

TV Viewing

You can use convenient features while watching TV. Additionally, you can edit the channel list or create favourite channel lists.

Using the Guide

See an overview of each channel's programme lineup.

 Live > TV Guide

 The image on your TV may differ from the image above depending on the model and geographical area.

In the Guide, you can see the daily programme schedules for each broadcaster, see programme information, choose a programme to watch and set up a schedule viewing or recording.

 Recording may not be supported depending on the model or geographical area.

 To view the Guide while watching TV, press the  (Channel) button on the Samsung Smart Remote or Remote Control.

 On the Standard Remote Control, press the GUIDE button.

 To see information about analogue channels and use the analogue channel functions of the Guide, you must finish the service provider settings in initial setup.

 To view the Guide, you must first set the TV's clock ( >  Settings > General > System Manager > Time Clock).

 Service provider settings in initial setup may not be supported on geographical area.

Move the focus to the programme you want in the Guide, and then press and hold the Select button. You can use the following functions:

 These functions may not be supported in the Guide depending on the model or geographical area.

- Record

You can make a recording of a current programme.

- Stop

You can stop the recording function that is currently running.

- Edit Recording

Time You can change the start and end times of scheduled programme recordings.

- Schedule Viewing

You can schedule the viewing of a broadcast scheduled programme.

- Schedule Recording

You can schedule recording of a broadcast scheduled programme.

- Cancel Scheduled Viewing

You can cancel scheduled viewings.

- Cancel Scheduled Recording

You can cancel scheduled recordings.

- View Details

You can see detailed information about the selected programme. The information may differ or may not be provided depending on the broadcast signal.

To move to the Channel Filter or Aerial Type, Schedule Manager screen: Press the  or  button. (If the remote control  button is , press it twice.)

- Channel Filter

You can view channels and programmes categorised by the types defined in Channel List.

- Aerial Type

You can change the type of broadcast signals the TV receives.

 This function may not be supported depending on the incoming broadcast signal.

- Schedule Manager

You can see the Schedule Manager or Recording & Schedule Manager screen.

 These functions may not be supported in the Guide depending on the model or geographical area.

Recording Programmes

Record a current or upcoming programme using a USB device instead of a video recorder.

 This function may not be supported depending on the model or geographical area.

 Read all precautions before using the recording feature. Refer to "Before Using the Recording and Timeshift Functions" for more information.

 You can record only the programmes that are received through an aerial.

 The  appears next to the programmes and channels scheduled for recording.

 If you go to  > Live TV while no USB device is connected, the Schedule Manager screen appears in place of the

- Recordings screen.

Using the instant and schedule recording options from the Guide screen

- Instant Recording

Select a live programme from the Guide, press and hold the Select button, and then select Record from the popup menu to start recording immediately.

- Schedule Recording

Select a programme scheduled to be broadcast, press the Select button, and then select Schedule Recording to set up a scheduled recording of the scheduled programme.

Using the instant and schedule recording options while watching a programme

- Instant Recording

If you select Record after pressing the button twice, and then press the Select button or after pressing the button once while watching a broadcast, recording starts.

- Schedule Recording

Press the Select button while watching a programme to display the programme info window. Use the left or right directional button to select a scheduled programme. Press the Select button, and then select Schedule Recording to set up a scheduled recording of the scheduled programme.

Scheduling a video recording after entering the date and time

 > Live TV > Recordings > Schedules > Add Recording

To schedule a recording, set the values for Aerial, Channel, Repeat, Date, Start Time and End Time of the broadcast programme to record, and then select Save.

 Check the current time in  >  Settings > General > System Manager > Time Clock.

 The menus may not appear depending on the geographical area.

Managing the schedule recording list

 > Live TV > Recordings > Schedules

You can change scheduled recording information or cancel scheduled recordings.

 The menus may not appear depending on the model or geographical area.

 You can schedule up to 30 recordings or viewings at once using Schedule Recording and Schedule Viewing.

- Edit

You can set the start and end times for a schedule recording. You can set the start time up to 10 minutes before the programme starts and the end time up to 10 minutes after the programme ends.

- Delete

You can delete scheduled recordings.

- View Details

You can view detailed information about scheduled recordings.

Viewing recorded programmes

 > Live TV > Recordings > Recordings

Select a file containing a recording from the list. The file is played back.

Move the focus to the recorded file and then view Play, Delete or View Details on the right menu.

Buttons that appear may differ depending on the file being played. For more information about control buttons, refer to

 Buttons and functions available while recording a programme or Timeshift".

 The menus may not appear depending on the model or geographical area.

Setting up a schedule recording start

 > Live TV > Recordings > Settings

- Start Recording Early

You can set the time to start the recording earlier than the broadcast start time in the programme guide.

- Continue Recording After

You can set the time to end the recording later than the broadcast end time in the programme guide.

- Symbol Information

Provide users with the information of the symbol and the explanation about an icon used in the schedule manager.

 The menus may not appear depending on the model or geographical area.

Setting Up Schedule Viewing

Configure the TV to show a specific channel or programme at a specific time and date.

 The  appears next to programmes that have been configured for a scheduled viewing.

 To set up a schedule viewing, you must first set the TV's clock ( >  Settings > General > System Manager > Time Clock).

Using the schedule viewing options from the guide screen

On the Guide screen, select a programme you would like to view, press and hold the Select button, and then select Schedule Viewing in the pop-up menu that appears.

Using the schedule viewing options while watching a programme

Press the Select button while watching TV. The Programme Info window appears. Select a programme that will be broadcast using the left or right directional buttons. Press the Select button, and then select Schedule Viewing to schedule viewing of that programme.

