

User Manual Dishwasher

Intended use

- This appliance is intended for use in the home and the home environment.

- Use the dishwasher only in the household and only for its designed purpose: for washing domestic dishes.

Safety instructions

Children from 8 years of age or people whose physical, sensory or mental abilities or their lack of experience or knowledge prevent them from using the appliance safely must not use this appliance without supervision or instruction by a responsible person.

Before you switch ON the appliance

Please read the operating and installation instructions carefully. They contain important information on how to install, use and maintain the appliance. Retain all documents for subsequent use or for the next owner.

Delivery

1. Check the packaging and dishwasher immediately for damage caused in transit. Do not switch on a damaged appliance, but contact your supplier.
2. Please dispose of the packaging material in an environmentally friendly manner.
3. Do not let children play with packaging and its parts. There is a risk of suffocation from collapsible boxes and film.

Installation

- Following installation, ensure that the back of the dishwasher is not freely accessible (protection against contact due to hot surface).
- Install and connect the appliance according to the installation and assembly instructions.
- Prior to installation, disconnect the dishwasher from the power supply.
- Ensure that the protective conductor system of the domestic supply has been correctly installed.
- The electrical connection conditions must correspond with the specifications on the dishwasher rating plate 92.
- If the power cord of this appliance is damaged, it must be replaced with a particular power cord. To prevent injury, the power cord may be purchased from customer service only.
- If the dishwasher is installed in a high-sided unit, the unit must be secured properly.
- If the dishwasher is installed below or above other domestic appliances, follow the information for installation in combination with a dishwasher in the installation instructions for the particular appliances.
- Also follow the installation instructions for the dishwasher to ensure that all appliances are operated safely.

- If there is no information or if the installation instructions do not include the appropriate information, contact the manufacturer of these appliances to ensure that the dishwasher can be installed above or below these appliances.
- If you cannot obtain any information from the manufacturer, you must not install the dishwasher above or below these appliances.
- If you install a microwave oven above the dishwasher, the microwave oven may be damaged.
- Install built-under or integratable appliances only under continuous worktops which have been screwed to adjacent cupboards to ensure stability.
- Do not install the appliance near heat sources (radiators, heat storage tanks, cookers or other appliances which generate heat) and do not install under a hob.
- After installing the appliance, ensure that the plug is easily accessible. (See Electrical connection)
- Some models: The plastic housing on the water connection contains an electric valve, the connecting cables are in the supply hose. Do not cut through this hose, do not immerse the plastic housing in water.

In daily use

Read and observe the safety information and instructions for use on the packaging for cleaning and rinsing agents.

Childproof lock (door lock)Door lock *

The description of the childproof lock is at the back in the envelope.

* depending on model

Childproof lock (button lock)

You can secure your appliance from being unintentionally the programme terminated (e.g. improper operation by children).

Activating the button lock:

1. Start the required programme.
2. Hold down the button  for approx. 4 sec. until this  is indicated on the digital display.

If any button is pressed while the programme is running, this  is indicated on the digital display. It is not possible to end (Reset) the programme.

Deactivating the button lock:

- Hold down the button  for approx. 4 sec. until the display  goes out.

When the programme ends (0:00 on the digital display), the button lock is cancelled. If there is a power failure, the button lock is retained. Whenever a programme is restarted, the button lock must be reactivated.

Damage

- The appliance may be repaired and opened up by a technician only. To do this, disconnect the appliance from the power supply. Pull out the mains plug or switch off the fuse. Turn off the tap.
- If the appliance is damaged, especially the fascia (cracks, holes, broken buttons), or the door function is impaired, stop operating the appliance. Pull out mains plug or switch off fuse. Turn off tap, call customer service.

Disposal

1. Make redundant appliances unusable to prevent subsequent accidents.
2. Dispose of the appliance in an environmentally friendly manner.

Warning Risk of injury!

- To prevent injuries, e.g. caused by stumbling, open the dishwasher only briefly in order to load and unload the dishwasher.
- Knives and other utensils with sharp points must be placed with the points downwards in the cutlery basket* or horizontally on the knife shelf* or in the cutlery drawer*.
- Do not lean or sit on the open door.
- In the case of free-standing appliances, ensure that the baskets are not overloaded.
- If the appliance is not in a cavity and a side panel is accessible, the door hinge area must be covered at the side for reasons of safety (risk of injury). The covers are available as optional accessories from customer service or specialist outlets.

* depending on model

Warning Risk of explosion!

Do not add any solvents to the washing chamber. Danger of explosion!

Warning Risk of scalding!

Open the door carefully when the programme is still running. There is a risk of hot water spraying out of the appliance.

Warning Risks to children!

- If fitted, use the childproof lock. An exact description can be found in the back of the envelope.
- Do not allow children to play with or operate the appliance.

- Keep children away from detergents and rinse aid. These may cause chemical burns in the mouth, throat and eyes or asphyxiation.
- Keep children away from open dishwasher. There may be small parts in the dishwasher which children could swallow and the water inside the dishwasher is not drinking water as it may contain detergent residue.
- Ensure that children do not place fingers in the tablet collecting tray . Small fingers could become caught in the slots.
- When opening and closing the door on an eye-level appliance, ensure that children do not become jammed or crushed between the appliance door and the cupboard door below.
- Children could become locked in the appliance (danger of suffocation) or get into another dangerous situation. Redundant appliances: Pull out the mains plug, sever and dispose of the power cord. Destroy the door lock so that the door can no longer be closed.

