

## Getting to know your appliance

In this section, we will explain the indicators and controls. You will also find out about the various functions of your appliance.

**Note:** Depending on the appliance model, individual details and colours may differ.

### Control panel

You can set your appliance's various functions on the control panel. The current settings are shown in the display

1. Display
2. Touch buttons
3. ShiftControl control element

### Controls

Use the controls to set your appliance simply and directly.

### Touch buttons

There are sensors under the touch buttons. Touch the corresponding touch button to select a function.

Touch button	Use
 On/off	Switches the appliance on or off → "Switching the appliance on and off" on page 14
 Main menu	Selects operating modes and settings → "Setting and starting the appliance operation" on page 14
 Time-setting options	Sets the timer, cooking time or "Finished at" start delay → "Time-setting options" on page 16
 Childproof lock	Activating and deactivating the childproof lock → "Childproof lock" on page 17
 Information	Displays additional information Displays the current temperature → "Setting and starting the appliance operation" on page 14

 Rapid heating	Activating or deactivating rapid heating → "Heating up the appliance quickly" on page 15  Activating or deactivating Power-Boost → "Heating up the appliance quickly" on page 15
 Start/stop	Start or pause the appliance → "Setting and starting the appliance operation" on page 14

## ShiftControl control element

Use the ShiftControl control element to navigate through the lines on the display and select the settings. Settings that you can change have left and right arrows .

Button	Use
 Left	Navigates to the left on the display
 Right	Navigates to the right on the display
 Up	Navigates upwards on the display
 Down	Navigates downwards on the display

**Note:** You can also scroll through the settings values quickly by pressing and holding a button. As soon as you release the button, you stop scrolling through the values quickly

## Main menu

Touch the  touch button to access the main menu.

Menu	Use
	Types of heating Select the desired heating type and temperature for your food → "Switching the appliance on and off" on page 14

	<b>Basic settings</b> Individually adjusting the appliance settings → "Basic settings" on page 18
	<b>EasyClean</b> Cleaning light soiling from the cooking compartment → "Cleaning function" on page 21
	<b>Self-cleaning</b> Cleaning the cooking compartment pyrolytically → "Cleaning function" on page 21

## Types of heating menu

Your appliance comes with various types of heating. After switching on the appliance, you are taken directly to the menu for the types of heating.

For temperature settings above 275 °C, the appliance reduces the temperature to approx. 275 °C after approx. 40 minutes.

Type of heating	Temperature	Use
 CircoTherm	40–200 °C	For baking and cooking on one or more levels. The fan distributes the heat from the ring-shaped heating element in the back wall evenly around the cooking compartment.
 Top/bottom heating	50–275 °C	For traditional baking and roasting on one level. Especially suitable for cakes with moist toppings. Heat is emitted evenly from above and below.
 Circo-roasting	50–250 °C	For roasting poultry, whole fish and larger pieces of meat. The grill element and the fan switch on and off alternately. The fan circulates the hot air around the food.
 Pizza setting	50–275 °C	For cooking pizza and dishes that require a lot of heat from underneath. The bottom heating element and the ring-shaped heating element in the back wall heat the cooking compartment.
 Bread baking setting	180–240 °C	For baking bread, bread rolls and baked goods that require high temperatures.
 Grill, large area	50–290 °C	For grilling flat items, such as steaks or sausages, for making toast, and for browning food. The entire area underneath the grill element becomes hot.
 Grill, small area	50–290 °C	For grilling small amounts of steak or sausages, for making toast, and for browning food. The central area under the grill element becomes hot.
 Bottom heating	50–250 °C	For cooking in a bain marie and for baking food for extra time. Heat is emitted from below.
 Slow cooking	70–120 °C	For gentle and slow cooking of seared, tender pieces of meat in ovenware without a lid. Heat is emitted evenly from above and below at low temperatures.
 Dough proving	35–55 °C	For proofing yeast dough and sourdough and for culturing yogurt. Dough proves more quickly than at room temperature. The surface of the dough does not dry out.
 Top/bottom heating eco	50–275 °C	For gently cooking selected types of food. Heat is emitted from above and below. This heating function is most effective between 150 and 250 °C. This type of heating is used to measure the energy consumption in the conventional mode.
 CircoTherm eco	40–200 °C	For gently cooking selected types of food on one level without preheating. The fan distributes the heat from the ring-shaped heating element in the back panel around the cooking compartment. This heating function is most effective between 125 and 200 °C. This type of heating is used to measure both the energy consumption in air recirculation mode and the energy-efficiency class.

## Cooking compartment functions

The features of the cooking compartment make your appliance easier to use. This, for example, enables the cooking compartment to be well lit and a cooling fan to prevent the appliance from overheating.

### Opening the appliance door

If you open the appliance door while the appliance is in operation, this pauses the programme. The operation continues to run when you close the door.

**Note:** For some types of heating, the operation continues to run even when the appliance door is open.

### Interior lighting

When you open the appliance door, the interior lighting switches on. If the door remains open for longer than around 15 minutes, the lighting switches off again.

In most operating modes, the interior lighting will switch on as soon as the appliance is started. Once the program is complete, the lighting switches off.

**Note:** You can set the interior lighting to not come on during the operation in the basic settings. → *“Basic settings” on page 18*

### Cooling fan

The cooling fan switches on and off as required. The hot air escapes above the door.

### Caution!

Do not cover the ventilation slots. Otherwise, the appliance may overheat.

To cool the cooking compartment more quickly after operation, the cooling fan continues to run for a certain period afterwards.

**Note:** You can change how long the cooling fan continues to run in the basic settings. → *“Basic settings” on page 18*

## Accessories

Your appliance is accompanied by a range of accessories. Here, you can find an overview of the accessories included and information on how to use them correctly.

### Accessories included

Your appliance is equipped with the following accessories:

Only use genuine accessories. They are specially adapted for your appliance.

You can buy accessories from the after-sales service, from specialist retailers or online.

**Note:** The accessories may become deformed when they become hot. This does not affect their function. Once they cool down again, they regain their original shape.