Using schedule viewing to view programmes at a specified time on a specified date

 > Live TV > Schedule > Manager > Add Viewing

 > Live TV > Recordings > Schedules > Add Viewing

To schedule a viewing, set the values for Aerial, Channel, Repeat, Date and Start Time of the broadcast programme to view, and then select Save.

 Check the current time in Settings General System Manager Time Clock.

 This function may not be supported depending on the geographical area.

Setting the schedule Viewing Time

 > Live TV > Schedule > Manager

 > Live TV > Recordings > Schedules

You can change scheduled viewing information or cancel scheduled viewings.

 You can set up a maximum total of 30 Schedule Viewing and Schedule Recording entries.

 The menus may not appear depending on the model or geographical area.

- Edit

You can set the start time of a scheduled viewing. If you choose a programme from the Guide, the Start Time can be set to up to 10 minutes before the programme.

- Delete

You can delete scheduled viewings.

- View Details

You can view detailed information about scheduled viewings.

Using Timeshift

Play, pause or rewind live TV.

You can pause and rewind live TV by using Timeshift. Activating this function disables the Broadcasting function.

To activate the Timeshift function while watching TV, press the  button twice, and then press the Select button or press the  button and then select Timeshift, or press the  button.

 This function may not be supported depending on the model or geographical area.

 When the Timeshift function is running, some functions are not available in  >  Settings > Broadcasting.

 To use Timeshift, you must connect a USB device for recording.

 Read all precautions before using the Timeshift function. For more information, refer to "Before Using the Recording and Timeshift Functions".

Buttons and functions available while recording a programme or Timeshift

Review available buttons and functions of how they are used while recording a programme or Timeshift.

This function may not be supported depending on the model or geographical area.

The available buttons and functions may differ with the functions.

When you press the down directional button, the control bar appears and the following options are available:

- Pause / Play

You can use the following functions when the video is paused. Note that with the video paused, the TV does not play audio.

- Slow Rewind or Slow Forward: Allows you to play the video slowly (1/8, 1/4, 1/2) backward or forward by selecting the  or  option. To increase the rewind or forward speed in slow mode up to 3 times, select the option repeatedly. To return to normal speed, select the  option.

When the Slow Rewind function is activated, you can view the difference between the current recording time and the current rewind time.

- Jump Backward / Jump Forward

Press the up directional button to move the focus to the playback control bar, and then select the left or right directional button in the playback control bar to move backward or forward by 10 seconds in the video.

When the Jump Backward function is activated, you can view the difference between the current recording time and the current rewind time.

- Rewind / Fast Forward

This function is not available while you are watching a programme that is currently being broadcast.

- Stop Recording / Stop Timeshift

Ends the recording or Timeshift function.

- Record

You can switch from the Timeshift function to the recording function. When switching to the recording function, you can include the content recorded by the Timeshift function in the new recording.

This function is only available when the Timeshift function is running.

- Edit Recording Time

You can set for what period of time the programme will be recorded.

This function is only available when a programme is being recorded.

- Go to Live TV

Select to return to the current scenes of the programme when the Timeshift function is playing its past scenes.

- Info

Displays the programme info window of the programme you are recording or time-shifting.

Using the Channel List

Change the channel or check programmes on other digital channels.

> Live TV > Channel List

Using the Channel List, you can change the channel or check programmes on other digital channels while watching TV. On Standard Remote Control, press the CH LIST button.

The Channel List screen contains the following icons:

-  A favourite channel.
-  A locked channel.
-  CI card required channel.

If you press the left directional button when viewing the Channel List screen, you can use the following functions:

- Terrestrial, Cable or Satellite

Allows you to choose between Terrestrial, Cable and Satellite.

This function may not be supported depending on the incoming broadcast signal.

This function may not be supported depending on the model or geographical area.

- All

Displays the channels that have been automatically searched.

The channels received to the currently selected Terrestrial, Cable or Satellite are displayed.

- Samsung TV Plus

While the TV is connected to the Internet, you can watch popular programmes or highlights for each theme through a virtual channel at any time. As with regular channels, the TV provides the daily programme schedules for Samsung TV Plus.

 This function may not be supported depending on the model or geographical area.

- Channel Type

Sorts the list so that it includes channels of a selected type. However, Channel Type can only be used channels contain the type information.

 This function may not be supported depending on the incoming broadcast signal.

- Favourites

Displays Favourites 1 to Favourites 5.

 It displays only the favourites list that includes the favourites channel.

- Sort

Sorts the list by Number or by Name.

 This option is only available on digital channels and may not always be available.

Editing channels

Edit the channels stored on your TV.

 > Live TV > Channel List > Edit Channels

The Edit Channels screen icons indicate the following:

-  A favourite channel.
-  A locked channel.
-  CI card required channel.

On the Edit Channels screen, you can select channels and use the following functions:

- Lock / Unlock

After selecting a target channel in Edit Channels, select Lock or Unlock. Then the channel is locked or unlocked. A locked channel cannot be viewed.

 If you want to use this function or set the password, set  >  Settings > Broadcasting > Apply Channel Lock to On.

For more information about how to set your password, refer to "Setting up a password".

- Delete

After selecting a target channel to remove in Edit Channels, select Delete. Removed channels are not displayed in the Channel List.

- Rename channel

After selecting a channel to change in Edit Channels, select Rename channel to change the channel name.

You can rename only one channel at a time.

This function is only available for analogue broadcasts.

- Change Number

After selecting a channel to change in Edit Channels, select Change Number to change the channel number.

This function may not be supported depending on the model or geographical area.

When a channel number is changed, its channel information is not updated automatically.