Protection of the environment

Both the packaging of new appliances and the old appliances themselves contain valuable raw materials and recyclable materials. Please dispose of the individual parts separated according to type. Please ask your dealer or inquire at your local authority about current means of disposal.

Packaging

All plastic parts of the appliance are identified with internationally standardised abbreviations (e.g. >PS< polystyrene). Therefore, plastic waste can be sorted out when the appliance is being disposed of. Please follow the safety instructions under “Delivery”.

Old appliances

Please follow the safety instructions under “Disposal of your appliance”.

This appliance is labelled in accordance with European Directive 2012/19/EU concerning used electrical and electronic appliances (waste electrical and electronic equipment - WEEE). The guideline determines the framework for the return and recycling of used appliances as applicable throughout the EU

Getting to know your appliance

Diagrams of the control panel and the interior of the appliance can be found in the envelope at the front. Individual positions are referred to in the text.

- 32 Rating plate

Overview of menu

The settings can be found in the individual chapters.

d Intensive drying **d:00 - d:01**

r Rinse aid **r:00 - r:06**

P Automatic disconnection **P:00 - P:02**

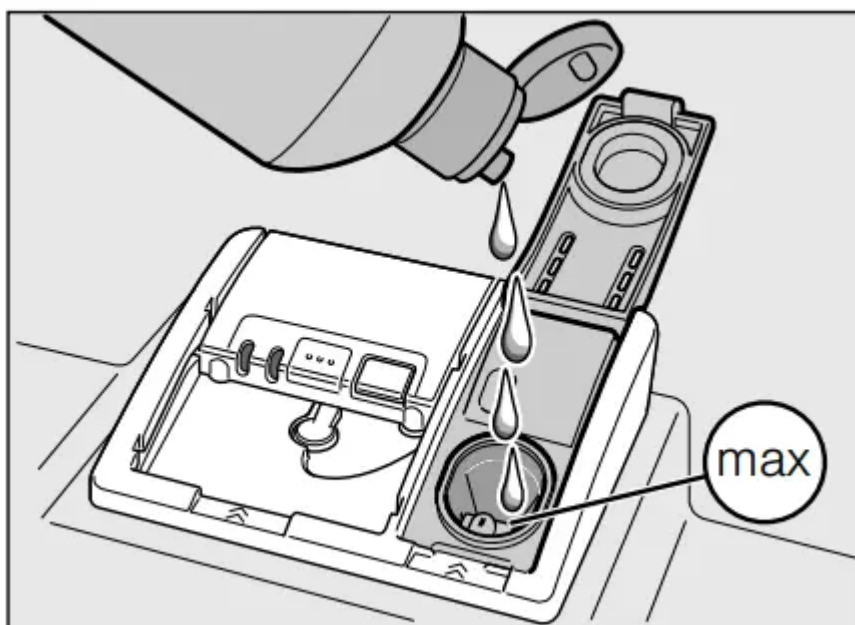

Rinse aid

As soon as the rinse-aid refill indicator **4** is lit on the fascia, there is still a rinse-aid reserve of 1-2 rinsing processes. Refill with rinse aid. The rinse aid is required for stain-free utensils and clear glasses. Use only rinse aid for domestic dishwashers. Combined detergents with rinse-aid component may be used up to a water hardness of 21° dH (37° fH, 26° Clarke, 3.7 mmol/l) only. If the water hardness is over 21° dH, rinse aid must be used.

1. Open the dispenser **29** by pressing and lifting the plate on the cover.

2. Carefully pour rinse aid up to the max. mark in the filler opening.

3. Close cover until it clicks shut.
4. To prevent excessive foam formation during the next rinse cycle, remove any rinse aid which has run over with a cloth.

Setting amount of rinse aid

The amount of rinse aid can be set from $r:00$ to $r:06$. Please set rinse aid on $r:05$ to obtain very good drying results ($r:05$ is already set in factory). Change this setting, only if streaks (select lower setting) or water stains (select higher setting) are left on the utensils.

Change this setting, only if streaks (select lower setting) or water stains (select higher setting) are left on the utensils.

1. Close the door.
2. Switch on ON/OFF switch 1
3. Hold down programme button A and press START button 8 until $d:0$ is indicated on the digital display.
4. Release both buttons.
5. Press programme button A until the factory set value $r:05$ is indicated on the digital display 10.

To change the setting:

1. Press programme button **C**. Each time the button is pressed, the set value increases by one level; when the value of **r:06** has been reached, the display jumps back to **r:00** (off).
2. Press START button **8**. The set value is saved.

Switching off rinse aid refill indicator

If the rinse-aid refill indicator **4** is impaired (e.g. when using combined detergents containing rinse aid component), it can be switched off

- Proceed as described under “Setting amount of rinse aid” and set the value to **r:00**
- The rinse aid refill indicator **4** is now switched off.