## Inserting accessories

The cooking compartment has four shelf positions. The shelf positions are counted from the bottom up.

In some appliances, the top shelf position in the cooking compartment features a grill symbol.

The accessories can be pulled out up to approximately halfway without tipping.

### Notes

- Ensure that you always insert the accessories into the cooking compartment the right way round.
- Always insert the accessories fully into the cooking compartment so they do not touch the appliance door.

## Locking function

The accessories can be pulled out approximately halfway until they lock in place. The locking function prevents the accessories from tilting when they are pulled out. The accessories must be inserted into the cooking compartment correctly for the tilt protection to work properly.

When inserting the wire rack, ensure that the lug **a**, is at the rear and is facing downwards. The open side must be facing the appliance door and the curvature must be facing downwards.

When inserting the baking tray or the universal pan, ensure that the lug **b** is at the rear and is facing downwards. The sloping edge of the accessory **c** must be facing towards the appliance door.

## Combining accessories

You can insert the wire rack and the universal pan at the same time to catch drops of liquid.

When inserting the wire rack, ensure that both spacers **a**, are at the rear edge. When the universal pan is inserted, the wire rack is on top of the upper guide rod of the shelf position.

## Optional accessories

You can purchase optional accessories from the aftersales service and specialist retailers, or on the Internet. You will find a comprehensive range of products for your appliance in our brochures and on the Internet.

Both availability and whether it is possible to order online differ between countries. Please see your sales documents for more details.

**Note:** Not all optional accessories are suitable for every appliance. When purchasing, please always quote the exact designation (E no.) of your appliance. → "Customer service" on page 29

Accessories
Baking and roasting shelf
Baking tray, suitable for pyrolytic cleaning
Universal pan, suitable for pyrolytic cleaning
Extra-deep pan, suitable for pyrolytic cleaning
Steaming set for ovens
Profi pan, suitable for pyrolytic cleaning
Lid for the Profi pan
Pizza tray
Grill tray, suitable for pyrolytic cleaning
Bread-baking stone, suitable for pyrolytic cleaning
Glass roasting dish, 5.1 litres
Glass pan
ComfortFlex shelf (1 level) + frame*
ComfortFlex rail (1 level)*
3 x fully extendable pull-out rack*
*Accessory does not fit in every appliance, quote the E no. when ordering

## Before using for the first time

Before you can use your new appliance, you must make some settings. You must also clean the cooking compartment and accessories.

## Initial use

As soon as the appliance is connected to the power supply, the first setting "Language" appears on the display.

## Setting the language

1. Use the  button to navigate to the bottom line.
2. Use the  or  button to select the language.
3. Use the  button to return to "Language".
4. Use the  button to select the next setting.

## Setting the time

1. Use the  button to navigate to the next line.
2. Use the  or  button to select the current time.
3. Press the  button.
4. Use the  button to select the next setting.

## Setting the date

1. Use the  button to navigate to the next line.
2. Use the  or  button to select the current day.
3. Use the  button to return to "Day".
4. Use the  button to select the next setting.
5. Use the  button to navigate to the next line.
6. Use the  or  button to select the current month.
7. Use the  button to return to "Month".
8. Use the  button to select the next setting.
9. Use the  button to navigate to the next line.
10. Use the  or  button to select the current year.
11. Use the  button to return to "Year".
12. Use the  button to apply the settings.

The initial use is complete.

### Notes:

- You can change these settings at any time in the basic settings. → "Basic settings" on page 18

- After connecting the appliance to the power or following a power cut, the settings for initial use are shown in the display

## Cleaning the cooking compartment

To eliminate the new-appliance smell, heat up the cooking compartment without anything in it and with the oven door closed.

1. Remove the accessories from the cooking compartment.
2. Remove any leftover packaging, such as polystyrene pellets, from the cooking compartment.
3. Before heating the appliance, wipe the smooth surfaces in the cooking compartment with a soft, damp cloth.
4. Use the  touch button to switch on the appliance.
5. Set the specified type of heating and temperature, then start the appliance. → "Setting and starting the appliance operation" on page 14

Settings	
Type of heating	CircoTherm 
Temperature	Maximum
Cooking time	1 hour

6. Keep the kitchen ventilated while the appliance is heating.
7. Use the  touch button to switch off the appliance once the specified time has elapsed.
8. Wait for the cooking compartment to cool down.
9. Clean the smooth surfaces with soapy water and a dish cloth.

## Cleaning the accessories

Clean the accessories thoroughly using soapy water and a dish cloth or soft brush.

## Operating the appliance

You have already learnt about the controls and how they work. Now we will explain how to set your appliance. You will learn about what happens when you switch the appliance on and off, and how to select the operating mode.

### Switching the appliance on and off

Touch the  touch button to switch the appliance on or off.

After switching off the appliance, on the display you can see if the residual heat in the cooking compartment is high or low.

Display	Meaning
H-	Residual heat high (above 120 °C)
h-	Residual heat low (between 60 °C and 120 °C)

## Notes

- Certain displays and notes, such as the residual heat in the cooking compartment, remain visible on the display even when the appliance is switched off.
- After an appliance operation, the cooling fan runs on audibly until the cooking compartment has been cooled as far as possible.
- Switch off your device when you do not need to use it. If no settings are applied for a long time, the appliance switches itself off automatically.

## Setting and starting the appliance operation

Example: CircoTherm hot air  at 170 °C

1. Touch the  touch button to switch on the appliance.

You are taken directly to the  menu for the types of heating.

2. Use the  or  button to select the type of heating.
3. Use the  button to navigate to the next line.
4. Use the  or  button to select the temperature.

**Note:** Depending on the operating mode, different settings are available. For each further setting, use the  button to navigate to the next line. Use the  or  button to select the setting.

5. Touch the  touch button to start the appliance operation.

The heating bar and run time appear on the display

**Note:** If you would like to go directly to the  main menu after switching on the appliance, you can select the main menu under "Operation after switching on" in the basic settings chapter. → "Basic settings" on page 18

## Default values

The appliance suggests a temperature or setting for each type of heating. You can accept this value or change it in the appropriate area.

