- The remote control operate at a range of 5 to 6M effectively
- Do not expose the remote control sensor to a bright light.

INITIAL SETUP

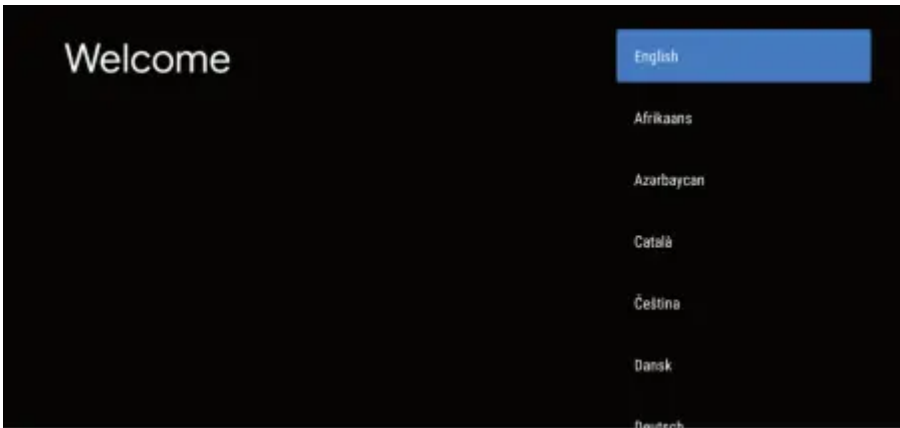

For the first initial setup, on screen setup wizard will guide you through setting up your TV.

Please follow according to onscreen guide to setup your TV correctly.

Be sure to follow the below prompts to pair your Bluetooth remote control. After the pairing is successful, you can now operate the TV.

Use the ▲ / ▼ buttons to select system language, then press OK/SELECT to confirm.

If you just want to use your TV normally, please select "SKIP"

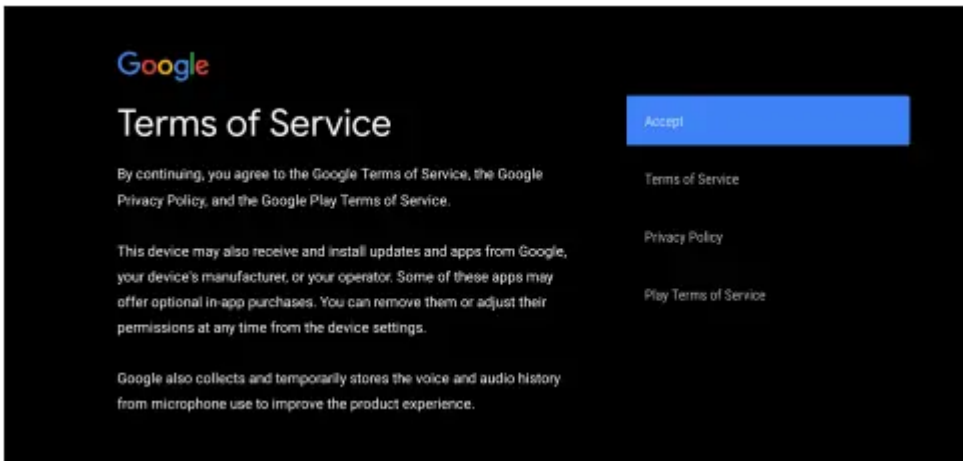

To connect your Android Smartphone to your TV, Select "Continue".