Utensils

Not suitable

- Cutlery and utensils made of wood.
- Delicate decorative glasses, craft and antique utensils. These decors are not dishwasher-proof.
- Plastic parts not resistant to heat.
- Copper and tin utensils.
- Utensils which are soiled with ash, wax, lubricating grease or ink.

Aluminium and silver parts have a tendency to discolour and fade during the wash cycle. Even some types of glass (e.g. crystal glass objects) may turn cloudy after many wash cycles.

Glass and utensil damage

Causes:

- Glass type and glass production process.
- Chemical composition of the detergent.
- Water temperature of the wash programme.

Recommendation:

- Use only glasses and porcelain which the manufacturer designates as dishwasher-proof.
- Use a detergent which protects utensils.
- Take glass and cutlery out of the dishwasher as soon as possible after the programme ends.

Loading the dishwasher

1. Remove large food remnants. It is not necessary to prerinse utensils under running water.

2. Place the utensils so that

– they are secure and cannot tip over.

– all utensils with their openings face down.

– parts with curves or indentations are at an angle, thereby allowing water to drain. – does not obstruct rotation of the two spray arms **23** and **25**.

Very small utensils should not be washed in the machine, as they may fall out of the baskets.

Unloading the dishwasher

To prevent water from dripping off the upper basket onto the utensils in the lower basket, it is recommended to empty the appliance from the bottom up. Hot utensils are sensitive to shock! Therefore, when the programme ends, leave the utensils to cool down in the dishwasher until they can be handled.

Cups and glasses

Top basket **22**

Note :

Utensils must not be placed above the tablet collecting tray 1B. These may block the lid of the detergent dispenser and prevent it from opening fully.

Pans

Bottom basket 28

Tip :

- Heavily soiled utensils (pans) should be placed in the bottom basket. The more powerful spray jet provides a better dishwashing result.
- Other examples, such as the best way of loading your dishwasher, can be found on our homepage as a free download. The corresponding Internet address can be found on the back page of these instructions for use.

Cutlery basket

You should always place cutlery unsorted with the points downwards. To prevent injuries, place long, pointed implements and knives on the knife shelf.

Cutlery drawer

Arrange the cutlery in the cutlery drawer 21 as illustrated. Separately arranged utensils are easier to remove after washing. The drawer can be taken out.

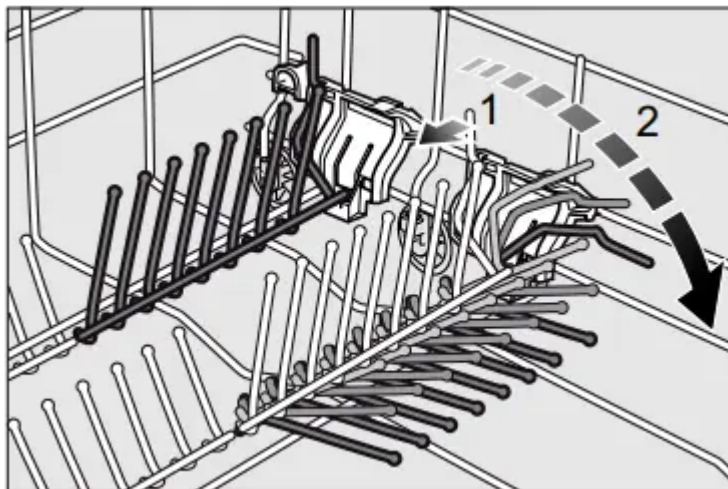

Depending on the model, you can fold down the side shelves to provide more room for taller items of cutlery. The front rows of prongs can be folded down to provide room for wider handles.

Folding spikes *

* depending on model The spikes can be folded down to improve arrangement of pans, bowls and glasses.

Small accessories holder *

* depending on model Light-weight plastic accessories, e.g. cups, lids, etc. can be held securely in the small accessories holder.

Adjusting the height of the basket

The height of the upper utensils basket 22 can be adjusted in 3 stages to create more space either in the upper or lower basket.

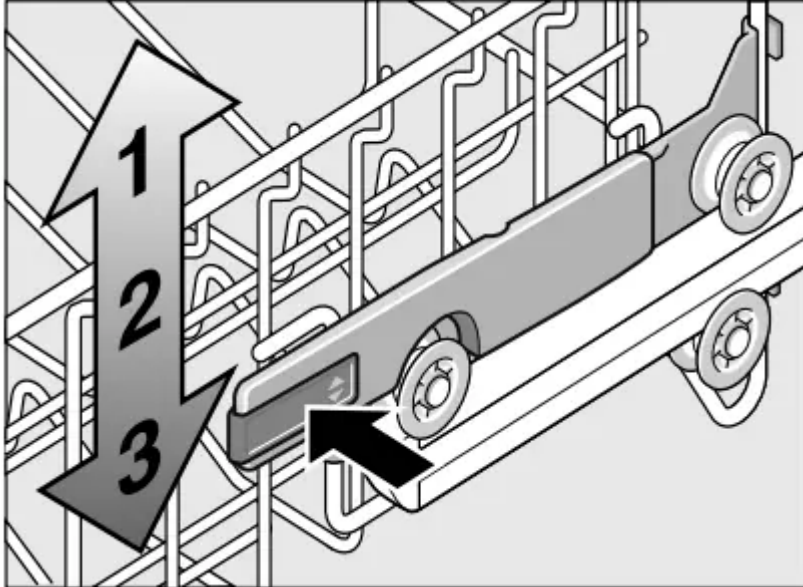

Appliance height 81.5 cm

	Top basket	Bottom basket
Setting 1 max. \emptyset	16 cm	30 cm
Setting 2 max. \emptyset	18.5 cm	27.5 cm
Setting 3 max. \emptyset	21 cm	25 cm

