery tray

Dishwasher with cutlery basket

Heavily soiled items

- Place very large plates in the center of the lower basket.

When tilted, plates up to 13 3/4" (35 cm) in diameter can be accommodated.

Cutlery

Split cutlery tray (depending on model)

- Arrange the cutlery as shown in the cutlery tray.

For easier unloading cutlery should be grouped in zones, one for knives, one for forks, one for spoons, etc.

Spoon heads should be placed in contact with at least one of the serrated retainers on the base of the cutlery tray to ensure that water runs off them freely.

The upper spray arm must not be blocked by tall cutlery items (e.g. cake servers).

The side sections of the tray can be moved into the middle to accommodate tall dishware items in the upper basket.

Spoons with thick handles may have to be placed as knives and forks with their heads in the holders.

- You can use the yellow slide to adjust the height of the middle section of the cutlery tray to make more room for large items of cutlery.

Cutlery basket (depending on model)

The cutlery basket can be placed anywhere on the front rows of spikes in the lower basket.

- To avoid risk of injury, knives and forks should be placed with the handles upwards in the basket.
However, cutlery placed handle down in the basket will come out cleaner and drier.
- Place small items of cutlery in the individual slots on three sides of the cutlery basket.

Cutlery insert for the cutlery basket

Use the insert supplied for heavily soiled items of cutlery.

The insert separates the items so that they can be reached better by the spray jets.

- Fit it onto the cutlery basket if required.

- Insert cutlery with the handles facing downwards, and distribute them evenly along the insert.

Optional accessories

If you would like to...

- Press the opening catch on the detergent dispenser. The flap will spring open.

The flap is always open at the end of a program.

- Add detergent to the compartments and close the container flap.
- Use one tab or add powder or gel detergent to compartment II and close the flap.
- If a Pre-rinse is desired, and available for your chosen program, add 1 teaspoon (5 ml) of detergent to compartment I.

Compartment I holds a maximum of 2 teaspoons (10 ml),

Compartment II holds a maximum of 3.5 tablespoons (50 ml) of detergent.

The horizontal marks in compartment II indicate the levels of approximately 1 ¼ and 2 tablespoons (20 and 30 ml) respectively. The marks indicate the approximate fill level in ml when the door is open in a horizontal position.

Turning on

- Make sure the spray arms can rotate freely.
- Close the door.
- Open the water supply, if it is closed.
- Press the  button to turn the dishwasher on.

The last program selected will appear in the display and the appropriate indicator light will come on.

After a short while, the estimated program duration for the program selected will appear in the display.

Selecting a program

Choose your program according to the type of load and soiling.

See the "Program Guide" for more information.

- Select the desired program with the Program selection button.

The indicator light for the selected program will come on.

Additional options can now be selected, if desired (see "Additional Options").

Starting a program

- Press the "Start / Stop" button.

The program starts.

If additional options are selected, the corresponding indicators will also light up.

Cancel a program only in the first few minutes.

Otherwise important program steps (e.g. the water softening) may be interrupted.

Program Guide

Program guide	When to use	Program sequence						
		Pre-rinse		Main wash	Interim rinse		Final rinse	Drying
		1	2		1	2		
Pots & Pans	For normally soiled pots & pans with dried on food , and heavily soiled dishware, use 120% detergent recommended.		X	X	X		X	X
Normal	Program for completely washing a full load of normally soiled dishware with the ability to adjust energy and water consumption based on the soil load of the dishware.	as required		X	X		X	X
China & Crystal	For temperature sensitive glassware and lightly soiled dishware, use 50% detergent recommended .	as required		X	as required		X	X
SaniWash	To sanitize dishware , e.g. baby bottles, cutting boards and preparation dishware.			X		X	X	X
Extra Quiet	Very quiet program for normally soiled dishware with dried on food .			X	X		X	X
Rinse & Hold	To rinse dishes when a complete program is not needed.	X						

Usage:

Electrical - 0.01 - 1.30 kWh Water -1.1 - 5 gal (4 -19 l)

Time display

Before the program starts, the time display shows the running time of the selected program in hours and minutes. During the running program the remaining time is shown in the time display.

Symbols will appear to indicate the current stage of the program:

	Pre-wash / Soak
	Main wash
	Interim rinse
	Final rinse
	Drying
	Finished

The time displayed may vary with the same program. This can be due, among other factors, to the water temperature at each intake, the reactivation process, the type of detergent, the number of dishes and how soiled they are.

When a program is selected for the first time, the display shows an average time for a cold water intake.

Each time a program is run, the electronic unit adjusts the program running time according to the intake water temperature and the load size.

Standby

A few minutes after the last key is pressed or at the end of the program the dishwasher will switch into Standby mode to save energy. The display and the indicators are turned off and only the Start/ Stop indicator light flashes slowly.

- To turn the dishwasher back on press any key.

If you do not turn the dishwasher off after the program ends, it will turn completely off after a few minutes in standby mode (see "Settings - Optimize standby").