- Restore Samsung TV Plus

You can restore the deleted Samsung TV Plus channels.

This function may not be supported depending on the model or geographical area.

- Save and Exit

Saves and closes the Edit Channels screen.

Using a Personal Favourites List

Designate frequently watched channels as favourite channels.

Favourite channels are highlighted in the Edit Channels and Channel List screens with the  symbol. You can create up to five favourites lists so that your family members can create their own personal favourites list.

Create a favourites list

> Live TV > Channel List > Edit Channels

1. Press the left directional button on the remote control to select the desired Favourites list.
2. Press the right directional button to select Add Channels.

3. Select the desired channel in the list on the screen.

4. Press Add to add the selected channel in the Favourites list.

Select Favourites 1 - Favourites 5 on the Edit Channels screen and the following functions are available:

- Add Channels

In the channel list, select one or more channels to add in the favourites list and then select Add Channels.

- Remove

Removes one or more channels from a favourites list.

- Change order

Changes the order of one or more channels selected in a favourites list.

- Rename Favourites

Renames a favourites list.

- Save and Exit

Saves and closes the Edit Channels screen.

TV-Viewing Support Functions

Use the functions that are available while watching TV.

Changing the broadcast signal

 > Live TV > Channel List

Press the directional button on your remote control, move the focus to Terrestrial, Cable, Satellite or Service Provider, and then press the Select button.

 You do not need to use this function if your TV is connected to a cable box or satellite box.

 The displayed Channel List may vary depending on the incoming broadcast signals.

Scanning for available channels

 >  Settings > Broadcasting (Auto Tuning Settings) > Auto Tuning

 This function may not be supported depending on the model or geographical area.

 If the TV is connected to a cable box or satellite box, you do not need to do this.

 The DVB-T2 system may not be supported depending on the geographical area.

 The Auto Tuning Settings may not appear depending on the model or geographical area.

Selecting the cable network search option

 >  Settings > Broadcasting (Auto Tuning Settings) > Cable Search Option

Sets additional search options such as the frequency and symbol rate for a cable network search.

 This function may not be supported depending on the model or geographical area.

 The Auto Tuning Settings may not appear depending on the model or geographical area.

Scanning for available channels on standby mode

 >  Settings > Broadcasting (Auto Tuning Settings) > Standby Auto Tuning

Automatically scan for channels while your TV is in standby mode.

 This function may not be supported depending on the model or geographical area.

 The Auto Tuning Settings may not appear depending on the model or geographical area.

Setting the Wake-up time

 >  Settings > Broadcasting (Auto Tuning Settings) > Wake-up Timer

Schedule timer to turn the TV on and scan channels automatically.

 This function may not be supported depending on the model or geographical area.

 The Auto Tuning Settings may not appear depending on the model or geographical area.

Setting the functions for the service provider

 >  Settings > Broadcasting > Service Provider Settings

You can configure the service provider-related settings.

- Service Provider

Turns on or off the service provider function.

- About Service Provider

Displays the current service provider and its information detail.

- Open Service Provider Settings

You can set available service providers.

 This function may not be supported depending on the model or geographical area

Checking digital channel signal info and strength

 >  Settings > Support > Device Care > Self Diagnosis > Signal Information

 If your TV is attached to a separate, over-the-air antenna, you can use the signal strength information to adjust the antenna for increased signal strength and improved HD channel reception.

 Signal Information is only available for digital channels.

 This function may not be supported depending on the model or geographical area.

Restricting Viewing to Specific Channels

 >  Settings > Broadcasting > Apply Channel Lock

By selecting the menu, you can turn on or off the Apply Channel Lock function.

Lock specific channels to prevent children from watching adult content.

 To use this function, the PIN number is required.

Using Mark Adult Channels

 >  Settings > Broadcasting > Mark Adult Channels

Enables or disables all adult services. When disabled, adult services will not be available.

 This function may not be supported depending on the model or geographical area.

Selecting the broadcasting audio option

 >  Settings > Broadcasting > Dual Sound

Set audio options for stereo or bilingual broadcasts. For more information, refer to "Supported broadcasting audio options".

 This function may not be supported depending on the model or geographical area.

Troubleshooting

If you have a problem with your TV, you can access various solutions while watching TV. If your problem is not addressed in the Troubleshooting section, view the FAQ section or contact the Samsung Call Centre.

Picture Issues

When the TV has trouble with the picture, these steps may help resolve the problem.

Testing the picture

Settings > Support > Device Care > Self Diagnosis > Picture Test

Before you review the list of problems and solutions below, use Picture Test to determine if the problem is caused by the TV. Picture Test displays a high definition picture you can examine for flaws or faults.

Flickering and Dimming

If your TV is flickering or dimming sporadically, you may need to disable some of the energy efficiency features.

Disable Ambient Light Detection, Power Saving Mode, Motion Lighting, or Contrast Enhancer.

- Settings General Eco Solution Ambient Light Detection
- Settings General Eco Solution Power Saving Mode
- Settings General Eco Solution Motion Lighting
- Settings Picture Expert Settings Contrast Enhancer

Run Picture Test. When the tested image quality is normal, check the signal of the connected device.

- Settings Support Device Care Self Diagnosis Picture Test

Component Connections and Screen Colour

If the color on your TV screen is not correct or the black and white colors are off, run Picture Test.

- Settings Support Device Care Self Diagnosis Picture Test

If the test results indicate that the problem is not caused by the TV, do the following:

When using the component cable, confirm that the green (Y), blue (Pb), and red (Pr) jacks are plugged into their proper connectors.

For more information about how to connect an external device, run Connection Guide.