## Heating bar

As soon as a type of heating has started, the heating bar appears on the display. The heating bar shows the temperature increase in the cooking compartment.

## Run time

When a type of heating has been started, the run time is displayed. The run time counts upwards during the operation. You can therefore check how long the operation has already been running.

## Displaying the current temperature

To show the current temperature on the display, press the  touch button.

The current temperature is shown briefly only when heating up.

## Further information

If the  touch button lights up, information can be displayed. Touch the  touch button to do this. The information is displayed for a few seconds.

## Changing or cancelling the appliance operation

### Changing the appliance operation

1. Use the  button to stop the operation.
2. Use the  or  button to navigate to the line for the setting that should be changed.

3. Use the < or > button to change the setting.
4. Use the ▶|| touch button to start the changed operation.

### Notes

- The cooling fan may continue to run while an operation is interrupted.
- After a temperature change, the paused running time continues to count. After a change in the type of heating, the running time starts again from zero.

### Cancelling the appliance operation

Press and hold the ▶|| touch button until the appliance operation is cancelled.

**Note:** Operating modes such as the cleaning function cannot be cancelled.

### Heating up the appliance quickly

You can use the "Rapid heat-up" and "PowerBoost" functions to reduce the preheat time. Whether the appliance is preheated with the "Rapid heat-up" function or the "PowerBoost" function depends on the type of heating that has been set. With the "PowerBoost" function, unlike with the "Rapid heat-up" function, you can place your food into the cold cooking compartment even before preheating has begun. Only cook on one level when using the "PowerBoost" function.

Function	Type of heating	Place the food in the cooking compartment
Rapid heat-up	Top/bottom heating 	after preheating
PowerBoost*	CircoTherm hot air  Bread-baking setting 	before preheating

\* Do not use more than one level for cooking

### Notes

- If the  touch button is lit, the "Rapid heat-up" or "PowerBoost" function can be activated.
- To deactivate the "Rapid heat-up" or "PowerBoost" function before it has finished, touch the  touch button.

### Activating the "Rapid heat-up" function

1. Set top/bottom heating  and the temperature.

**Note:** Set a temperature above 100 °C to allow the appliance to preheat quickly.

2. Touch the ▶|| touch button to start the appliance operation.

3. Touch the  touch button to activate the "Rapid heat-up" function.

The  symbol appears on the display.

4. Once the set temperature has been reached, the "Rapid heat-up" function switches itself off automatically. The  symbol disappears from the display. Place the food in the cooking compartment

### Activating the "PowerBoost" function

1. Set CircoTherm hot air , or the bread baking setting  and the temperature.

**Note:** Set a temperature above 100 °C to allow the appliance to preheat quickly.

2. Place the food on a single level in the cooking compartment.

3. Touch the  touch button to start the appliance operation.

4. Touch the  touch button to activate the "PowerBoost" function.

The  symbol appears on the display.

Once the set temperature has been reached, the "PowerBoost" function switches itself off automatically. The  symbol disappears from the display

## Time-setting options

Your appliance has different time-setting options.

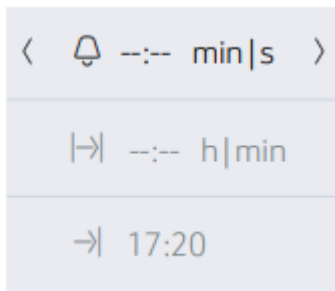

Time-setting option	Use
 Timer	The timer functions like an egg timer. The appliance does not switch on and off automatically.
 Cooking time	Once the set cooking time has elapsed, the appliance switches off automatically.
 Ready at	The appliance switches on automatically, and once the set cooking time has elapsed and the end time has passed, it switches off automatically.

**Note:** If you have set a time-setting option, the time interval increases if you set a higher value. Example: You can set a cooking time of up to one hour in oneminute increments; for cooking times over one hour, you can set a cooking time in five-minute increments.

### Showing and hiding the time-setting options

To show or hide the time-setting options, touch the  touch button.

**Note:** After a particular length of time, the time-setting options that are shown are automatically hidden. If you have already set a cooking time, it will be applied.

## Setting the timer

The timer can be set when the appliance is switched on or off.

1. Touch the  touch button.

The time-setting options are shown on the display.

2. Select the cooking time using the  button.

**Note:** When the appliance is switched on, use the  button to navigate to the Timer  line and then select the cooking time using the  button.

3. Touch the  touch button to start the timer.

The  symbol appears on the display. The timer counts down.

**Note:** As soon as the set time has elapsed, a signal sounds. To cancel the signal tone, touch the  touch button.

## Setting the cooking time

Once the set cooking time has elapsed, the appliance switches off automatically. The function can only be used in combination with a type of heating.

1. Touch the  touch button.
2. Set the type of heating and temperature.
3. Touch the  touch button.

The time-setting options are shown in the display.

4. Use the  or  button to set the cooking time.

– Default value for the  button = 10 minutes

– Default value for the  button = 30 minutes

5. Touch the  touch button to start the set cooking time.

As soon as the cooking time has elapsed, an audible signal sounds and the appliance ends the operation automatically. Touch the  touch button to end the audible signal.

## Start delay – "Ready at"

The appliance switches on automatically and switches off at the preset end time. To do this, set the cooking time and determine the end time for the operation.

The start delay can only be used in combination with a type of heating.

### Notes

- Ensure that food is not left in the cooking compartment for too long as it may spoil.
- It is not possible to start every type of heating with a start delay.

1. Slide food into the cooking compartment on a suitable accessory and close the appliance door.
2. Touch the  touch button.
3. Set the type of heating and temperature.
4. Touch the  touch button.

The time-setting options are shown on the display.

5. Select the cooking time using the  button.
6. Use the  button to navigate to the "→ Ready at" line.
7. Select the end time using the  button.
8. Touch the  touch button.

The appliance waits until the appropriate time to start the operation.