If refill salt and/or rinse aid or a fault are present in the display, the dishwasher will not switch to Standby mode.

The refill messages can be turned off when you use a tab detergent (see "Before using for the first time"). Fault messages cannot be turned off.

USE

At the end of a program

If the door has opened slightly, and the message  **Finished** or **Drying Plus** appears in the display, this indicates that the program has finished.

- Open the door completely to re-engage the door closing mechanism.

In the "Normal" program, the drying fan will run for a few minutes after the program is completed.

If you have deactivated the automatic door opening function (see "Settings - Drying Plus"), but would still like to open the door at the end of the program, then make sure that you open the door fully. Otherwise steam from the dishwasher could damage the edge of the counter top because the fan is no longer running.

Unload the dishwasher.

Dishes tend to break and chip more easily when they are hot.

Allow the dishes to cool until they are comfortable enough to handle before unloading them.

If you open the door fully after switching off, the dishes will cool much faster.

Unloading the lower basket first will prevent water drops from the upper basket and cutlery tray (depending on model) from dropping onto dishes in the lower basket.

- Press the  button to turn the dishwasher off.

Preparing your appliance for an extended vacation

If you elect to turn off the water to your home for an extended period of time, please note that this may not be enough to reduce the risk of a leak.

To be completely safe, you must turn off the water supply to each individual appliance. This means under the sink for a dishwasher, at the laundry bib for your washer, etc.

Interrupting a program

A program is interrupted as soon as the door is opened.

If the door is closed again, the program will continue from where it was interrupted.

Water in the dishwasher is hot. Danger of scalding.

Only open the door if absolutely necessary and exercise extreme caution when doing so. Before closing the door again, leave it ajar for approx. 20 seconds. This will enable the temperature in the wash cabinet to settle. Close the door firmly until it clicks into place.

Changing a program

If the detergent dispenser flap is already open, do not change the program.

If a program has already started and you wish to change it:

- Press the "Start/Stop" button for at least one second.

The program is canceled.

- Select and start the desired program.

Additional options

Intensive lower basket

The "Intensive lower basket" option allows you to wash heavily soiled items in the lower basket while washing more delicate items in the upper basket.

Cleaning performance in the lower basket is intensified in programs where this function is available.

Depending on the program, this can mean that the running time varies slightly.

- Press the  button to turn the dishwasher on.

The "Start / Stop" indicator light flashes.

- Select a program.
- Press the "Intensive lower basket" button.

The Intensive lower basket indicator light will come on if the function is available for the program which has been selected.

- Start the program with the "Start / Stop" button.

Once set, the function will remain active for the program selected until the setting is changed.

Turbo

The "Turbo" function can be used to reduce the program run-times, in programs in which the option is available. In order to achieve optimum cleaning results, energy consumption rates are increased when Turbo has been selected.

- Press the  button to turn the dishwasher on.

The "Start / Stop" indicator light flashes.

- Select a program.
- Press the Turbo button.

The Turbo indicator light will come on if the function is available for the program which has been selected.

- Start the program with the "Start / Stop" button.

Once set, the function will remain active for the program selected until the setting is changed

Delay start

The start time of a program can be delayed from 30 minutes to 24 hours. The delay is set in 30 minute increments.

When using the "Delay Start" function, make sure that the detergent compartment is dry before adding detergent. Wipe dry with a cloth if necessary. Otherwise the detergent could stick together and not completely rinse out.

Do not use liquid detergent. The detergent could leak out of the compartment.

- Press the  button to turn the dishwasher on.

The "Start / Stop" indicator light flashes.

- Select the desired program with the "Program" button.
- Press the "Delay start" button.

The last delay start time will show in the time display. The "Delay start" indicator light comes on.

- Set the desired delay start time with the "Delay start" button.

If you press and hold the "Delay start" button, the time will automatically count up to **24:00 h**. To start again at 30 minutes, press the "Delay start" button twice.

- Press the "Start / Stop" button.

The "Start / Stop" indicator light comes on.

If, after you have set the delay start time, you do not press the Start / Stop button within a few seconds, the display will revert to showing the program duration. You will have to enter the delay start time again.

The time will count down to the program start in 1-minute steps.

Once the delay start time has elapsed, the selected program starts. The display shows the remaining time, the indicator "Delay start" goes out and the "Start / Stop" indicator light comes on.

Starting a program before the Delay start has elapsed:

A program can be started before the Delay start time has elapsed.

- Press the "Start / Stop" button for at least one second.

The "Delay start" indicator light goes out and the "Start / Stop" indicator light flashes.

- Press the "Start / Stop" button again.

The program starts. The "Start / Stop" indicator light comes on.

Settings menu

The "Settings" menu allows you to change standard settings

Opening the "Settings" menu

- Press the  button to turn the dishwasher off.
- Press and hold the "Start / Stop" button.
- Turn the dishwasher on with the  button and hold the "Start / Stop" button down for at least 4 seconds.