Appliance height 86.5 cm

	Top basket	Bottom basket
Setting 1 max. \emptyset	18 cm	33 cm
Setting 2 max. \emptyset	20.5 cm	30.5 cm
Setting 3 max. \emptyset	23 cm	28 cm

1. Pull out the top basket **22** out.
2. To lower the basket, press in the left and then the right lever on the outside of the basket. In doing so, hold the sides of the basket along the upper edge to prevent it from suddenly dropping.

3. To raise the basket, hold the basket on the sides of the upper edge and lift it up.
4. Before re-inserting the basket again, ensure that it is at the same height on both sides. Otherwise, the appliance door cannot be closed and the upper spray arm will not be connected to the water circuit.

Detergent

You can use tablets as well as powder or liquid detergents for dishwashers, but never use washing up liquid. The dosage can be individually adjusted with powder or a liquid detergent according to the degree of soiling. Tablets contain an adequately large amount of active ingredients for all cleaning tasks. Modern, powerful detergents predominantly use a lowalkaline formulation with phosphate and enzymes. Phosphates bond the lime in the water. Enzymes break down starch and remove protein. Phosphate-free detergents are less frequent. These have a slightly weaker lime bonding capacity and require a higher dosage. To remove coloured stains (e.g. tea, tomato sauce), oxygenbased bleaching agents are usually used.

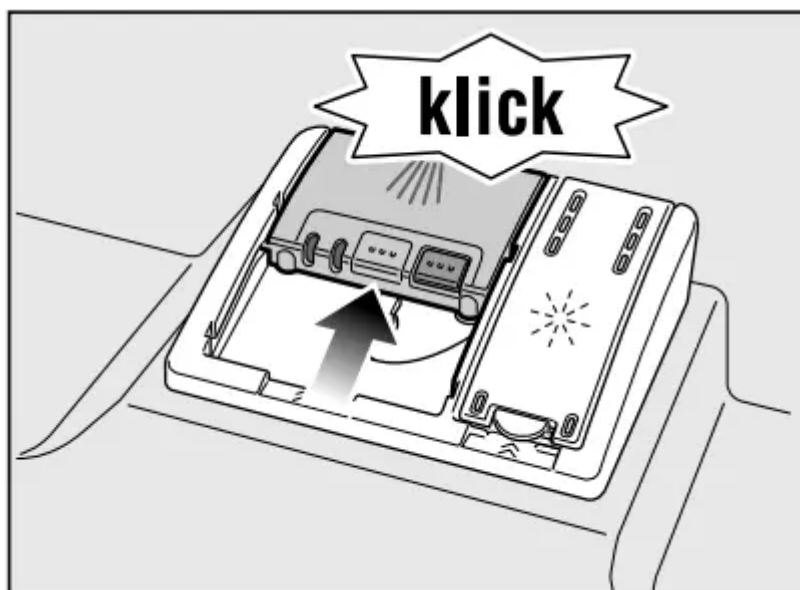

Adding detergent

1. If the detergent dispenser **30** is still closed, press the lock **31** to open the detergent dispenser. Pour detergent into the dry detergent dispenser **30** only

(insert tablet flat, not on its edge). Dosage: see manufacturer's instructions on the packaging. The graduated detergent dispenser **30** helps you add the correct amount of powder or liquid detergent. Usually 20 ml–25 ml are adequate for normal soiling. If using tablets, one tablet is adequate.

2. Close the cover on the detergent dispenser by sliding it up until the lock engages without difficulty.

The detergent dispenser opens automatically at the optimum time depending on the programme. The powder or liquid detergent is distributed in the appliance and is dissolved, the tablet falls into the tablet collecting tray where it dissolves in doses.

Tip : If the utensils are only lightly soiled, slightly less than the indicated amount of detergent is usually adequate. Suitable detergents and care products can be purchased online via our website or via customer service (see back page).

Overview of programmes

The max. possible number of programmes is illustrated in this overview. The corresponding programmes for your appliance can be found on the fascia. The programme data has been measured in the laboratory according to AS/NSZ 2007.