- Source Connection Guide

Screen Brightness

If the screen appears too dim, try changing the settings under Reset Picture or disabling Brightness Optimisation.

- Settings Picture Expert Settings Reset Picture
- Settings General Power and Energy Saving Brightness Optimisation

If the colors on your TV are correct but just a little too dark or bright, try adjusting the following settings first

- Settings Picture Expert Settings Contrast
- Settings Picture Expert Settings Brightness
- Settings Picture Expert Settings Sharpness
- Settings Picture Expert Settings Color
- Settings Picture Expert Settings Tint (G/R)

Blurring or Juddering

If you notice blurring or juddering on the screen, use the Picture Clarity Settings function to resolve the issue.

- Settings Picture Expert Settings Picture Clarity Settings

Unwanted Powering Off

If your TV appears to turn off by itself, try disabling some of the TV's energy efficiency functions.

See if Sleep Timer has been enabled. The Sleep Timer automatically turns the TV off after a specified period of time.

- Settings General System Manager Time Sleep Timer

If the Sleep Timer has not been enabled, see if Auto Power Off or Off Timer has been enabled and disable it.

- Settings General Eco Solution Auto Power Off
- Settings General System Manager Time Off Timer

Problems Powering On

If you are having problems powering on your TV, there are a number of things to check before calling the service department.

Confirm that the TV's power cable is connected correctly at both ends and that the remote control is operating normally.

Make sure that the antenna cable or cable TV cable is firmly connected.

If you have a cable box or satellite box, confirm that it is plugged in and turned on.

In case of a model that supports One Connect Box, check the One Invisible Connection or One Connect Cable between the TV and One Connect Box

Unable to find a Channel

If your TV is not connected to a cable box or satellite box, run Auto Program.

- Settings Broadcasting Auto Program

When using a broadcast receiver such as set-top box and IPTV, check the connection to the TV.

- Source Connection Guide

When the symptom persists, contact your service provider.

Unable to find a Channel

If your TV is not connected to a cable box or satellite box, run Auto Tuning.

- Settings Broadcasting (Auto Tuning Settings) Auto Tuning

The Auto Tuning Settings may not appear depending on the model or geographical area.

When using a broadcast receiver such as set-top box and IPTV, check the connection to the TV.

- Source Connection Guide

When the symptom persists, contact your service provider.

The TV image does not look as good as it did in the store

Store displays are tuned to a digital UHD channel or HD channel.

Change the output resolution of your devices, such as digital broadcast receiver, IPTV, and set-top box to UHD or HD.

Be sure to use an HDMI cable to enjoy high quality videos.

Source Connection Guide Video Device HDMI

To connect the TV with your PC, make sure that your PC's graphic card supports UHD resolutions.

For more information about the supported UHD resolutions, refer to "Supported Resolutions for UHD Input Signals."

Make sure that the set-top box or cable box supports the content or broadcast for UHD and set the resolution. For more information, contact your service provider.

When using a Samsung TV Plus channel, check the network connection. When the network speed is slow, the app may not work or the image quality may be poor.

The picture is distorted

The compression of video content may cause picture distortions, especially in fast moving pictures from sports programs and action movies.

If the signal reception is weak or poor, screen distortion may be visible but it is not a malfunction.

Mobile phones used close to the TV (within 1m) may cause noise on analog and digital channels.

The color is wrong or missing

If you're using a Component connection, make sure that the Component cables are connected to the correct jacks.

Incorrect or loose connections may cause color problems or a blank screen.

The color is poor or the picture is not bright enough

Go to Picture and then adjust the Picture Mode, Brightness, Sharpness, and Color settings.

- Settings Picture Picture Mode
- Settings Picture Expert Settings Brightness
- Settings Picture Expert Settings Sharpness
- Settings Picture Expert Settings Color

See if Power Saving Mode has been enabled.

- Settings General Eco Solution Power Saving Mode

Try resetting the picture.

- Settings Picture Expert Settings Reset Picture

There is a dotted line on the edge of the screen

Change Picture Size Settings to 16:9 Standard.

- Settings Picture Picture Size Settings

Change the output resolution of your external device.

The picture is black and white.

Check whether Greyscale is set to On.

- Settings General Accessibility Greyscale

The picture won't display in full screen

HD channels will have black bars on either side of the screen when displaying upscaled SD(4:3) content.

Black bars will appear at the top and bottom of the screen when you watch movies that have aspect ratios different from your TV.

Adjust the picture size options on your external device or set the TV to full screen.

- Settings Picture Picture Size Settings Picture Size

The Caption function in the TV menu is deactivated

When an external device is connected with an HDMI or Component cable, the Caption function is unavailable. Adjust the caption setting on the external device.

Subtitles appear on the TV screen.

Turn off the Subtitle function in Subtitle Settings

- Settings General Accessibility Subtitle Settings Subtitle

The HDR of the connected external device turns off

Expand the reception range of the corresponding HDMI input signal in Input Signal Plus.

- Settings General External Device Manager Input Signal Plus

The TV remains on or does not turn on automatically.

If the surrounding area is too dark or bright, the motion sensor may not work normally. The performance of the motion sensor may be affected by the installation environment (height, tilt, obstacles). If the clothes you wear or your skin colour is similar to the surrounding shading, the motion sensor may not work properly.

 Motion Sensor may not be supported depending on the model or geographical area.

The TV responds to all visual changes around it (lights, displays, dogs, out-of-window changes, and other occurrences). You can adjust the response level by adjusting the sensitivity of the motion detector.

-  >  Art Settings > Motion Detector

 Motion Detector may not be supported depending on the model or geographical area.