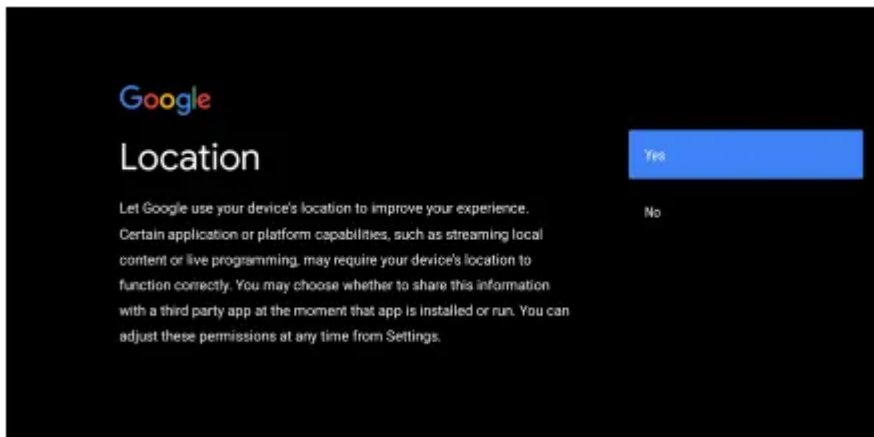

Press ▲ / ▼ to select your Wi-Fi you wish to connect to, enter the password and then confirm to connect.

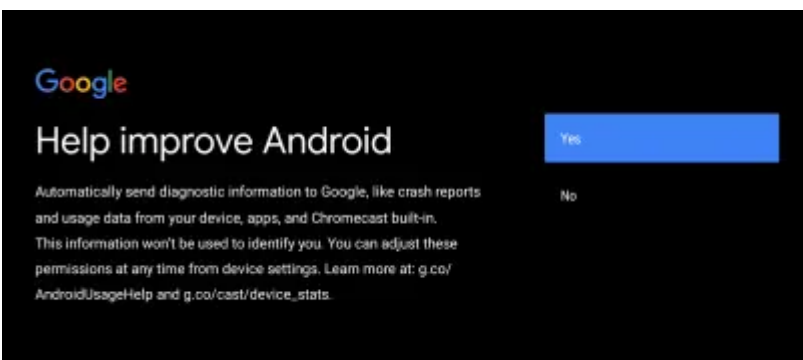

By accepting the Google Terms of Service to improve the product experience, Select “ACCEPT” to proceed with this condition.

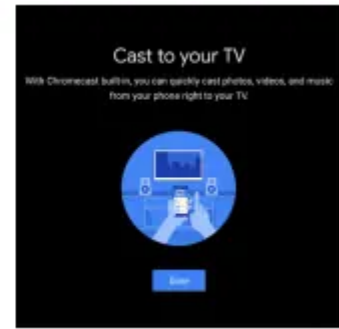

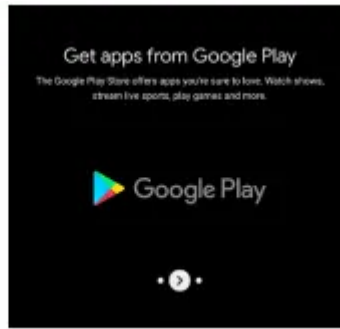

Select “YES” if you want your location identified on your ANDROID TV. (Note: Select “YES” if you want google to inform you on weather more accurately based on location).

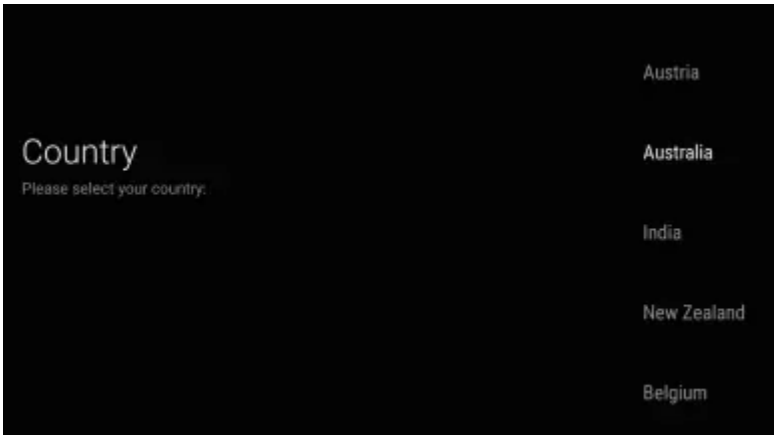

By Agreeing and selecting “YES”, you agree to automatically send diagnostic information to Google to help improve your Google experience.

Informational screens will now appear, you can scroll through steps by press “RIGHT” directional button to continue.