Type of utensils and soiling	Programm	Programme data 1.) Duration: hs/ mins 2.) Energy consumption in kWh 3.) Water consumption in litres 4.) With Aquasensor	Possible additional options	Programme sequence
Pots, utensils and cutlery Highly soiled	 Pots and Pans 70°	1.) 2:15 2.) 1,50 3.) 15 4.) 12	all	Prerinse Clean 70° Intermediate rinse Final rinse 70° Dry
Utensils and cutlery Normally soiled	 Auto 45° - 65°	1.) 1:30 - 2:40 2.) 0,95 - 1,60 3.) - 4.) 8 - 19	all	Is optimised according to the soiling with the aid of sensors.
sensitive utensils, cutlery, temperature-sensitive plastic and glasses slightly adhesive, fresh food remnants	 Eco 45°	1.) 2:50 2.) 0,64 3.) 12 4.) -	all	Prerinse Clean 45° Intermediate rinse Final rinse 45° Dry
Utensils and cutlery Lightly soiled	 Glass 40°	1.) 1:30 2.) 0,90 3.) 14 4.) 11	IntensivZone Express Wash/ Speed Perfect (VarioSpeed) Half load Extra drying	Pre-rinse Clean 40° Intermediate rinse Final rinse 60° Drying
Utensils and cutlery Lightly soiled	 Quick 45°	1.) 0:29 2.) 0,80 3.) 10 4.) -	Extra drying	Clean 45° Intermediate rinse Final rinse 55°
all types of utensils Lightly soiled	 Prerinse	1.) 0:15 2.) 0,05 3.) 4 4.) -	none	Prerinse

Programme selection

You can select a suitable programme according to the type of utensils and degree of soiling.

Information for test institutes

Test institutes can request the conditions for running comparison tests by sending an e-mail to dishwasher@test-appliances.com. Quote the appliance number (ENr.) and the production date (FD) which you can find on the rating plate  on the appliance door.

Additional options

* depending on model Additional options can be set with the buttons 

Express Wash/ Speed Perfect/ (VarioSpeed) *

This function can reduce the running time by approx. 20% to 50% depending on the selected rinse programme. The change in the running time is indicated on the digital display . To obtain optimum cleaning results at a reduced running time, water and energy consumption are increased.

Half load *

If you have only a few items to wash (e.g. glasses, cups, plates), you can switch to “half load”. This will save water, energy and time. It is recommended to put a little less detergent in the detergent dispenser than for a full load.

SanitationPlus *

This function increases the temperatures and retains them for an extra long time to obtain a defined disinfection performance. Continuous use of this function increases the hygiene status. This additional option is ideal for cleaning e.g. chopping boards and baby bottles.

Intensive zone *

Perfect for a mixed load. You can wash very soiled pots and pans in the lower basket together with normally soiled utensils in the upper basket. The spray pressure in the lower basket is intensified, the rinsing temperature is increased slightly.

Extra drying *

Operating the appliance

Aqua sensor *

* depending on model

The Aqua sensor is an optical measuring device (light barrier) which measures the turbidity of the rinsing water.

The Aqua sensor is used according to the programme. If the Aqua sensor is active, "clean" rinsing water can be transferred to the next rinse bath and water consumption can be reduced by 3–6 litres. If the turbidity is greater, the water is drained and is replaced with fresh water. In the automatic programmes the temperature and running time can also be adjusted to the degree of soiling.

Switching on the appliance

1. Turn on the tap fully.
2. Switch on ON/OFF switch . The display of the last selected programme flashes. This programme remains selected if no other programme button  is pressed. The expected programme duration flashes on the digital display).
3. Press the START button . The programme starts running.

Programme sequence indicator

 Your dishes are being cleaned.

 Your dishes are being rinsed.

 Your dishes are being dried.

Remaining running time display

When the programme is selected, the remaining running time of the programme is indicated on the digital display . The running time is determined during the programme by the water temperature, the number of utensils as well as the degree of soiling and may vary (depending on the selected programme).

Timer programming *

* depending on model

You can delay the start of the programme in 1-hour steps up to 24 hours.

1. Close the door.
2. Switch on ON/OFF switch 

3. Press button **6** + until the digital display **10** jumps to **h:01**.
4. Press **6** + or – button until the displayed time corresponds with your requirements.
5. Press START button **8**, timer programming is activated.
6. To delete timer programming, press the **6** + or – button until **10 h:00** is indicated on the digital display. You can change your programme selection at any time until the programme starts.

End of programme

The programme has ended when the value **0:00** is indicated on the numerical display **10**

Automatic switch off after end of programme or interior light*

* depending on model

To save energy, the dishwasher can be automatically switched off 1 min or 120 min after the programme ends. The setting can be selected from **P:00** to **P:02**.

P:00 Appliance does not switch off automatically.

The interior light **20** comes on when the door is opened irrespective of whether the ON/OFF switch **1** (is switched on or off. When the door is closed the light is off. If the door is open for longer than 60 min., the light switches off automatically. The interior light **20** is lit only when the set value **P:00** is selected.

P:01 Appliance switches off after 1 min.

P:02 Appliance switches off after 120 min.

1. Close the door.
2. Switch on ON/OFF switch **1**.
3. Hold down programme button **A** and press START button **8** until **d:0** ... is indicated on the digital display.
4. Release both buttons.
5. Keep pressing programme button **A** until the value **P:0**... is indicated on the numerical display **10**.

To change the setting:

1. Press programme button . Each time the button is pressed, the set value increases by one level; when the value of **P:02** has been reached, the display jumps back to **P:00**.
2. Press START button . The set value is saved.