As soon as the end time has passed, a signal sounds and the appliance stops the operation automatically. To cancel the signal tone, touch the  touch button.

## Checking, changing or deleting settings

1. Touch the  touch button.

The time-setting options are shown on the display.

2. Use the  or  button to navigate through the lines.
3. If necessary, change the setting using the  or  button. Set "00:00" to delete a time function. The setting is applied automatically.

## Childproof lock

Your appliance is equipped with a childproof lock so that children cannot switch it on accidentally or change any settings.

Your appliance has two different locks.

Lock	Activate/deactivate
Automatic childproof lock	Via the Settings menu → "Basic settings" on page 18
One-time childproof lock	Via the  touch button

**Note:** As soon as you activate the childproof lock, the control panel is locked. The 0 and # touch buttons are not included. You can deactivate the childproof lock at any time.

## Automatic childproof lock

The control panel is locked so that the appliance cannot be switched on. To switch it on, the automatic childproof lock must be interrupted. After the appliance operation, the control panel is locked automatically.

### Activating

1. Touch the  touch button.
2. Touch the  touch button.
3. Use the  or  button to select the "Settings".
4. Use the  button to navigate to the next line.
5. Use the  or  button to select "Automatic childproof lock".
6. Use the  button to navigate to the next line.
7. Use the  or  button to select "Activated".
8. Touch the  touch button.
9. Use the  button to navigate to the next line to save the setting.

The "Automatic childproof lock" is activated. The  symbol appears on the display after switching off the appliance.

### Cancelling

1. Press and hold the  touch button until "Childproof lock deactivated" appears on the display.
2. Touch the  touch button.
3. Switch on the required appliance operation.

### Deactivating

1. Press and hold the  touch button until "Childproof lock deactivated" appears on the display.
2. Touch the  touch button.

3. Touch the  touch button.
4. Use the  or  button to select the "Settings".
5. Use the  button to navigate to the next line.
6. Use the  or  button to select "Automatic childproof lock".
7. Use the  button to navigate to the next line.
8. Use the  or  button to select "Deactivated".
9. Touch the  touch button.
10. Use the  button to navigate to the next line to save the setting.

The "Automatic childproof lock" is deactivated.

11. Touch the  touch button.

## One-time childproof lock

The control panel is locked so that the appliance cannot be switched on. To switch it on, the one-time childproof lock must be deactivated. After the appliance is switched off, the control panel is no longer locked.

### Activating and deactivating

1. Press and hold the  touch button until "Childproof lock activated" appears on the display.

The childproof lock is activated.

2. Press and hold the  touch button until "Childproof lock deactivated" appears on the display.

The childproof lock is deactivated.

## Basic settings

There are various settings available to you in order to help use your appliance effectively and simply. You can change these settings as required.

### Changing the basic settings

1. Touch the  touch button.
2. Touch the  touch button.
3. Use the  or  button to select the " Settings".
4. Use the  button to navigate to the next line.
5. Use the  or  button to select the setting.
6. Use the  button to navigate to the next line.

7. Use the < or > button to select the setting.

8. Touch the  touch button.

9. To save the setting, use the  button to select "Save".

To discard the setting, use the  button to select "Discard".

## List of basic settings

Setting	Selection
Language	Select language
Time of day	Sets the current time
Date	Sets the current date
Favourites	Set the heating types that should be shown in the heating types menu → "Setting favourites" on page 18
Audible signal duration	Short
	Medium
	Long
Button tone	Switched off (Exception: The button tone for the  touch button remains switched on)
	Switched on
Display brightness	Adjustable across 5 levels
Clock display	Digital
	Off
Lighting	On during operation
	Off during operation
Childproof lock*	Only key lock
	Door lock and key lock
Automatic childproof lock	Deactivated
	Activated
Action after switching on	Main menu
	Heating types
Night-time dimming	Switched off
	Switched on (display dimmed between 10 p.m. and 5.59 a.m.)
Brand name logo	Display
	Do not display

Fan run-on time	Recommended Minimum
Pull-out system	No Yes (double or triple pull-out system retrofitted)
Factory settings	Load
*) Depending on the appliance model, this basic setting cannot be selected	

## Setting favourites

You can set which heating types are shown in the Types of heating menu.

**Note:** The "CircoTherm hot air", "Circo-roasting" and "Grill, large area" types of heating are always shown in the Types of heating menu. They cannot be deactivated.

1. Touch the ⓘ touch button.
2. Touch the 🏠 touch button.
3. Use the ⏪ or ⏩ button to select the "⚙️ Settings".
4. Use the ⏴ button to navigate to the next line.
5. Use the ⏪ or ⏩ button to select "Favourites"
6. Use the ⏴ button to navigate to the next line.
7. Use the ⏪ or ⏩ button to select the type of heating.
8. Use the ⏴ button to navigate to the next line.
9. Use the ⏪ or ⏩ button to select "Activated" or "Deactivated".

**Note:** If you have selected "Activated", the type of heating is shown in the Types of heating menu. If you have selected "Deactivated", the type of heating is shown in the Types of heating menu.

10. Touch the 🏠 touch button.
11. To save the setting, use the ⏴ button to select "Save".

To discard the setting, use the ⏵ button to select "Discard".

## Sabbath mode

You can set a time of up to 74 hours using Sabbath mode. The food in the cooking compartment remains warm, without you having to switch the appliance on or off.

## Starting Sabbath mode

Before you can use Sabbath mode, you must activate it under "Favourites" in the basic settings. → "Setting favourites" on page 18

Once the Sabbath mode has been activated, you can select it under the menu for the types of heating.

The appliance heats up with top/bottom heating. The temperature can be set between 85 °C and 140 °C.

1. Touch the  touch button.
2. Use the  or  button to select "Sabbath mode".
3. Use the  button to navigate to the next line.
4. Use the  or  button to select the temperature.
5. Use the  button to navigate to the next line.
6. Use the  or  button to select the cooking time.
7. Touch the  touch button.

The appliance starts the operation.