 If the test picture does not appear or there is noise or distortion, the TV may have a problem.

Contact Samsung's Call Centre for assistance.

 If the test picture is displayed properly, there may be a problem with an external device. Please check the connections.

 If the problem persists, check the Signal Information or refer to the external device's user manual.

Sound and Noise Issues

When the TV has difficulties with sound, these steps may help resolve the problem

Testing the sound

-  >  Settings > Support > Device Care > Self Diagnosis > Sound Test

If the TV plays the Sound Test melody without distortion, there may be a problem with an external device or the broadcast signal's strength.

How can I connect an audio device to the TV?

The connection method may differ depending on the audio device such as HDMI (eARC), Optical, Bluetooth and Wi-Fi.

For more information about how to connect an audio device, run Connection Guide

- Source Connection Guide Audio Device

There is no sound or the sound is too low at maximum volume.

Check the volume control of your TV, and then check the volume control of the external device (cable box or satellite box, DVD, Blu-ray, etc.) connected to your TV.

Check the cable connection between an external device and the TV and then try cable connection again.

The picture is good but there is no sound.

Set Sound Output to TV Speaker.

- Settings Sound Sound Output

If you are using an external device, check the device's audio output option.

For example, you may need to change your cable box's audio option to HDMI if the box connected to your TV is using an HDMI cable.

To listen to computer sound, connect an external speaker to the computer's audio output connector.

If your TV has a headphone jack, make sure there is nothing plugged into it.

Reboot the connected device by disconnecting and then reconnecting the device's power cable.

With a set-top box or cable box, check the cable connection and reboot the external device. When the symptom persists, contact your service provider.

No sound is heard.

Check whether Digital Output Audio Format is set to Pass-Through.

If you select the Pass-Through option to use an AV receiver that does not support Dolby Digital+, no sound is output with Dolby Digital+ content.

It is recommended to set Digital Output Audio Format to Auto when the connected receiver supports only the limited audio formats.

- Settings Sound Expert Settings Digital Output Audio Format Auto

The speakers are making an odd sound.

Run Sound Test.

- Settings Support Device Care Self Diagnosis Sound Test

Make sure that the audio cable is connected to the correct audio output connector on the external device.

For antenna or cable connections, check the Signal Information. A low signal level may cause sound distortions.

- Settings Support Device Care Self Diagnosis Signal Information

The sound is interrupted.

The sound may frequently be interrupted when a Bluetooth speaker is used. Make sure that the Bluetooth speaker and the wireless access point are on a straight line and the Bluetooth speaker is placed as close as possible to the TV.

To minimise interruptions, we recommend a wireless access point that uses a 5 GHz frequency. 5 GHz may not be available depending on the model.

When the symptom persists, it is recommended to use wired connection such as HDMI-eARC and Optical

Whenever a function is used on the TV or the channel is changed, the TV voices the activity. The TV explains in voice-over the video scenes displayed on the screen.

Turn off the Voice Guide function in Voice Guide Settings.

- Settings General Accessibility Voice Guide Settings Voice Guide

The TV audio is not being played through the AV receiver.

Check the A/V receiver's power supply and its settings.

- When connecting the optical cable between the TV and A/V receiver, make sure that the sound output is set Optical on your TV.
- In case of HDMI-eARC connection, make sure that it is connected to the eARC dedicated HDMI port on your TV. However, the eARC can be used only when the A/V receiver supports the eARC feature.

The sound is not heard clearly.

Change to an appropriate sound mode.

-  >  Settings > Sound > Sound Mode

When Intelligent Mode and Adaptive Sound+ are turned on, the sound effects are automatically adjusted to the surroundings.

-  >  Settings > General > Intelligent Mode Settings > Intelligent Mode

 This function may not be supported depending on the model. To optimise the sound depending on the surroundings, select Adaptive Sound+.

-  >  Settings > General > Intelligent Mode Settings > Adaptive Sound+

 This function may not be supported depending on the model

The volume of the external device cannot be adjusted.

Check the cable connection between the TV and the external device.

When connecting an external speaker such as home theater via HDMI, make sure it is connected to the HDMI (eARC) port on the TV. Make sure that the Settings General External Device Manager Anynet+ (HDMI-CEC) is active on your TV.

I want to turn off and on the TV and audio device at the same time.

When you connect the Samsung Soundbar to the TV via Bluetooth, the power turns off and on together. It may not be supported depending on the Samsung Soundbar model.

When you connect an audio device that supports HDMI eARC to the HDMI (eARC) port on the TV, the power turns off and on together.

Channel and Broadcast Issues

When the TV has difficulties receiving broadcasts, these steps may help resolve the problem

" Weak or No Signal" displayed in TV mode or cannot find channel.

Make sure that the external device is connected securely and turned on. Move to Sources to switch to other input sources.

- Source Sources

When using a set-top box or cable box, check the broadcast signals or the network that is connected to the external device.

The TV is not receiving all channels.

Confirm that the coaxial cable is securely connected to the TV. Run Reset or Auto Tuning.

-  >  Settings > General > Reset

-  >  Settings > Broadcasting (Auto Tuning Settings) > Auto Tuning

 The Auto Tuning Settings may not appear depending on the model or geographical area.

The subtitles are not provided on a digital channel.

When watching channels with the antenna cable connected, run Subtitle Settings.

-  >  Settings > General > Accessibility > Subtitle Settings

Some channels may not have subtitle data. When watching a channel on an external device such as a set-top box and cable box, turn on the subtitle function on the device. For more information, contact your service provider

Broadcasting is deactivated.

Broadcasting is only available when Source is set to TV.