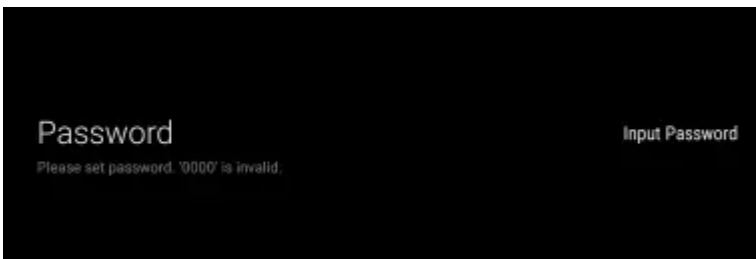

Select the country you are using the device in with the ▲ / ▼ directional buttons.

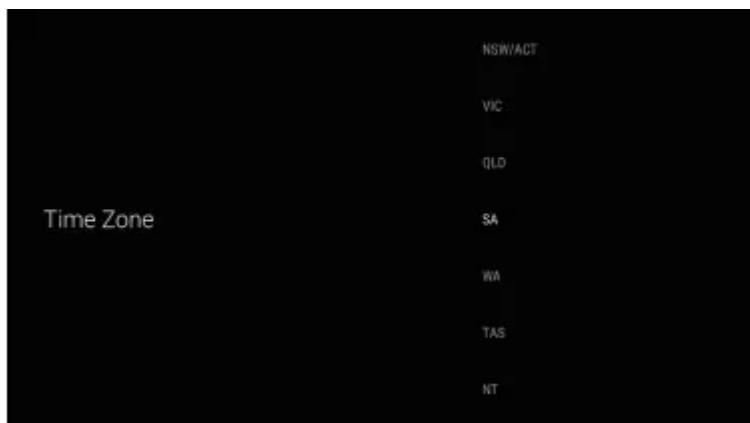

Used to set a password of your TV for security purposes.

NOTE: make sure to save the password, as you can then refer to password when required.

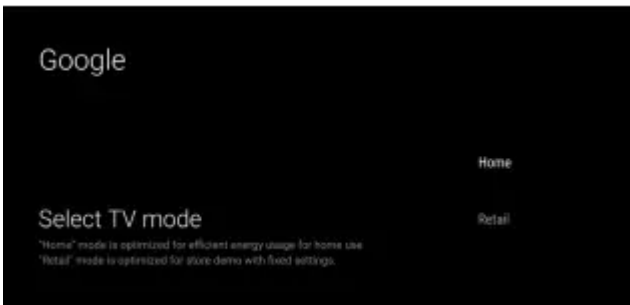

Select the TimeZone you are using the device in with the ▲ / ▼ directional buttons.

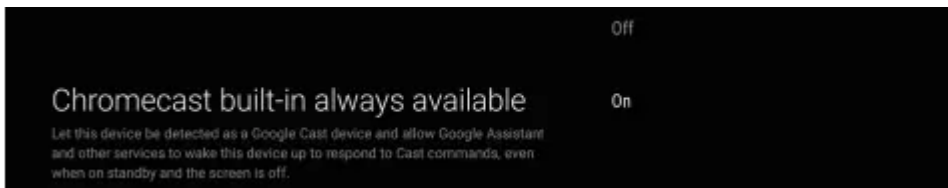

Please be sure in this step, select "HOME" if you are using this TV for use at home.

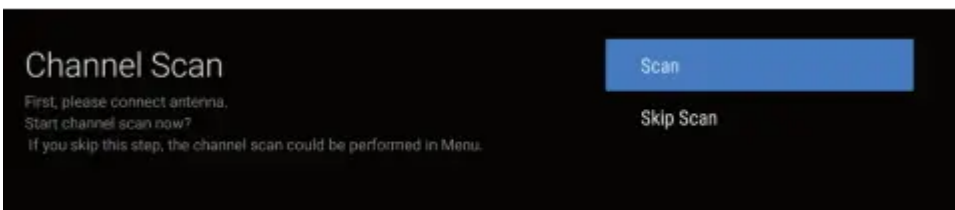

Make sure to confirm once you have selected "HOME".