### Notes

- Once Sabbath mode has started, you can no longer change any settings or cancel the operation using the  touch button.
- The operation is not interrupted if you open the appliance door.

Once the Sabbath mode duration has elapsed, a signal sounds. The appliance stops heating. Use the  touch button to switch off the appliance.

## Cancelling Sabbath mode

Touch the  touch button to cancel Sabbath mode.

## Cleaning agent

With good care and cleaning, your appliance will retain its appearance and remain fully functioning for a long time to come. We will explain here how you should correctly care for and clean your appliance.

### Suitable cleaning agents

To ensure that the different surfaces are not damaged by using the wrong cleaning agent, observe the information in the table. Depending on the appliance model, not all of the areas listed may be on/in your appliance.

## Caution! Risk of surface damage

Do not use:

- Harsh or abrasive cleaning agents,
- Cleaning agents with a high alcohol content,
- Hard scouring pads or cleaning sponges,
- High-pressure cleaners or steam cleaners,
- Special cleaners for cleaning the appliance while it is hot.

Wash new sponge cloths thoroughly before use.

**Tip:** Highly recommended cleaning and care products can be purchased through the after-sales service. Observe the respective manufacturer's instructions.

### Warning – Risk of burns!

The appliance becomes very hot. Never touch the interior surfaces of the cooking compartment or the heating elements. Always allow the appliance to cool down. Keep children at a safe distance.

Area	Cleaning
<b>Appliance exterior</b>	
Stainless steel front	Hot soapy water: Clean with a dish cloth and then dry with a soft cloth.  Remove flecks of limescale, grease, starch and albumin (e.g. egg white) immediately. Corrosion can form under such flecks.  Special stainless steel cleaning products suitable for hot surfaces are available from our after-sales service or from specialist retailers. Apply a very thin layer of the cleaning product with a soft cloth.
Plastic	Hot soapy water: Clean with a dish cloth and then dry with a soft cloth.  Do not use glass cleaner or a glass scraper.
Painted surfaces	Hot soapy water: Clean with a dish cloth and then dry with a soft cloth.
Control panel	Hot soapy water: Clean with a dish cloth and then dry with a soft cloth.  Do not use glass cleaner or a glass scraper.

Door panels	Hot soapy water: Clean with a dish cloth and then dry with a soft cloth. Do not use a glass scraper or a stainless steel scouring pad.
Door handle	Hot soapy water: Clean with a dish cloth and then dry with a soft cloth. If descaler comes into contact with the door handle, wipe it off immediately. Otherwise, any stains will not be able to be removed.
<b>Appliance interior</b>	
Enamelled surfaces	Hot soapy water or a vinegar solution: Clean with a dish cloth and then dry with a soft cloth. Soften baked-on food remnants with a damp cloth and soapy water. Use stainless steel wire wool or oven cleaner to remove stubborn dirt. <b>Caution!</b> Never use oven cleaner in the cooking compartment when it is still warm. This may damage the enamel. Remove all food remnants from the cooking compartment and the appliance door before you next heat up the appliance.  Leave the cooking compartment open to dry after cleaning it. It is best to use the cleaning function. → "Cleaning function" on page 21 <b>Note:</b> Food residues can cause white deposits to form. These are harmless and do not affect how the appliance works. Remove using lemon juice if required.
Glass cover for the interior lighting	Hot soapy water: Clean with a dish cloth and then dry with a soft cloth. If the cooking compartment is heavily soiled, use oven cleaner.
Door cover	made from stainless steel: Use stainless steel cleaner. Follow the manufacturers' instructions. Do not use stainless steel care products. made from plastic: Clean using hot soapy water and a dish cloth. Dry with a soft cloth. Do not use glass cleaner or a glass scraper. Remove the door cover for cleaning.
Rails	Hot soapy water: Soak and clean with a dish cloth or brush.
Pull-out system	Hot soapy water: Clean with a dish cloth or a brush. Do not remove the lubricant while the pull-out rails are pulled out – it is best to clean them when they are pushed in. Do not clean in the dishwasher.
Accessories	Hot soapy water: Soak and clean using a dishcloth or brush. If there are heavy deposits of dirt, use a stainless steel scouring pad. Enamelled accessories are dishwasher-safe.

## Notes

- Slight differences in colour on the front of the appliance are caused by the use of different materials, such as glass, plastic and metal.
- Shadows on the door panels, which look like streaks, are caused by reflections made by the interior lighting.

- Enamel is baked on at very high temperatures. This can cause some slight colour variation. This is normal and does not affect operation.

The edges of thin trays cannot be completely enamelled. As a result, these edges can be rough. This does not impair the anti-corrosion protection.

## Keeping the appliance clean

Always keep the appliance clean and remove dirt immediately so that stubborn deposits of dirt do not build up.

### Warning – Risk of fire!

Loose food remnants, fat and meat juices may catch fire. Before using the appliance, remove the worst of the food remnants from the cooking compartment, heating elements and accessories.

### Tips

- Clean the cooking compartment after each use. This will ensure that dirt cannot be baked on.
- Always remove flecks of limescale, grease, starch and albumin (e.g. egg white) immediately.
- Use the universal pan for baking very moist cakes.
- Use suitable ovenware for roasting, e.g. a roasting dish.

## Cleaning function

Your appliance is equipped with a self-cleaning function and EasyClean. You can use the self-cleaning function to clean the cooking compartment. Use the EasyClean cleaning aid for intermediate cleaning of the cooking compartment. Dirt is softened beforehand using EasyClean. It can then be removed more easily.

## Self-cleaning

Use "Self-cleaning" mode to clean the cooking compartment.

You can choose from three cleaning settings.

Setting	Cleaning level	Duration
1	Light	Approx. 1 hour, 15 minutes
2	Medium	Approx. 1 hour, 30 minutes
3	Intensive	Approx. 2 hours

The dirtier the cooking compartment and the longer the dirt has been there, the higher the cleaning setting should be. A cleaning cycle requires only approx. 2.5 – 4.7 kilowatt hours.