Broadcasting cannot be accessed while you watch TV using a cable box or satellite box.

Broadcasting cannot be accessed while a recording is in progress or the Timeshift function is running.

External Device Connectivity Issues

When the TV has difficulties connecting to external devices such as a PC, game console or mobile device, these steps may help resolve the problem.

The "Mode Not Supported" message appears.

Adjust the output resolution of the external device to a resolution supported by the TV.

The video is OK but there is no audio.

If you are using an HDMI connection, check the audio output setting on your PC.

If you are using a DVI to HDMI cable, a separate audio cable is required.

To listen to the computer sound, connect external speakers to the audio output connection of the computer.

I want to connect to a PC and mobile device via screen mirroring.

To wirelessly connect the TV to your PC, read the instructions at PC Screen Sharing (Wireless) in Connection Guide, and then try to connect.

- Source Connection Guide PC Screen Sharing (Wireless)

Confirm that the TV and your PC are connected to the same network.

To wirelessly connect the TV to your mobile device, read the instructions at Smartphone Screen Sharing (Smart View) in Connection Guide, and then try to connect.

- Source Connection Guide Smartphone Screen Sharing (Smart View)

If the TV has difficulties connecting to your PC or mobile device due to surrounding radio interferences, change the frequency of the wireless access band, and then try to connect.

No screen appears when connecting the TV to an external device.

For more information about how to connect an external device, run Connection Guide.

- Source Connection Guide

Make sure that the external device is connected securely and turned on. Move to Sources to switch to other input sources.

- Source Sources

Using HDMI Troubleshooting, you can check the connection to HDMI cable and external devices (takes approximately 2 minutes).

- Source Connection Guide Video Device HDMI Troubleshooting

When using a set-top box or cable box, check the broadcast signals or the network that is connected to the external device.

I want to connect to a Bluetooth speaker

For more information on how to connect a Bluetooth speaker, see Audio Device Bluetooth in Connection Guide.

- Source > Connection Guide > Audio Device > Bluetooth

The PC screen does not appear or it flickers

When the PC screen does not appear or the PC is not recognised, check the power supply of the PC, and then reconnect the HDMI cable between the PC and TV. When the symptom persists, check that the PC is in Sleep mode, and then set Input Signal Plus to On.

-  >  Settings > General > External Device Manager > Input Signal Plus

When the set resolution is not matched, it may cause a blank or flickering screen. For the PC supported resolution, see 'Read Before Connecting a Computer (Supported Resolutions).'

Network Issues

When the TV has difficulties connecting to the Internet, these steps may help resolve the problem.

Settings Support Device Care Self Diagnosis Smart Hub Connection Test

If the TV has trouble with network connection or TV services, check the Smart Hub connection status

Wireless network connection failed. Unable to connect to a wireless access point.

- Make sure that no items that can generate electromagnetic interferences are placed between the TV and the wireless/wired access point.
- Check if the access point is turned on. If it is on, turn it off, wait 1 or 2 minutes, and then turn it on.
- Enter the correct password if required.
- If the wireless connection fails, connect the TV to the access point via a LAN cable.
- If the TV can connect to the Internet normally via the wired connection, there might be a problem with the access point. In this case, try using a different access point.

Wired network connection failed.

Check if the LAN cable is plugged in on both ends. If it is plugged in, check if the access point is turned on. If it is on, turn it off, wait 1 or 2 minutes, and then turn it on.

Auto IP configuration failed. Unable to connect to the network.

Check if the LAN cable is plugged in on both ends. If it is plugged in, check if the access point is turned on.

If the access point is on, turn it off, wait 1 or 2 minutes, and then turn it on.

Disconnect and then reconnect the power cable of the TV, or press and hold the power button for 3 seconds.

Connected to a local network, but not to the Internet.

1. Check if the Internet LAN cable is connected to the access point's external LAN port.
2. Check the DNS setting in IP Settings.

- Settings General Network Network Status IP Settings

Network setup is completed, but unable to connect to the Internet.

If the problem persists, contact your Internet service provider.

Wired networks are not supported by some models.

Anynet+ (HDMI-CEC) Issues

When Anynet+ (HDMI-CEC) isn't working, these steps may help resolve the problem.

What is Anynet+?

You can use the TV's remote control to control external devices that support Anynet+ (HDMI-CEC) and that are connected to the TV via an HDMI cable. For example, if a connected external device supports Anynet+, you can have the connected device turn on or off when you turn the TV on or off.

Anynet+ does not work.

Confirm that the device is an Anynet+ device. The Anynet+ system supports Anynet+ devices only.

Check if the power cord of the Anynet+ device is properly connected.

Check the cable connections of the Anynet+ device.

Go to Anynet+ (HDMI-CEC) and see if Anynet+ (HDMI-CEC) has been set to On.

- Settings General External Device Manager Anynet+ (HDMI-CEC)

Anynet+ may not function when some other functions are active, including Channel Search, Smart Hub, Initial Setup, etc.

If you have disconnected and then reconnected the HDMI cable, scan for devices again or turn your TV off and on.

I want to start Anynet+. I also want the connected devices to turn on when the TV is turned on.

Move the focus to the Anynet+ device at Source, press the up directional button to move to Anynet+ (HDMI-CEC), and then press the Select button.

Check if the Anynet+ device is properly connected to the TV, and then select Anynet+ (HDMI-CEC) menu to see if Anynet+ (HDMI-CEC) is set to On.

- Settings General External Device Manager Anynet+ (HDMI-CEC)

I want to exit Anynet+. It is inconvenient to turn on other devices because the TV also turns on. It is inconvenient because the connected devices (e.g. set-top box) turn off together.