Switching off the appliance

Short time after the end of the programme:

1. Switch off ON/OFF switch .
2. Turn off the tap (not applicable if Aqua-Stop fitted).
3. Open the door.
4. Remove the utensils when they have cooled down.

Interrupting the programme

1. Switch off ON/OFF switch . The LEDs go out. The programme is saved. If the door was opened on an appliance which has a warm water connection or is heated, first leave the door ajar for several minutes and then close. Otherwise, expansion (pressure) may cause the appliance door to spring open or water to run out of the appliance.
2. To continue the programme, switch on the ON/OFF switch again.

Terminating the programme (Reset)

1. Press START button for approx. 3 sec. The numerical display indicates **0:01**.
2. The programme sequence lasts approx. 1 min. On the digital display is indicated **0:00**.
3. Switch off ON/OFF switch .

Changing the programme

When the START button has been pressed, the programme cannot be changed. The only way a programme can be changed is by Cancel programme (Reset).

Intensive drying

The final rinse uses a higher temperature which improves the drying result. The running time may increase slightly. (Caution if utensils are delicate!)

1. Close the door.
2. Switch on ON/OFF switch .

3. Hold down programme button **A** and press START button **8** until the digital display **10 d:0** ... is indicated.
4. Release both buttons.

To change the setting:

1. Press the button **C** to switch the Intensive drying on **d:01** or off **d:00**
2. Press START button **8**. The set value is saved.

Cleaning and maintenance

A regular inspection and maintenance of your machine will help to prevent faults. This saves time and prevents problems.

Overall condition of the machine

- Check spray arm for grease and limescale deposits. If you find such deposits:
- Fill detergent dispenser with detergent. Start the appliance without utensils in the programme with the highest rinsing temperature. Clean the appliance with detergents/ appliance cleaners which are particularly suitable for use with dishwashers.
- To ensure that the door seal always remains clean and hygienic, regularly clean it with a damp cloth and a little washing-up liquid.
- If the appliance is switched off for a prolonged period, leave the door ajar to prevent the formation of an unpleasant odour.

Never use a steam cleaner to clean your dishwasher. The manufacturer is not liable for any consequential damage. Regularly wipe the front of the appliance and fascia with a damp cloth; water and a little washing up liquid are adequate. Do not use sponges with a rough surface or abrasive detergents, as these could scratch the surfaces. Stainless steel appliances: To prevent corrosion, avoid using sponge cloths or wash them out thoroughly several times before using for the first time.

Rinse aid

- Check the refill indicator **4**. If required, refill rinse aid.

Filters

The filters **26** keep large foreign objects in the rinsing water away from the pump. These foreign objects may occasionally block the filters. The filter system consists of a coarse filter, a flat fine filter and a microfilter.

1. After each washing cycle check the filters for residue.
2. Unscrew filter cylinder as illustrated and take out filter system.

3. Remove any residue and clean filters under running water.

4. Re-install filter system in reverse sequence and ensure that the arrow marks are opposite each other after closing the filter system.

Spray arms

Limescale and contaminants in the rinsing water may block nozzles and bearings on the spray arms **23** and **25**.

1. Check outlet nozzles on the spray arms for blockages.
2. Unscrew the upper spray arm **23**.
3. Remove the lower spray arm **25** upwards.

4. Clean spray arms under running water.
5. Re-engage or screw on spray arms.

Fault, what to do?

Experience has shown that you can rectify most faults which occur in daily operation yourself. This ensures that the machine is quickly available to you again. In the following overview you can find possible causes of malfunctions and helpful information for rectifying them.

Waste water pump

Large food remnants or foreign objects which were not captured by the filters may block the waste water pump. The rinsing water will then be above the filter.

Warning – Risk of cuts!

When cleaning the waste water pump, ensure that you do not injure yourself on pieces of broken glass or pointed implements. In this case:

1. First always disconnect the appliance from the power supply.
2. Take out top basket **22** and bottom basket **28**
3. Remove the filters **26**.
4. Scoop out water, use a sponge if required.

5. Prise out the white pump cover (as illustrated) using a spoon. Grip the cover on the crosspiece and lift diagonally inwards. Remove cover completely.

6. Check impeller wheel and remove any foreign objects.

7. Place cover in the original position and press down until it engages (click).

8. Install filters.

9. Re-insert baskets.

Fault table

Fault	Cause	Remedial action
"Check water supply" display 3 lights up.	Supply hose kinked	Install supply hose without kinks.
	Tap turned off.	Turn on the tap.
	Tap jammed or calcified.	Turn on the tap. Flow rate must be min. 10 l/ min. when water supply is open.
	Filter in the water supply blocked	Switch off the appliance and pull out the mains plug. Turn off the tap. Unscrew water connection.  Clean filter in the supply hose. Screw water connection on again. Check for leaks. Reconnect power supply. Switch on the appliance.
Error code E:07 is lit	Intake opening (on right inside of appliance) covered by utensils.	Arrange utensils so that the intake opening is not obstructed.
Error code E:12 is lit.	Heating element soiled.	Clean appliance with dishwasher cleaning agent.
Error code E:22 is lit.	Filters 26 are soiled or blocked.	Clean filters. (See Cleaning and maintenance)
Error code E:24 ... is lit.	Waste water hose is blocked or kinked.	Install hose without kinks, remove any residue.
	Siphon connection still sealed.	Check connection to siphon and open if required.