**Note:** For your safety, the cooking compartment door locks automatically. It cannot be opened again until the  symbol for the locking mechanism goes out in the status bar. The interior lighting remains off during cleaning

 **Warning: Risk of burns!**

- The cooking compartment becomes extremely hot during the cleaning function. Never open the appliance door. Allow the appliance to cool down. Keep children away from the appliance. Risk of burns!
-  The appliance becomes very hot on the outside during the cleaning function. Never touch the appliance door. Allow the appliance to cool down. Keep children at a safe distance.

 **Warning: Risk of harm to health!**

The cleaning function heats up the cooking compartment to a very high temperature so that food remnants left over from roasting, grilling and baking will burn off. This process releases vapours, which can irritate the mucous membranes. While the cleaning function is running, keep the kitchen well ventilated. Do not remain in the room for long periods. Keep children and pets away. Follow the instructions even when using the Delayed start function with a delayed end time.

## Preparation

 **Warning: Risk of fire!**

- Loose food residues, grease and meat juices may catch fire during the cleaning function. Before starting the cleaning function, remove coarse dirt from the cooking compartment and from the accessories. Risk of fire!
- The appliance will become very hot on the outside during the cleaning function. Never hang combustible objects, e.g. tea towels, on the door handle. Do not place anything against the front of the appliance. Keep children away from the appliance. Risk of fire!
- If the door seal is damaged, a large amount of heat will be generated around the door. Do not scrub or remove the seal. Never operate the appliance if the seal is damaged or missing.

 **Warning – Risk of serious damage to health!**

The appliance will become very hot during the cleaning function. The non-stick coating on baking trays and tins is destroyed and noxious gases are released. Never clean non-stick

baking trays and baking tins using the cleaning function. Only clean enamelled accessories using the cleaning function.

**Caution!** Shelf supports and pull-out rails discolour during cleaning. Before you start the cleaning function, remove the shelf supports and pull-out rails from the cooking compartment.

1. Remove the shelf supports and pull-out rails from the cooking compartment. → "Rails" on page 23
2. Remove the worst of the food residues from the cooking compartment and accessories.
3. Clean along the edges of the cooking compartment in the area around the seal. Do not scrub the seal. → "Cleaning agent" on page 19
4. Clean the inner door panel using hot soapy water and a dish cloth. Dry with a soft cloth. If the cooking compartment is heavily soiled, use oven cleaner.
5. Insert the accessory supports if you wish to clean accessories when the cooking compartment is being cleaned. Make sure that the vertical bar **a**, on the accessory support is facing the front (figure **1**).

6. Insert the rear end of the accessory support as far as it will go into the rear socket **b**, and push the accessory support back **c** (figure **2**).
7. Then insert the front end of the accessory support as far as it will go into the front socket **d**, and push the accessory support down **e** (figure **3**).

8. Whenever you wish to use the cleaning function, make sure that you never leave anything other than an enamelled accessory without anti-stick coating (e.g. the universal pan) on the accessory supports (figure 4).

**Caution!** The wire rack tends to discolour if it is left in the cooking compartment when it is cleaned. Do not attempt to clean the rack using the cleaning function.

**Note:** Further accessories that can be cleaned using the cleaning function are listed in the table for special accessories. → "Accessories" on page 11

## Starting

1. Touch the  touch button.
2. Touch the  touch button.
3. Use the  or  button to select "Self-cleaning ".
4. Use the  button to navigate to the next line.
5. Use the  or  button to select the cleaning setting.

**Note:** Once it has started, the cleaning setting can no longer be changed.

6. Use the  button to navigate to the next line.
7. Touch the  touch button.

The appliance starts self-cleaning.

Ventilate the kitchen when the cleaning function is running.

During self-cleaning, the appliance door is locked automatically. The  symbol appears on the display.

**Note:** If you would like to start self-cleaning later, set an end time.

## Cancelling

Touch the  touch button to cancel. The appliance door cannot be opened until the  symbol goes out.

## Finishing

As soon as self-cleaning has run through, a signal sounds. The appliance door cannot be opened until the 5 symbol goes out.

### Once the cleaning function has ended

1. Allow the cooking compartment to cool down.
2. Wipe off any ash that has been left behind in the cooking compartment and around the appliance door with a damp cloth.
3. If you have left an accessory inside the cooking compartment to be cleaned, remove it and wipe it down with a damp cloth.
4. Lift the accessory support up at the front and remove it. → "Rails" on page 23
5. Refit the shelf supports or pull-out rails. → "Rails" on page 23

## EasyClean

The EasyClean cleaning aid makes it easier to clean the cooking compartment. Dirt is softened beforehand by vaporizing soapy water. It can then be removed more easily.

### Warning – Risk of scalding!

Water in a hot cooking compartment may create hot steam. Never pour water into the cooking compartment when the cooking compartment is hot.

## Starting

### Notes

- The "EasyClean 
1. Remove the accessories from the cooking compartment.
  2. Mix 0.4 litres of water (not distilled water) with a drop of washing-up liquid and pour into the middle of the cooking compartment floor.
  3. Touch the  touch button.
  4. Touch the  touch button.
  5. Use the  or  button to select "EasyClean 
  6. Use the  button to navigate to the next line.
  7. Touch the  touch button.

The appliance starts EasyClean. The remaining time appears on the display.

## End

As soon as the cleaning aid has run through, a signal sounds and the appliance ends the operation automatically.

As soon as you open the appliance door, the interior lighting is switched on so that you can rinse the cooking compartment more easily. The remaining water in the cooking compartment must be removed promptly. Do not leave the remaining water in the cooking compartment for a long time (e.g. overnight). The appliance must not be operated when the cooking compartment is still wet or damp.