To turn off the Anynet+ function of a device connected to the TV, turn off the Anynet+ (HDMI-CEC) function of the device.

- Settings General External Device Manager Anynet+ (HDMI-CEC)

When Anynet+ (HDMI-CEC) is turned off, the sound bar connected via the HDMI eARC) port does not turn off and on together with the TV. To prevent a specific device connected to the TV from turning off automatically, turn off the HDMI-CEC function on a specific device connected to the TV.

The message "Connecting to Anynet+ device..." or "Disconnecting from Anynet+ device" appears on the screen.

You cannot use the remote control when the TV is configuring Anynet+ or switching to the TV viewing screen.

Use the remote control after the TV has completed the Anynet+ configuration or has switched to the TV viewing screen.

The Anynet+ device won't play.

You cannot use the play function when Reset is in progress.

The connected device is not displayed.

Check whether the device supports Anynet+.

Anynet+ devices must be connected to the TV using an HDMI cable. Make sure the device is connected to your TV with an HDMI cable. Some HDMI cables may not support Anynet+.

Check whether the HDMI cable is properly connected.

Go to Anynet+ (HDMI-CEC) and see if Anynet+ (HDMI-CEC) has been set to On.

- Settings General External Device Manager Anynet+ (HDMI-CEC)

Scan for Anynet+ devices again.

If the connection is terminated because there has been a power failure or the HDMI cable has been disconnected, please scan for the device again.

Remote Control Issues

When the remote control isn't working, these steps may help resolve the problem.

The remote control does not work.

The connection between the remote control and the TV may be lost. Point the Samsung Smart Remote at the front of the TV, and then press and hold the  and  buttons simultaneously for 3 seconds or more.

 Pairing is not available in AU7/BEA series.

Also, if the remote control does not work properly or its response is very slow, the battery might be low or dead.

- Charge the remote control by using the solar cell or the USB port (C-type) on the bottom.

You can check remaining battery of Samsung Smart Remote with solar cell in

-  >  Settings > General > Power and Energy Saving > Available Remote Battery.

 If the remote control has batteries, replace them with new ones.

External devices cannot be operated with the TV remote control.

Check the cable connection between the TV and external devices.

When the symptom persists, set it manually in Source Universal Remote Setup.

Recording Issues

When Timeshift or Schedule recording aren't working, these steps may help resolve the problem.

The Timeshift or recording function cannot be used.

- Check if there is a storage device connected to the TV.
- Recording will automatically stop if the signal becomes too weak.
- Check the free space on the storage device.
- The function will not work if there isn't enough storage space on the USB device.
- Before using the recording function, be sure to read all precautions. For more information, refer to "Before Using the Recording and Timeshift Functions".

Cannot record videos received from an external device or Samsung TV Plus.

The recording function is only available for digital broadcast channels received by the TV. You cannot record videos received from an external device or Samsung TV Plus.

The "Format Device" message appears when the Timeshift or recording function is used.

- To use the recording function, the storage device connected to the TV must have been already formatted.
- Formatting the storage device deletes all data from it, and the storage device is formatted in NTFS.

The recorded files on the TV are not played back on a PC.

- The recorded files on the TV can only be played back on the same TV. Those video files cannot be played back on a PC or other TV.

This function may not be supported depending on the model or geographical area

Apps

When apps aren't working, these steps may help resolve the problem

I launched an app, but it's in a different language. How can I change the language?

Languages supported by an app may be different from the TV Language set in the menu.

The ability to change the language depends on the app's provider.

The app does not work properly. Its image quality is poor.

Check the network connection. When the network speed is slow, the app may not work or its image quality may be poor.

The services of your application are not provided by the TV but by the application service provider.

Refer to the Help section on the application service provider's website.

The Smart Hub home screen keeps appearing whenever you turn on the TV.

Turn off the Autorun Smart Hub function in Smart Features.

• Settings > General > Smart Features > Autorun Smart Hub

Media Files

When files don't play, this may help resolve the problem.

Some files are interrupted during playback.

This problem may occur with unsupported files or high-bitrate files. Most files can be played back, but some file may not play smoothly.

Some files can't be played.

Some files that use an unsupported codec may not be played back.

Make sure that the codec is supported by the TV. For more information, refer to "Read Before Playing Photo, Video, or Music Files."

Voice Assistant Issues

This function may not be supported depending on the model or geographical area.

 The Voice Wake-up function may not be supported depending on the model, Voice Assistant or geographical area.

The voice commands do not work well.

Voice commands may differ depending on the Voice Assistant. Refer to the command examples for each Voice Assistant.

- Bixby: Explore Now
- Amazon Alexa: Settings General Voice Amazon Alexa Settings
- Google Assistant: Settings General Voice Google Assistant Settings

Bixby or Alexa answers automatically

The TV may recognise an ambient noise or everyday conversation as a call to Voice Assistant.

Turn off the Voice Wake-up function or set the Wake-up Sensitivity to Low.

- Explore Now Settings Voice Wake-up

I spoke "Hi, Bixby" but Bixby does not answer.

I spoke "Alexa" but Amazon Alexa does not answer.

When the TV is far from you or the ambient noise is so loud, the TV may be unable to recognise your voice.

- When the distance to the TV is within 3 to 4 m, optimal performance is provided. Please look at your TV screen and speak.

Turn on the Voice Wake-up function.

- Explore Now Settings Voice Wake-up

Voice recognition does not work with the Samsung Smart Remote unlike other features. There is no response even if the voice entry button is pressed.

The connection between the remote control and the TV may be lost. Try pairing the remote control with the TV.