Let this device be detected as a Google Cast device and allow Google Assistant and other services to wake this device up to respond to Cast commands, even when on standby and the screen is off.

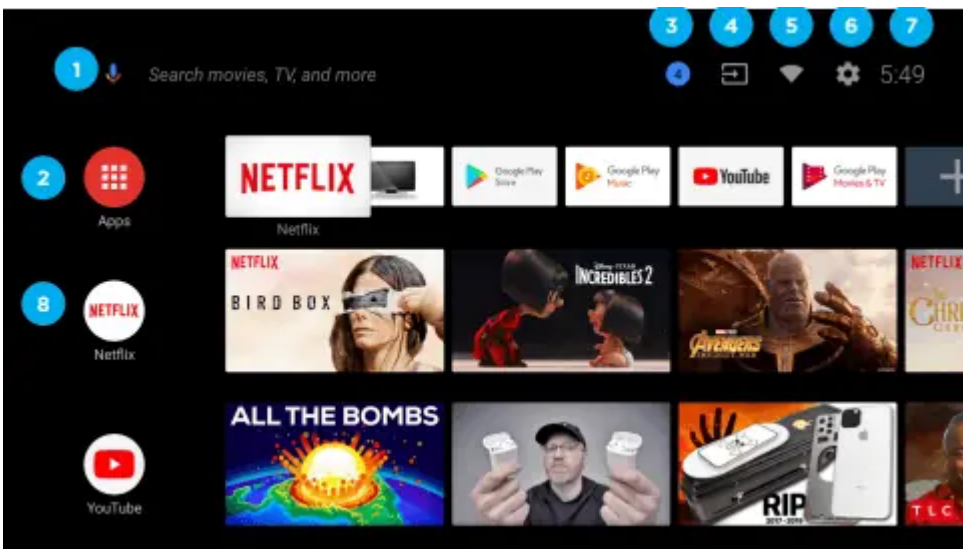

Make sure to select "SCAN" to auto tune your TV to search for local DTV channels.

NOTE: Please make sure Antenna (RF) cable is plugged into the ANT IN port located on back of TV. (refer to page 11 TV ports - #10).

FAQS

GENERAL PROBLEMS WITH TV SET

Symptoms	Items to Check and Actions to Follow
"Ghost" or double image	<ul style="list-style-type: none"> • This may be caused by obstruction to the antenna due to high rise buildings or hills. Using a highly directional antenna may improve the picture.
No power	<ul style="list-style-type: none"> • Check if the TV's AC power cord is plugged into the outlet. • Unplug the TV, wait for 60 seconds. Then reinsert plug into the outlet and turn on the TV again.
No picture	<ul style="list-style-type: none"> • Check antenna connections at the rear of the TV to see if it is properly connected to the TV. • Possible broadcast station trouble. Try another channel. • Adjust the contrast and brightness settings. • Check the Closed Captions control. Some TEXT modes could block the screen.
Good picture but no sound	<ul style="list-style-type: none"> • Increase the volume level by pressing the VOL+ button on the remote control or on the TV side control panel. • Press the MUTE button on the remote control to ensure mute is off.
Good sound but poor color	<ul style="list-style-type: none"> • Adjust the contrast, color and brightness settings.
Poor picture	<ul style="list-style-type: none"> • Poor picture quality may occur when an activated S-VHS camera or camcorder is connected to your TV and other peripherals at the same time. Switch off one of the peripherals.
Snowy picture and noise	<ul style="list-style-type: none"> • Check the antenna connection.
Horizontal dotted line	<ul style="list-style-type: none"> • This may be caused by electrical interference (e.g. hair dryer, nearby neon lights, etc.) Turn off the equipment.
Television not responding to remote control	<ul style="list-style-type: none"> • Check whether the batteries are working. Replace if necessary. • Clean the remote control sensor lens on the TV. • You can still use the buttons on the side of your TV.
Pixels (dots) that are always dark or always lit	<ul style="list-style-type: none"> • Your TV is precision-manufactured using an extremely high level of technology. However, sometimes pixels may not display correctly. These types of occurrences are inherent to this type of product and do not constitute a defective product.