## Subsequent cleaning

1. Open the appliance door and remove the remaining water with an absorbent sponge cloth.
2. Clean the smooth surfaces in the cooking compartment with a dish cloth or a soft brush. Stubborn residues can be removed using a stainless steel scouring pad.
3. Remove limescale with a cloth soaked in vinegar. Then wipe with clean water and rub dry with a soft cloth (including under the door seal).
4. Use the ⓘ touch button to switch off the appliance.
5. Depending on the appliance type, open or lower the appliance door to the stop position (approx. 30°) and leave it open for approx. one hour to allow the enamel surfaces in the cooking compartment to dry thoroughly. Alternatively, you can also run the rapid drying function for the cooking compartment.

## Running the rapid drying function for the cooking compartment

1. Once the cleaning aid has been run through, depending on the appliance type, open or lower the appliance door to the stop position (approx. 30°).
2. Touch the ⓘ touch button.
3. Start CircoTherm hot air at 50 °C.
4. After five minutes, switch off the appliance and close the appliance door.

## Removing heavy deposits of dirt

You have several options for removing particularly stubborn deposits of dirt.

- Leave the soapy water to work for some time before starting the cleaning aid.
- Rub soapy water onto the dirt on the smooth surfaces before starting the cleaning aid.

- Repeat the cleaning aid after the cooking compartment has cooled down

## Rails

With good care and cleaning, your appliance will retain its appearance and remain fully functional for a long time to come. This will tell you how to remove the shelves and clean them.

### Detaching and refitting the rails

#### Warning – Risk of burns!

The rails become very hot. Never touch the hot rails. Always allow the appliance to cool down. Keep children away from the appliance.

#### Detaching the rails

1. Lift the rail slightly at the front: **a**, and detach it **b** (figure **1**).
2. Then pull the whole rail towards you and take it out (figure **2**).

Clean the rails with cleaning agent and a sponge. For stubborn deposits of dirt, use a brush.

#### Attaching the rails

The rails only fit on the right or the left side. For both rails, ensure that the retaining bracket is at the front.

1. First, insert the rail in the middle of the rear socket **a**, until the rail rests against the cooking compartment wall, and push it back **b** (figure **1**).
2. Then insert the rail into the front socket **c**, until the rail also rests against the cooking compartment wall here, and press it downwards **d** (figure **2**).

## Appliance door

With good care and cleaning, your appliance will retain its appearance and remain fully functional for a long time to come. This will tell you how to remove the appliance door and clean it.

### Removing and fitting the appliance door

To clean the door panels, you can detach the appliance door.

#### Warning – Risk of injury!

The hinges of the appliance door may snap shut with great force. Always fully turn the two locks for fitting and removing the appliance door.

#### Warning – Risk of injury!

If the appliance door has been removed without turning both locking levers to their limit stops, the hinge may snap shut. Do not reach into the hinge. Call the aftersales service.

### Detaching the appliance door

1. Open the left- and right-hand door locks (fig. **1**). To do this, hold the screwdriver horizontally and use it to push the door lock (black component) on each side of the door all the way up (fig. **2**).

**Tip:** Use a torch to light up the gap so that you can see the door locks.

Door lock closed (fig. **3**)

Door lock open (fig. 4)

2. Open the appliance door approx. 45° (fig. 5)

3. Using a coin, turn both the left- and right-hand locks on the inside of the appliance at the bottom as far as they will go.

Left-hand lock: Clockwise

Right-hand lock: Anti-clockwise

The arrows will now be pointing to one another and the lock will click into place (fig. 6).

Left-hand lock secured (fig. 7)

Right-hand lock released (fig. 8)

4. Move the appliance door back and forth until you hear a quiet click (fig. 9).

The appliance door is now in the lock position. You will only be able to move it slightly.

**Caution!**

Risk of damaging the door hinges. Do not force the appliance door open or closed when it is in the lock position.

If you have forced the appliance door open or closed when it was in the lock position, please contact our after-sales service.

**⚠ Warning: Risk of injury!**

The door handle may break off. Do not carry the appliance door by the door handle. To carry or remove the appliance door, take hold of it with both hands, one on the left and one on the right.

5. Take hold of the appliance door with both hands, one on the left and one on the right, and rotate the door handle upwards slightly **a**, until you are able to pull up the appliance door and remove it **b** (fig. 10).

**⚠ Warning: Risk of injury!**

Do not drop the appliance door.

The appliance door weighs 7 - 10 kg – handle it with care.

6. Set the appliance door down on a flat, soft, clean surface.

### Refitting the appliance door

1. Slide the appliance door over the left- and right-hand guide rollers simultaneously (fig. **1** and **2**).

Ensure that the appliance door is not wedged at an angle and that it is properly fitted in place.

2. Rotate the door handle upwards slightly **a**, (fig. **3**). The appliance door will slide the short distance remaining to the bottom **b** (fig. **3**).

3. Use a coin to release the locks on both sides of the appliance door (fig. **4**).

Left-hand lock: Anti-clockwise

Right-hand lock: Clockwise

4. Open the appliance door slightly until you hear a quiet click. Close the appliance door.

**⚠ Warning: Risk of injury if the door locks are not closed!**

The appliance door may become detached. You may be injured and the appliance door damaged. After refitting the door, always close the left- and right-hand door locks.

5. Close the left- and right-hand door locks (fig. **5**). To do this, hold the screwdriver horizontally and use it to push the door lock on each side of the door all the way down (fig. **6**.)

## Removing and installing the door panels

For cleaning, you can remove the glass panels from the appliance door.

To do this, the appliance door must be removed beforehand (see section "Removing and fitting the appliance door").

**⚠ Warning: Risk of injury!**

The appliance must not be used again until the door panels and appliance door have been correctly fitted.

**⚠ Warning: Risk of injury!**

Components inside the appliance door may have sharp edges. Wear protective gloves.

## Removal

**Note:** Lay the glass panels you have removed on an even surface that is soft and clean.

1. Remove the appliance door.
2. Lay the appliance door with the front side facing down on an even surface that is soft and clean.
3. Push on the left- and right-hand side on the outside of the appliance door until the inner glass is released on both sides (Fig. **1**).
4. Carefully lift the inner glass and remove it in the direction of the arrow (Fig. **2**)

5. Push down on the intermediate panel around **a**, carefully lift the holder **b** until it can be pulled out (Fig. 3).