The first option of the Settings menu will appear in the display and all the indicator lights will come on.

See the Display Functions section for details.

- Select the menu option you wish to change.

The selected options are marked with a check .

Language

The display contents can be shown in different languages.

The displayed language can be changed in the Language .

Select the desired language and confirm with the center button.

The flag after the word Language serves as a guide when an unfamiliar language has been selected.

Select the menu option with a flag until the Language  submenu is displayed.

Water hardness

Your dishwasher is fitted with a water softener which you need to program to the water hardness level in your area.

- The dishwasher must be correctly programmed to match the hardness of your water.
- Your local water authority will be able to advise you of the exact water hardness level in your area.
- In areas where the water hardness fluctuates (e. g. 37 - 50 °d [39 - 52 gr/gal]) always program the machine to the higher value (in this example 50 °d [52 gr/gal]).

A check  will appear beside the water hardness which has been set.

- Select the hardness of your water supply and confirm with the center button.

°d	gr/gal	Value to set in the display
1	1	1
2	2	2
3	3	3
4	4	4
5	5	5

51-60	53-63	51-60
61-70	64-73	61-70

Rinse aid

For best results the rinse aid dosage can be adjusted.

The dosage can be set between 0-6 ml. The factory default dosage setting is 3 ml rinse aid.

If spots appear on the dishes:

- Use a higher setting for rinse aid.

If smearing or streaking show:

- Use a lower setting for rinse aid.

Select the desired rinse aid amount and confirm with the center button.

Drying Plus

The Drying Plus function automatically opens the door slightly at the end of a program with a drying phase (except "Extra quiet"), in order to improve the drying process. (see the "Program guide").

This function can also be deactivated.

- Select the desired setting and confirm with the center button.

If you have deactivated the automatic door opening function but would still like to open the door at the end of the program, then make sure that you open the door fully. Otherwise steam from the dishwasher could damage the edge of the counter top because the fan is no longer running.

Optimize standby

A few minutes after the last key is pressed or at the end of the program the dishwasher will switch into Standby mode to save energy. The display and the indicators are turned off and only the Start/Stop indicator light flashes slowly.

If the dishwasher is not turned off after the program ends, it will turn completely off after a few minutes in standby mode.

This function can also be turned off. The display and the indicators stay on and the dishwasher will turn off after approx. 6 hours.

- Select the desired setting and press the center button.

If refill salt and/or rinse aid or a fault are present in the display, the dishwasher will not turn off.

The refill messages can be turned off when you use a tab detergent. Fault messages cannot be turned off.

Deactivate indicators

If you consistently use "Tab" detergent products in your dishwasher, you can switch the Salt and Rinse Aid indicators off if desired.

- Select the desired setting and confirm with the center button.

If you switch to using a detergent that does not contain salt or rinse aid, remember to replenish the salt and rinse aid and turn the indicators back on.

Soak

You can use the Soak function in the program selected for loosening very stubborn food residues. It is not available for every program.

If you are using powder dishwasher detergent, add approx. 1 teaspoon (5 g) to compartment I.

- Select the desired setting and confirm with the center button.

Once set, the function will remain active for the programs for which it is available, until the setting is changed.

Pre-rinse

You can use this function in the selected program to remove easily loosened food residues. It is not available for every program.

- Select the desired setting and confirm with the center button.

Once set, the function will remain active for the programs for which it is available, until the setting is changed.

Extended drying

The fan runs longer at the end of a program to improve the drying result. This function is not available for every program.

- Select the desired setting and confirm with the center button.

Once set, the function will remain active for the programs for which it is available, until the setting is changed.

Brightness

There are seven different display brightness settings.

- Select the desired brightness and confirm with the center button.

Contrast

There are seven different display contrast settings.

- Select the desired contrast and confirm with the center button.

Filter check

This selection allows you to set the number of cycles run before the filter check message shows.

You can select between 30 and 60 cycles.

The "Filter check" message is set by default to 50 cycles.

- Select the desired interval and confirm with the center button.

Showroom program

Only for showrooms.

The dishwasher comes with various demo programs for dealers.

- **Demo with wash sound:**

The program activates the pumps to demonstrate the wash sound.

- **Drying Plus Demo:**

The door will open automatically.

Turning the demo mode on

- Select the desired option.
- Select the option **On** and confirm with the center button.
- Close the Settings menu.
- Press the "Start / Stop" button.

Demo mode will begin.

Turning the demo mode off

Demo mode will turn off automatically when it reaches the end of the cycle.

Factory default

If you have altered any settings from the factory default, you can reset them to the factory default settings.

- Select **Reset** and confirm with the center button.

Leaving the Settings menu

Use **Close** to leave the Settings menu.

- Select **Close** and confirm with the center button.

The display will then show the last program selected and the indicator light for the program selected will come on.

Frequently Asked Questions

Repairs should only be carried out by a qualified and trained person in accordance with local and national safety regulations. Unauthorized repairs could cause personal injury or machine damage.
