

## **QUICK START GUIDE Voicetracer Speech Recognition Software**

### **EN**

Dragon NaturallySpeaking Recorder Edition transcribes spoken text that you have previously recorded into a portable recorder.

## **Installing Dragon NaturallySpeaking**

1. Exit all open programs. If you're running a virus checker, turn it off.
2. To download the software installation file, go to and follow the on-screen prompts.
3. To install the software, open the dragon\_installer.exe file and follow the on-screen prompts. When asked for the Serial number, enter the Serial number of the software printed on the first page of this booklet.
4. Click Finish to complete the installation.

## **Creating a Dragon user profile**

- Start the software by double-clicking the Dragon icon on your desktop.
- The first time you start Dragon, the program automatically starts a wizard that helps you create and train your user profile.
- When profile creation is complete, the DragonBar will appear at the top of your screen.

## **Transcribing recorded text**

1. Connect your Philips VoiceTracer to the computer.
2. In the Tools menu on the DragonBar, click Transcribe Recording.
3. Follow the on-screen prompts.

## **Personalizing your profile's vocabulary**

Let Dragon learn which words and phrases you use. Personalizing your profile will prevent many errors. For more information, go to the Help menu and select Improve my Accuracy.

### **Stop typing, start speaking**

Turn your recordings into text quickly, easily and accurately with the Philips VoiceTracer Speech Recognition Software. Save hours of tedious typing by automatically turning your audio recordings into written text. Simply record using your VoiceTracer and let the software do the typing for you!

### **Turn your voice into text**

- Speech recognition software eliminates the need to type up documents

- Automatically transcribe your recordings, up to three times faster than typing
- Software works with all current Philips VoiceTracer audio recorders

### Accurate results

- Exceptional transcription accuracy rate of up to 99 %
- Software continues to learn to improve speech recognition accuracy

### Highlights

#### Speech recognition software

Put an end to tedious typing and create text documents directly from recorded audio files. The speech recognition software automatically converts your recordings into a text file.

#### Exceptional accuracy

The speech recognition software provides an astounding accuracy rate of up to 99 %. It also never misspells a word, so typos are a thing of the past.

#### Automatic transcription

Using the speech recognition software is at least three times quicker than typing up the document yourself. Simply record your documents and notes, connect the recorder to the computer, click the 'Transcribe' button and the software does the typing for you.

### A software which learns

The smart algorithm learns from corrections you make to the transcribed text. This means the more you use the software, the more accurate your results become. The software also memorizes patterns, and commonly grouped words when you speak, to predict which words are most likely to occur. This acts as an extra boost to your speech recognition accuracy.

### Works with Philips VoiceTracer

Transcribe any recordings you create with your Philips audio recorder automatically into text. The software is compatible with all current Philips VoiceTracer models.