	Cover on the waste water pump loose.	Lock cover correctly. (See Waste water pump)
Error code E:25 is lit.	Waste water pump blocked or cover on the waste water pump is not locked in position.	Clean pump and lock cover correctly. (See Waste water pump)
Error code E:27 is lit.	Mains voltage too low.	Not an appliance fault, have the mains voltage and electrical installation checked.
A different error code is indicated on the digital display. (E:01 to E:30)	A technical fault has probably occurred.	Switch off appliances with the ON/OFF switch 1 . After a short time restart the appliance. If the problem recurs, turn off the tap and pull out the mains plug. Call customer service and mention the error code.
Display flashes	Door not closed properly.	Close the door. Ensure that no objects (utensil, fragrance dispenser) are protruding over the basket and preventing the door from closing.
Refill indicator for rinse-aid 4 is lit.	No rinse aid.	Refill rinse aid.
Refill indicator for rinse-aid 4 is not lit.	Refill indicator switched off	Activation/deactivation (see chapter Rinse aid).
	There is still enough rinse aid available.	Check refill indicator, level.
Water is left in the appliance at the end of the programme.	Filter system or area under the filters 26 is blocked.	Clean filters and area underneath (see Waste water pump).
	The programme has not yet ended.	Wait until programme ends or reset (see Terminating the programme).

Utensils not dry.	No or too little rinse aid in the dispenser.	Refill rinse aid.
	Programme selected without drying.	Select programme with drying (see Overview of programmes, Programme sequence).
	Water collecting in depressions on the utensils and cutlery.	Arrange utensils in a sloping position, arrange affected utensils as sloping as possible. 
	The combined detergent used has a poor drying performance.	Use different combination detergent with better drying performance. Use of rinse aid also increases the drying performance.
	Intensive drying to increase drying not activated.	Activate intensive drying (see Operating the appliance)
	Utensils were removed too early or drying process had not ended yet.	Wait until program ends or wait until 30 min after program ends before removing utensils.
	The eco rinse aid used has a poor drying performance.	Use a proprietary rinse aid. Eco products are much less effective.
Plastic utensils not dry	Special properties of plastic.	Plastic has a lower heat storage capacity and therefore dries less well.
Cutlery not dry.	Cutlery not arranged properly in the cutlery basket.	Separate cutlery if possible, prevent contact points.
		Arrange cutlery properly and separate if possible.

	Cutlery not arranged properly in the cutlery drawer.	
Appliance interior wet after rinse cycle.	No appliance fault.	On account of the “Condensation drying” principle, water droplets are physically induced and required in the container. The humidity in the air condenses on the inner walls of the dishwasher, drains and is pumped out.
Food remnants on the utensils.	Utensils placed too closely together, utensils basket overfilled.	Arrange utensils with adequate clearance between them ensuring that the spray jets can reach the surface of the utensils. Prevent contact points.
	Spray arm rotation obstructed.	Arrange utensils so that the spray arm can rotate without obstruction.
	Spray arm nozzles blocked.	Clean the spray arm nozzles, (See Cleaning and maintenance).
	Filters 26 dirty	Clean filters, (see Cleaning and maintenance).
	Filters 26 inserted incorrectly and/or not engaged.	Insert and engage filters correctly.
	Rinse programme too weak.	Select a more intensive rinse programme.
	Utensils precleaned too intensely; sensors therefore decide on weak programme sequence. Stubborn	Do not prerinse utensils. Remove only large food remnants.

	soiling cannot be completely removed.	
	Tall narrow receptacles in corner areas are not rinsed adequately.	Do not place hollow receptacles too obliquely and do not place in the corner area.
	Top basket 22 on right and left not set to same height.	Set top basket to same height using side levers.
Detergent residue	Detergent dispenser cover blocked by utensils and therefore does not open fully.	Detergent dispenser cover must not be obstructed by utensils. Do not place utensils or fragrance dispenser in the tablet collecting tray.
	Detergent dispenser cover blocked by the tablet	Tablet must be inserted flat and not upright.
	Tablets used in the quick or short programme. Dissolving time of the detergent is not reached in the selected short programme.	Dissolving time of tablets too long for a quick or short programme. Use a detergent powder or select a more intensive programme.
	Washing effect and dissolving performance are reduced after a prolonged storage time or detergent is very lumpy	Change detergent.
Water stains on plastic parts	Droplet formation on plastic surface is physically unavoidable.	Use a more intensive programme (more water changes).

	After drying, water stains are visible	Arrange utensils in a sloping position. Use rinse aid.
Washable or water-soluble coatings in the container or on the door.	Detergent substances are deposited. These coatings cannot usually be removed with chemicals (appliance cleaner, ...).	Change detergent brand. Clean appliance mechanically.
	Only for glasses: Initial glass corrosion – can only apparently be wiped off.	See Glass and utensil damage
White, stubborn coatings; limescale on the utensils, container or door	Detergent substances are deposited. These coatings cannot usually be removed with chemicals (appliance cleaner, ...).	Change detergent brand. Clean appliance mechanically.
	Underdosing of detergent	Increase detergent dosage or change detergent.
	Too weak rinse programme selected.	Select a more intensive rinse programme
Tea or lipstick residue on the utensils.	Too low rinsing temperature	Select programme with higher washing temperature.
	Too little or unsuitable detergent.	Use suitable detergent at correct dosage.
	Utensils precleaned too intensely; sensors therefore decide on weak programme sequence. Stubborn soiling cannot be completely removed.	Do not prerinse utensils. Remove only large food remnants.