Point the Samsung Smart Remote at the front of the TV, and then press and hold the  and  buttons simultaneously for 3 seconds or more.

Also, if the remote control does not work properly or its response is very slow, the battery might be low or dead.

- Charge the remote control by using the solar cell or the USB port (C-type) on the bottom.

Settings

- You can check remaining battery of Samsung Smart Remote with solar cell in
> General > Power and Energy Saving > Available Remote Battery.

- If the remote control has batteries, replace them with new ones.

During voice recognition, the heavy load message appears and the function does not work.

Unplug and then plug the TV power cable and then try again after 1 minute and 30 seconds. It may take a while if the voice recognition server is being inspected.

I want to see weather information of the desired area.

Say with the area name included.

Other issues

Use these procedures to resolve other issues that may occur in relation to the product

The TV is hot.

- Watching TV for an extended period of time causes the panel to generate heat.
- The heat from the panel is dissipated through internal vents running along the top of the TV.
- The bottom, however, may feel hot to the touch after extended use.
- Children watching TV need constant adult supervision to prevent them from touching the TV.
- This heat, however, is not a defect and does not affect the TV's functionality.

The TV smells like plastic.

This smell is normal and will dissipate over time.

The settings are lost after 5 minutes or every time the TV is turned off.

If Usage Mode is set to Retail Mode, the TV's audio and video settings are automatically reset every 5 minutes.

Change Usage Mode to Home Mode.

- Settings General System Manager Usage Mode

The TV is tilted to the side.

Remove the base stand from the TV and reassemble it.

The stand is wobbly or crooked.

Refer to the Quick Setup Guide and make sure that the stand is assembled correctly.

PIP is not available.

PIP is available only when an external device is connected with an HDMI or Component cable.

Note that the function is unavailable when Smart Hub is active.

This function may not be supported depending on the model or geographical area.

A POP (TV's internal banner ad) appears on the screen.

Change Usage Mode to Home Mode.

- Settings General System Manager Usage Mode

The TV is making a popping noise.

- The expansion and contraction of the TV's outer casing may cause a popping noise.
- This does not indicate a product malfunction.
- The TV is safe to use.

The TV is making a humming noise.

- Your TV utilizes high-speed switching circuits and high levels of electrical current. Depending on the TV's brightness level, the TV may seem slightly noisier than a conventional TV.
- Your TV has undergone strict quality control procedures that meet our demanding performance and reliability requirements.
- Some noise coming from the TV is considered normal and is not an acceptable cause for an exchange or refund.

The software update over the Internet has failed.

Check the network connection status.

- Settings General Network Network Status

If the TV is not connected to a network, connect it to a network.

The upgrade stops if you already have the latest software version.

The TV narrates the screen events in voice-over.

To turn off Voice Guide, move the focus from Accessibility Shortcuts to Voice Guide and then press the Select button. You can turn on or off Voice Guide. To run Accessibility Shortcuts, see the following:

- Press and hold the +/- (Volume) button on your Samsung Smart Remote or Remote Control.
- Press the AD/SUBT. button on the Standard Remote Control or press and hold the MUTE button.

Diagnosing TV operational issues

You can diagnose issues with your TV and Smart Hub and run reset functions.

- Settings Support Device Care Self Diagnosis

You can use the Picture Test to help diagnose video issues and the Sound Test to diagnose sound issues. You can also view signal strength information for over-the-air digital signals, test the Smart Hub Internet connection, and run the Smart Hub and TV factory reset functions.

- Video Test
- Picture Test
- Sound Test
- HDMI Troubleshooting
- Signal Information
- Smart Hub Connection Test
- Reset Smart Hub

Cannot select Signal Information in Self Diagnosis.

Verify that the current channel is a digital channel.

Signal Information is only available for digital channels.

- Settings Support Device Care Self Diagnosis Signal Information

Reset Smart Hub

Resets all Smart Hub settings to their factory defaults and deletes all information related to Samsung accounts, linked service accounts, Smart Hub service agreements, and Smart Hub applications.

- Settings Support Device Care Self Diagnosis Reset Smart Hub

Reset picture

Resets current picture settings to the default settings.

- Settings Picture Expert Settings Reset Picture

Reset sound

Resets current sound settings to the default settings.

- Settings Sound Expert Settings Reset Sound

Getting Support

Get help directly from Samsung if you have a problem with your TV.

Getting support through Remote Management

Settings Support Remote Management

After consenting to our service agreement, you can use Remote Management to access Remote Support and have a Samsung service technician diagnose your TV, correct problems and update your TV's software remotely via the web. You can also turn Remote Management on and off.

 You can also start this function by pressing and holding the  button for 5 or more seconds.

 This function requires an Internet connection.

Finding the contact information for service

Settings Support About This TV

You can view the address of the Samsung website, the call center phone number, your TV's model number, your TV's software version, Open Source License and other information you may need to get service support from a Samsung call agent or the Samsung website.

You can also view information by scanning the QR code of your TV.

You can also start this function by pressing and holding the button for 5 or more seconds. For the standard remote control, press and hold the (Play) button for 5 or more seconds. Continue holding the button until the customer information pop-up window appears.

Requesting service

Settings Support Device Care Request Support

You can request service when you encounter a problem with the TV. Select the item matching the problem that you encountered, enter the required item, move the focus to Next, and then press the Select button. Select Request Now Send or Schedule Appointment Request Send. Your service request will be registered. The Samsung

Contact Center will contact you to set up or confirm your service appointment.

You must agree to the terms and conditions for the service request.

This function may not be supported depending on the geographical area.

This function requires an Internet connection.