6. Lift the first and second intermediate panels from below (Fig. 4) and remove them in the direction of the arrow (Fig. 5).

7. Remove the spacers (Fig. 6) and seals (Fig. 7) for cleaning if needed.

8. Clean the door panels on both sides with glass cleaner and a soft cloth.

**⚠ Warning: Risk of injury!**

Scratched glass in the appliance door may develop into a crack. Do not use glass scrapers, or sharp or abrasive cleaning aids or detergents.

9. Dry the door panels and refit them.

## Fitting

**Note:** When fitting the door panels, make sure that they are in the original order.

1. Insert the intermediate panel so that the **a**, arrow on the right-hand side is pointing upwards (Fig. **1** )

2. Check the fit of the four spacers and two seals on the intermediate panel:

- Position the spacers so that each of the lines runs through the centre (Fig. **2** ).
- Attach the seals at the corners (Fig. **3** ).

3. Insert the intermediate panel with the seals and spacers. The arrow on the intermediate panel must line up with the arrow on the frame (Fig. **4** ).

4. Insert the second intermediate panel without the seals and spacers and push it in the direction of the arrow until it is fitted in the frame. The arrow on the intermediate panel must line up with the arrow on the frame (Fig. **5** ).

5. Push down on the intermediate panel around **b**, slide the holder **c** in at an angle and push down until it clicks into place (Fig. **6**).

The holder has been inserted (Fig. **7**).

6. Insert the inner glass into the mounting rail **d** at an angle towards the back (Fig. **8**).

7. Push the inner glass downwards until it clicks into place (Fig. **9**).

## Trouble shooting

If a fault occurs, there is often a simple explanation. Before calling the after-sales service, please refer to the fault table and attempt to correct the fault yourself.

**Tip:** If a meal does not turn out exactly as you wanted, refer to the "Tested for you in our cooking studio" section. Here, you will find plenty of cooking tips and notes.

**⚠ Warning: Risk of injury!**

Incorrect repairs are dangerous. Do not attempt to repair the appliance yourself. Repairs must only be carried out by one of our trained after-sales engineers. If the appliance is defective, call the after-sales service.

**⚠ Warning: Risk of injury!**

Incorrect repairs are dangerous. Repairs may only be carried out and damaged power cables replaced by one of our trained after-sales technicians. If the appliance is defective, unplug the appliance from the mains or switch off the circuit breaker in the fuse box. Contact the after-sales service

**Fault table**

**⚠ Warning: Risk of electric shock!**

- Work on the appliance electronics may only be performed by a specialist.
- Always disconnect the appliance from the power supply when work is carried out on the electronics. Switch off the circuit breaker or remove the fuse from your household fuse box.

Fault	Possible cause	Notes/remedy
The appliance does not work	The plug is not plugged into the mains	Connect the appliance to the power supply
	Power cut	Check whether other kitchen appliances are working
	The circuit breaker is faulty	Check in the fuse box to make sure that the fuse for the appliance is OK
After switching on an operating mode, a message is shown on the display which indicates that the temperature is too high	The appliance has not cooled down sufficiently	Allow the appliance to cool down and switch the operating mode on again
The appliance cannot be switched on; the  symbol is shown on the display	The automatic childproof lock is activated	Press and hold the  touch button until the  symbol goes out
The appliance cannot be operated when it is switched on; the  symbol is shown on the display	The childproof lock is activated	Press and hold the  touch button until the  symbol goes out
The appliance does not heat up;  is shown on the display	Demo mode is activated in the basic settings	Disconnect the appliance from the mains for approx. 10 seconds (switch off the circuit breaker in the fuse box) and then deactivate demo mode in the basic settings within 3 minutes → <i>"Basic settings"</i> on page 18
The appliance door cannot be opened; the  symbol is shown on the display	The appliance door is locked until the cooking compartment has cooled down	Wait until the  symbol goes out
	The childproof lock locks the appliance door	Press and hold the  touch button until the  symbol goes out; adjust the childproof lock setting
"D" or "E" appears on the display, e.g. D0111 or E0111	Technical problem	Switch the appliance off and on again If the message appears again, call the after-sales service. Quote the exact error message

**Maximum operating time exceeded**

Your appliance ends the operation automatically when no cooking time is set and the setting has not been changed for a long time.

The actual cooking time until the operation is stopped automatically varies according to the selected settings.

The appliance display indicates that the operation will end automatically. Afterwards, the operation is stopped.

To use the appliance again, switch it off beforehand. Then switch the appliance on again and set the required operation.

## Replacing the bulb in the top of the cooking compartment

If the cooking compartment light bulb fails, it must be replaced. Heat-resistant, 40 watt, 230 V halogen bulbs are available from the after-sales service or specialist retailers.

When handling the halogen bulb, use a dry cloth. This will increase the service life of the bulb. Only use these bulbs.

### **Warning: Risk of electric shock!**

When replacing the cooking compartment bulb, the bulb socket contacts are live. Before replacing the bulb, unplug the appliance from the mains or switch off the circuit breaker in the fuse box.

### **Warning: Risk of burns!**

The appliance becomes very hot. Never touch the interior surfaces of the cooking compartment or the heating elements. Always allow the appliance to cool down. Keep children at a safe distance.

1. Place a tea towel in the cold cooking compartment to prevent damage.
2. Turn the glass cover anti-clockwise to remove it (figure ).
3. Pull out the bulb – do not turn it (figure ).

Insert the new bulb, making sure that the pins are in the correct position. Push the bulb in firmly.

4. Screw the glass cover back on. Depending on the appliance model, the glass cover may have a sealing ring. If the glass cover has a sealing ring, put it back in place before screwing the cover back on.
5. Remove the tea towel and switch on the circuit breaker.

## Glass cover

If the glass cover of the halogen bulb is damaged, it must be replaced. You can obtain a new glass cover from the after-sales service. Please specify the E number and FD number of your appliance.

### Warning