Coloured (blue, yellow, brown), difficult to remove to non-removable coatings in the appliance or on stainless steel utensils.	Film formation consisting of ingredients from vegetables (e.g. cabbage, celery, potatoes, noodles, ...) or the tap water (e.g. manganese).	Can be partly removed with machine cleaner or by mechanical cleaning. Coatings are harmless.
	Film formation caused by metallic components on silver or aluminium utensils.	Can be partly removed with machine cleaner or by mechanical cleaning.
Plastic parts discoloured.	Too low rinsing temperature.	Select programme with higher washing temperature.
	Utensils precleaned too intensely; sensors therefore decide on weak programme sequence. Stubborn soiling cannot be completely removed.	Do not prerinse utensils. Remove only large food remnants.
Initial or existing, irreversible clouding of glass	Too much rinse aid.	Set rinse aid amount to lower setting.
	No rinse aid added or setting too low.	Add rinse aid and check dosage (recommended setting 4-5).
	Detergent residue in the final rinse programme section. Detergent dispenser cover blocked by utensils (cover does not open fully).	Detergent dispenser cover must not be obstructed by utensils. Do not place utensils or fragrance dispenser in the tablet collecting tray.
	Utensils precleaned too intensely; sensors therefore decide on weak programme	Do not prerinse utensils. Remove only large food remnants.

	sequence. Stubborn soiling cannot be completely removed	
Initial or existing, irreversible clouding of glass.	Glasses not dishwasher-proof, only suitable for dishwasher.	Use dishwasher-proof glasses. Avoid long steam phase (standing time after wash cycle ends). Use wash cycle at lower temperature. Use detergent with glass protection component.
Rust spots on the cutlery	Cutlery not adequately rustresistant. Knife blades are frequently more severely affected.	Use corrosion-resistant cutlery.
	Cutlery will also rust if rusting parts are rinsed at the same time (pan handles, damaged utensil baskets, etc.).	Do not wash rusting parts.
The appliance does not start.	The mains fuse has tripped.	Check mains fuse.
	Power cord not inserted.	Ensure that the power cord is plugged all the way into the back of the appliance and into the socket. Check that the socket functions.
	The appliance door has not been shut properly.	Close the door.
ProgrammDoor cannot be closed.e starts automatically.	You did not wait until programme ended.	Perform reset. (See Terminating the programme).
The door is difficult to open.	Child-proof lock is activated	Deactivate childproof lock. (See instructions for use at the back)

Door cannot be closed	Door lock has been activated.	Close door with increased force.
	Door cannot be closed due to installation.	Check appliance installation: Door or attached parts must close without obstruction.
Cover on the detergent dispenser cannot be closed.	Detergent dispenser or cover guide blocked by sticky detergent residue.	Remove detergent residue.
Detergent residue in the detergent dispenser or in the tablet collecting tray.	Spray arms blocked by utensils, therefore detergent is not rinsed out.	Ensure that the spray arms can rotate freely.
	The detergent dispenser was damp when filled.	Pour detergent into the dry detergent dispenser only.
Appliance stops in the programme or programme is interrupted.	Door not closed properly	Close the door.
	Do not place utensils or fragrance dispenser in the tablet collecting tray. Top basket presses against inner door and prevents door from being closed securely.	Check whether rear panel is being pressed in, e.g. by socket or by hose holder which has not been removed.
	Power and/or water supply interrupted.	Restore power and/or water supply.
Filling valves making striking noises.	Depends on domestic installation, as appliance is not defective. No effect on appliance function.	No remedial action possible.

Knocking or rattling noise.	Spray arm strikes the utensils, utensils not positioned correctly	Position utensils so that the spray arms do not strike the utensils.
	If there is a low load, the water jets strike the washing tank directly.	Load the appliance with more utensils or distribute the utensils more evenly in the dishwasher.
	Light utensils move during the wash cycle.	Arrange light utensils securely.
Unusual foam formation	Handwash liquid in the rinse aid dispenser.	Immediately refill rinse aid dispenser with rinse aid.
	Rinse aid spilled	Remove rinse aid with a cloth.

Technical specifications

Weight:

max. 60 kg

Voltage: 220–240 V, 50 Hz or 60 Hz Connected load: 2.0–2.4 kW Fuse: 10/16 A (UK 13A)

Power input: switched off 0.10 W not switched off 0.10 W Water pressure: at least 0.05 MPa (0.5 bar), maximum 1 MPa (10 bar). At a higher water pressure: connect pressure-reducing valve ahead. Inlet rate: minimum 10 litres/minute Water temperature: for cold water connection only. Capacity: 12–15 place settings (depending on model).
